Figure 6.31. **102**
Building Analysis (Author, 2011).

Figure 6.32. **104**
The access door is poorly defined, as it blends in with the screens (Author, 2011).

Figure 6.33. **104**
The secondary entrances to the art gallery (Author, 2011).

Figure 6.34. **104**
The African Steps running along the Western facade of the art gallery. The screens are evident on the facade (Author, 2011).

Figure 6.35. **104**
External view of the screens (Author, 2011).

Figure 6.36. **104**
Close-up of the screens (Author, 2011).

Figure 6.37. **104**
Internal view of the screens. It is clear that there is no external visual connection (Author, 2011).

Figure 6.38.	104	separate elements. This does not encourage interactivity or participation (Author, 2011).	Figure 7.21.	115	The parti-diagram for the facility emerged from a desire to provide a sheltered public space – the public realm – that allowed for interaction with other programmes. The parti-diagram indicates the relationship of the public square with the building, which is form driven, and its users (Author, 2011).
The art gallery in the foreground, looking up the steps and to the main foyer in the distance (Author, 2011).			Figure 7.22.	115	The spatial planning of the public realm was informed from the theory, concept, programme and the site. The idea of thresholds and linking of spaces is expressed in this vignette by the public square and the exhibition space (Author, 2011).
Figure 6.39.	104	Movement past the building and the site as the sidewalks are separate elements. This does not encourage interactivity or participation (Author, 2011).	Figure 7.23.	116	The approach to the design development was first explored (Author, 2011).
The main foyer, which alludes to sitting underneath a tree. (Author, 2011).			Figure 7.24.	117	The sketch drawings from the design development are shown (Author, 2011).
Figure 6.40.	104	Figure 7.9.	111	Figure 7.25.	118
The view/access to the gallery from the main foyer (Author, 2011).		Movement is manipulated to go through the site or building (Author, 2011).	Figure 7.10.	111	The sketch drawings from the design development are shown (Author, 2011).
Figure 6.41.	104	Figure 7.10.	111	Figure 7.26.	119
The main entrance to the Constitutional Court is well defined (Author, 2011).		Movement is manipulated to go through the site or building (Author, 2011).	Figure 7.11.	111	The ground floor plan was tested against the parti-diagram and the design informants. Although it approached the argument successfully, subsequent design drawings could be refined further (Author, 2011).
Figure 6.42.	105	Figure 7.11.	111	Figure 7.27.	120
Building Analysis (Author, 2011).		The diagonal movement path allows for views into the building and exposure to its creative processes (Author, 2011).	Figure 7.12.	112	3D computer modelling of the building informed the subsequent design approach to the building (Author, 2011).
		Figure 7.12.	112	Figure 7.28.	121
		Sketch of the relationship between the public realm and the site (Author, 2011).	Figure 7.13.	112	Further development of the design process (Author, 2011).
		Figure 7.13.	112	Figure 7.29.	122
		Sketch of the activities around the site's edge (Author, 2011).	Figure 7.14.	112	Concept model (Author, 2011).
