Had Shrimp cocktail, Filet Steak + mushroom. Bob an Ruman accompanying by Vina Tio Pepe and by bottle Nederburg Cabernet (Vanna Baker who was supposed to have come drunk nothing). Bob + Bette shared 1/2 bottle of Svedka vodka (left from night). It was a more friendly meal than any in Vina lounge. They all left about 10 pm + I "Flagged" out to bed. Had absolutely awful night. Sick headache. Took 2 aspirins + 1 V.C. about 3.30 a.m. and had small soft kip but it did not help much. Though the "Shrubs" may have been bad but probably too much wine.

Clear day. Layed a bit and slept at 7.30. Bath, change etc + much juice & polyminox as usual after. Saw Dick, Ridel & Thomas for Welcome back. Only left for home about 10.45. Laid Sub + silk coat at dry cleaners + set off at 11.30 or so. Much work to deal with. (Police & Law in Durban dealing with much delayed N. Bank Central). Took Marwood & Lovers at Jannas. (Cheese sold to Masters Race) + continental word mail, tele's & various things in afternoon. Left office about 6.15. + looked in Andy Hays' coffee factory then playing Croquet at about 6.45 + too absorbed to stop by 7 pm. Came home + went into their Sts to drink a St or two to begin - (and their welcome had been to cheese!) - As an afterthought mentioned by Xmas Case 2 Napping!! + spent lots of time trying to be friendly can people be? Had whisky and (by mistake) boronide (instead of soda) but drank it + normal Kalgan. Very dinner after - very good if a little too much! A curious painful bump near parting in my hair which had just become slightly noticeable on arrival in Sabrina land now spread to a curious sensitivity across the left side of my face. My eyes were dull & leaden. I did not feel very well + had intense ear aches and I visited C to no effect for these. To bed about 11 pm.

Clear warm day. Did not feel too bad - headache + lay till 7.30. Few animals + usual Carrot juice, (2 glasses + 1/2 coke marinade) plus 2 glasses beer even. My surface head sensitivities increased + shooting pains at left temple. To home in Joppo. Rather muddled about all day doing all sorts of odd jobs. No lunch. Had taken 1/2 anflox + 1/2 C in morning then 3 Diflumin about midday to alay head pain to little effect. Left home about 6pm + came straight home. Has 2 glasses Carrot juice but no dinner. Throat quite sore. Gargled with Salt Solution + gargles into nose. Went to bed feeling lousy about 10 pm.

Clear, warm day. Felt so lousy I stayed in bed till 10.30. having to close head but it was worse if anything. Went up to home in Joppo about 11 am.. Felt so lousy I saw Dr Papke there in Joppo about 11 am.. Felt so lousy I saw Dr Papke (in answer to everything by both Abrahahchi + Erwin Heubel) + made an appointment by both Abrahahchi + Erwin Heubel) + made an appointment for 2.45. No lunch. Papke found I had pushed out a verrucous infection (mainly along to cheilion from corner sensitivities) of head + shooting in left side and shooting pains over left eye + temple) + gave tablets to be taken every 3 hours + should go home + stay here for three days + sleep more. He also found blackheads again on the nose and account for drawing in ears due to my being "tense" - the light-headedness continuing as he put it. He did not think the serum brought to do anything about it. Roy J.P. v. 13 saying I would be okay for 3 or 4 days but the nose really infected. Home by 6 pm for dinner. Found old John Makombe's early heavy board. Drove early to him at Xmas. Give him R6 (about 1/2 dozen) of Dick as incentive + 2 glasses of marinade + Kalgan and give him a big cold silk tea (with milk). Had cheese + 2 light whiskies while waiting for veg dinner. Also 2 glasses Carrot juice. Had slight belly ache and medium sized neck kraal. I put down to 'cheese'. Started Papke's Rabarber (get from Vanda of Keddie). Left eye felt tingles up + shooting pains come on at intervals. To bed about 11 pm.

