Departmental Web Pages

The screenshot displays the University of Pretoria website in Microsoft Internet Explorer. The main page is for the Faculty of Economic and Management Sciences, specifically the 'Research' section. The page includes a navigation menu on the left with links to Home, About Us, Departments, Units & centres, Academic Programmes, Research, Community engagement, Alumni, News and Events, and Contact Us. Below the navigation menu, there is a section for 'Research output' with a red arrow pointing to it. The text in this section states: 'The Faculty of Economic and Management Sciences currently has nine staff member who obtained their NRF ratings. Several researchers in the Faculty also received national and international acknowledgement for the excellence of their research.' To the right of this text is a photograph of a group of people sitting around a table, possibly in a meeting or classroom setting. The main content area on the right shows a search result for an article titled 'Dialogue among pre- and post-genetic revolution civilisations'. The article details include the author's name, email address, and a list of keywords and subjects. The article is published in 'The Journal for Transdisciplinary Research in Southern Africa', volume 2, no. 2, pp. 369-378. The abstract states: 'The genetic revolution will have a profound impact on human society and therefore on the public policy environment. This article aims to describe the public policy paradigms and paradigm shifts that...'

Research

Being an internationally recognised South African teaching and research intensive university is central to the University of Pretoria's new strategic plan.

Since its humble beginnings in 1908, the University has gone a long way to achieving this goal and is currently considered to be one of the leading institutions of higher education in the country.

To further strengthen its position as a premier research institution and to ensure future success, the UP has developed a research agenda based on four principles:

- Research will make a positive contribution to local, national and international needs aligned with the National R&D strategy as well as International trends;
- Research will be based on the proven capacity that exists within the University and will be built on work of excellent researchers and research leaders;
- Research themes will not only be defined on short-term needs, but also be visionary in that they will identify areas of future potential that will require the University to build competencies in order to remain a premier research institution; and
- The University research agenda should also take cognisance of unique competencies that exist within the University.

The Department of Research Support plays an integral role in the practical implementation of the University's research agenda. The department has as its core function the provision of a range of support services aimed at promoting research development through the support of the individuals who carry it out.

Use Quotes

“This project has transformed my life as a Dean in three ways.

First, it made me aware of the **power of technology** in managing the multiplicity of written tasks—media articles, media interviews, newspaper columns, intellectual pieces—that simply drift into spaces where I can never find these original writings.

Second, it made me aware of the **efficiency of dissemination of ideas** in this information age if one simply took the time to create such a web space.

Third, it made me aware of the **power of collaboration** between academic authors and the academic information services (library)—something that I had not explored until now. I am deeply grateful to the persistence of my academic library colleagues in opening up this new world in the life of a busy Dean” - Prof. Jonathan Jansen, Dean of the Faculty of Education, University of Pretoria, Personal E-mail Communication, May 08, 2006.

OAI Base URL

“There is a single base URL for all requests. The base URL specifies the Internet host and port, and **optionally** a path, of an HTTP server acting as a repository. Repositories expose their base URL as the value of the baseURL element in the [Identify](#) response. Note that the composition of any path is determined by the configuration of the repository's HTTP server. “

