*The highest wisdom has but one science, the science  
of the whole.* (Leo Tolstoy, War and Peace)

*To my parents*

## ACKNOWLEDGEMENTS

I would like to express my sincere thanks to:

- ◆ Prof. Dr G. V. Ferreira, the supervisor of this thesis, for his professional guidance
- ◆ Prof. C.F. Smit and Dr M.J. Van der Linde for their support and assistance with statistical data
- ◆ My husband for his loving support and motivation
- ◆ My children for their loving encouragement
- ◆ Mrs I. Noomé for her invaluable assistance with the language editing, layout and final printing
- ◆ The staff of the Merensky library for their friendly and professional service
- ◆ The teachers and learners whose willingness to participate in the survey and interviews made this study possible.

*To God, the honour and the glory for blessings undeserved!*

## **SUMMARY**

# **THE ACCOMMODATION OF THE BLACK GRADE NINE LEARNER IN A TRADITIONALLY WHITE SCHOOL**

by

**Petro Erasmus**

**SUPERVISOR : Prof. Dr G.V. Ferreira**

**DEPARTMENT : Orthopedagogics**

**DEGREE : Philosophiae Doctor**

In South Africa, First World and Third World elements exist side by side, representing different social, economic and political realities. The current educational dispensation advocates the exposure of members of various cultures to one another at school.

This study focuses on the quality of accommodation and possible accompanying problems and the degree of belonging experienced by black learners attending traditionally white schools. Differences between the cultural orientation, socio-economic situation and historico-political background of black learners, as opposed to the orientation of the schools they attend, could hinder their adjustment to these schools. Additional influencing factors could be these learners' expectations of the self, school and society, as well as a possible educational backlog.

This study endeavoured to research and describe black learners' life-worlds, especially their experience of the multicultural school environment in traditionally white schools. The aim of the empirical research was to identify any specific educational and underlying emotional needs that could arise from hailing from a different cultural background. This aim was realised firstly by undertaking a theoretical investigation focusing on the literature on the subject, and secondly by an empirical investigation in two phases into various aspects of black Grade Nine learners' life-worlds.

In the theoretical investigation, which served as a basis for the empirical study, an attempt was made to research the cultural and home situation of Grade Nine black learners. The discussion of problems that these learners could encounter within traditionally white schools was based on an eighteen-theme "culture-general framework" applied to the South African school situation.

The empirical research involved visits to a sample of eight traditionally white schools in Gauteng. Qualitative and quantitative methods were combined in a two-phase research design. In the quantitative phase, a questionnaire directed at the learners was applied to a sample of 332 learners. The questionnaire gathered biographical information, and data on the family, individual and school/cultural dimensions to identify stumbling blocks to and facilitating elements in the process of accommodation in these schools. The qualitative phase consisted of participating data collection techniques, namely sixteen semi-structured focus interviews with eight selected learners and eight teachers, one learner and one teacher from each of the eight participating schools. The interviews concentrated on the learners' and teachers' feelings regarding the same dimensions addressed by the questionnaire. The combination of these two procedures allowed a holistic and more in-depth picture of the nature of the learners' experiences and needs at school to emerge. The validity of the eventual conclusions was heightened by the process of triangulation between the theoretical, qualitative and quantitative findings.

Racism was identified as a prominent stumbling block, and effective accommodation strategies were lacking at schools. Learners displayed definite emotional and social needs within the school situation. On the other hand, several facilitating elements are already present in these schools and could be developed further. This challenging situation is addressed by means of various guidelines aiming to improve the quality of accommodation within schools. Suggestions for future research are also made.

Key words:

- black Grade Nine learner
- traditionally white school
- school accommodation

- educational/emotional needs
- culture-general framework
- stumbling blocks
- facilitating elements
- two-phase research design
- quantitative/qualitative research
- racism
- multiculturalism and anti-racism
- intercultural interaction
- double-bind situation
- holistic approach
- whole-school approach

## **SAMEVATTING**

# **DIE AKKOMMODASIE VAN DIE SWART GRAAD NEGE LEERDER IN 'N TRADISIONEEL-BLANKE SKOOL**

deur

**Petro Erasmus**

**PROMOTOR** : **Prof. Dr. G V Ferreira**

**DEPARTEMENT** : **Ortopedagogiek**

**GRAAD** : **Philosophiae Doctor**

In Suid-Afrika bestaan Eerste en Derde wêreldes sy aan sy en is verteenwoordigend van verskillende sosiale, ekonomiese en politieke realiteite. Die huidige onderwysbedeling bepleit die blootstelling van verskeie kulture aan mekaar op skoolvlak.