Overset. Still felt lousy about head, nose &
troubling surface pains. Could not drag myself out of bed
& decided to stay here today too. Made carrot juice at
11.30 & had 2 glasses at one time 2 piske from garden, fully
away 3 glasses C. juice to eat & day. Ray Irwin H. re Shately
my neck again & arranged to go to his house at 6 pm to discuss it.
Cold Veg. lunch. Further tidy up of bed and some reading.
Bath & change at 5 pm - 5.30. Had good, large, well-preserved
Krap at 7.45. Off to Irwin just after 6pm. Saw Ray Irwin
come in at 7 pm his bus home at 6pm. Saw a little pink-brownish
adult Piske dragonfly & felt my 'skin' headache might be due to some
old neck trouble - he said, "maybe bee at L.C.M. as soon as possible to neck
Shately". ~~I went there~~ The last most troubled the vertebrae posteriorly
going to side by plane tomorrow & had time another day further (all there
but leave by plane on Saturday). Went to office just after 7 pm to
collect papers & mail & home by 7.45 or so. Had sandwich & cheese. Had
Cold Veg supper & had boiled eggs. Did not feel at all good & very uneasy
about the head. Was up until about 11 pm for though
had these papers, felt a lot for work & read about Brian
Fischer from many his book and disappearance. It seemed a
serious further blow to Shately & behavior today. He and
Churchills death were the buzzwords in these 3 bad papers.
Went to bed very uneasy about the head and was conscious
of the throbbing pains throughout the night also having particularly
difficult & frustrating dreams. Head seemed better taken a
decided turn for worse after aid of Piske capsules & after seeing
Drury. Drury did not think I should see Piske again. He will tell

Felt lethargically alright in my but head pain
remained fairly in back ground. Again read

but drank 6 tumblers of Carrot juice (2 at 10:30
2 at 1:30 and 2 separated at night). Damned head
came on again and blurriness in eyes. I also
felt that sort of nausea which causes one to breath
in a sort violently. Took 2 analges + 1 v.c. again
(dammit I had taken 2 this already!!) which
again slowly eased off the head pains and suchlike
and gave me an ease for the night. Felt that
this 5 day constipation has something to do with it.

but drank 6 tumblers of Carrot juice (2 at 10 am
2 at 1.30 and 2 separated at night). Damned head
came on again and blurriness in eyes. Jabs
felt that sort of nausea which causes one to heave
in a sort violently. Took 2 analgen + 1 Vt C. again
(damn it! Head better & still clearer!!) which
again slowly eased off the head pains and suchlike
and gave me a can for the night. Felt that
this 5 day confinement has smelly to do with it.

Upset Stomach
Little food

Overcast rainy day. Stomach still rumbling. Deerhoof Krab at 6 pm and another at 9 pm. Coming home on bed sandy till now. No head seemed inflamed and rhinopharynx right knee seems better. Disaffection of both may have been aggravated by the constipation. Worked + worked and only this and going through newspapers or Sleep by 10:15 am. Took till about 3 pm to clear papers.

(He had 3 pieces of dog toast today). Lay and read in Rondavel and had three more pieces dry toast at 4:30. 6-7 hr went to drive with dogs through Waterfall Ridge Extension via John Ranch then Selma - Strategic Rd. Lousy + ghastly as I felt (mentally) after awful night. I could not get out of bed till 8:30 am. Had small loose Krab at 8:45. Worked + npt + took two dogs and Wiwi's Col to Waterfall Vet Hospital at 9:30. where at 10 am young Dr. Hyman (Mallers partner) extracted two of Rasius teeth under anesthesia + cleaned out Tarter. Trimmed off growth of Tia's right eye. Left Wiwi's nose to be cauterized as no other means of stopping bleeding + fresh results in Septic Sores. Wound fester this evening. Brought Rasius home about 10:30. still "ail". He was up and droopy about 11:15. Drove with this on Stoep + going through Xmas Cards to answer. (No lunch). Felt terribly depressed + resorted to 2 Analgan + 1 VTC which very soon put me in better frame of mind. Read (Steve Schell biography). Had some Earl Grey China tea (teab) + 2 pieces toast at 4:30 pm. Tummy still felt very unwell. Rasius ate fairly again by 5 pm when I set it to turn soft bread + milk + yogurt at Bowlin Chile Greek, fully fed with pepto + Cheddy, oil, water + barley + whole grain, to drive to collect papers + my Tie Dye parcels + parcel (blue winter long-sleeved pull-over from Murray) + back to Waterfall Vet Hospital to check W/His after cauterization at 6:15 or so - Very quiet + subdued in his basket + relaxed to his form for consciousness. Went for walk with dogs. Beautiful, even + sunned with moon. Stayed on top of my topmost reservoir in cool breeze + enjoyed view till about 7:30 or so. before coming down. Tummy still very upset decided to try old settling draft of Port + Brandy + had this while reading in room 7:30 - 8:30. + it seemed to clear up slightly. Had hot Veg. (Can't bear + worked potatoe) dinner with Coli chicken. Tummy pain relieved later. Read in till about 1:30 am. (Had your dinner at 1:15 + to bed + went to bed). Headaches -

18.2.65.