More info: <http://www.openarchives.org/OAI/openarchivesprotocol.html>

Example Base URL's

CSIR: <http://researchspace.csir.co.za/dspace-oai/request>

SU: <http://ir.sun.ac.za/cib-oai/request>

DUT: <http://ir.dut.ac.za:8080/dspace-oai/request>

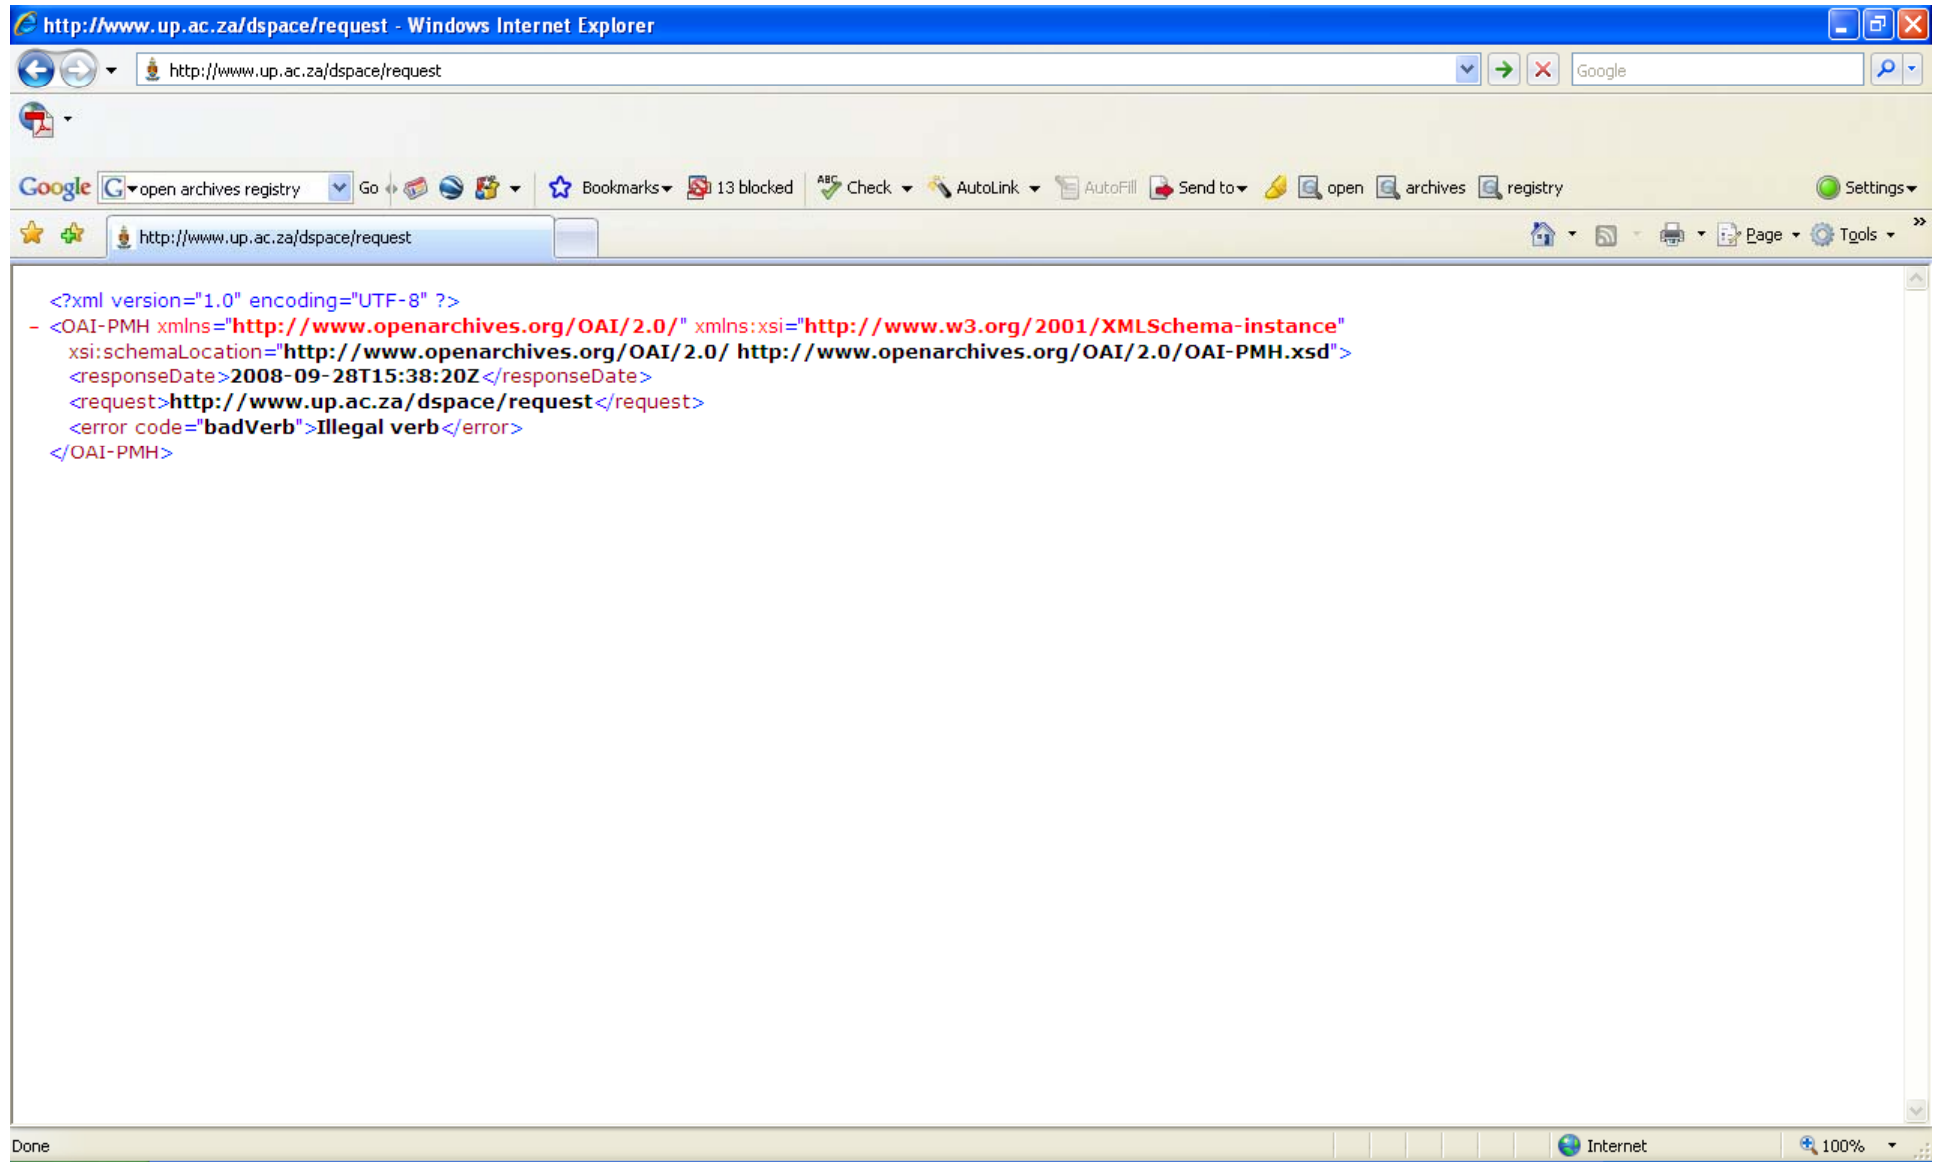

UJ: <http://ujdigispace.uj.ac.za:8080/dspace-oai/request>

How to find your OAI base URL:

<http://www.openarchives.org/OAI/2.0/guidelines-static-repository.htm>

<http://www.openarchives.org/OAI/openarchivesprotocol.html>

What are the harvesters looking for?

The screenshot shows a Windows Internet Explorer browser window with the address bar displaying `http://www.up.ac.za/dspace/request`. The browser's toolbar includes a search box with the text "Google" and various navigation and utility icons. The main content area displays the following XML response:

```
<?xml version="1.0" encoding="UTF-8" ?>  
- <OAI-PMH xmlns="http://www.openarchives.org/OAI/2.0/" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"  
  xsi:schemaLocation="http://www.openarchives.org/OAI/2.0/ http://www.openarchives.org/OAI/2.0/OAI-PMH.xsd">  
  <responseDate>2008-09-28T15:38:20Z</responseDate>  
  <request>http://www.up.ac.za/dspace/request</request>  
  <error code="badVerb">Illegal verb</error>  
</OAI-PMH>
```

The status bar at the bottom of the browser window shows "Done" on the left and "Internet" and "100%" on the right.

Test your OAI base URL

