

DEVELOPMENT AND MONITORING OF THE ATAMELANG BARUI
POLAR COOPERATIVE BEEF RANCH

BY

TSATSI SIMON TSHENKENG

Submitted in partial fulfilment for the degree

M.Inst. Agrar. Pasture Science

in the

Department of Plant Production
& Soil Science

Faculty of Biological & Agricultural Sciences.

University of Pretoria

Supervisor: Prof N F G Rethman

1999

ACKNOWLEDGEMENTS

I thank the staff members of the Department of Agriculture - North West Province for their co-operation and assistance in interviewing the respondents and others who helped me with maps.

I appreciate the advice from the staff members of the Faculty of Biological and Agricultural Sciences, - University of Pretoria. My sincerest gratitude goes to my Promoter, Professor N F G Rethman for his guidance in planning and reporting this study.

Finally a word of thanks goes to Mrs Phoebe Kitchin for her patience and excellent work in typing this manuscript.

T S TSHEKENG

CONTENTS

CHAPTER		PAGE
1	INTRODUCTION	1
1.1	Problems and motivation for study	1
1.2	Problem and objectives	2
1.3	Research hypothesis based on objectives	3
2	RANGE CONDITION AND LIVESTOCK PRODUCTION IN SOUTHERN AFRICA	4
2.1	Introduction	4
2.2	Range condition in Southern Africa	4
2.2.1	Reasons for deterioration of rangelands in Southern Africa	11
2.3	Livestock production in Southern Africa	14
3.	RESEARCH METHODOLOGY	26
3.1	Social aspects	26
3.1.1	Choice of the study area	26
3.1.2	Orientation and planning of the study	27
3.1.3	Information sources	27
3.1.4	Questionnaire objectives and design	28
3.1.5	Sampling procedure	28
3.1.6	Interviewing procedure	29
3.1.7	Reliability of the results	29
3.1.8	Data analysis	29
3.2	Technical aspects	30
3.2.1	Determination of bush density on the farm at ABPCBR	
3.2.2	Determination of the grass species composition and grazing capacities on the farm at the ABPCBR	31
4.	CLIMATE, SOILS AND VEGETATION OF GANYESA DISTRICT	39
4.1	Climate	39
4.2	Soils of Ganyesa area	40
4.2.1	Soil forms and soil series	41
4.2.2	Agricultural value of soils occurring in the Ae3 and Ah6 land types	42
4.3	The vegetation of Ganyesa area	43
4.3.1	Savanna formation	44
4.3.1.1	Kalahari thornveld and bushveld	45

4.4	The present vegetaticn of Ganyesa communal grazing area	46
4.5	The vegetation and veld condition of Ganyesa leased farms	47
5.	SPECIFIC SITUATION IN GANYESA DISTRICT	48
5.1	Historical background	
5.2	Agro-ecological situation	48
5.3	Social aspects of the members of the community of Ganyesa district	49
5.3.1	Introduction	49
5.3.2	Personal factors	49
5.3.2.1	Sex and marital status	49
5.3.2.2	Occupational status	50
5.3.2.3	Age	51
5.3.2.4	Level of education	52
5.3.3	Leaders of the community of Ganyesa village who own livestock	53
5.3.4	Agricultural situation	
5.3.4.1	Problems with the management of livestock	53
5.3.4.1.1	Death of calves at birth	54
5.3.4.1.2	Marketing infrastructure	54
5.3.4.1.3	Dipping of cattle	55
5.3.4.1.4	Feeding of cattle	56
5.3.4.1.5	Reasons for keeping cattle	56
5.3.4.1.6	Total number of cattle in Ganyesa village	57
5.3.4.1.7	Discussion	57
5.3.4.2	Problems with the management of communal veld	58
5.3.4.2.1	Farmers perception of the veld condition	58
5.3.4.2.2	The recommended stocking rate in Ganyesa area	59
5.3.4.2.3	Grazing systems	59
5.3.4.2.4	Problems of veld fire	59
5.3.4.2.5	The problem of bush encroachment	60
5.3.4.2.6	Grass species which indicates that the veld is in a poor, fair or good condition	62
5.3.4.2.7	Evidence of soil erosion in the area	63
5.3.4.2.8	Discussion	64
5.3.5	Communication situation	69
5.3.5.1	Introduction	69
5.3.5.2	Sources of information on livestock farming	69
5.3.5.3	The Extension Officer in Ganyesa village	71
5.3.5.4	Frequency of consultation with regard to the management of livestock	72
5.3.5.5	The three best farmers in Ganyesa area	72
5.3.5.6	Newsletters or magazines on livestock farming	73
5.3.5.7	Farmers information days	74
5.3.5.8	Demonstrations on livestock management	75
5.3.5.8.1	Result demonstration	75
5.3.5.8.2	Method demonstration	75

