Title of Research Study: Understanding people's opinions of wildlife in urban and residential areas

You are invited to participate in a research study on people's opinions of wildlife in urban and residential areas. The purpose of this research is to identify which wildlife people enjoy seeing, how potential negative interactions between people and wildlife can be resolved, and how you would like wildlife to be managed. Your opinion is important.

The survey will take 10-15 minutes to complete. To view the **informed consent form**, please click [HERE](#)

Have you taken any of the following actions to prevent negative interactions with wildlife?

Treatments/sprays

Secure trash by keeping trash cans indoors or locking the lid of the trash can so that wildlife cannot open the can by pushing it over

Only take trash out on the morning of trash collection

Use noise to scare away wildlife

Use a water hose to scare away wildlife

Use a paintball gun to scare away wildlife

Motion activated lights (select this option **only** if you installed motion activated lights to prevent wildlife entering your property, and not for any other reason)

Keep pets indoors

Keep pet food indoors

Remove certain trees or plants from your property

Other (Please specify)

None of the above

There are reasons **for** relocation of wildlife. Message - Economic cost

There are reasons against relocation of wildlife. Government agencies managing wildlife are primarily funded by the sale of fishing and hunting licenses, not by taxpayer dollars. Relocating wildlife is expensive. Relocation requires highly trained staff with the appropriate equipment (such as trailers, cages, nets, guns) and veterinary drugs. Relocation may cost \$150 to over \$1,000 per animal relocated. If agencies relocate conflict wildlife, then they have less money to fund wildlife and habitat conservation in Georgia.

1. They can take the appropriate actions to reduce conflicts with wildlife (for example, securing trash against wildlife, scaring wildlife away from their yards);

2. They can euthanize (kill) conflict wildlife, either themselves or by hiring a licensed nuisance wildlife control operator (NWCO). This option only applies if the conflict wildlife is not a protected species;
3. They can contact a nuisance wildlife control operator (NWCO) or a government organization for advice on how to reduce wildlife conflicts; or

Message - Animal Welfare

There are reasons against relocation of wildlife. Being captured and relocated is very stressful to wildlife. Wildlife can be injured during relocation and may also die from the stress of being captured and relocated. If wildlife are part of a herd, pack or other social group then relocation means that they are separated permanently from their group. Placing conflict wildlife in a captive facility is sometimes an option. However, taking a previously free ranging wild animal and placing it in permanent captivity can be traumatic. There are also limited facilities with room for additional animals. Placing

an individual wild animal in captivity means less space available for other animals that may do better in a captive environment (e.g., orphaned wildlife).

Message - Consequences after relocation

There are reasons **against** relocation of wildlife. If conflict (causing) wildlife are captured and released in another location, then it is highly likely that these relocated wildlife will:

- be attacked by other wildlife to protect their territory or because they eat these animals; find other residential or urban areas that provide easy food sources and they will come into conflict with people there;
- be killed or harmed by people at the new location because they don't want to deal with the conflict animal;
- or be injured or killed trying to return to the area where they were captured.

Another animal may move to the location where the wildlife was captured, which means that conflict may continue but with a different animal.

Message - Wildlife Management

There are reasons **against** relocation of wildlife. The mandate of state wildlife agencies is to manage wildlife populations. This means that the agency focuses on managing entire populations of wildlife, and not individual animals. Spending money on relocations reduces funds for wildlife conservation programs. Allocating staff to relocations means that these staff are not working on wildlife or habitat conservation. Relocating wildlife may also introduce wildlife diseases (like rabies) or pests (like ticks) to other wildlife, livestock, and pets.

There are reasons **against** relocation of wildlife. The mandate of state wildlife agencies is to manage wildlife populations. This means that the agency focuses on managing entire populations of wildlife, and not individual animals. Spending money on relocations reduces funds for wildlife conservation programs. Allocating staff to relocations means that these staff are not working on wildlife or habitat conservation. Relocating wildlife may also introduce wildlife diseases (like rabies) or pests (like ticks) to other wildlife, livestock, and pets.

Do you agree that **population management** is a good reason for not relocating conflict wildlife?

Note: "conflict wildlife" refers to wildlife that causes damage or poses threat to people and/or their pets

- Do not agree at all
- Somewhat agree
- Agree
- Strongly agree

Although many people prefer to have wildlife relocated, in most cases the state wildlife agency is not able to relocate wildlife because they must focus on **managing all wildlife**.

Members of the public who have conflicts with wildlife in Georgia have 4 options for dealing with conflict (causing) wildlife:

1. They can take the appropriate actions to reduce conflicts with wildlife (for example, securing trash against wildlife, scaring wildlife away from their yards);
2. They can euthanize (kill) conflict wildlife, either themselves or by hiring a licensed nuisance wildlife control operator (NWCOW). This option only applies if the conflict wildlife is not a protected species;
3. They can contact a nuisance wildlife control operator (NWCOW) or a government organization for advice on how to reduce wildlife conflicts; or
4. They can choose to do nothing and to tolerate the wildlife.

Based on the argument against relocation (population management), how likely are you to...

	Very unlikely	Unlikely	Neither unlikely nor likely	Likely	Very likely
Manage conflict with wildlife yourself	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Have conflict (causing) wildlife euthanized	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Seek professional advice on resolving conflict	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Tolerate wildlife	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

What else do you think can be done to manage conflict (causing) wildlife?
