

Supplementary Material

Ensemble averaging allows modelling of spatiotemporal PM₁₀ concentrations in South Africa with sparse ground-based monitoring stations.

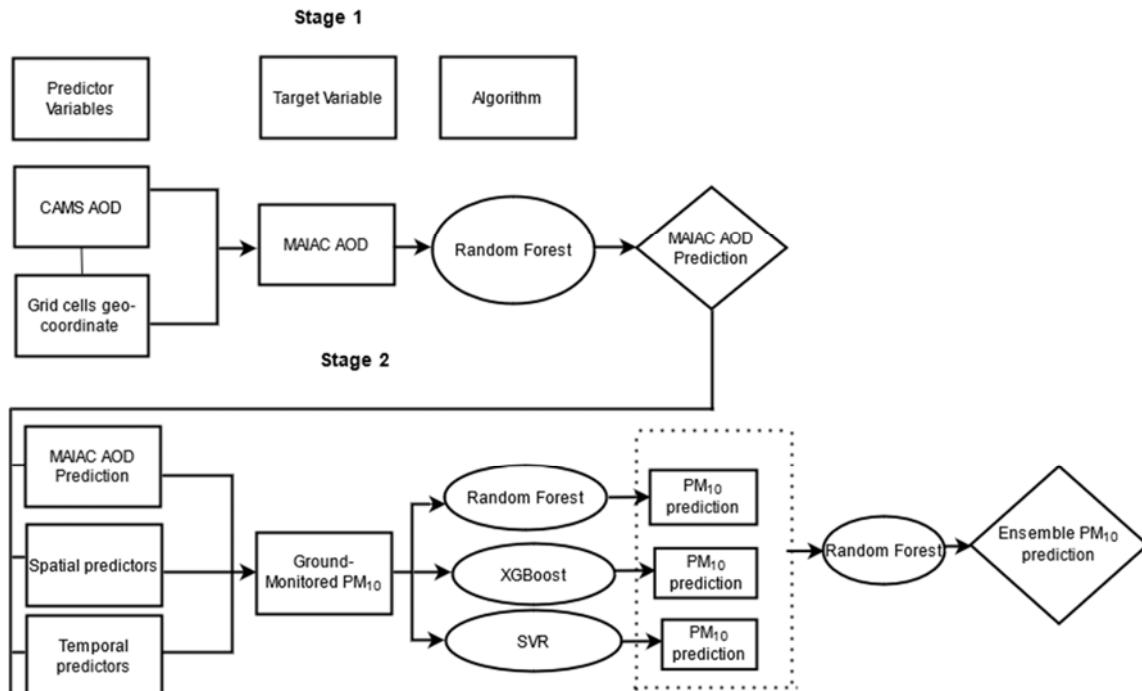

Figure S1. Flowchart of model training process.

