

**Supplementary table 1:** Comparison of median progression-free survival in patients with bone-only metastases compared with bone metastases in combination with different patterns of soft tissue metastases.

	<b>n</b>	<b>Disease progression</b>	<b>Median</b>	<b>95% CI</b>	<b>Log rank</b>	<b>p value</b>
<b>Metastases</b>	<b>n (%)</b>					
Skeletal metastasis alone	39	22 (56.4)	12.00	5.19 – 18.81	3.164	0.367
Skeletal and lymph node metastasis	51	27 (52.9)	14.00	7.51 – 20.49		
Skeletal, lymph and visceral metastasis	13	3 (23.1)	4.00	4.00 – 10.00		
Skeletal and visceral metastasis	3	2 (66.7)	8.00	1.60 – 14.40		

**Supplementary table 2:** Comparison of median overall survival in patients with bone-only metastases compared with bone metastases in combination with different patterns of soft tissue metastases.

	<b>n</b>	<b>Death</b>	<b>Median</b>	<b>95% CI</b>	<b>Log rank</b>	<b>p value</b>
<b>Metastases</b>	<b>n (%)</b>					
Skeletal metastasis alone	39	32 (82.1)	14.00	9.76 – 18.24	2.389	0.496
Skeletal and lymph node metastasis	51	37 (72.5)	15.00	11.07 – 18.93		
Skeletal, lymph and visceral metastasis	13	11 (84.6)	15.00	11.69 – 18.31		
Skeletal and visceral metastasis	3	1 (33.3)	17.00
