Inhoud

- Omvang en status
- Ontsluiting
- Bruikbaarheid
- Lesse geleer

Omvang en status

- Navorsingsuitsette soos vervat in die UP Navorsingsverslag:
 - Artikels publiseer in geakkrediteerde vaktydskrifte
 - Hoofstukke gelewer in boeke
 - Konferensiereferate gelewer : geakkrediteerde konferensies
 - Tesisse en verhandelinge gelewer (huidiglik op UPeTD)
- Navorsingsuitsette van studente:
 - projekte, plakkate, mini verhandelinge
- “Grys literatuur” soos tegniese verslae, werksdokumente
- Gebeurlikhede op kampus soos Intreeredes, spesiale- en gedenklesings
- Volledige referate van internasionale konferensies
- Volledige tydskrifte
- Boeke digitiseer
- Navorsingsmateriaal

Totaal, OpenUP (UP artikels)

Welcome to UPSpace, the full text open access Institutional Repository of the University of Pretoria!

Title: Elephant left patella, cranial and articular surface
Author/s: Seegers, Christine D.
Other Contributor/s: University of Pretoria. Faculty of Veterinary Science. Dept. of Anatomy and Physiology
LC Subjects: African elephant
 Veterinary anatomy
 Loxodonta africana
 Patella -- Anatomy
 Stifle joint
Keywords: Patella, Left
 Patella, Cranial aspect
 Patella, Articular surface
 Knee cap
Issue Date: 20-May-2009
Creation Date: 1994
Abstract: Anatomical representation of the left patella, cranial and articular surface, of an adult elephant.
Description: Black/white wash painting technique. Original canvas size: (w)29.0 x (h)15.0 cm. Original scanned size in pixels: (w)5288 x (h)2408 pixels (600 dpi). Final size in pixels:(w)600 x (h)355 (150 dpi). Estimate download time: 12 sec. @ 28.8 kbps.
 Metadata assigned by Prof. H.B. Groenewald.

About UPSpace

Title: Cages for hospitalized patients and intensive care unit cages
Author/s: Van Schoor, Mirinda
Other Contributor/s: University of Pretoria. Faculty of Veterinary Science. Dept. of Companion Animal Clinical Studies
LC Subjects: Veterinary critical care
Veterinary medicine -- South Africa
Veterinary emergencies
Keywords: Veterinary intensive care
Comfort
Heating pad
Hospitalization
Intensive care unit
Oxygen cage
Warmth
Issue Date: 5-Nov-2010
Creation Date: 2008
Series/Report no.: Veterinary critical care slide collection (Dr M. van Schoor)
Abstract: PHOTOS 1-4: Hospitalized animals must be housed in cages that are secure and comfortable. There should be no sharp edges so the patient cannot hurt itself. The cage should be large enough so the animal can move and turn around. Many critically ill animals may have problems maintaining normal body temperature and need an external heat source. A heating mat can be placed on the floor of the cage so the animal is comfortably warm. Hospitalized animals can develop hyperthermia from heating pads and this should not be confused with true fever. Stainless steel cages should be used and should ideally be placed against the walls of the ward. The cage door must be able to close securely to prevent escape of the patient. Cages must be kept clean and cleaned and disinfected between patients. PHOTO 5: ICU cages should be comfortable and safe for the patient. There should be clear notices of the treatment and special needs of the patient on each cage. Monitoring of patients in the intensive care unit is critical. The cages may be placed on top of each other in rows and adequate space should be allowed for therapeutic and monitoring equipment. PHOTO 6: Oxygen cages are useful for controlling oxygen concentration, temperature and humidity and allow animals to ventilate without assistance. Inspired oxygen concentration of 30-40% is recommended for animals that need oxygen therapy. If the oxygen concentration is too high it can cause oxygen toxicity. Oxygen cages provide a sealed environment, where the fraction of inspired oxygen, humidity and ambient temperature can be controlled and monitored and carbon dioxide can be removed efficiently. Oxygen cages with a Plexiglas front allow observation of the patient, these oxygen cages also have access ports for entry and exit of intravenous lines and monitoring leads. The advantage of using oxygen cages is that it is a non-invasive way of providing oxygen support to critically ill patients. A disadvantage is that oxygen is lost each time the door of the cage is opened. The amount of oxygen lost each time the door is opened and the amount of oxygen needed to fill the cage makes the use of oxygen cages relatively wasteful and expensive.

Gerard Moerdyk (04:03:1890-29:03:1958) designed a significant number of the buildings on the various campuses of the University of Pretoria.

He was also one of the longest serving Chairmen of the Council of the University of Pretoria (18:10:1935-25:06:1942).

The Gerard Moerdyk [Moerdijk] Collection contains material from the archives of the Human Sciences Research Council that was not suitable for archiving with the collection in the Pretoria branch of the South African National Archives. It was then decided to move this material to a more suitable location and were thus donated to the University of Pretoria, Department of Architecture.

The Architectural Archives of the University of Pretoria is a repository of material made by donation and deposited in either the Department of Architecture Archives, the Reading Room, or as part of the Archives at the Special Collection Unit, Merensky Library.

As material is digitized it becomes available in electronic format on UPSpace.

Please note: variant spelling of Gerard Moerdyk's name is used, such as: Gerhard Moerdijk, Gerard Moerdyk and Gerhard Moerdyk.

 - Preservation standards
 - Digitization standards
 - Migration standards
 - Backup standards
 - Metadata standards: Dublin core
 - Security systems

Terugvoer

“By the way this UP collection is a little treasure trove for me and I am so delighted to have discovered it I am in danger of being distracted from my main job of writing my novel! “

Carole York per epos 9 November 2010