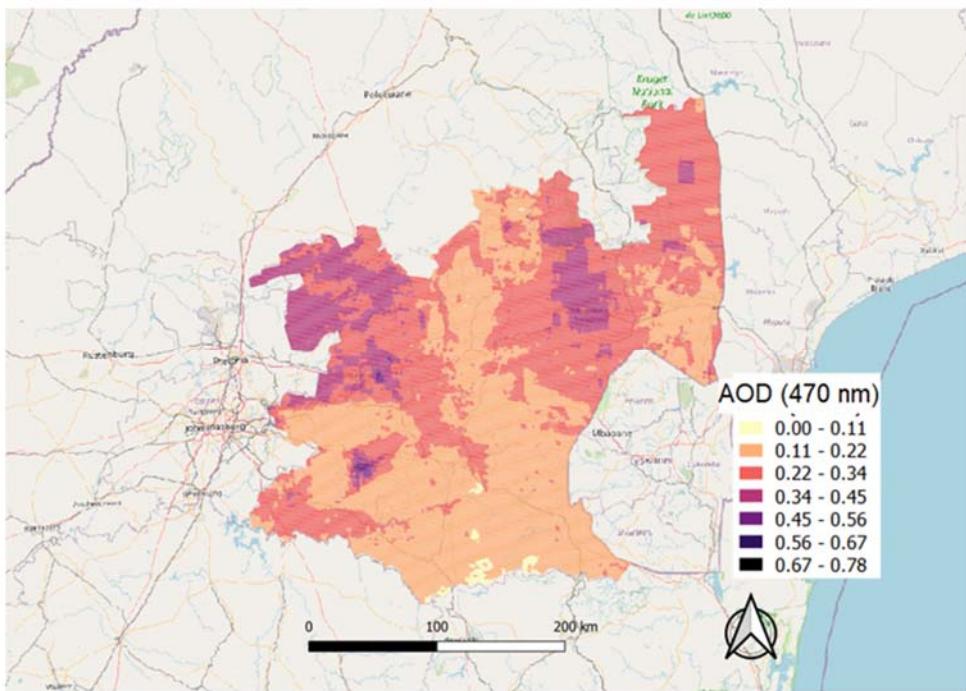

Figure S2: Mpumalanga province prediction map of AOD 470 nm for June 6, 2016

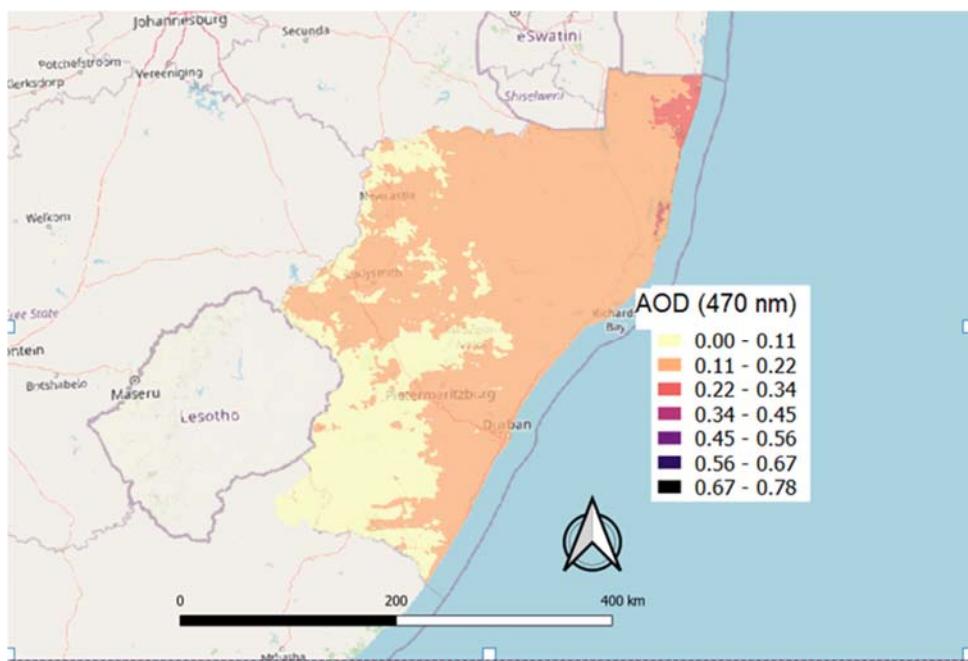

Figure S3: KwaZulu-Natal province prediction map of AOD 470 nm for June 6, 2016

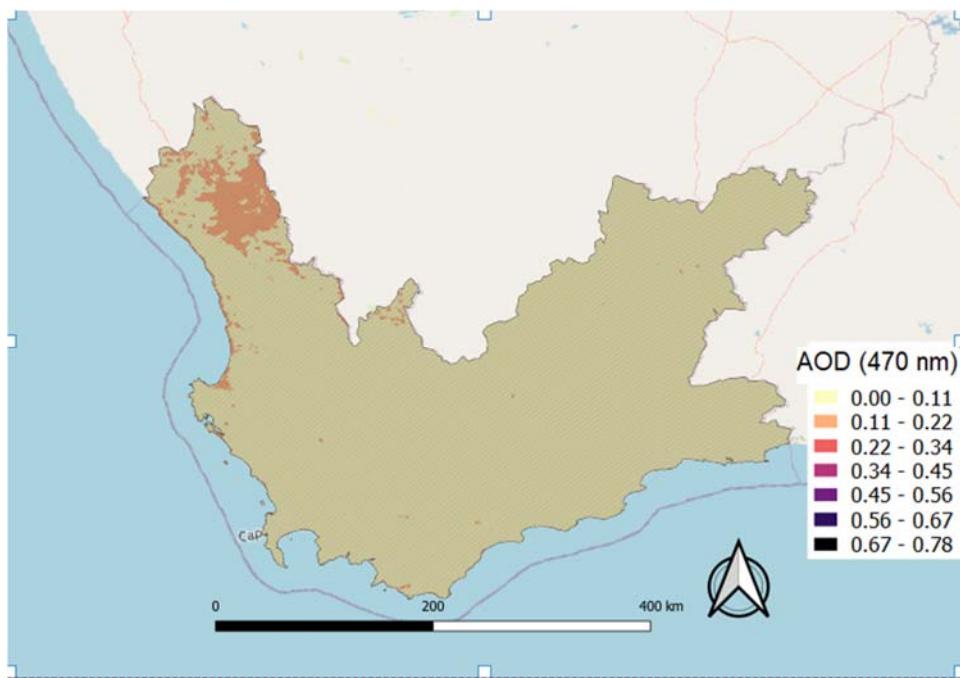

