ABSTRACT

This study examined the influence of the mathematics profiles of secondary school pre-service mathematics teachers on their instructional behaviour. The mathematics profile construct was determined with respect to four components, namely, subject matter knowledge, pedagogical content knowledge, conceptions of mathematics and beliefs about the teaching and learning of mathematics. The instructional behaviour construct was studied with regard to participants' use of a traditional versus reform approach to teaching, and whether learners were afforded an authoritarian versus democratic style of learning. Social constructivism formed the epistemological underpinning. The context for the study was a Post Graduate Certificate in Education (PGCE) course at a university in South Africa. The study adopted a qualitative post-hoc research approach of seven case studies. The final portfolios submitted by participants as part of their PGCE course were used as the main source of data. Through participant and researcher reflections, a visual representation of each participant's mathematics profile and instructional behaviour was constructed. These were then compared in within-case and cross-case comparisons. Findings indicated that the mathematics profiles of pre-service mathematics teachers have an influence on either enabling or constraining the development of their instructional behaviour. An improvement in the pedagogical content knowledge of mathematics teachers without positive changes in their conceptions and beliefs and the quality of their reflections and subject matter knowledge does not result in reformed instructional behaviour. The mathematics profile as a package needs to be developed in order for pre-service mathematics teachers to make the required changes in their instructional behaviour towards a more reform-orientated approach to teaching and learning of mathematics.

Keywords: pre-service, mathematics, teaching, learning, secondary, instructional behaviour, profiles, social constructivism

To God be all the glory

Isaiah 58 vs 8

Then shall your light break forth like the morning, and your healing (your restoration and the power of a new life) shall spring forth speedily; your righteousness (your rightness, your justice, and your right relationship with God) shall go before you [conducting you to peace and prosperity], and the glory of the Lord shall be your rear guard.

TABLE OF CONTENTS

ABSTRACT.....	i
TABLE OF CONTENTS.....	iii
LIST OF ACRONYMS	vii
LIST OF TABLES.....	viii
LIST OF FIGURES	xi
CHAPTER ONE OVERVIEW	1
1.1 Introduction.....	1
1.2 Background to the research.....	5
1.2.1 Training of pre-service mathematics students	5
1.2.2 South African learners' performance in mathematics	7
1.2.3 Contract research project	10
1.2.4 Consulting the literature.....	15
1.3 Problem Statement.....	18
1.3.1 Rationale	18
1.3.2 Research Questions.....	20
1.4 Conceptual framework.....	21
1.5 Teacher training in South Africa.....	23
1.6 Research design and methods	24
1.6.1 Paradigm	25
1.6.2 Research approach	26
1.6.3 Data collection strategies	27
1.6.4 Data analysis	28
1.6.5 Methodological norms	28
1.6.6 Ethical considerations	29
1.7 Limitations of the study	30
1.8 Outline of the study.....	30
CHAPTER TWO LITERARY FRAMEWORK	31
2.1 Introduction.....	31
2.2 Social constructivism.....	32
2.3 Literature review.....	35

2.3.1	Subject matter knowledge.....	37
2.3.2	Pedagogical content knowledge.....	40
2.3.3	Conceptions of mathematics	48
2.3.4	Beliefs regarding the teaching and learning of mathematics	52
2.3.5	Teacher's ideology (approach to teaching).....	53
2.3.6	Learners' mathematics experiences (learning approach).....	56
2.4	Conceptual Framework.....	58
2.5	Conclusion	61
CHAPTER THREE	RESEARCH DESIGN AND METHODS	62
3.1	Overview.....	62
3.2	Research design	62
3.3	Research procedures	63
3.4	Research paradigm.....	64
3.5	Research methods	65
3.5.1	Site	65
3.5.2	Sample.....	70
3.5.3	Data collection	85
3.5.4	Data analysis	90
3.6	Methodological norms	92
3.7	Conclusion	94
CHAPTER FOUR	PARTICIPANT REFLECTIONS	95
4.1	Introduction.....	95
4.2	Marge	96
4.3	Lena.....	101
4.4	Peta.....	106
4.5	Kapinda.....	111
