

**ECONOMIC DEVELOPMENT IN NIGERIA THROUGH THE AGRICULTURAL,  
MANUFACTURING AND MINING SECTORS: AN ECONOMETRIC APPROACH**

by

**DENNIS CHIEKWEIRO UZOIGWE**

Thesis submitted in partial fulfilment of the requirements for the degree of

**PhD (ECONOMICS)**

in the

Faculty of Economic and Management Sciences

at the

UNIVERSITY OF PRETORIA

PRETORIA

AUGUST 2007

**ECONOMIC DEVELOPMENT IN NIGERIA THROUGH THE AGRICULTURAL,  
MANUFACTURING AND MINING SECTORS: AN ECONOMETRIC APPROACH**

**DECLARATION**

I, Dennis Chiekweiro Uzoigwe declare that the dissertation / thesis with the above title which I hereby submit for the degree of PhD in the Department of Economics at the University of Pretoria, is my own work and has not previously been submitted by me for a degree at another University.

---

## DEDICATION

This study is dedicated to my God, the Almighty Jesus Christ, for sparing my life from a ghastly auto accident that claimed the lives of more than two-thirds of the 52 passengers of a Lagos-bound bus on which I was travelling on my way to board the aeroplane to the University of Pretoria after the Christmas holidays in 2004.

## ACKNOWLEDGEMENTS

This study has been possible because of God's and my family's support over the past years.

My unreserved gratitude goes to my supervisors, Prof. A.C. Jordaan and Prof. J.N. Blignaut, who in spite of their busy schedules and programmes found time to read the work in great detail and offer constructive ideas. I will always remain grateful to them for the speedy and great attention they gave to me. Prof. J.N. Blignaut got me interested in the topic during one of my consultations with him. Since then he has helped me with materials and has steered the direction of the research through interesting and intellectual conversations.

I am very much indebted to the coordinator of the postgraduate programme, Prof. Charlotte Du Toit, for her encouragement and support. I must thank Prof. Renee van Eyden, who, when my personal computer crashed, helped me out with one from the department.

I am grateful to the Head of Department, Prof. Jan van Heerden, and to Prof. N.J.C. Schoeman, Prof. S. Koch, Prof., Margarat Mabugu and the other lecturers at the Department of Economics for their intellectual contributions throughout the period of my research. To my great friend and lecturer Dr. Johannes Jordaan I say, thank you and God bless.

My thanks to Maria Prozesky for her language editing.

**ECONOMIC DEVELOPMENT IN NIGERIA THROUGH THE AGRICULTURAL,  
MANUFACTURING AND MINING SECTORS: AN ECONOMETRIC APPROACH**

**DEGREE: PHD (ECONOMICS)**

**ABSTRACT**

In the 1960s, Nigeria was on a par, in terms of aspirations to attain a very high level of economic growth and development, with its fellow-oil producing and exporting countries such as Malaysia and Indonesia, but has since failed to keep pace with them. Nigeria's agricultural, manufacturing and mining and quarrying sectors have played a continuous and significant role in the development of the country's economy. The approval of the millennium development goals (MGDs) by the United Nations General Assembly therefore raises three pivotal questions for Nigeria. 1) Why is Nigeria still an underdeveloped and low-income country? 2) What should the country do to make rapid economic and social progress? and 3) How can it attain a high level of economic development and growth?.

This is the background of this study, which is an empirical investigation into the factors affecting Nigeria's bid to achieve sustainable economic growth and development with particular reference to such sectors as agriculture, manufacturing and mining and quarrying (solid minerals) over the period of 1970-2005. This involves the analysis of the relevance of the health care and education sectors and examination of impediments to past economic development, a development model applicable to Nigeria, the efforts made and the challenges facing the country in achieving the MDGs, and the role of foreign development partners in complementing Nigeria's development efforts.

The methodology adopted for this study is sectoral-econometric modelling, using the Engle-Yoo (1991) model, which contributes to bridging the gap seen in empirical studies in the application of a multivariate dynamic econometric cointegration model on the effect of domestic and foreign financial resources investment for the development of the growth sectors in the Nigerian economy. The model captures the essential linkages between the growth sectors and the country's efforts to achieve a high level of economic development.

The results from the simulations are broadly consistent with findings described in theoretical and empirical literature. There is a strong positive relationship between the gross output of the agricultural, manufacturing and mining and quarrying sectors and labour input and public capital expenditure for the growth sectors. Also there is a strong positive relationship between the agricultural credit guarantee scheme, fertiliser and the gross output of agriculture. Furthermore, the findings show a positive impact of the structural adjustment programme with the agricultural and manufacturing production. Dynamic simulation of results was undertaken to assess the path of the 10 percent dynamic adjustment (shocks) on the relevant exogenous variables and the response properties show remarkable and positive significant impact due to the shocks. The estimated actual and forecast values of the equations in the model show notable increase in the amount and growth of the gross domestic product of the real sectors in Naira billion from 2005 to 2008.