Figure S4: Western Cape Province prediction map of AOD 470 nm for June 6, 2016

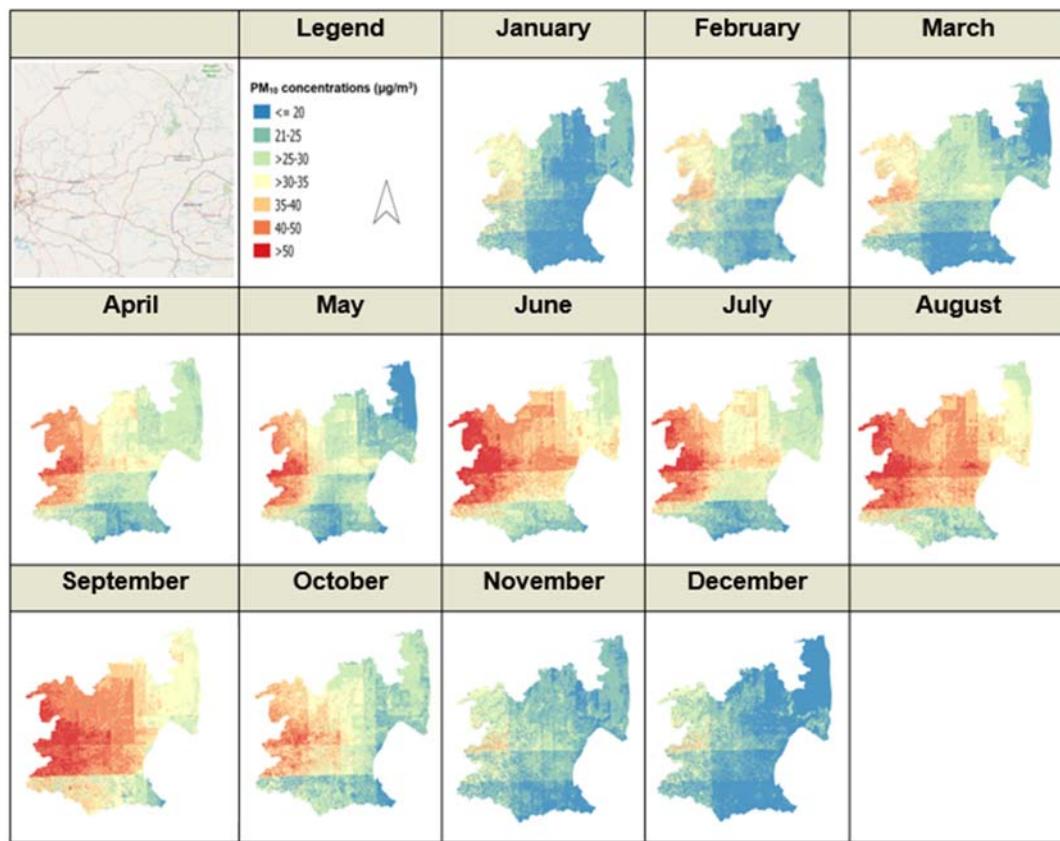

Figure S5: Mpumalanga Province estimated monthly mean PM₁₀ concentrations ($\mu\text{g}/\text{m}^3$) for 2016 at 1 \times 1 km grid cells aggregated from daily estimates.

