

## PLANTELYS

Die meegaande twee lyste is eers van Setswana na die wetenskaplike benaming en Afrikaans, en dan in die tweede lys van Latyn na Setswana met 'n oog op verdere navorsingswerk. Hierdie lyste van plantname is soos in die veld versamel saam met die *dingaka*. In feitlik al die gevalle is die name deur hulle self verskaf in die veld. Die verwysingsnommers is by daardie geleentheid aan die plante toegeken, in die teks gebruik en ook is eksemplare van die plante gepers en met die verwysingsnommer na die Nasionale Herbarium in Pretoria gestuur vir identifikasie. Die teksnommers is om aan te dui in watter tekste die gebruik van die plante beskrywe word.

Met groot dank en erkentlikheid word die amptenare aldaar se hulpvaardigheid vermeld.

Nadat die wetenskaplike naam terug ontvang is en indien bekend, ook die Afrikaanse naam bygevoeg is, is meegaande lyste opgestel, o a. met verwysing na: Watt J.M en Breyer-Brandwijk, M. 1962, en C.A. Smith, 1966 en O.B. Miller se aangehaalde werke, veral vir plante waarvan nie eksemplare versamel is nie.

Plant-name wat net onder die *dingaka* bekend is is met (Nga ) aangedui. Verskeie plante het 3 of tot 5 name. Sommige plante is 'manlik', met 'n kragtige uitwerking en is met 'n (M) aangedui; ander is vroulik en word met 'n (F) onderskei. Tswana plantname word met 'n hoofletter geskryf, vgl. ook Letty 1962, om makliker uitgeken te word in die teks, veral aangesien talle van die name nou vir die eerste keer in druk verskyn en dit dus van belang is om die name aan te teken en uit te ken. Afrikaanse spelling is sonder hoofletters, soos nog in 1968 p.28 deur die Taalkommissie van die Suid-Afrikaanse Akademie vir Wetenskap en Kuns voorgeskryf.
