BASTAD experience

The image is a horizontal collage composed of four distinct photographs. From left to right: 1) A traditional building with intricate carvings and a tiled roof. 2) A modern industrial or institutional building with large glass windows and a dark facade. 3) A landscape scene featuring a road, trees, and a small structure in the distance. 4) A person wearing a traditional Indian outfit, specifically a sari, standing outdoors.

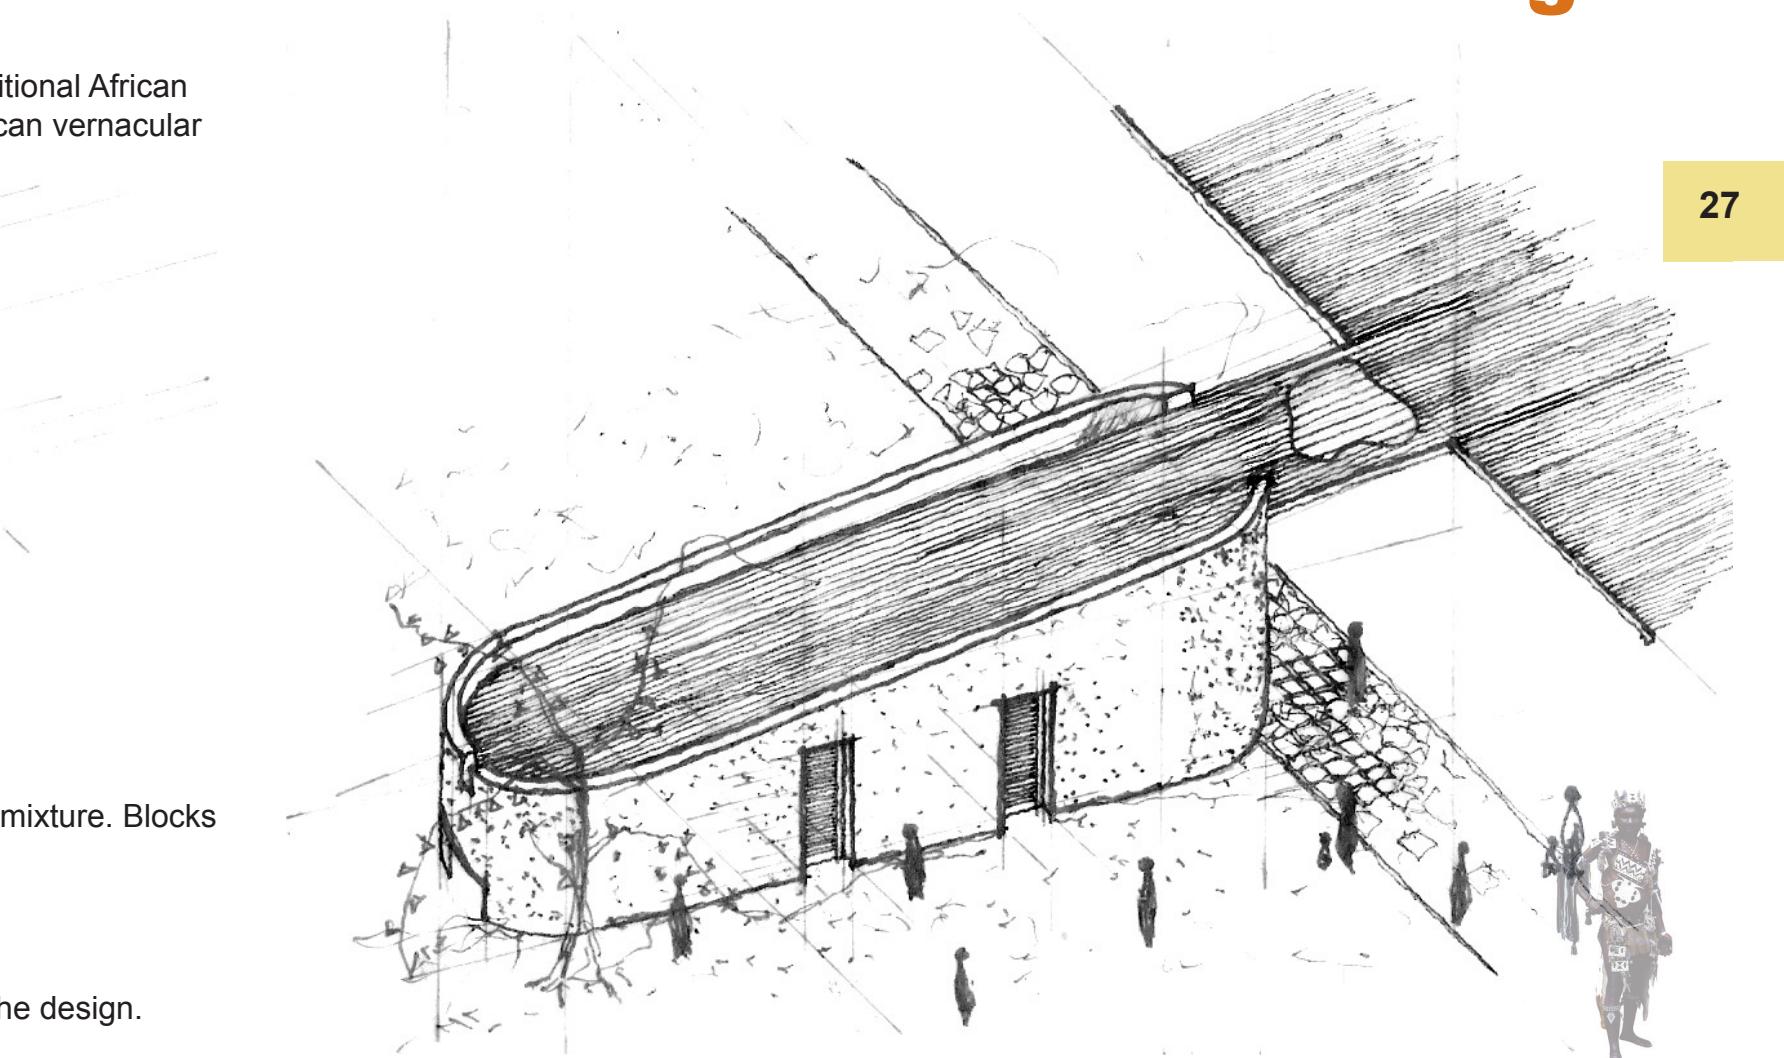

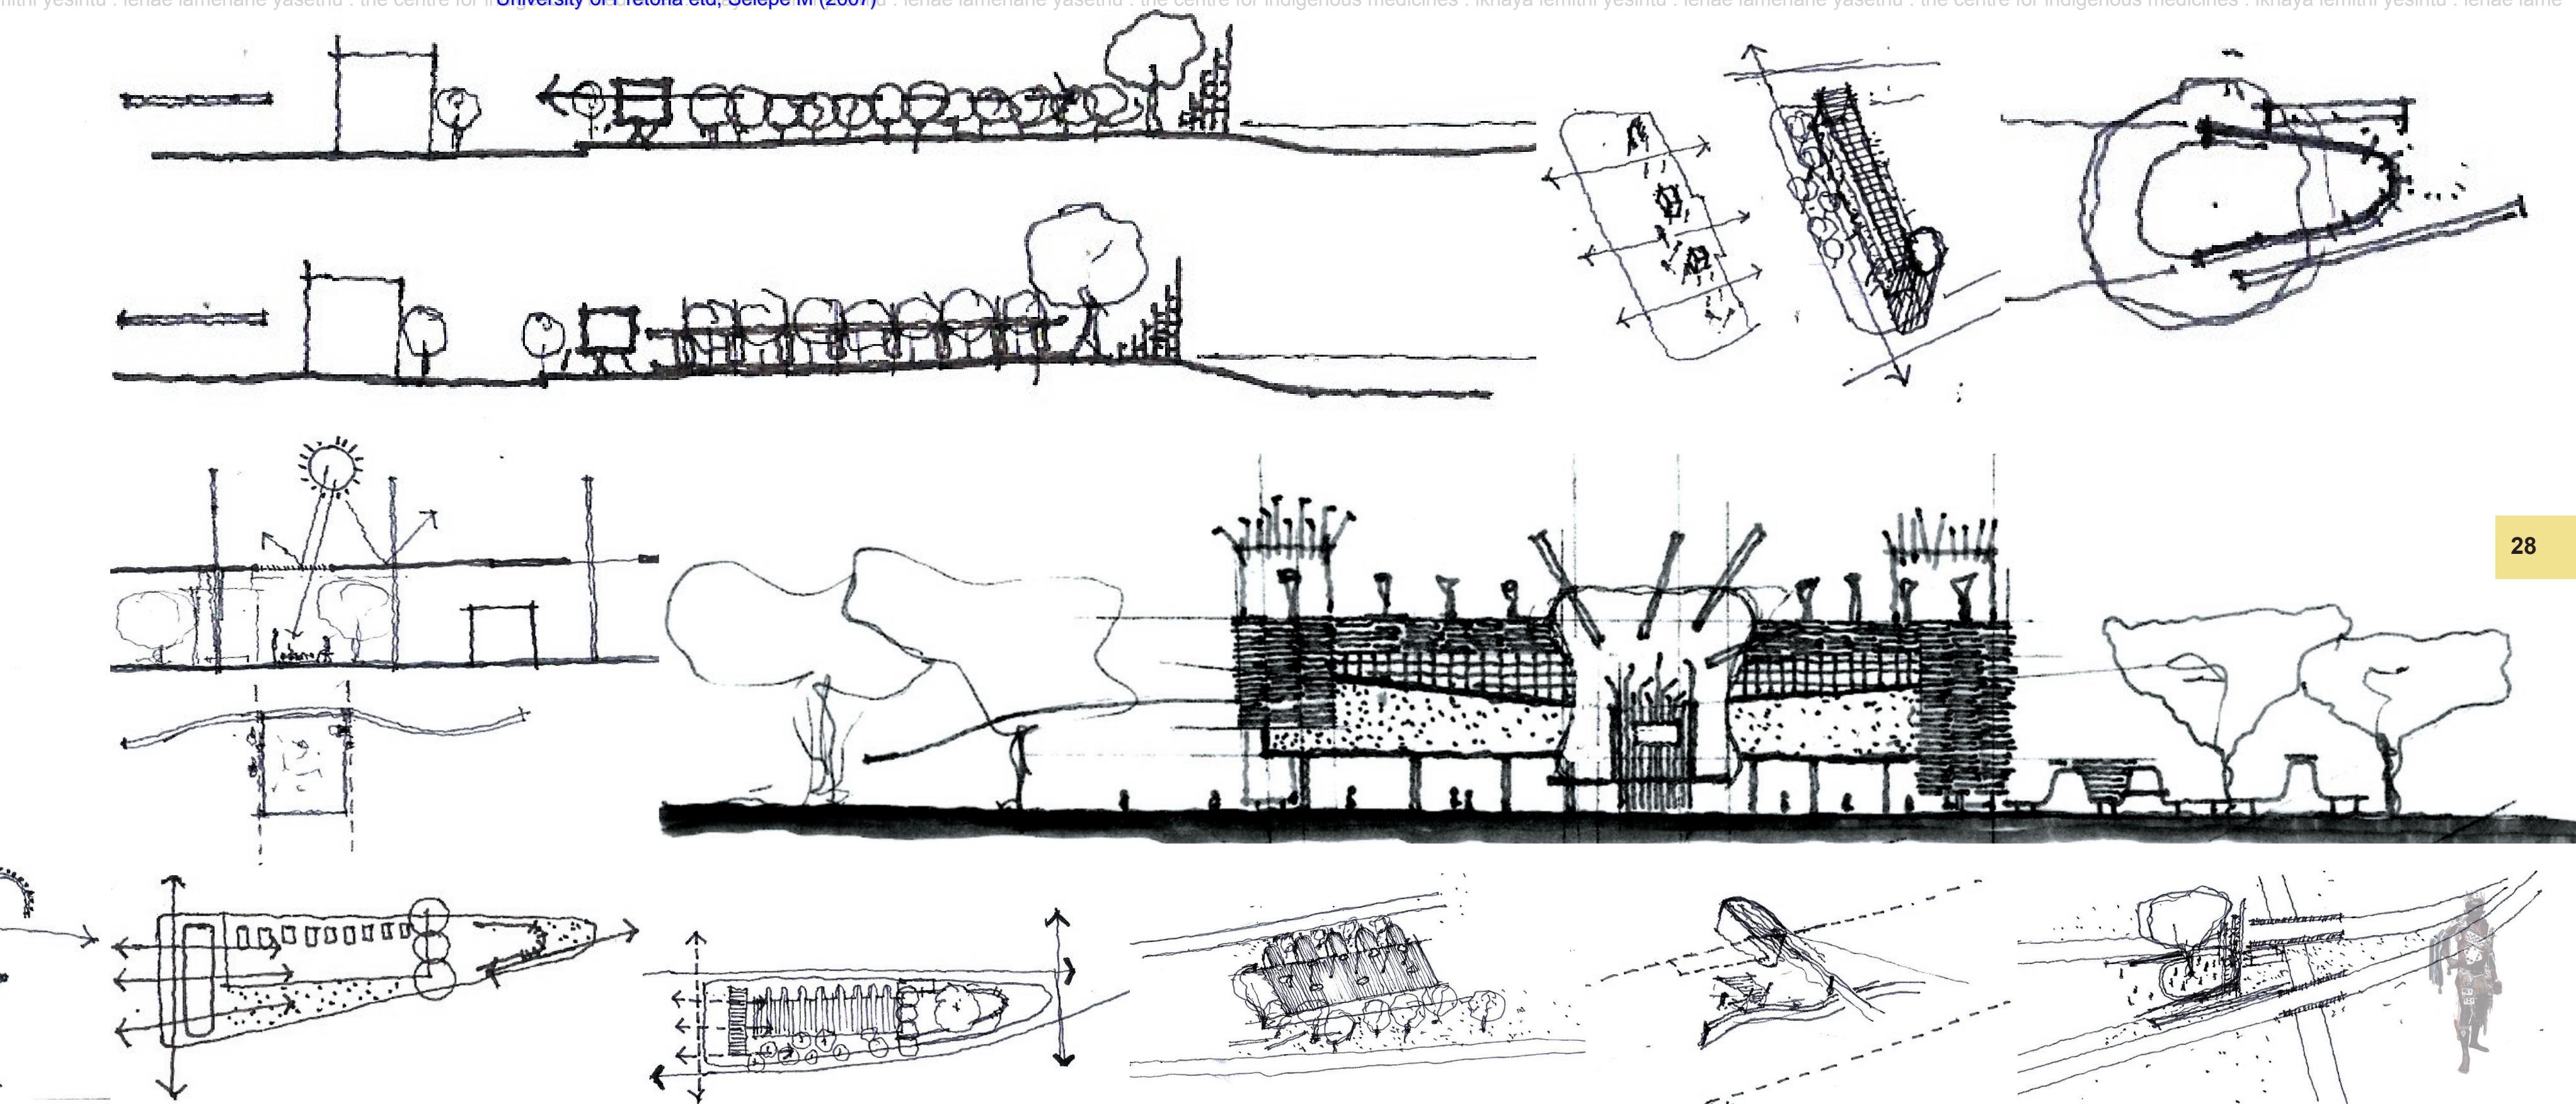

fig.39