1 Small hard Krafp.

Reactions headache
night.

Felt lousy (nauseous) on waking at 6 am + long till 7.30 am. Head exercises but longitudinal turns painful. Shave, bathe dress + was feeding animals + drinking Canned juice (already made by Kalgan) at 9 am. Had moderately formed Krafp at 8.15 am. Off to Office now but of an "unreal" still I mind getting in about 10. Has another Krafp immediately on rising (moderately thin-formed). Longish till to Tobie till of my usual, depressed state of mind at 25 in. (He was all for in Gay bush home to rest side long saying tree was not real anything important (in me at moment)). I slept until later in + known people who had left remained + mostly effects. Discussed on details of Domini as White fox down brought by home. Bank (genuinely Muller it seems) now interfering with my tree planting scheme. I feel small trees to be and have some sort of a show down with Holboer or someone to clear this over "Savage"!! our and get the designs fulfilled. Stayed on road before till 8.30 pm + left by home. (No lunch by bed time to take 2 analges (Intc) at 12.30 as jaw feels so bad (depressed + loose pains) + lay down for an hour (1.15 to 2 pm). As expected I ruminated. He too busy to see me today would be again (unrest). He too blessed me in bottom of not being able to take a gift loose in the hand. It merely charitable friends. Read on room drinking 3 glasses. Read on (boring 3rd one strictly 4th) on Old Silvettis biography to 7.30 pm before going to bed.

Did not feel too bad on working but had threatening in background + long till 8 am. I wash, shave + feeding animals and having 3 glasses Canned juice + 1 Kerosene hen + 1 banana at 8.45. Then came in to write this. Could not induce Earl now Krafp without of some tummy rumbling last night. To Office by 10.30. No lunch. With some effort squeezed out a well formed small diameter Krafp at 12 pm. Tea + biscuits 10.30 am + 3400 fm + lots of water. Spent some time writing letter to Amalgam. Read books + left office about 6 pm to home. Read on round robin 7 pm on. 3 glasses Canned juice + 1 Kerosene hen + 2 bananas. Hot Veg dinner (Mashed beans, carrots, much potatoe) + about 3x4 lb fillet of beef (grilled) 8.45 - 9.30 pm. Came in till about 10.30 but fell asleep in chair + woke up with stiff + throbbing neck. The neck had been throbbing all day in background but did not take analges. Actually enjoyed dinner + taste of food + ate almost first time since hospitalization. Now have difficulty sleeping on account of the other head but overall not bad. Dr. Rumm H did not stay or come up to me at dwelling as he had said he would + left me with fairly he could not be bothered. Dominit.

Clean warm morn. Slight nausea early on usual + long till 8.45. Head exercises painful - longitudinal especially. Took 2 analges at 8.15. in Third V.S.C. on site business very many. Took 2 Krafp at 8.30. but only squeezed out minute small dream. Fainted once. Recent Krafp had had clear pale - blood as periodically happens. Feeding animals + drinking 3 glasses Canned juice prepared by Kalgan at 8.45. At v.s.c. Berg at 9.35 am arranged for an amput. about front fingers in mid fore arm + 1/3, my right + master brook. finally about 1.30. then to this. In rest of day. No lunch. Home at 9.30 pm + tea 10.15. Long till to home (12 - 12.45) about my woes. Left for home about 6.30 pm. 3 glasses Canned juice + banana + drinking 7 - 8.45. Hot Veg + fillet filet dinner. Read (end of Silvettis biography) till 9.30 pm. Rather uncomfortable night.