The study calls to question rigid government control over the mining and quarrying sector. The importance of mining and quarrying in accelerating the pace of economic growth in Nigeria should rather motivate the government to deregulate and reform the sector. This will enable the government to attract investors into the sector, while effectively planning to encourage the proliferation of small-scale artisan, medium-scale and large-scale miners. The deregulation of the mining and quarrying sector will boost production, growth and development through employment creation, increased income of household miners and upliftment of the social and economic status of the vast majority of Nigerians.

Some of the reasons identified for Nigeria's poor economic performance include: the serious effect of "Dutch disease", reflected in the country's inability to manage and diversify its oil wealth to transform and achieve dynamic industrial (manufacturing), agricultural, mining,

health and educational and other growth sectors. Nigeria also suffers the effects of a troubled political history, during which military rule persisted for extended periods.

This study shows the importance of improving the knowledge base for policymaking, where intersectoral linkages between economic and social factors can be identified, and direct and indirect macroeconomic policy effects discerned. This distinguishes the study from earlier work in Nigeria on development policy. Achieving a high level of economic development through transforming the country's real sectors will not only reduce poverty by providing food security, increased agricultural and industrial exports, increased per capita income and consumption, but will also bring about improved literacy and a healthy workforce and foster peace and security in Nigeria. In addition, success in transforming the real sectors will strengthen and broaden the productive base of the country, which currently relies heavily on the petroleum sector as the major earner of foreign exchange. In order to achieve a high level of economic development and growth, attention should be concentrated on channelling global financial resources to the above-mentioned sectors because of their strong linkages with and powerful value-added effect to the rest of the economy.

Under the new democratic dispensation, there ought to be large investment into the growth and support sectors from domestic and external sources if the country is to attain the international growth target of achieving a high and sustainable level of economic development. Therefore, with a strong will to become a patriotic civil society, stable and prosperous, and enough wisdom to elect leaders with good will and fairly good knowledge of the country's economy, great prospects lie before the Nigerian economy.

## TABLE OF CONTENTS

<b>ACKNOWLEDGEMENTS</b> .....	iv
<b>ABSTRACT</b> .....	v
<b>LIST OF TABLES</b> .....	xiii
<b>LIST OF FIGURES</b> .....	xv
<b>LIST OF ABBREVIATIONS AND ACRONYMS</b> .....	xvi
<b>CHAPTER ONE: INTRODUCTION</b> .....	1
1. 1 Introduction .....	1
1. 2 Background to the problem. ....	3
1. 3 Problem statement .....	12
1. 4 Objectives of the study .....	13
1. 5 Contribution and justification for the study .....	15
1. 6 Outline of the study. ....	16
<b>CHAPTER TWO: LITERATURE REVIEW OF ECONOMIC DEVELOPMENT: CONTEMPORAY ISSUES AND THEIR RELEVANCE TO NIGERIA'S ECONOMY</b> .....	18
2.1 Introduction .....	18
2.2 Overview of economic development .....	19
2.2.1 The concept and relevance of economic development .....	19
2.2.2 Economic development: the perspective of human development index (HDI).....	20
2.2.3 Economic development lesson for the developing countries .....	22
2.3 Overview of the Nigerian economy .....	28
2.3.1 Undiversified economic base of Nigeria .....	31
2.3.2 Weak manufacturing sector (industry).....	31
2.3.3 The growing incidence of poverty in the Nigerian economy .....	32
2.3.4 The impact of external debt burden on Nigerian economy .....	32
2.3.5 Evidence of corruption in the Nigerian economy .....	32
2.4 Development prospects of Nigeria .....	34
2.4.1 Liberalisation of the economy .....	34
2.4.2 Restructuring and privatisation programmes in the Nigerian economy .....	35
2.4.3 Financial sector liberalisation and policy reforms .....	36
2.4.4 Attraction of foreign private investment into the agricultural sector .....	37

2.4.5 Industrialisation policy and incentives for small, medium and large-scale Enterprises .....	37
2.4.6 Social and environmental services reforms in Nigerian economy.....	38
2.5 Evidence from development models in Asian countries.....	39
2.5.1 The adoption of special economic zones .....	39
2.5.2 Encouragement of private entrepreneurs and institutions .....	40
2.5.3 Adoption of sound macroeconomic policy management .....	40
2.5.4 Adoption of a labour intensive manufacturing strategy .....	41
2.5.5 Adoption of strategies to develop human capital .....	41
2.5.6 Increased productivity and rise in real wages .....	42
2.5.7 Mitigation of corruption in the economies .....	42
2.6 Overview and lessons from a Malaysian development model .....	42
2.7 Development model applicable to Nigeria .....	46
2.7.1 Efficient utilisation of agricultural potentials in the development process.....	46
2.7.2 Adoption of attractive manufacturing (industrial) incentives .....	48
2.7.3 Attraction of FDI into the economy .....	48
2.7.4 Outwardly-oriented or export-led development strategies through trade and regional integration .....	49
2.7.5 Private-entrepreneur driven development process .....	50
2.7.6 A need for a professional civil service .....	50
2.7.7 Human resources development .....	51
2.7.8 Information technology driven economy .....	52
2.8 Summary of the review findings and conclusions .....	52
<b>CHAPTER THREE: POLICY FRAMEWORK TO ACHIEVE THE MILLENNIUM DEVELOPMENT GOALS IN NIGERIA.....</b>	<b>56</b>
3.1 Introduction .....	56
3.2 Policy framework of the MDGs .....	57
3.3 The MDGs: efforts, progress and challenges in Nigeria .....	59
3.4 General appraisal and challenges facing the country in meeting the MDGs .....	64
3.5 The role of foreign partners in achieving the MDGs in Nigeria .....	66
3.5.1 Official Development Assistance (ODA) .....	66

