

SOUTHERN AFRICAN LARGE TELESCOPE

Background

The Southern African Large Telescope (SALT) is the largest optical telescope in the world. It is a 10-metre diameter telescope with 918 hexagonal segments. It is located at the top of a mountain 3400 metres from the sea level. It is the only telescope of its size in the southern hemisphere. It is the only telescope of its size in the southern hemisphere. It is the only telescope of its size in the southern hemisphere.

This design is for the Southern African Large Telescope (SALT) project. It is a 10-metre diameter telescope with 918 hexagonal segments. It is located at the top of a mountain 3400 metres from the sea level. It is the only telescope of its size in the southern hemisphere. It is the only telescope of its size in the southern hemisphere. It is the only telescope of its size in the southern hemisphere.