Clear warm morn. Head well subsides but lancing. Rose 7.30. Shave bath + feeding animals + drinking 3 glasses Canned juice 8.45 am. Collected + made up Sunday Veg slice like ones already + dried. 1/3 Kerosene for bath at Bennett house. Bought Canned beans seed at 10 am. Left for home by 10.30 pm. No lunch. Did not feel to true but had along headache. Long + though thought nearly gone but thought to me to Amalgam + I proceeded it. Left office about 6.45 pm + left into the wild young orchard. Helped 3 glasses Canned juice + banana + drinking 7.15 - 8.30. Hot Veg dinner + fillet filet 8.30 - 9.30. Filet of steel red after and to bed about 11 pm. Squashed out since hand formed Krafp with difficulty at 7.30 pm. Reactions headache night.

Friday.

Clear, cooler, sunny. Up 7.15 am. Head ached on start of analgesine yesterday. 3 mins rolling increase seemed to settle it. Feely animal + drably C+A mice at 8.30. Ruth with Rollers over his body we found someone else to do massage or he was to sit up (he admitted) in carrying out my instructions or underlying pain. Then after settling all seeds for him to do more rolling of Cervix, Lumbar & Sacrum). To office via W.M.F. stairs and Brain (dealing w/ D. & L. Jabs: lumbar). City there about 10.15, and spent all day interviewing in N.B. Doubt South Africa. Head still dry all remarkably well & had not time to take analgesine as I was expected back to home about 7.30 pm. Had 2 glasses, Cognac + 1/2 apple juice or banana juice till 11. Had Veg + Grille filled dinner plus banana, honey, + cinnamon as usual at 8.40 — 9.30 pm. Slab head started aching. Did 3 mins exercises (21 rolls this time in off side direction but horizontal twist: since too painful) and went to bed at 11.30. Left mouth right while rolling head.

[Tired to work with 6 mins rolling increase but no good]

Woke up at 3.30 with bad throbbing being muscularly painful at back but also with eye + forehead headache and it got steadily worse. To 2 Analges + 1/2 t.c. at 4 am. (So last dose like 7.30 pm morning, head lasted 32 hours). Up at 7 am. Sudden movement of head when walking + sharp knifelike. Feely animals + drably C+A mice at 7.50 am. To turn via W.M.F. stairs twice. Bullet hole in my shoulder blade not yet closed up. He was vaguely unwell. Saw Newton, he would try to get Bullet hole out today as horses away on reef. In office by 9.30 pm today good formal Krap at 11 am. Head worked up. Found patch of nagging pain also I took 2 Analges + 1/2 t.c. at 6 pm, left for home about 7 pm. 4 glasses more C+A mice. 7.30 — 8.45. Got veg dinner + grille + banana juice. 9.45 — 9.45 pm. Read. To see about 11 pm with head again "burking". It may work on Doubt (very carefully) stimulating + as from left completed undisturbed by others it is clear that my head trouble not caused by vibrations

Woke at 3.15. with bad head pain (but no headache or nausea uttered till 1). Got up and did 1/2 hour of head rolling exercise determined not to take more analgesine unless it hurts. It seemed to ease pain considerably. (horizontally still painful!) Head however slowly works up. New patch of pain at 6 pm. Took another 1/2 hour exercises but no good. Then took another 2 Analges + 1/2 t.c. By 7.15, pain aq slightly reduced. Got up. Bath. Shave + took this by 8.15. Pain now easing off. Feely animal + drably C+A mice by 8.30. Analges is obviously becoming less + less effective. Will give 5ccs Dr. Inniss later to office about 9 am. There all day on N.B. Doubt family Ray Inniss 12.30 re seeing him. He suggested 6.30 pm at his house this evening. No head. Finally saw Dr. Inniss at 3.30 pm. Left office 6.15 + with Inniss at 6.30 till him whole story of muscle spasm head + all aches forgotten details in some detail (including increased tally of Analges). Since leaving hospital he thought my temples larger due to a peripheral "pressure" in the almost blind at present (from which "all the patients have suffered"). He did not think this day myself any harm + increased taking of analges though I do not in some detail affect how this might affect me physically. In no way he said. I should take as many as I were necessary to keep any residual pain as effects of this were far worse than any the pills controlled. He suggested I give Hot-Cold Compresses to neck every night before bed to next week (i.e. V. Hot 1 min, ice cold 1/2 min for 10 mins). Take analges to kill pain and he would phone me in weeks time to see how things going. He thought everyone would eat off come night in due time. Home by 8 pm. 4 glasses C+A mice + 6 bananas before. Hot Veg dinner (no meat) 8.40 — 9.30 pm. Hot-Cold Compresses at 11.30 am to bed for quite comfortable night.