3.6 Summary of the main findings and conclusions .....	78
<b>CHAPTER FOUR: THE RELEVANCE OF GROWTH IN NIGERIA’S SUPPORT SECTORS FOR ECONOMIC DEVELOPMENT.....</b>	<b>80</b>
4.1 Introduction .....	80
4.2 Relevance of the agricultural sector in Nigeria .....	82
4.2.1 Provision of food security .....	82
4.2.2 Provision of raw materials for domestic industries .....	85
4.2.3 Provision of foreign exchange from exports .....	85
4.2.4 Structural transformation in Nigeria .....	87
4.2.5 Provision of employment opportunities .....	87
4.2.6 Provision of large markets for industrial products .....	87
4.3 The relevance of the manufacturing sector in economic growth and development in Nigeria .....	88
4.3.1 Historical association with development .....	89
4.3.2 Inability to harness the potential in agriculture .....	89
4.3.3 Developing countries as agricultural societies .....	89
4.3.4 Manufacturing sector as complement to other sectors in job creation .....	89
4.3.5 Manufacturing as a relevant development strategy because of its efficient use of land resources .....	90
4.3.6 Industrialisation promoting national integration .....	90
4.3.7 The manufacturing sector providing additional income .....	90
4.3.8 Industrialisation inducing technological development .....	91
4.3.9 Highly industrialised nations and the status of superpower .....	91
4.4 Relevance of mining and quarrying (solid minerals) in economic growth and development of Nigeria .....	92
4.5 Relevance of the growth support sectors, education and health, in achieving economic development in Nigeria .....	98
4.5.1 Education as condition and support sector for MDGs in Nigeria .....	98
4.5.2 The importance of health care service as growth support sector for attaining the MDGs in Nigeria .....	105
4. 6 Summary of the main findings and conclusions .....	107
<b>CHAPTER FIVE: THEORETICAL AND ANALYTICAL FRAMEWORK .....</b>	<b>109</b>
5.1 Introduction .....	109
5.2 The concept of cointegration and error-correction (ECM) econometrics methodology.....	111
5.3 Structure of the model .....	115

5.4 Model for agriculture .....	116
5.5 Basic hypotheses, assumptions and expectations for each variable in the cointegration agricultural model .....	117
5.6 Model for the manufacturing sector .....	119
5.7 Basic hypotheses, assumptions and expectations for each variable in the cointegration manufacturing model .....	120
5.8 Model for the mining and quarrying sector .....	121
5.9 Hypotheses and basic expectations for each of the variables included in the mining and quarrying (solid minerals) model.....	122
5.10 Summary of the main findings and conclusions .....	122
<b>CHAPTER SIX: EMPIRICAL ANALYSIS AND PRESENTATION OF ESTIMATED RESULTS .....</b>	<b>124</b>
6.1 Introduction .....	124
6.2 The model for agriculture .....	125
6.2.1 Estimation results of long-run cointegration equation .....	125
6.2.2 Estimation results of the error correction model (ECM) .....	126
6.2.3 Diagnostic statistical testing.....	127
6.2.4 Cointegration correction and adjusted coefficients. ....	127
6.2.5 Analysis of the results of the estimated models for agriculture and their implications .....	130
6.3 The model for manufacturing .....	131
6.3.1 Estimation results for long-run cointegration equation .....	131
6.3.2 Estimation results of the error correction model (ECM).....	132
6.3.3 Diagnostic statistical testing. ....	134
6.3.4 Cointegration correction and adjusted coefficients .....	134
6.3.5 Analysis of the results of the estimated manufacturing model and their implications .....	137
6.4. Model for the mining and quarrying sector.....	137
6.4.1 Estimation results of long-run cointegration equation.....	138
6.4.2 Estimation results of the error correction model (ECM).....	139
6.4.3 Diagnostic statistical testing .....	140
6.4.4 Cointegration correction and adjusted coefficients .....	141
6.5. Dynamic simulation and response property of the model.....	144
6.5.1 Policy shocks .....	145
6.5.2 Forecasts.....	149

6.6 Dynamic simulation of the results and the policy-scenarios.....	153
6.7 Summary of the main findings and conclusion.....	155
CHAPTER SEVEN: SUMMARY OF MAJOR FINDINGS AND POLICY IMPLICATIONS, CONCLUDING REMARKS, LIMITATIONS, RECOMMENDATIONS AND SUGGESTIONS FOR FURTHER WORK.....	
7.1 Summary of major findings and policy implications .....	158
7.2 Concluding remarks .....	163
7.3 Limitation of the study .....	164
7.4 Policy recommendations .....	164
7.5 Suggestions for further work .....	166