The screenshot shows a web browser window titled "OAI Repository Explorer - Windows Internet Explor" with the address bar displaying "http://re.cs.uct.ac.za/". The browser's toolbar includes a Google search bar, "Go", "Bookmarks", "0 blocked", "Check", "AutoLink", "AutoFill", and "Send to" buttons. The main content area has a green header with the "Open Archives Initiative - Repository Explorer" logo and the text "explorer version - 1.46c ; protocol version - 1.0/1.1/2.0 ; December 2006". Below the header, a message states: "This site presents an interface to interactively test archives for compliance with the OAI Protocol for Metadata Harvesting [[Click here for details](#)]". A note follows: "JavaScript is required" and "Note: To avoid HTTP errors, please wait for each page to finish loading before clicking on any link." The main form contains two input fields: "Enter the OAI baseURL :" followed by a text box, and "Select from the list :" followed by a dropdown menu currently showing "Archeologia e Calcolatori Journal -Index". Below these fields are two links: "[[View Archive Website](#)]" and "[[Test the specified/selected baseURL](#)]". At the bottom, there are two columns: "Verbs" with links for "Identify", "List Metadata Formats", and "List Sets"; and "Parameters" with input fields for "from (eg., YYYY-MM-DD)", "until (eg., YYYY-MM-DD)", and "metadataPrefix". The browser's status bar at the bottom shows "Done", "Internet", and "100%".

