List of Figures

Figure 1.	A spatial timeline depicting the development of Church Square from 1855 to 1970. The square as remained spatial unchanged since this time. (Van der Waal Collection, University of Pretoria, 1970-).	2
Figure 2.	(Previous spread) A panorama of the south western facade of Church Square taken in front the Old Raadsaal. The lower recessed facade, towards the left of the image, was added to the Capitol Theatre precinct, refer to Context chapter. (Author, 2016)	6
Figure 3.	A dressing room located backstage (Author, 2016). Located in the western side of the fly tower showing the current condition of the majority of the spaces in this section of the Theatre.	8
Figure 4.	(Previous page) The Grand Foyer, as referred to by the proposal drawings, in its current condition (Author, 2016). This area as well as the adjacent spaces are relatively well maintained when compared to the auditorium space. (Pictured right) Events, private and restaurant hosted extent from the Entrance Foyer into the Grand Foyer and the adjacent spaces.	16
Figure 5.	(Right) The auditorium space is currently being used as parking garage since 1981 (Author, 2016). Refer to Context chapter.	16
Figure 6.	(Left) A view from the Promenade into the Grand Foyer looking (east) towards the Entrance Foyer (Author, 2016). The Grand Stair can be seen to on the right (south) of the image. The doors on the left (north) of the lower level of the Grand Foyer, now barricaded, lead into the Auditorium on the Orchestra Floor. The Balcony is accessed from the north of the Promenade level. An understanding of the intricacies of the details and ornamentation that once adorned the Theatre can begin to be appreciated in this image.	19
Figure 7.	(Chapter page) Looking up at a portion of the western facade of the Ou Raadsaal building opposite from the Capitol Theatre (Author, 2016).	28

Fig. 232: *Graflex Speed graphic large format camera, produced over a similar period to that of the heyday of the Capitol Theatre. (Author, 2016)*

Figure 8.	(Previous page) Topographical drawing of Pretoria highlighting the Cardo and Decumanus and the Capitol Theatre (Author, 2016). Adapted from GWA (2013) City of Tshwane Inner City Precinct drawing.28
Figure 9.	(Right) The proposed movement of the Capitol Cities from Bloemfontein (Judicial Capital) and Cape Town (Legislative Capital) to Pretoria (Author, 2016).....	.28
Figure 10.	(Right) Sketches of Jordaan (1989) depicting the principal of the Cardo and Decomanus in a city layout as well as the development of Pretoria from 1850 through to 1950.30
Figure 11.	(Right) A map showing the eastwards movement of development occurring in Pretoria (Author, 2016). Drawing adapted from Google Earth Imagery (2016)	
	The most easterly centre is the historic city centre of Pretoria. In recent years there has been an increase in development in close proximity to the University of Pretoria in the Hatfield area. This is due to the growing residential demands required expansion of sport facilities in the area. Depicted by the central ring. The Most easterly growth point is that of Menlyn that is retail and business orientated with some residential projects.32
Figure 12.	(Right) The current functions of Pretoria city centre (Author, 2016). Drawing adapted from GWA Studios (2013)	
	The extents of the focus area depicted extends from Pretoria Train station, Church Square and the Union Buildings.34
Figure 13.	(Right) The three Capital Districts, Administrative, Judicial and Legislative with the imported functions of the Parliament Supreme Court of Appeal shown (Author, 2016). Drawing adapted from GWA Studios (2013)36
Figure 14.	(Left) Nompandolo Mkatshwa Wits SRC President-Elect (at the time of the protest) leading the Fees Must Fall protest on the 23 October 2015. (Photographer: Longari, 2015).39
Figure 15.	(Top) Route taken by the 1913 march against military conscription. Originating in Church Square and moving	