Hierdie studie fokus op die kwaliteit van die akkommodasie en moontlike meegaande probleme en die graad van samehorigheid wat swart leerders in tradisioneel-blanke skole ervaar. Swart leerders se kulturele oriëntasie, sosio-ekonomiese situasie en histories-politiese agtergrond, in teenstelling met dié van hulle skool, kan hulle aanpassing by hierdie skole bemoeilik. Dit wil voorkom of hulle verwagtinge van hulself, skool en samelewing, sowel as 'n moontlike opvoedkundige agterstand ook hul ervaring van akkommodasie kan beïnvloed.

Die doel van hierdie studie is om swart leerders se leefwêreldes, veral hulle ervaring van die multikulturele skoolomgewing in 'n voorheen tradisioneel-blanke skool, na te vors. Die spesifieke doelstellings van die empiriese navorsing was om die opvoedkundige en onderliggende emosionele, sowel as enige ander behoeftes wat kan voortspruit uit verskillende kulturele agtergronde, te identifiseer. Hierdie doelstellings is gerealiseer deur eerstens 'n teoretiese ondersoek en tweedens deur 'n empiriese ondersoek na verskeie aspekte van die leefwêreldes van swart Graad Nege leerlinge te loods.

In die teoretiese ondersoek, wat dien as basis vir die empiriese studie, is 'n poging aangewend om die kulturele en huislike gesitueerdheid van Graad Nege swart leerlinge na te vors. Probleme wat hierdie leerlinge binne die tradisioneel-blanke skool kon teekom, was gebaseer op 'n agttien-tema "kultuur-algemene raamwerk" wat toegepas is op die Suid-Afrikaanse situasie.

Die empiriese ondersoek het bestaan uit besoeke aan agt tradisioneel-blanke skole in Gauteng. Kwalitatiewe en kwantitatiewe metodes is gekombineer gedurende die empiriese studie. Gedurende die kwantitatiewe ondersoek is 'n vraelys gemik op 'n steekproef van 332 leerders gebruik. Die vraelys het biografiese inligting, data oor die gesins-, individuele en skool-/kulturele dimensies ingewin om struikelblokke en fasiliterende elemente in hierdie skole te identifiseer. Die kwalitatiewe ondersoek het bestaan uit deelnemende data-insamelingstegnieke, naamlik sestien semi-gestruktureerde fokusonderhoude met agt leerders en agt onderwysers, een leerder en een onderwyser van elk van die agt deelnemende skole. Die kombinasie van hierdie twee prosedures verteenwoordig 'n holistiese en meer in-diepte prentjie van die aard van leerders se ervarings en behoeftes op skool. Die geldigheid van die uiteindelijke gevolgtrekkings is aangehelp deur die proses van triangulasie tussen die teoretiese, kwalitatiewe en kwantitatiewe bevindings.

Rassisme is duidelik 'n prominente struikelblok, en doeltreffende akkommodasie-strategieë was nie in plek by die skole nie. Leerders het spesifieke emosionele en sosiale behoeftes getoon binne die skoolsituasie. Aan die ander kant was daar ook verskeie fasiliterende elemente teenwoordig in die skole, wat dan ook verder uitgebou kan word. Hierdie uitdagende situasie word aangespreek deur verskeie riglyne wat poog om die kwaliteit van akkommodasie in skole te verhoog. Voorstelle vir verdere navorsing word ook gemaak.

Sleutelwoorde:

- swart Graad Nege leerling
- tradisioneel-blanke skool
- skoolakkommodasie
- opvoedkundige/emosionele behoeftes

- kultuur-algemene raamwerk
- struikelblokke
- fasiliterende elemente
- twee-fase navorsingsontwerp
- kwantitatiewe/kwalitatiewe navorsing
- rassisme
- multikulturalisme en anti-rassisme
- interkulturele interaksie
- “double-bind” situasie
- holistiese benadering
- hele-skool benadering