How-to Become a Data Contributor
Using OAISTER Data Outside this Interface

Steps to Becoming a Data Contributor

To become a data contributor-- in the Open Archives Initiative this is known as a Data Provider-- you should follow a few simple seteps.

- Familiarize yourself with [the OAI Protocol for Metadata Harvesting](#), available at the Open Archives Initiative site.
- Choose a tool to make your metadata available to harvesters such as OAISTER. The most comprehensive list of tools is the [Tools and Strategies for Using and Enhancing / Extending the OAI Protocol](#).
- Create your XML1.1 compatible, UTF-8 compliant metadata records. In order to be an OAI Data Provider, you must have your metadata available in [Simple Dublin Core metadata format](#). However, *we encourage you to also make your metadata records available in other formats.*
- Test your resulting repository of metadata records in the [OAI Repository Explorer](#).
- Register your repository with the [official Open Archives registry](#). As part of registration, the repository will need to pass a number of tests, not all of which are the same as those in the OAI Repository Explorer.
- Send Tom Habing an email (thabing@uiuc.edu) so he can add you to the [UIUC OAI registry](#). This is a comprehensive list of all OAI data providers.
- Send OAISTER an email (oaister@umich.edu) so we can harvest you immediately. If we spot any problems with your compliance (protocol or metadata), we will let you know.

Open Archives Initiative

<http://www.openarchives.org/Register/ValidateSite>

The screenshot shows a Windows Internet Explorer browser window with the title "Data Provider Validation and Registration - Windows Internet Explorer". The address bar contains the URL "http://www.openarchives.org/Register/ValidateSite". The browser's search bar is set to "Google". The page content includes the Open Archives logo, a heading "Data Provider Validation and Registration", and a form for entering a base URL. The form has a text input field, two radio buttons for "Validate only (may register later)" (selected) and "Register this site (or update existing registration)", and a "Validate baseURL" button. Below the form, there is a note about the base URL matching and a paragraph explaining the validation process. The page footer shows the date "Mon Jun 16 17:42:12 2008". The browser's status bar at the bottom indicates "Done" and "Internet" with a 100% zoom level.

Data Provider Validation and Registration

Please enter base URL of the repository to be validated and/or registered:

Validate only (may register later) Register this site (or update existing registration)

Note that the base URL you enter here must EXACTLY match the base URL returned in the Identify response. It must match in case (<http://Wibble.org/> does not match <http://wibble.org/>) and include any trailing slashes etc.

Submitting this form will make some initial tests of the validation of the base URL you have submitted and then send an email to the adminEmail address specified in the Identify response. The email will contain a URL to confirm the request to validate and/or register the repository. This procedure has been adopted so that only the administrators of a repository can run the validation and registration tests.

Mon Jun 16 17:42:12 2008

IR on Wikipedia

<http://en.wikipedia.org/wiki/UpSpace>

The screenshot shows a Windows Internet Explorer browser window with the address bar containing <http://en.wikipedia.org/wiki/UpSpace>. The page title is "UpSpace - Wikipedia, the free encyclopedia". The main content area displays the article for "UpSpace", which is an institutional research repository of the University of Pretoria. The article text includes: "UPSpace (Institutional research repository of the University of Pretoria) is the name of the open access digital institutional repository of the University of Pretoria, South Africa. A digital institutional repository in the context of a higher education institution can be defined as 'a set of services that a university offers to the members of its community for the management and dissemination of digital materials created by the institution and its community members. It is most essentially an organizational commitment to the stewardship of these digital materials, including long-term preservation where appropriate, as well as organization and access or distribution.'^[1] UPSpace contains a collection of the intellectual/ research output produced by past and current researchers of the University of Pretoria. The spectrum of material covered in UPSpace includes the following: Historical/ archival material - after it has been digitized; Research articles (scholarly publications); Popular research material; Unpublished research; Inaugural addresses; Conference proceedings; Technical reports; Open lectures; Data sets, and many more. The main objectives of an institutional repository are: 1) to enhance the visibility of the knowledge products created by an institution's members by providing easy open access, and 2) to preserve the intellectual output of the members of that community for years to come. The open source platform, DSpace, which was developed by an MIT-Hewlett Packard alliance, is used for UPSpace." Below the text is a section titled "Communities & Collections on UPSpace" with a list of categories: Centre for the Study of AIDS (CSA), Department of Library Services, Economic & Management Sciences, Education, Education Innovation, Engineering, Built Environment & Information Technology, Health Sciences, Humanities, Law, and Manuscripts Collections. The left sidebar contains navigation links such as Main Page, Contents, Featured content, Current events, Random article, interaction links like About Wikipedia, Community portal, Recent changes, Contact Wikipedia, Donate to Wikipedia, Help, a search box, and a toolbox with links like What links here, Related changes, Upload file, and Special pages. The top of the page features a banner with the text "Wikipedia is sustained by people like you. Please donate today." and a "Log in / create account" link. The browser's address bar and search bar are visible at the top, and the status bar at the bottom shows "Internet" and "100%" zoom.

