The B. Bank Meeting

Drinks and dinner with Mary P.

Sunny morning. Long till 7.30. Feedy animals and tea + toast. By 8.45. A row with Kalypso about her late arrival last night about which she gave me a sense of difficulty of transport from my school work + islands where she + Jefferson had decided to go with. told her she had promised always to phone on these occasions so that we can not left worse + in dark about what had happened + normally had different she would have got to phone somehow. later I asked her to take out strong comb + wash + wash of Murrin Remyton blood-stain still there + she told me as a 'punishment' for last night + flatly refused to do it + I sat on my work of my hand back the night of I asked her to wash it + she said she would not do it. This was my Kalypso's speech to me and after a religious weekend what more. She had no intention of 'punishing' her and she had better think about it and the way she had now heard me by this occasion. To office by 10 to find that Bank called for meeting in July to a business with table, me, + 20th. (she could be set) to discuss policy on dealing with red. Development also has now taken me off London St. TTB. And only Egan's in town at 10 pm. I had my right in my chamber about with Bill + Mary + Philip + the Mac's!!!!. And so the day went on - one of those hell days. Mary phoned me at 6 pm + I suddenly decided to take her out to dinner last dinner with her first + day at James "to fresh it all" Home by 12 pm + to bed.
