## ABSTRACT

The purpose of this study is to explore how education policy on information and communication technology (ICT) influences teaching and learning in South African schools. An instrumental case study applying backward mapping principles as a strategy of inquiry was used. Utilizing a social constructivist lens and guided by a theoretical framework of a socio-cultural approach to policy analysis, this exploratory qualitative research study set out to investigate how teachers in South African schools appropriate education policy on ICT. The case study included three schools from diverse socio-cultural settings, with two participating teachers at each of the identified research sites. The principal at each school and e-learning specialists (officials) at the District and Provincial Departments of Education constituted additional data sources. Data collection methods included interviews, classroom observations, field notes and document analysis. Constructivist grounded theory methods and computer assisted qualitative data analysis software (CAQDAS) were employed in the analysis of data.

It was found that, teachers' professionalism and agency are crucial in formulating and implementing a school-based e-education policy in practice. The national e-education policy currently exists as an "invisible policy" within the school context. Secondly, teachers reposition themselves as social and cultural actors of school-based policy appropriation and formulation rather than as recipients of, or reactors to the national e-Education policy. Thirdly, the lack of systemic support to teachers acted as the catalyst for the emergence of communities of practice between schools. The notion of "our" system as opposed to an imposed system prevails. Fourthly, teachers' ignorance of the national e-Education policy indicates the need for policy development and implementation at school level and denotes a new construct to policy appropriation. I theorise that teachers' beliefs, attitudes, professionalism and will to improve teaching and learning through the use of ICT are integral and necessary conditions for effective policy implementation.

Communities of practice

## DEDICATION

This thesis is dedicated to my wife Saloshna, for believing in me, nurturing and supporting me through this difficult period.

I owe all I am to you.

To my children Shavani and Mogeshin  
forgiving me the freedom to pursue my studies with constant encouragement and support.

To my autistic son Suthakir, who will never be able to read these words,  
thank you for sacrificing our 'together time'.

## ACKNOWLEDGEMENTS

I would like to express my heartfelt gratitude to the following people who made invaluable contributions to this study and in the writing of this research report.

My supervisor, Professor Liesel Ebersöhn for her unwavering academic support and dedication. Her vibrant and enthusiastic academic approach and intellectual rigour turned every challenge I encountered in this study into new learning opportunities. Her constant words of encouragement in every chapter were a tremendous source of inspiration. Her exemplary role as a supervisor and mentor served to promote my own growth as a young scholar, academic and researcher in the field.

My co-supervisor, Jill Fresen, for her thoroughness and open approach to my study. Her time, advice and significant attention to structural and editing detail is acknowledged and appreciated.

Professor Jonathan Jansen, for instilling in me a sense of intellectual rigour to explore an intellectual puzzle and to push the boundaries back in this field of study. Thank you for allowing me to experience the teachings of a true scholar, who gives of himself so unselfishly.

My head of department, Professor Max Braun, for your continued support, patience and understanding. Your interest in my personal well-being served as a pillar of strength throughout this process.

The teachers that allowed me access into their private classroom spaces, and the principals that allowed me unrestricted access to their schools, I thank you for sharing your life experiences with me.

Professor Saloshna Vandeyar, for being an outstanding intellectual and academic sounding board for my study.

## TABLE OF CONTENTS

### Chapter 1: Orientation to the study

1.1	Introduction	21
1.2	Background context	22
1.3	Rationale for the study	24
1.4	Statement of the research problem	25
1.5	Research questions	28
1.6	Paradigmatic perspectives	28
1.6.1	Methodological and epistemological paradigm	28
1.6.2	Theoretical framework: Socio-cultural approach to policy studies	29
1.6.2.1	Policy as a socio-cultural practice	29
1.6.2.2	Policy as agency	30
1.6.2.3	Policy as a practice of power	31
1.6.2.4	Summary	32
1.7	Research assumptions	32
1.8	Conceptualization of terms	33
1.9	Research design and methodology	36
1.9.1	The research process and phases of inquiry	38
1.9.2	Enhancing the quality of the study	39
1.9.3	Scope and limitations	40
1.9.4	Ethical considerations	41
1.10	Outline of chapters	42
1.11	Conclusion	43

### Chapter 2: Exploring the debates in the field

2.1	Introduction	45
2.2	The rationale of governments for an ICT policy in education	45
2.3	International landscape: Macro level -	
	Are policies implemented as planned?	47
2.3.1	ICT policy implementation: Trends and strategies	47
2.3.1.1	Slow pace of change	48