	eastwards to the Union Buildings (Author, 2016). Drawing adapted from GWA Studios (2013)	.42
Figure 16.	(Middle) 1920 Railway protest again racial exclusion from first class coaches that took place at Pretoria Train Station (Author, 2016). Drawing adapted from GWA Studios (2013)	.42
Figure 17.	(Left) 1956 Womens march against pass laws. Participants gathered at the Pretoria Train Station and marches moved north up toward Church Square and the eastwards to the Union Buildings (Author, 2016). Drawing adapted from GWA Studios (2013)	.42
Figure 18.	(Top) 3 April 2014 Protest at the State of the Capital Address at Pretoria City Hall (Author, 2016). Drawing adapted from GWA Studios (2013)	.43
Figure 19.	(Middle) 23 October 2015 The Fees Must Fall protest, originating at Burger's Park and Hatfield converging at the Union Buildings (Author, 2016). Drawing adapted from GWA Studios (2013)	.43
Figure 20.	(Left) 16 December 2015 The Zuma Must Fall protest, originating at Burger's Park and Hatfield converging at the Union Buildings (Author, 2016). Drawing adapted from GWA Studios (2013)	.43
Figure 21.	(Above) The future protest route of the Capital City (Author, 2016). Drawing adapted from GWA Studios (2013)	.44
Figure 22.	(Right) Enlarged map of the future protest route (Author, 2016). Drawing adapted from GWA Studios (2013)	.44
Figure 23.	(Right) Church Square, an image taken from the roof top of the Barclays Bank building looking towards the western	

facade of the Church Square. (Photograph: S.A. Panorama XII, 1971)

The Square has remained largely unchanged since. However, the Capitol Theatre, seen in the top left (south west) corner, was still operational at this time albeit three years prior to its sale and subsequent abandonment.46

Figure 24. (Right) " Reconstruction Drawing NH of G-Church, Church Square, Pretoria" (Translated Afrikaans description of drawing)
 (Van Der Waal Collection, University of Pretoria. 1986)

The plan of the church is overlayed on to the plan of the contemporary Church Square48

Figure 25. (Top) The NH of G- Church from Van Der Waal's (1986) reconstruction drawing.
 (Van Der Waal Collection, University of Pretoria. 1900-1902)
50

Figure 26. (Middle) The south west corner of the Church Square.
 (Van Der Waal Collection, University of Pretoria. 1900-1902),
 showing the plinth that was intended for the Paul Kruger Statue. On the left of the frame, the western corner of the church can be made out.
50

Figure 27. (Left) A view of the south west corner of Church Square know as "The Oaks"
 (Van Der Waal Collection, University of Pretoria. 1897)
 Beyond the oak tree was the location of the Presidents Theatre and later on the Capitol Theatre.50

Figure 28. (Top) The Sammy Marks Fountain that replaces the plinth intended for the statue of Paul Kruger.
 (Van Der Waal Collection, University of Pretoria. 1906-1911)
51

Figure 29. (Middle) The Reserve Investment Building is completed (right of frame)
 (Van Der Waal Collection, University of Pretoria. 1906-1911)
51

Figure 30.	(Left) A western view of Church Square, 20 May 1910. (Van Der Waal Collection, University of Pretoria. 1910) South Africa is granted the status of the independent dominion under Britain. The shape of the crowd is similar to that of current design of Church Square.51
Figure 31.	Panorama taken from the Ou Raadsaal building on 20 May 1910 (Van Der Waal Collection, University of Pretoria. 1910) South Africa is granted the status of the independent dominion under Britain. The shape of the crowd is similar to that of current design of Church Square (Fig. 32).53
Figure 32.	A survey drawing of Church Square. (Author: Strauss, 1984)54
Figure 33.	(Top) A view towards Standard Bank and Tudor Chambers (Van Der Waal Collection, University of Pretoria. Date unknown)56
Figure 34.	(Middle) A view eastward down Church Street, Tudor Chamber from the part of the threshold into Church Square. (Van Der Waal Collection, University of Pretoria. Date unknown)56
Figure 35.	(Left) The south western facade of Church Square, the infrastructure for the electric trams can be seen in this image. (Van Der Waal Collection, University of Pretoria. Date unknown)56
Figure 36.	(Right) Albrech Holm sketches of some of the building facade that make up the edges of Church Square. (Author:Holm, 1989).56
Figure 37.	(Top) The Palace of Justice and Church Square during Republic day. (Photographer: Unknown, 1961)58
Figure 38.	(Middle) Taken from the Barclays Bank building. The Capitol Theatre can be seen on the left of the image. (Van Der Waal Collection, University of Pretoria. Date Unknown)58

