

Supplementary Table 2 - Characteristics of patients excluded from the study

Age, sex and CD4 count (cells/ μ L) of patients that attended the study sites following screening and were assessed eligibility for the study, comparing those who were enrolled with those not enrolled in the study

	Enrolled (n=201)	Not enrolled (347)	P-value
Sex			
Male, (n (%))	102 (51%)	192 (55%)	0.3 [†]
Female, (n (%))	99 (49%)	155 (45%)	
Age (median, IQR)	39, 32-47	39, 33-46	1.00*
CD4 count ((cells/μL) median, IQR)	33, 12-61	26, 10-50	0.03*

[†]Chi-squared test

*Mann-Whitney U test
