I wish to sincerely extend my heart-felt thanks and gratitude to, and humble appreciation for, the following for their individual and/or collective contribution, inspiration and encouragement that facilitated the completion of this thesis:

*******The 1994 Guidance teachers, staff and standard ten students attached to the five high schools, namely Ratshepo, J.M. Ntsime, Kgabutle, Letsatsing and Barolong in the now North-West province. Without their co-operation and assistance, the success of this study as a whole would have been greatly grounded.

*******My family - including immediate and distant relatives and friends - for their constant and firm moral support, encouragement and interest in this work. My father, Mr Fish Mmoso Serialong Molefe who despite no formal education at all, taught me how to catch fish especially through the frequent, slow and staggering readings of his favourite biblical accounts of Moses and Aaron in Exodus chapter seven. My seventy-five year-old mother, Mrs Christinah Kebaletswe Molefe who, despite her standard four formal education, insisted on daily checking of my school work till I passed standard four. Her only severe and prompt disciplinary action against my playing truancy almost every afternoon of the first three months as a standard one pupil was a necessary cure there and then. My wife, Mrs J.D. Molefe, never waivered to relieve me of many household chores

expected of any normal husband. I feel humbled by her honour to care for the daily needs of our only daughter and three sons.

*******My two outstanding medical practitioners, Drs H.A. and S.O. Gutta for their unflinching relentlessness and expert medical attention to me particularly during my nine months' suspension from work from 15 August 1990 up to 14 May 1991 by the now defunct Republic of Bophuthatswana.

*******Lawyers for Human Rights at the Pretoria branch generally, and particularly Ms L.D. Seafield, who stood by me to see to it that justice is done.

*******Dr J. Landman, Mrs G. Sauer and others of the Human Sciences Research Council for the wonderful piece of work on the research test materials.

*******My promoter Professor and Doctor C.D. Jacobs not only for his readiness and willingness to offer me guidance where needed, but also for his pertinent humours that are always conducive to learning climate. His expertise and commitment to my studies are praise-worthy.

*******Almighty God, The Creator, for His praise-worthy disposal of everything I have proposed. Through his Guidance, Love and Light, our beloved country and the poeple's gallant and valiant efforts and negotiations have been justly rewarded with democracy, hope for peace and everlasting faith.

I am not unconscious of my physical incapacitation that is usually unassociated with my conscious mind. I am not the smartest of the smart; yet, I often marvel at the highest level of the academic point to which my feet were elevated by THE INVISIBLE HAND.