5.4.2.6	<i>Approach to asking questions in class</i>	163
5.4.2.7	<i>Discipline</i>	164
5.4.2.8	<i>Personal responsibility</i>	165
5.4.2.9	<i>Honesty</i>	166
5.4.2.10	<i>Personal input</i>	167
5.4.2.11	<i>Corporal punishment</i>	169
5.4.3	Racism	169
5.4.3.1	<i>What would learners change about their school?</i>	170
5.5	RELATIONSHIPS BETWEEN VARIABLES	171
5.5.1	Relationship between insults (V93) and other variables	171
5.5.1.1	<i>Relationship between the frequency of racist insults (V93) and gender (V3)</i>	172
5.5.1.2	<i>Relationship between the frequency of racist insults (V93) and the nature of intercultural relations at school (V92)</i>	173
5.5.2	Relationship between keeping picked-up goods (V67) and other variables	175
5.5.2.1	<i>Relationship between keeping picked-up goods (V67) and the location of the home (V40)</i>	176
5.5.3	Relationship between condoning latecoming for school (V83) and other variables	177
5.5.3.1	<i>Relationship between condoning latecoming for school (V83) and the nature of intercultural relations at school (V92)</i>	177
5.5.3.2	<i>Relationship between condoning latecoming for school (V83) and time spent on schoolwork (V70)</i>	178
5.5.4	Relationship between condoning loud talk (V84) and other variables	180
5.5.4.1	<i>Relationship between condoning loud talk (V84) and feeling happy/unhappy when at school (V59)</i>	180

5.5.5	Relationship between regarding eye contact as disrespectful (V85) and other variables	182
5.5.5.1	<i>Relationship between regarding eye contact as disrespectful (V85) and the location of the home (V40)</i>	182
5.5.6	Relationship between standing distance when talking to someone (V86) and other variables	183
5.5.6.1	<i>Relationship between standing distance (V86) and feeling happy/unhappy when at school (V59)</i>	184
5.5.7	Relationship between borrowing without permission (V91) and other variables	185
5.5.7.1	<i>Relationship between borrowing without permission (V91) and working hard at a subject the learner dislikes (V101)</i>	185
5.5.8	Relationship between approving of the writing of exams to pass (V109) and other variables	187
5.5.8.1	<i>Relationship between approving of the writing of exams to pass (V109) and time spent on schoolwork (V70)</i>	187
5.5.9	Relationship between the handling of trouble at school (V110) and other variables	189
5.5.9.1	<i>Relationship between the handling of trouble at school (V110) and the nature of intercultural relations at school (V92)</i>	189
5.5.9.2	<i>Relationship between the handling of trouble at school (V110) and working hard at a subject the learner dislikes (V101)</i>	190
5.5.10	Relationship between the number of close friends from another race group (V57) and feeling happy/unhappy when at school (V59)	192
5.5.11	Relationship between the nature of intercultural relations at school (V92) and other variables	192
5.5.11.1	<i>Relationship between the nature of intercultural relations at school (V92) and condoning hitting somebody (V111)</i>	193
5.5.12	Relationship between self-esteem (V46-V55) and other variables	194
5.5.12.1	<i>Relationship between self-esteem (V46-V55) and the location of the home (V40)</i>	195
5.5.12.2	<i>Relationship between self-esteem (V46-V55) and the nature of intercultural relationships at school (V92)</i>	195
5.5.12.3	<i>Relationship between self-esteem (V46-V55) and time spent on schoolwork (V70)</i>	196
5.5.12.4	<i>Relationship between self-esteem (V46-V55) and the desired educational level (V42)</i>	197
5.5.12.5	<i>Relationship between self-esteem (V46-V55) and encouragement from parents to do homework (V77)</i>	197

5.5.12.6	<i>Relationship between self-esteem (V46-V55) and the ability to discuss personal problems with the parents (V79)</i>	198
5.6	SYNTHESIS	199

#### **LIST OF TABLES IN APPENDIX D**

Table D1:	Comparison between the frequency of racist insults (V93) with the language medium of the school (no variable)	346
Table D2:	Comparison between the frequency of racist insults (V93) with type of school preferred (V58)	346
Table D3:	Comparison between keeping picked-up goods (V67) and the nature of intercultural relationships at school (V92)	347
Table D4:	Comparison between keeping picked-up goods (V67) and feeling happy/unhappy when at school (V59)	347
Table D5:	Comparison between keeping picked-up goods (V67) and the desired educational level (V42)	348
Table D6:	Comparison between keeping picked-up goods (V67) and job aspirations (V45)	349