Figure 39.	(Left) The south western facade of Church Square, the infrastructure for the electric trams can be seen in this image. (Van Der Waal Collection, University of Pretoria. Date unknown)58
Figure 40.	(Top) An ANC Youth League Poster calling for the removal of the Paul Kruger Statue. (Author: ANCYL Tshwane Region, 2015)59
Figure 41.	(Middle) Green Paint covering the north western Burghers on the plinth of the Paul Kruger Statue. (Photographer: Makgatho, 2015)59
Figure 42.	(Left) Looking toward the Paul Kruger statue from the southern facade of the Square. A security fence that was erected after the Kruger Must Fall protests of 2015. (Author, 2016).59
Figure 43.	The new erected security fence reinforced by a significant amount of razor wire. In the background the Standard bank, Ou Raadsaal, and Transvaal Provincial Administration (TPA) buildings can be clearly seen. (Photographer: McDonald, 2015)60
Figure 44.	(Top) Location of the Capitol Theatre in relation to Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)62
Figure 45.	(Middle) The current identity of Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)62
Figure 46.	(Left) Vehicular access (Author, 2016). Drawing adapted from GWA Studios (2013)62
Figure 47.	(Top) The intended edge conditions of Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)63

Figure 48.	(Middle) Occupation of the supportive edges by private programs (Author, 2016). Drawing adapted from GWA Studios (2013)	.63
Figure 49.	(Left) "Breaks" in the urban fabric (Author, 2016). Drawing adapted from GWA Studios (2013)	.63
Figure 50.	(Left) A newspaper clipping showing the vision for the new Church Square. (Van der Waal Collection, University of Pretoria, 1971)	.65
Figure 51.	(Top) An Architects impression of the 1970's Church Square vision. (Hefer, 1971: 156)	.65
Figure 52.	(Middle) Church Square proposal drawing No. 6, S.A. Architectural Record , 1962 (Van der Waal Collection, University of Pretoria, 1962)	.65
Figure 53.	(Right) Alternative Church Square proposal by Stadskern Herontwikkeling (Van der Waal Collection, University of Pretoria, 1960's)	.65
Figure 54.	(Left) Perspective of the Church Square Proposal Plan No 6 (S.A. Architectural Record , 1962)	.67
Figure 55.	(Top) The new edge conditions of Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)	.68
Figure 56.	(Middle) Judicial and public functions of the edges (Author, 2016). Drawing adapted from GWA Studios (2013)	.68
Figure 57.	(Left) Proposed vehicular access (Author, 2016). Drawing adapted from GWA Studios (2013)	.68
Figure 58.	(Top) The new public identity of Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)	

69
Figure 59.	(Middle) Proposed public ground floor programs (Author, 2016). Drawing adapted from GWA Studios (2013)	.69
69
Figure 60.	(Left) Church Square, the turn point of the protest (Author, 2016). Drawing adapted from GWA Studios (2013)	.69
Figure 61.	Current function of the buildings surrounding Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)	.70
70
Figure 62.	Proposed function of the buildings surrounding Church Square (Author, 2016). Drawing adapted from GWA Studios (2013)	.71
71
Figure 63.	(Left) Perspective of the new Church Square looking from the TPA building, over the Capitol Theatre towards the northern corner. (Author, 2016)	.73
73
Figure 64.	(Middle) Perspective of the south western corner of the new Church Square looking towards the Capitol Theatre depicting the historical retaining wall and steps leading into the inner square. (Author, 2016)	.73
73
Figure 65.	(Right) Sketch plan of the new Church Square (Author, 2016).	.73
73
Figure 66.	(Right) Plan of the new Church Square (Author, 2016).	.74
74
Figure 67.	Sketch of the entrance portico of the Capitol Theatre (Author, 2016).	

The portico, in its current state, is glazed and is treated as an extension to the internal condition and is occupied by

	the restaurant.76
Figure 68.	A view from the stage looking up at the fly tower (Author, 2016).	
	Streaks of daylight filter through the timber slatted mezzanine level just below the sky lights. This ingress of daylight at the this point is the only aspect of the external context in the auditorium space. An alternative context and condition is created by the interior of the auditorium.79
Figure 69.	(Chapter page) Reflections cast through a window on to marble floor of the Grand Foyer. (Author, 2016)	
83
Figure 70.	(Left) An exploration sketch depicting the extension of the internal heritage in to the public realm in order to bring and awareness to the historical value of the internal condition of the auditorium. (Author, April 2016)83
Figure 71.	(Right) An sketch the explores the idea of a new skin that exposes the layer of heritage inside. The inserted architecture occupies the internal volume of the auditorium with its roof extending over the layer of heritage that is accommodates the circulation, placing the occupant in close proximity with the heritage before entering the new architecture that allows views of the heritage from within the space. (Author, April, 2016)88
Figure 72.	Sketch of the main facade of the Covent de Sant Francesc, the intervention by David Closes redefining the entrance to the existing space. (Author, 2016)	
92
Figure 73.	(Top) The two upper sketch deal the "weight" of the intervention in relation to the facade of the existing and the balance and scale of the resultant composition. (Author, 2016)	
94
Figure 74.	(Middle) The ordering of the new form is initially link to the existing by replicating the roof angle after which the form respond to the new stairs and introduces a new form. (Author, 2016)	
94
Figure 75.	(Right) The proportions of the new respect that of the existing, scaled down so as not to shift the hierarchy away from the heritage. (Author, 2016)94
Figure 76.	The insertions of new forms on the left are balances through the formalised aspect of decay that bring natural light	