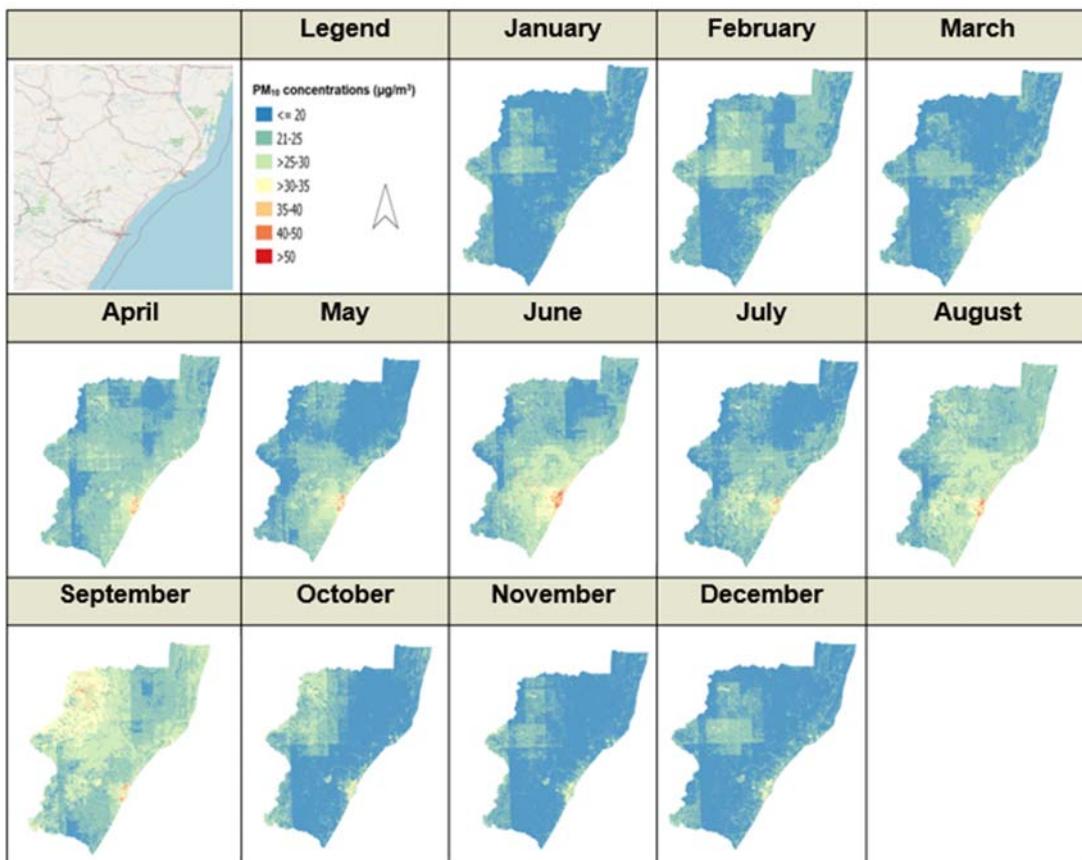

Figure S6: KwaZulu-Natal Province estimated monthly mean PM₁₀ concentrations ($\mu\text{g}/\text{m}^3$) for 2016 at 1 × 1 km grid cells aggregated from daily estimates.