Table D7:	Comparison between keeping picked-up goods (V67) and time spent on schoolwork (V70)	350
Table D8:	Comparison between keeping picked-up goods (V67) and working hard at a subject the learner dislikes (V101)	351
Table D9:	Comparison between condoning latecoming for school (V83) and the location of the home (V40)	351
Table D10:	Comparison between condoning latecoming for school (V83) and feeling happy/unhappy when at school (V59)	352
Table D11:	Comparison between condoning latecoming for school (V83) and the desired educational level (V42)	352
Table D12:	Comparison between condoning latecoming for school (V83) and job aspirations (V45)	353
Table D13:	Comparison between condoning latecoming for school (V83) and working hard at a subject the learner dislikes (V101)	353
Table D14:	Comparison between condoning loud talk (V84) and the location of the home (V40)	354
Table D15:	Comparison between condoning loud talk (V84) and the nature of intercultural relations at school (V92)	354
Table D16:	Comparison between condoning loud talk (V84) and the desired educational level (V42)	355
Table D17:	Comparison between condoning loud talk (V84) and job aspirations (V45)	356
Table D18:	Comparison between condoning loud talk (V84) and time spent on schoolwork (V70)	357
Table D19:	Comparison between condoning loud talk (V84) and working hard at a subject the learner dislikes (V101)	357
Table D20:	Comparison between regarding eye contact as disrespectful (V85) and the nature of intercultural relations at school (V92)	358
Table D21:	Comparison between regarding eye contact as disrespectful (V85) and feeling happy/unhappy when at school (V59)	358
Table D22:	Comparison between regarding eye contact as disrespectful (V85) and the desired educational level (V42)	359
Table D23:	Comparison between regarding eye contact as disrespectful (V85) and job aspirations (V45)	360
Table D24:	Comparison between regarding eye contact as disrespectful (V85) and time spent on schoolwork (V70)	361
Table D25:	Comparison between regarding eye contact as disrespectful (V85) and working hard at a subject the learner dislikes (V101)	361

Table D26:	Comparison between standing distance when talking to someone (V86) and the location of the home (V40)	362
Table D27:	Comparison between standing distance when talking to someone (V86) and the nature of intercultural relations at school (V92)	362
Table D28:	Comparison between standing distance when talking to someone (V86) and the desired educational level (V42)	363
Table D29:	Comparison between standing distance when talking to someone (V86) and job aspirations (V45)	364
Table D30:	Comparison between standing distance when talking to someone (V86) and time spent on schoolwork (V70)	365
Table D31:	Comparison between standing distance when talking to someone (V86) and working hard at a subject the learner dislikes (V101)	365
Table D32:	Comparison between borrowing without permission (V91) and the location of the home (V40)	366
Table D33:	Comparison between borrowing without permission (V91) and the nature of intercultural relations at school (V92)	366
Table D34:	Comparison between borrowing without permission (V91) and feeling happy/unhappy when at school (V59)	367
Table D35:	Comparison between borrowing without permission (V91) and the desired educational level (V42)	367
Table D36:	Comparison between borrowing without permission (V91) and job aspirations (V45)	368
Table D37:	Comparison between borrowing without permission (V91) and time spent on schoolwork (V70)	369
Table D38:	Comparison between approving of the writing of exams to pass (V109) and the location of the home (V40)	369
Table D39:	Comparison between approving of the writing of exams to pass (V109) and the nature of intercultural relations at school (V92)	370
Table D40:	Comparison between approving of the writing of exams to pass (V109) and feeling happy/unhappy when at school (V59)	371
Table D41:	Comparison between approving of the writing of exams to pass (V109) and the desired educational level (V42)	372
Table D42:	Comparison between approving of the writing of exams to pass (V109) and job aspirations (V45)	373
Table D43:	Comparison between approving of the writing of exams to pass (V109) and working hard at a subject the learner dislikes (V101)	374
Table D44:	Comparison between the handling of trouble at school (V110) and the location of the home (V40)	374

Table D45:	Comparison between the handling of trouble at school (V110) and feeling happy/unhappy when at school (V59)	375
Table D46:	Comparison between the handling of trouble at school (V110) and the desired level of education (V42)	375
Table D47:	Comparison between the handling of trouble at school (V110) and job aspirations (V45)	376
Table D48:	Comparison between the handling of trouble at school (V110) and time spent on schoolwork (V70)	377
Table D49:	Comparison between the nature of intercultural relations at school (V92) and feeling happy/unhappy when at school (V59)	377
Table D50:	Comparison between the nature of intercultural relations at school (V92) and close friends in another race group (V57)	378
Table D51:	Comparison between the nature of intercultural relations at school (V92) and type of school preferred (V58)	379
Table D52:	Comparison between the nature of intercultural relations at school (V92) and keeping picked-up goods (V67)	380
Table D53:	Comparison between the nature of intercultural relations at school (V92) and borrowing without permission (V91)	381
Table D54:	Comparison between the nature of intercultural relations at school (V92) and way to solve an argument (V113)	381