	into the space. (Author, 2016)	.96
Figure 77.	Sketch illustrating the various intentions of the alterations ranging from the new structure (right) the hidden (middle), and the subservient insertion (left). (Author, 2016)	.97
Figure 78.	(Top) The main facade with the subservient insertion that defined the entrance. (Photographer: Surroca, 2011)	.98
Figure 79.	(Middle) The skylight that formalises aspects of the decay of the building. (Photographer: Surroca, 2011)	.98
Figure 80.	(Left) The new structure containing modern services for the building. (Photographer: Surroca, 2011).	.98
Figure 81.	(Top) Interior perspective of the new insertions. The texture of the new concrete and timber slats mimicking that of the existing interior. (Photographer: Surroca, 2011)	.99
Figure 82.	(Middle) An interior view looking toward the new insertion. (Photographer: Surroca, 2011)	.99
Figure 83.	(Left) The new structure contrasts the existing in terms of its materiality and form yet is completely dependent on the existing for support. (Photographer: Surroca, 2011).	.99
Figure 84.	(Left) The Ou Raadsaal Building. The Supreme Court of Appeal, moved from Bloemfontein, will be accommodated in this building. (Van der Waal Collection, University of Pretoria, 1910-)	103

Figure 85.	(Right) A sketch depicting the subterranean links between the government buildings surrounding Church Square (Author, 2016). 104
Figure 86.	(Previous page) The now barricaded doors leading into the Auditorium from the Grand Foyer (Author, 2016). These doors separate the current function of the Auditorium as a parking garage from the Grand Foyer and rest of the southern portion of that is used as event spaces by the current restaurant. 106
Figure 87.	(Right) Section through the stage, auditorium and grand foyer looking east (Author, 2016). Drawing adapted from Rogers Cooke.(1928) The black indicates the primary heritage to be retained. These are the internal façades of the auditorium that are main contributors to the "external" condition of the created context and for the most part will remain unaltered. The sky like ceiling shown in grey also contributes to the experience of the created context but can be altered so long as the essence of the ceiling is retained. The red indicates that which is to be demolished, in this case, a portion of suspended timber flooring under the balcony seating to accommodate an insertion. 106
Figure 88.	The Ground floor of the Capitol Theatre (Author, 2016). Drawing adapted from Rogers Cooke.(1928) The extent of the proposed precinct can seen by the buildings that were never realised (light grey) that would have completed the street façade. The entrance to the Theatre is through the portico, a later addition. The route into the Theatre can noted the first transition space that place the occupant into the context of the "imagine street-scape". The walls to be demolished (red) between the columns (black) open the internal space in order to enhance the experience of a street-scape. The fabric beyond the following transition spaces is the all recognised as primary heritage and will be retained. The fabric in the auditorium to be demolished will accommodate new fire exists and circulation routes. The primary heritage of the auditorium is separated from the skin of the Theatre and provides the opportunity to insert a new architectural layer behind the heritage layer. 108

Figure 89. The First floor of the Capitol Theatre (Author, 2016).
 Drawing adapted from Rogers Cooke.(1928)

With the exception of the ring beam of the restaurant foyer above the "imagined" street-scape and the steel girder that supports the balcony, the primary heritage fabric is finer than on the ground floor. At the level the heritage fabric in the auditorium is treated like a veneer that draws the eye to the stage and the performance all whilst hiding the circulation to the balcony. The balcony is accessed from the corridors extending toward the stage from the north portion of the promenade either side of the primary heritage of the auditorium.

