## Acknowledgement

I wish to extend my heartfelt gratitude to the numerous individuals without whom the completion of this research would be difficult:

First and foremost, I thank God for the wonderful opportunity that He gave me during the process of this study. This work was achieved through the Lord's help and for that I am thankful to Him, and hope that He will bless even this work.

I would like to express a special word of appreciation to my supervisor, Professor P.G.J Meiring and my co-supervisor, Arno Meiring. Their acute insight, reliable comments and fruitful suggestions have given me strength to take on this study up to where I am. May our beloved God bless you and continue with good work as you did with me.

Finally, I want to thank my families who have provided support and encouragement. Especially my study has been facilitated by the patience and support of my wife, Eun-Hye Lee, without whose loving support and prayers, this research would never have become a reality. Also, I would like to dedicate this thesis to my three children, Ha-Eun, Yea-Eun, and Sung-Eun. Thank you for the patience you showed to me during this study.

I am grateful also to my family for their financial support and prayer, particularly my parent and parent-in-law in South Korea. I would also like to express my sincere appreciation to my community in South Korea, specifically the Se-Kang (light of world) full-gospel church congregation, for their fellowship and constant prayers.