5.3.5.9	Organisation in Ganyesa area	76
5.3.5.9.1	Organisation to which community leaders belonged	76
5.3.5.9.2	The strongest and the most influential organisation in Ganyesa area	77
5.3.5.10	Discussion	77
6.	CO-OPERATION	80
6.1	Co-operative societies	80
6.2	Procedure prior to obtaining registration as a Co-operative	82
6.3	Model regulations	84
6.4	Problems of co-operative development in the area previously known as Bophuthatswana	84
6.4.1	Lack of co-operative education	85
6.4.2	Ineffective supervision and control	85
6.4.3	Lack of guidance in co-operative investments	85
6.4.4	Political indulgence and misuse of position	87
6.4.5	Bureaucracy in co-operative management	87
7.	DISCRIPTION OF THE ATAMELANG BARUI POLAR CO-OPERATIVE BEEF RANCH	89
7.1	Historical background and geographical situation	89
7.2	Climate	89
7.3	Soils	90
7.4	Vegetation	91
7.5	Infrastructure	92
7.5.1	Fences	92
7.5.2	Watering points	92
7.5.3	Roads and firebelts	92
7.5.4	Livestock handling facilities	93
8.	THE SYSTEM AS CURRENTLY PRACTISED IN THE STUDY AREA	94
8.1	Introduction	
8.2	Social aspects of the farmers	95
8.2.1	Introduction	95
8.2.2	Personal factors	95
8.2.2.1	Sex and marital status	95
8.2.2.2	Occupational status of the farmers	96
8.2.2.3	Age	97
8.2.2.4	Level of education	98
8.2.3	Discussion of the personal factors	100
8.2.4	Farming experience of the members of Co-operative	101
8.2.5	Sources of information on the management of the veld	101
8.3	Livestock production	103
8.3.1	Livestock management	103
8.3.1.1	Farmers visits to the Co-operative	104
8.3.1.2	Feeding of mineral supplements	105

8.3.1.3	Treatment of cattle against ticks	106
8.3.1.4	Stock theft at the Co-operative	106
8.3.1.5	Herd composition	106
8.3.1.6	Cattle owned at the Co-operative as well as on leased farms and in the communal grazing area	107
8.3.1.7	The type of breed kept	107
8.3.1.8	Reproduction	108
8.3.1.9	Marketing of livestock	109
8.4	Range management on the Co-operative	110
8.4.1	Problems experienced by members of the Co-operative regarding the veld	110
8.4.2	Causes of problems in the veld	111
8.4.3	Farmers solutions to the veld problems	112
8.4.4	The value of veld burning	114
8.4.5	Situation with respect to bush density	115
8.4.6	Encroaching tree species	117
8.4.7	Grass species occurring on the farm according to the members of the Co-operative	117
9.	RECOMMENDATIONS	120
9.1	The conditions of using the farm as a Co-operative	120
9.2	Extension service	120
9.3	The role of the Department of Agriculture on the Co-operative	121
9.4	Infrastructure	122
9.4.1	Fences	122
9.4.2	Water points	122
9.4.3	Dipping tanks	122
9.5	Breed of bulls kept	123
9.6	Marketing of livestock	123
9.7	Management of livestock	123
9.7.1	Treatment of calves from birth to weaning age	123
9.7.2	Condition of cows at calving	124
9.7.3	Management of bulls	124
9.7.4	Culling and selection	125
9.7.5	Dipping of livestock	126
9.7.6	Feeding of mineral lick	127
9.7.6.1	Lick formulation	127
9.7.6.1.1	Mineral lick - Summer	127
9.7.6.1.2	Mineral and energy lick-Autumn	128
9.7.6.1.3	Mineral-energy-protein lick - Winter	128
9.7.7	Feeding of crop residues	129
9.8	Management of the veld	129
9.8.1	Stocking rate	129
9.8.2	Rotational grazing	130
9.8.3	Rotational resting	133
9.8.4	Burning to remove moribund grass material	133
9.8.4.1	Burning the grass material	133
9.8.4.2	Season of burning	134

9.8.4.3	Type and intensity of fire	134
9.8.4.4	Grazing management after burning	136
9.8.5	Bush control	136
9.8.6	Demarcation of sites for determining the grazing capacity and bush density	138
9.8.7	Establishment of planted pasture	138
9.8.7.1	Establishment of borseltjiegras in strips	139
9.8.7.2	Establishment of borseltjiegras on the old cultivated land	139
9.8.7.2.1	Seedbed preparation	139
9.8.7.2.2	Planting season, method of planting, seeding rate fertilization and weed control	140
9.8.7.2.3	Utilization	141
9.8.7.3	Establishment of bluebuffalograss on the old cultivated land	141
9.8.7.3.1	Seedbed preparation, planting season, planting method, seeding rate and fertilization	141
9.8.7.3.2	Utilization of pasture	141
9.8.7.3.3	Management of pasture	142
9.9	Training of farmers	142
9.9.1	Training on the management of veld and livestock	142
