

## Fakulteit Natuur- en Landbouwetenskappe

Bosbou- en Landbou Biotegnologie Instituut

Die Bosbou en Landbou Biotegnologie Instituut (FABI) is 'n na-graadse navorsingsinstituut wat tot stand gebring is op grond van die wete dat die toekoms van bosbou en landbou in Suid-Afrika grootliks afhanklik sal wees van die insluiting van nuwe en ontwikkelende tegnologieë in hierdie industrieë.

FABI-wetenskaplikes pak doel-georiënteerde navorsing aan in samewerking met belangrike spelers in die bosbou en landbousektore in Suid-Afrika en verbeter sodoende beide kundigheid en nywerheidsontwikkeling in die land. Dit aktiveer terselfdertyd samewerking en skakeling met die meeste van die statutêre instellings wat navorsing in die plantwetenskappe doen. FABI bied verder waarde deur opleidingsubsidies, studentedeelname aan navorsingsprogramme, en die geweldige menslike en tegnologiese hulpbronne wat met UP geassosieer word.

## Faculty of Natural and Agricultural Sciences

Forestry and Agricultural Biotechnology Institute

The Forestry and Agricultural Biotechnology Institute (FABI) is a postgraduate research institute which is based on a recognition that the future of forestry and agriculture in South Africa strongly depends on the incorporation of new and emerging technologies into these industries.

FABI scientists undertake goal-directed research, in partnership with major players in the forestry and agricultural sectors in South Africa, and in so doing promote both human capital and industrial development in the country. It also enables collaboration and linkage with the majority of statutory bodies undertaking research in the plant sciences. Additional value comes from training grants, participation of students in research programmes, and the enormous human and technological resources associated with UP.

## Lefapha la Disaense tša Tlhago le Temo

Institšhute ya Dikgwa le Bayothenolotši ya Temo (FABI)

Institšhute ya Dikgwa le Bayothenolotši ya Temo (FABI) ke institšhute ya dithuto tša ka godimo ga dikriri ya mathomo ye e theilwego godimo ga tsebo ya gore bokamoso bja dikgwa le temo mo Afrika Borwa bo letše kudu go nyalanyweng ga ditheknolotši tše mpha le tše di sa tšwelelago mo diintastering tše.

Borasaense ba FABI dira dinyakišišo tše di nepišago dilo tše itšego, ka tšhomišano le bakgathatema ba bagolo mo Makaleng a dikgwa le temo mo Affika Borwa, gomme ka go dira bjalo FABI e hlohleletša tlhabollo ya mabokgoni mo bathong le intastering mo nageng. Gape e kgontšha tšhomišano le makala a mangwe a a ikemetšego a a dirago dinyakišišo disaenseng tša dimela. FABI e holwa kudu ke dikrante tša tlhahlo, go kgatha tema ga baithuti mananeonyakišišong, le methopong ya bašomi le ya theknolotši ye e sepelelanago le UP.