The primary heritage in the Grand foyer and promenade still carry out a structural role. The Kirkness brick of the auditorium skin are to be removed to make way for the new architectural layer that will be inserted behind the heritage layer. 110

Figure 90. The Second floor of the Capitol Theatre (Author, 2016).
 Drawing adapted from Rogers Cooke.(1928)

The primary heritage maintains the same fineness as on the floor below but is contained to the auditorium. Again this heritage layer hides circulation and service spaces such as the projection rooms located at the back of the auditorium. The primary heritage at this level replicates a roof condition behind which the sky-like ceiling drops behind, fixing to the Theatre skin and creates the perception of an infinite sky. 112

Figure 91. (Right) Section through the stage, auditorium and grand foyer looking east (Author, 2016).
 Drawing adapted from Rogers Cooke.(1928).

The new architectural layer is governed by the nature of the existing. The new layer is separated from the primary heritage fabric, occupying the space behind it giving it more depth. Where as with the secondary heritage adaptations can be made that must ensure the retention of the essence or function. 114

Figure 92. (Right) The main level and extent intervention of the SCA Library (Author, 2016). 116

Figure 93. (Right) An early conceptual sketch of the links required between the Library and SCA (Author, 2016). 118

Figure 94. (Left) The Space for the CASAC Offices extending over the entrance foyer (Author, 2016). 121

Figure 95. (Right) A section showing the CASAC Offices in relation to the streetscape below (Author, 2016). 122

Figure 96.	The urban "megaphone" projecting through the existing in the courtyard (Author, 2016).	124
Figure 97.	A conceptual sketch of the urban "megaphone" (Author, 2016).	127
Figure 98.	Extending the street façade of south west corner of Church Square (Author, 2016).	128
Figure 99.	(Right) The witness stand relative to the plane of the unbuilt buildings (Author, 2016).	130
Figure 100.	(Far right) The witness stand in relation to the rest of the precinct (Author, 2016).	130
Figure 101.	(Right) The subterranean clandestine level (Author, 2016).	132
Figure 102.	(Right) The new circulation of the ground floor of the precinct (Author, 2016).	134
Figure 103.	(Right) Circulation of the upper level (Author, 2016).	136
Figure 104.	The street facing, Neo-Classical façade of The rocks Police Station. (Photographer: Lu, 2014)	139
Figure 105.	The contemporary addition by Welsh + Major that gives a edge to The Rocks Police Station and to the pedestrian walkway that runs behind the building. (Photographer: Lu, 2014)	140
Figure 106.	(Top) The contrast of the new steel and glass façade and the old masonry walls of the old station (Photographer: Lu, 2014).	142
Figure 107.	(Middle) The roof of the new structure facilitating gutter drainage off the existing roof structure (Photographer: Lu, 2014).	142
Figure 108.	(Left) The new façade in context (Photographer: Lu, 2014).	142
Figure 109.	(top) A clear separation between the existing condition and the new façade is made, distinguishing the two identities (Photographer: Lu, 2014).	143

Figure 110.	(left) A closer view of the junction where the cladding is separated from the existing and joined only by the structure (Photographer: Lu, 2014).	143
Figure 111.	(Previous page) Extending the heritage and function into the public realm (Author, March 2016).	146
Figure 112.	(Right) A sketch showing the intersections with heritage and the new layer of architecture extending into Church Square (Author, May 2016)	146
Figure 113.	A parti diagram of the connections between the various levels (Author, June 2016).	149
Figure 114.	An exploration sketch that depicts possible links between the various conceptual levels and programs (Author, April 2016). The links between the levels are explored through the visual connections and physical junctions within the Capitol Theatre as well as the surrounding buildings.	150

To my parents, the love you have given me, the support and encouragement for my wildest pursuits is all I could of ever wished for and more. Thank you for the landscapes that you raised me in, the red dunes of Mier, the crystal waters off Anse Royale, the golden sunsets over the Matobo hills, they have made me who I am. They have fostered a wanderlust and passion to explore and a need to share new horizons with others. I can only hope that these horizons and the spaces I create there move them in the same way it moves me.

To my brothers, thank for exploring with me, teaching me, helping me through each endeavor. You keep me grounded.

Finally to Arthur, Thank you. Your guidance and questions have led to a surety I have in my abilities. You have cultivated an eagerness to continue dreaming, developing and making space. As I meander towards the future, I fall more and more in love with architecture.