South African Institutional Repositories

http://en.wikipedia.org/wiki/South_African_Institutional_Repositories

The screenshot shows a Windows Internet Explorer browser window with the title bar "South African Institutional Repositories - Wikipedia, the free encyclopedia - Windows Internet Explorer". The address bar contains the URL "http://en.wikipedia.org/wiki/South_African_Institutional_Repositories". The browser interface includes a search bar with "Google" and a "Go" button, a bookmarks bar, and a toolbar with various icons. The main content area displays the Wikipedia article for "South African Institutional Repositories". The article title is "South African Institutional Repositories" and it is identified as being from Wikipedia, the free encyclopedia. The article text discusses the emergence of institutional repositories to address the challenge of managing and accessing vast numbers of knowledge artifacts, such as journal articles, research reports, books, and conference papers. It notes that these repositories require effective management, preservation, and curation for efficient retrieval. The article also mentions that South African research organizations and academic institutions have joined the global drive of making knowledge available in a free and open manner, and that this list of repositories provides an entry point to the wealth of information located in South African Repositories. Below the main text, there is an "External links" section with several entries: "CSIR Research Space" provides access to some of the research outputs generated by CSIR scientists; "ReRR" provides access to some of the research output generated by the Rhodes University community; "UPSpace" provides access to some of the research outputs generated by researchers at the University of Pretoria; "UWC Theses Online" is the University of the Western Cape electronic theses and dissertations repository holds full-text theses submitted for degree purposes since 2004, with selected titles prior to 2004; and "SUN Institutional Repository" provides access to recent theses and dissertations from Stellenbosch University. The browser's status bar at the bottom shows "smith_carnegie" and "Internet" with a 100% zoom level.

Google Scholar

<http://scholar.google.co.za/intl/en/scholar/publishers.html#faq1>

The screenshot shows a Windows Internet Explorer browser window titled "Google Scholar Help Center - Windows Internet Explorer". The address bar contains the URL "http://www.google.com/support/scholar/bin/request.py". The browser's toolbar includes navigation buttons, a search bar with "Google" text, and various utility icons like "Bookmarks", "Check", "AutoLink", "AutoFill", "Send to", "google", "scholar", and "Settings". The main content area is titled "Google Scholar Help Center" and contains a form for providing information to the support team.

The status bar at the bottom of the browser window displays "Done, but with errors on page." and "Internet" with a 100% zoom level.

Google <http://www.google.com/addurl/?continue=/addurl>

The screenshot shows a Windows Internet Explorer browser window titled "Add your URL to Google - Windows Internet Explorer". The address bar contains the URL "http://www.google.com/addurl/?continue=/addurl". The page content includes the Google logo, a search bar with "google scholar" entered, and a navigation menu with links like "Home", "About Google", "Advertising Programs", "Business Solutions", and "Webmaster Info". The main heading is "Add your URL to Google". Below this, there is a section titled "Share your place on the net with us." which explains the process of submitting a URL to the Google index. It includes a "Please note" section and a form with fields for "URL:", "Comments:", and an "Optional" captcha field with the word "holise" in a red, cursive font. To the right, there is a section titled "Other Options" with links to "Instant Ads on Google", "Google AdSense for Web Publishers", and "Google-Quality Site Search". The status bar at the bottom shows "Done" and "Internet" with a 100% zoom level.

