This book is designed to be a textbook for the use in the Seminaries, Bible Colleges and Universities that have sprouted with vigour in Africa. It is ideologically-driven: to build a group of African church historians who will tell the story of African Christianity, not Christianity in Africa, as an African story, by intentionally privileging the patterns of African agency without neglecting the noble roles played by missionaries. The effort has been to identify the major themes or story lines in African encounters and in the appropriation of the gospel. The project has enabled these historians to work together, in an ecumenical spirit, from across many boundaries: faith, region, gender, and ancestral race. They have bequeathed to future generations to tell more of the story of where the rain of the gospel met Africans before the deluge that appears on the horizon.