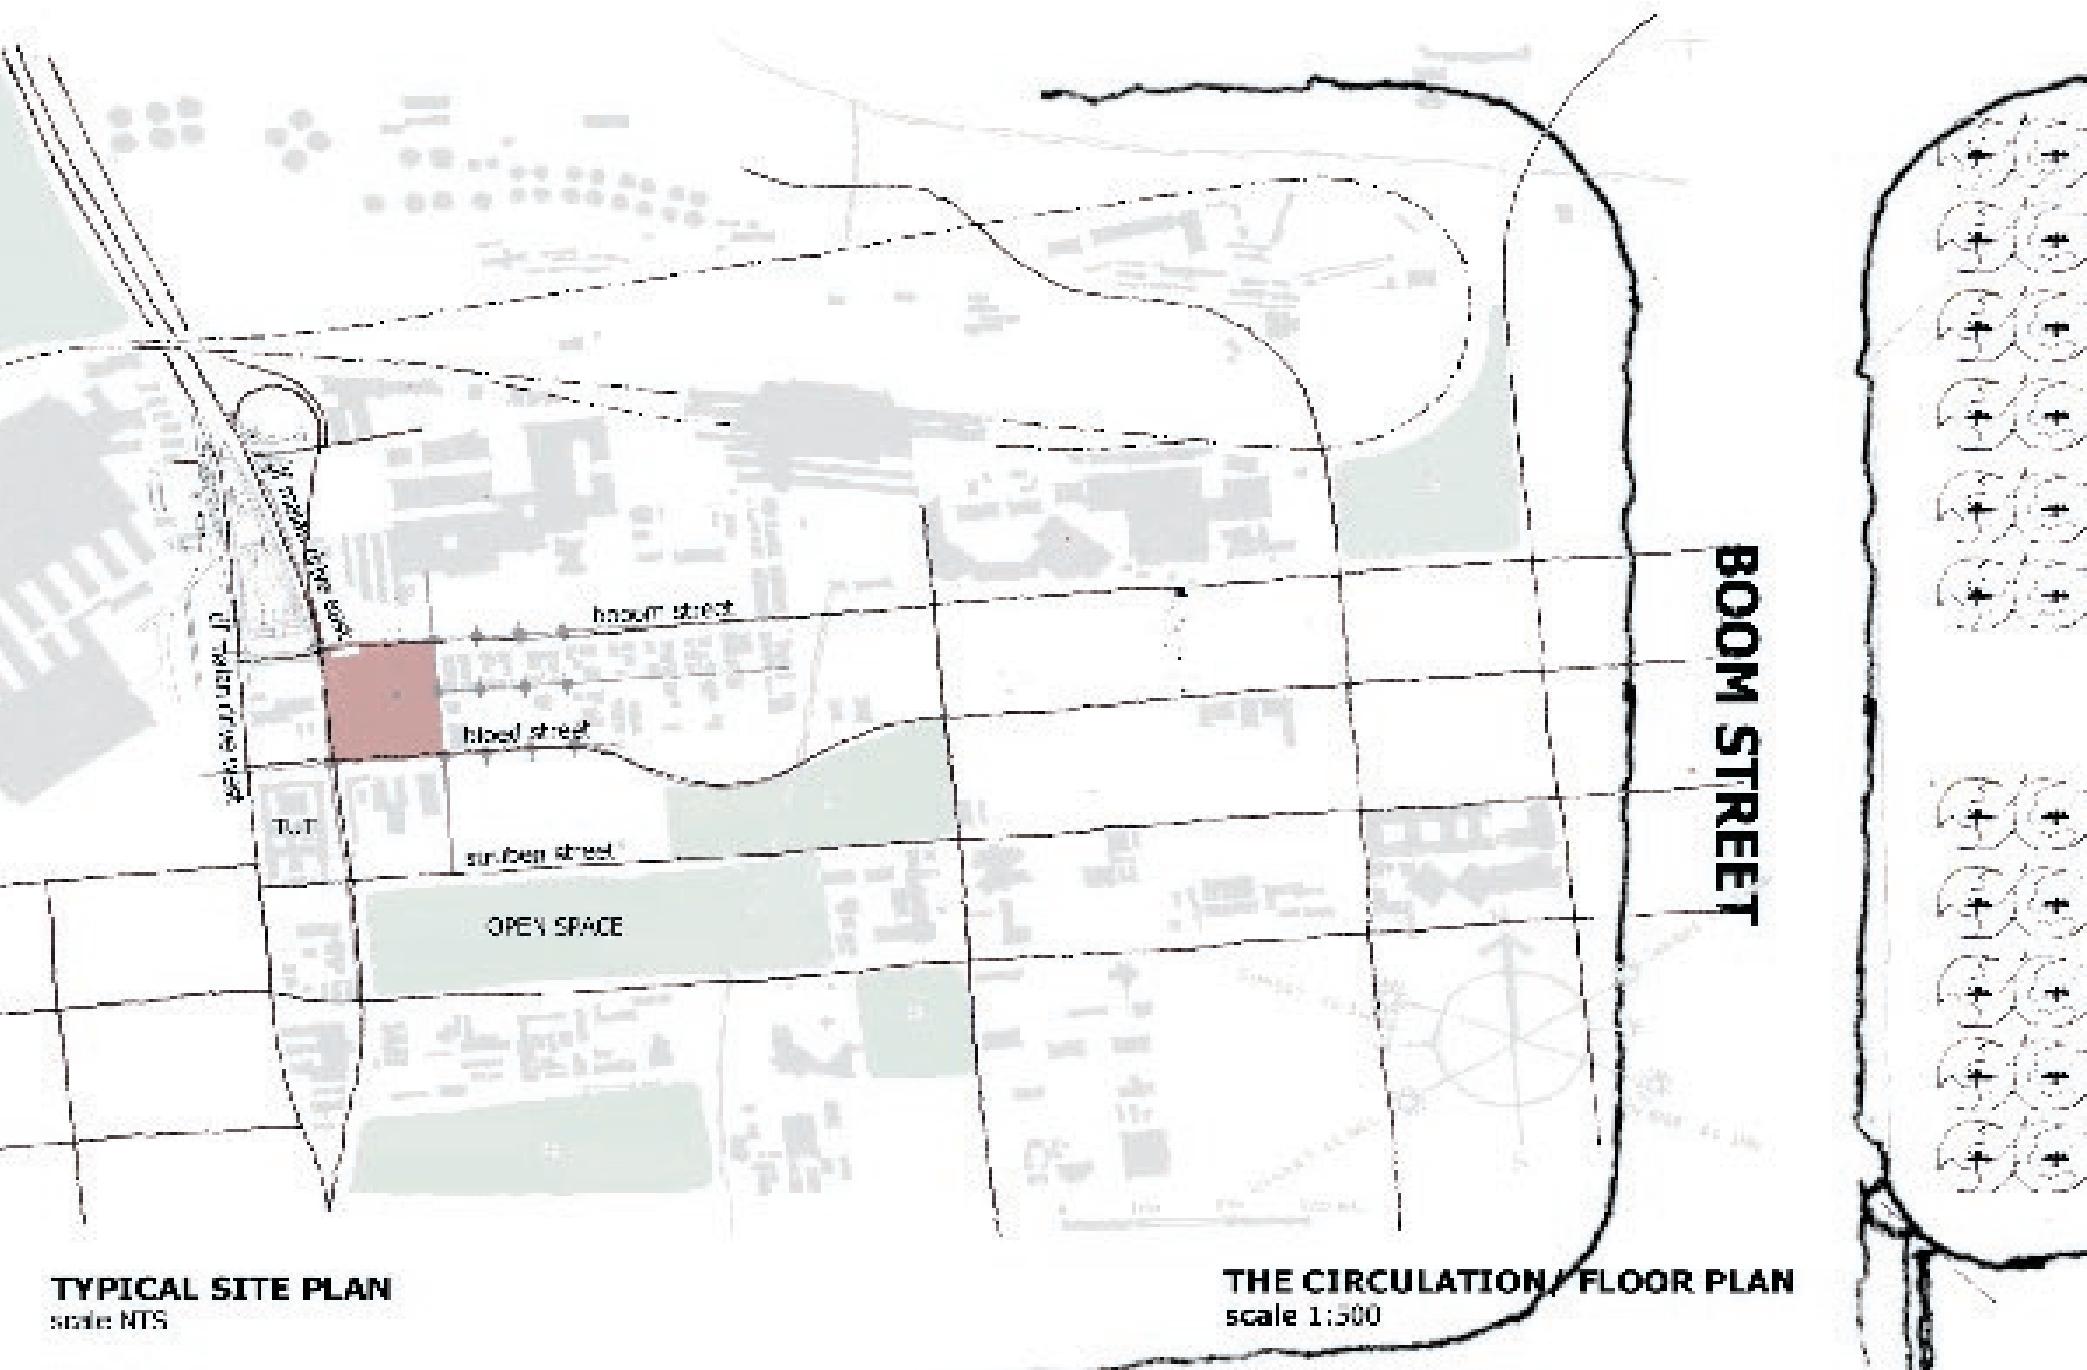

The image contains two hand-drawn diagrams. The top diagram depicts a vertical column of four rectangular boxes representing seed blocks. A central vertical pipe passes through them. Arrows point from the sides of each box towards the central pipe, suggesting a process of extraction or pressing. The bottom diagram shows a similar vertical arrangement of boxes, but with more complex piping. A curved arrow originates from the bottom left and points upwards towards the central pipe, indicating the direction of flow or extraction.