Add your URL to Google

[Home](#)
[About Google](#)
[Advertising Programs](#)
[Business Solutions](#)
[Webmaster Info](#)
▶ [Submit Your Site](#)

Find on this site:

Share your place on the net with us.

We add and update new sites to our index each time we crawl the web, and we invite you to submit your URL here. We do not add all submitted URLs to our index, and we cannot make any predictions or guarantees about when or if they will appear.

Please enter your full URL, including the `http://` prefix. For example: `http://www.google.com/`. You may also add comments or keywords that describe the content of your page. These are used only for our information and do not affect how your page is indexed or used by Google.

Please note: Only the top-level page from a host is necessary; you do not need to submit each individual page. Our crawler, Googlebot, will be able to find the rest. Google updates its index on a regular basis, so updated or outdated link submissions are not necessary. Dead links will "fade out" of our index on our next crawl when we update our entire index.

URL:

Comments:

Optional: To help us distinguish between sites submitted by individuals and those automatically entered by software robots, please type the squiggly letters shown here into the box below.

Scopus/ Scirus

<http://newsbreaks.infotoday.com/nbreader.asp?ArticleID=18070>

“Elsevier has introduced a new "Search Sources" feature for its Scopus users (<http://www.scopus.com>); the feature allows librarians to customize interfaces to direct their users to specific institutional repositories and special digital subject collections. It appears that the new Scopus feature will simply allow librarians to preset the content preferences in Scopus that users of Scirus (<http://www.scirus.com>), Elsevier's free scholarly search engine, can set for themselves on a search-by-search basis, using the Advanced Search features. Scopus announcements also encourage Scopus clients to open their institutional repositories to the expanding Scirus Repository Search Program. “

Supporting Open Access Initiatives Worldwide

NEW! July 2009 Edition!

The number of repositories is growing fast worldwide but still many of them does not have their own domain or subdomain, and for this reason it is not possible to add them in our analysis. Some institutions maintain several databases with completely different URLs which penalize the global visibility they have. We are still unable to add usage/download statics but there are many initiatives already working on standardization of the collecting methods, so we expect that global data could be available soon.

Following several requests we now show two global Rankings. One that covers all repositories as was shown in previous editions (Top 400), and a new one that focus only on Institutional Repositories (Top 400 Institutional).

The major change introduced in this edition relates to the way the composite index (World Ranking) is computed, as we are now combining normalized values instead of ranks. The visibility is calculated giving extra importance to the external inlinks not coming from generic domains (.com, .org, .net). As in the last edition, the figures for rich files (pdf, doc, ppt, ps) are combined and not treated individually.

Comments on results

The composition of some repositories is so diverse that we decided to exclude those with only very large bibliographic databases (Dialnet, DTIC). CiteSeer is also excluded because is almost already replaced by the new version CiteSeerX. The French HAL central repository is excluded only from the institutional list in which

Scientific Commons

The screenshot shows the Scientific Commons website in a Windows Internet Explorer browser window. The browser's address bar displays the URL <http://www.scientificcommons.org/>. The browser's menu bar includes File, Edit, View, Favorites, Tools, and Help. The search bar contains the text "scientific commons". The browser's taskbar shows several open tabs: "Scientific Commons | A C...", "Managing - BIB ITD", "DSpace Technical Workshop ...", and "EKERK - Alle artikels - Vertro...".

The website's header features the Scientific Commons logo with a "beta" tag and a search bar. The main content area is divided into two columns. The left column, titled "Scientific Commons", includes a "Details at a Glance" section with the following statistics:

Publications	29,560,028
Repositories	1,120

The right column, titled "Recently added Publications", lists several articles with their titles, authors, and brief descriptions:

- [Recovering portfolio default intensities implied by CDO quotes \(2008\)](#)
Cont. Rama, Minca, Andreea

OA week targets 200 participants

by liz

With Open Access Week fast upon us, from October 19-23 2009, we're feverishly helping organizations worldwide plan their OA week events. We've noticed a few interesting trends in participation this year:

- ⇒ Last year we had 120 participants, this year we could top 200 but at the moment only 100 have confirmed their participation. If you are one of the 100 institutions who have expressed interest but are still in the final planning stages, please confirm your involvement today so that we can beat last year's performance!
- ⇒ If you are participating, please update the [OAD wiki](#) today with