2.3.1.2	Multidimensional approach and systemic change	49
2.3.1.3	Simplistic policies and competing priorities	50
2.3.1.4	Changes to national curriculum policy	52
2.3.1.5	Successful ICT policy implementation	54
2.3.2	Responses to ICT policy in education	55
2.3.2.1	ICT policy focus	55
2.3.2.2	An inclusive approach to the formulation of policy	56
2.3.2.3	Policy deficits	57
2.3.2.4	Centralised vs decentralised centres of control	59
2.3.3	Summary of macro level findings	61
2.4	International landscape: Meso and micro level -	
	Are classroom practices changing?	62
2.4.1	Social context of ICT policy implementation	63
2.4.1.1	Systemic support, capacity and competence	63
2.4.1.2	Institutional culture and practice	65
2.4.1.3	School leadership	66
2.4.1.4	Teacher professionalism	68
2.4.1.5	ICT curriculum integration	71
2.4.1.6	The influence of ICT policy on learning	73
2.4.2	Summary of meso-micro level findings	74
2.5	The South African scenario	75
2.5.1	South African scenario: Macro level-	
	Are policies implemented as planned?	76
2.5.2	South African scenario: Meso and micro level -	
	Are classroom practices changing?	80
2.5.3	Summary of findings - South African scenario	81
2.6	Comparison of findings between international and South African landscapes	82
2.7	Conclusion	83

### **Chapter 3: Research design and methodology**

3.1	Introduction	86
-----	--------------	----

3.2	Paradigmatical assumptions	86
3.2.1	Meta-theoretical paradigm	86
3.2.2	Methodological paradigm	89
3.3	Research purpose	90
3.4	Strategy of inquiry:	
	A case study approach based on backward mapping principles	91
3.4.1	Backward mapping principles	93
3.4.2	Selection of cases	95
3.4.3	Identification and selection of participants	99
3.5	The research process	103
3.5.1	Phases of inquiry: Data collection methods and instrumentation	104
3.5.1.1	The pilot study	104
3.5.1.2	Semi-structured face-to-face interviews	108
3.5.1.3	Informal conversational interview	111
3.5.1.4	Classroom observations	112
3.5.1.5	Reflective journal	117
3.5.1.6	Researcher participant diaries	118
3.5.1.7	Document analysis	119
3.6	Data analysis: from research questions to findings	121
3.6.1	Data analysis: Interview data	122
3.6.1.1	Data reduction: bringing meaning, structure and order	122
3.6.1.2	Qualitative data analysis	123
3.6.1.3	Coding and categorization of data	124
3.6.2	Data analysis: Informal conversational interviews	127
3.6.3	Data analysis: Classroom observations	127
3.6.4	Data analysis: Field notes	128
3.6.5	Data analysis: Reflective journal	129
3.6.6	Data analysis: Document analysis	130

3.7.1	Audit trail	131
3.7.2	Case-to-case transferability	131
3.7.3	Credibility	131
3.7.4	Confirmability	132

3.7.5	Width and depth of study	132
3.7.6	Retest reliability	133
3.7.7	Researcher reflexivity and researcher role	133
3.8	Summary	134

## **Chapter 4: Findings and discussion of results**

### **What are the e-education policy implementation practices in teaching and learning?**

4.1	Introduction	135
4.2	How do teachers interpret policy?	135
4.2.1	National curriculum policy: “readerly” or “writerly”?	136
4.2.2	E-education Policy: “readerly” or “writerly”?	138
4.3	Teachers implementing e-education policy in practice	143
4.3.1	Teachers’ beliefs and attitudes on the role of ICT	144
4.3.2	Teachers’ emerging pedagogies	146
4.3.3	Teachers as innovators and trendsetters in the use of ICT	150
4.3.4	ICT initiating teachers as collaborative learners	154
4.3.5	Teachers as drivers of ICT implementation	159
4.3.6	Teachers’ will to develop ICT competence and pedagogical skills	160
4.3.7	ICT defining teachers as administrative agents	163
4.3.8	ICT developing learners as researchers and independent knowledge seekers	165
4.4	How does teachers’ practice influence learning?	166
4.4.1	ICT catering for multiple learning styles	167
4.4.2	ICT improving learner attitudes	171
4.4.3	ICT promoting integrative and interdisciplinary learning	172
4.4.4	Learning about ICT and learning with ICT	175
4.5	Summary: Main results	176
4.6	Literature reflection	177
4.6.1	Introduction	177
4.6.2	Echoing existing knowledge on ICT policy in transforming teaching and learning	178
4.6.2.1	ICT policy transforming teaching	178

