Dear Hendriette Jansen van Vuuren:

This email is to confirm permission for the pre-print of the paper:

Meyer, J.P., Nwosu, P.N. & Sharifpur, M. 2014. A review and parametric investigation into nanofluid viscosity models. *Journal of Nanotechnology in Engineering and Medicine*, 5 : 1-11

in the University of Pretoria UPSPace limited to internal use. The pre-print should include full citation to ASME and a link back to the version of record on the ASME Digital Collection.

ASME supports institutional repositories and funder mandates regarding access and currently reviews requests on a case-by-case basis.

Sincerely,

Colin
