Regarding this article, published on September 15, 2023, several errors occurred:

Page 6, Table 2:

- The title is incorrect and should be “The 10 polymorphic microsatellite loci selected for *Glossina brevipalpis* including repeat motif, primer sequence, number of alleles (N_A), allele size range, heterozygosity within subsamples (H_s), total heterozygosity (H_t).”
- The artefact “Q8” in the left margin is to be suppressed, as the asterisk after “Gb48” and its reference “X linked”.

Page 7, line 49: A call to Supplementary Figure 7 is missing between $F_{IS_no_null} = -0.0247$ and the comma.

An international open-access, peer-reviewed, online journal publishing high quality papers on all aspects of human and animal parasitology

Reviews, articles and short notes may be submitted. Fields include, but are not limited to: general, medical and veterinary parasitology; morphology, including ultrastructure; parasite systematics, including entomology, acarology, helminthology and protistology, and molecular analyses; molecular biology and biochemistry; immunology of parasitic diseases; host-parasite relationships; ecology and life history of parasites; epidemiology; therapeutics; new diagnostic tools.

All papers in Parasite are published in English. Manuscripts should have a broad interest and must not have been published or submitted elsewhere. No limit is imposed on the length of manuscripts.

Parasite (open-access) continues Parasite (print and online editions, 1994-2012) and Annales de Parasitologie Humaine et Comparée (1923-1993) and is the official journal of the Société Française de Parasitologie.

Editor-in-Chief:
Jean-Lou Justine, Paris