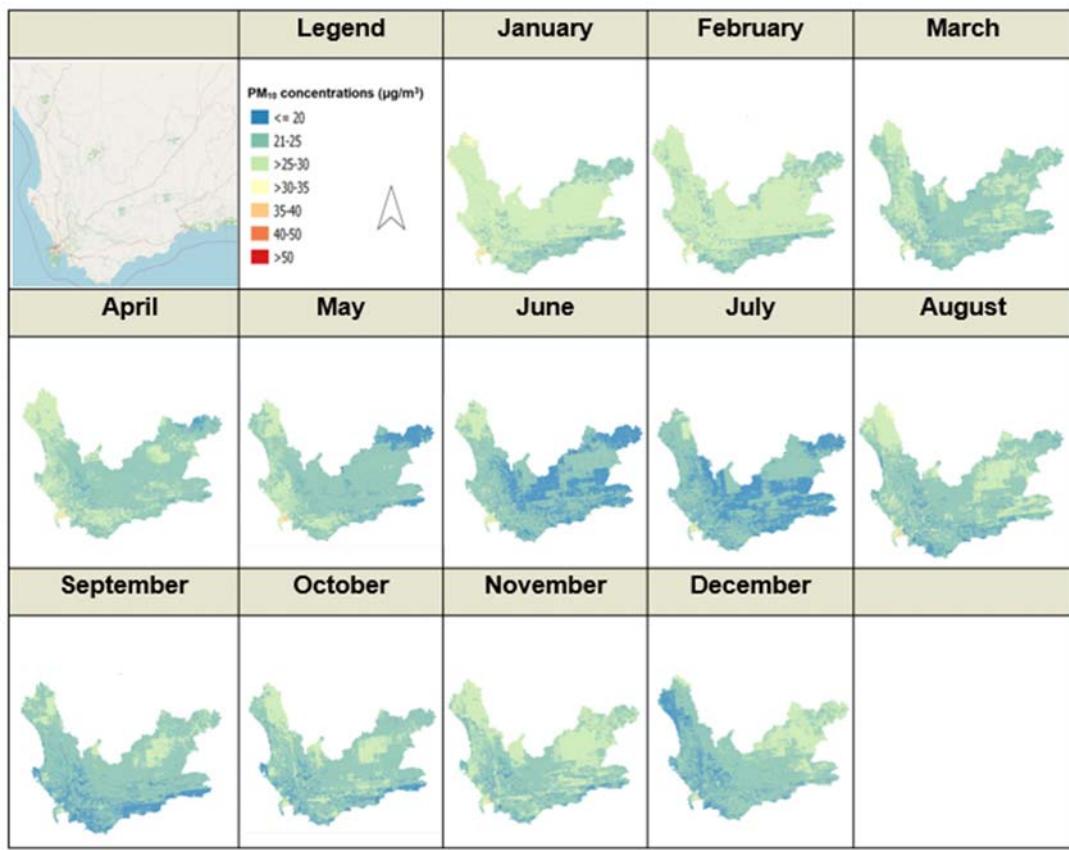

Figure S7: Western Cape Province estimated monthly mean PM₁₀ concentrations ($\mu\text{g}/\text{m}^3$) for 2016 at 1 \times 1 km grid cells aggregated from daily estimates.

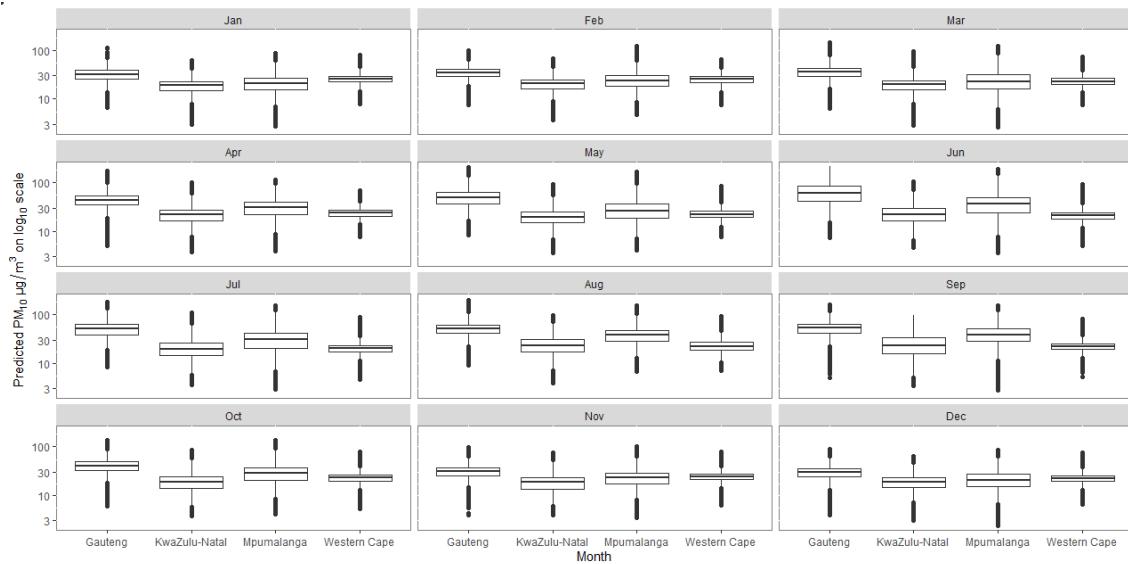

Figure S8: Spatial and temporal patterns in the distribution of predicted PM₁₀. The whisker limits indicate the P5 and P95 PM₁₀ concentrations.

Table S1: The percentage and distribution of observed MAIAC AOD 470 nm, unitless by month.

Month	N	Mean	SD	Percentiles				
				5	25	50	75	95
January	33871708 (72%)	0.12	0.09	0.02	0.06	0.09	0.15	0.29