4.6.2.2	ICT policy transforming learning	182
4.6.2.3	New insights	184
4.6.3	Conclusion	189

## **Chapter 5: Findings and discussion of results**

### **How do systemic structures respond to e-education policy to influence teaching and learning?**

5.1	Introduction	190
5.2	Drawing boundaries around schools	190
5.2.1	Ability of the school to change the behaviour of teachers to implement policy	190
5.2.1.1	ICT school practice and leadership	191
5.2.1.2	Transforming schools – Creating an ethos of a shared vision	195
5.2.2	Resources required by schools to affect the behaviour of teachers to implement policy	199
5.2.2.1	ICT curriculum resources	199
5.2.2.2	The need for ICT competent teachers and capacity building	201
5.2.2.3	The need for ICT policy and policy guidelines	205
5.3	Beyond the boundary of the school	208
5.3.1	The ability of district and province to affect the behaviour of teachers to implement policy	208
5.3.1.1	District and province ICT administrative directives	208
5.3.2	Resources required by district and province to affect the behaviour of teachers to implement policy	210
5.3.2.1	The need for ICT policy, policy guidelines and effective channels of communication	210
5.3.2.2	The establishment of ICT curriculum integration guidelines and ICT attainment levels	217
5.3.2.3	The need for systemic competence and capacity in e-learning directorates	219
5.3.2.4	The need for a shared vision and unified strategy between e-learning and curriculum directorates at district and	

	provincial levels	224
	5.3.2.5 The need for “ICT willing schools” - promoting school collaboration	229
	5.3.2.6 The need for ICT teacher training	232
5.4	Summary	234
5.5	Literature reflection	235
	5.5.1 Introduction	235
	5.5.2 Echoing existing knowledge on ICT policy transformation, teaching and learning	235
	5.5.2.1 ICT policy transforming schools	235
	5.5.2.2 ICT policy transforming districts and provinces	240
	5.5.3 New insights	248
	5.5.3.1 ICT policy transforming schools	248
	5.5.3.2 Transforming province and district directorates	251
	5.5.4 Conclusion	254

## **Chapter 6: Implications for policy, research and practice Summary of findings, recommendations and conclusion**

6.1	Introduction	255
6.2	Summary of key findings	255
	6.2.1 Province and district response to the national e-education policy	255
	6.2.2 Response of schools	257
	6.2.3 Principals as change agents	258
	6.2.4 Teachers’ beliefs, attitudes and professional practices	259
6.3	Significance of findings - new knowledge generated	263
6.4	Research assumptions revisited	265
6.5	Suggestions for further research	267
6.6	Recommendations for policy and practice	268
6.7	Conclusion	269

## LIST OF TERMINOLOGY

<p><b>e-learning</b></p> <p><b>e-education</b></p>	<ul style="list-style-type: none"> <li>• The design, development and delivery of technology-enhanced learning experiences, using a multimedia such as: web-based resources; audio-visual material, interactive whiteboards.</li> <li>• In the South African context, e-education involves the use of ICT to accelerate the achievement of the national education goals. e-education also includes the connectivity between learners, teachers, support services, and providing platforms for learning. The broader goal of e-education is to improve teaching and learning through effective use of technology and pedagogy (Department of Education, 2004).</li> <li>• E-learning is flexible learning using ICT resources, tools and applications, focussing on accessing information, interaction among teachers, learners and the online environment, collaborative learning, and production of materials and resources to enhance learning (Department of Education, 2004).</li> </ul>
<p><b>Learners</b></p>	<ul style="list-style-type: none"> <li>• In the current study students, learners and pupils are terms that are synonymous. However, the term learner will be used consistently. A learner, as implied in this research is a person who is in learning in the formal schooling period.</li> </ul>
<p><b>Schools</b></p>	<p>Schools are classified as public, government or state schools; former model C schools; or independent schools.</p> <ul style="list-style-type: none"> <li>• Former model C (or inner city) schools are public schools that were previously (prior to 1994) designated for white learners only. Both terms ‘model C’ and ‘inner city’ school will be used interchangeably.</li> <li>• Township schools are public schools, typically situated in suburbs out from the city centre and previously designated for black persons.</li> <li>• Independent (or private) schools are defined as schools that receive minimal financial support from the state.</li> </ul>
<p><b>Policy</b></p>	<p>Policy and reform are terms used interchangeably, and may imply authorised policy or school based policy.</p>
<p><b>Macro, meso and micro</b></p>	<p>In this study, macro implies national government; meso represent provincial, district and school levels of government. Micro represents the classroom and teacher level.</p>
<p><b>DoE</b></p>	<p>At the time of conducting this research the national department of education was the DoE, and is referred to as such in this thesis. Currently the DoE has been restructured into the department of basic education and the department of higher education.</p>
