Ideas: where to start

- Are you working on a Doctoral or Master’s thesis?
- Have you completed a project which concluded successfully?
- Are you wrestling with a problem with no clear solution?
- Do you have an opinion or observation on a subject?
- Have you given a presentation or conference paper?
- If so, you have the basis for a publishable paper
What makes a good paper?
HINT: Editors and reviewers look for …

- Originality – what’s new about subject, treatment or results?
- Relevance to and extension of existing knowledge
- Research methodology – are conclusions valid and objective?
- Clarity, structure and quality of writing – does it communicate well?
- Sound, logical progression of argument
- Theoretical and practical implications (the ‘so what?’ factors!)
- Recency and relevance of references
- Internationality/Global focus
- Adherence to the editorial scope and objectives of the journal
- A good title, keywords and a well written abstract
Emerald has introduced structured abstracts

• **A structured abstract** – in 250 words or less (no more than 100 in any one section)

• **Purpose** – Reasons/aims of paper

• **Design** – Methodology/’how it was done’/scope of study

• **Findings** – Discussion/results

• **Research limitations/Implications** (if applicable) – Exclusions/next steps

• **Practical implications** (if applicable) – Applications to practice/’So what?’

• **[NEW] Social implications** (if applicable) – Impact on society/policy

• **Originality/value** – Who would benefit from this and what is new about it?

Plagiarism and referencing

• Plagiarism (from the Latin *plagium* meaning ‘a kidnapping’) is the act of taking someone else’s work and passing it off as your own (false attribution). It is considered fraud!

• Hard to detect with peer review but there are new tools to help us

• Emerald’s entire portfolio is included in iThenticate web-based software from iParadigms [http://www.ithenticate.com/](http://www.ithenticate.com/)

• Emerald’s Plagiarism Policy can be seen at [http://info.emeraldinsight.com/about/policies/plagiarism.htm](http://info.emeraldinsight.com/about/policies/plagiarism.htm)

• For more general information visit [http://www.plagiarism.org/](http://www.plagiarism.org/)
Copyright

• As the author, you need to ensure that you get permission to use content you have not created as soon as your manuscript has been accepted otherwise this may delay your paper being published

• Supply written confirmation from the copyright holder when submitting your manuscript

• If permission cannot be cleared, we cannot republish that specific content

• More information including a permissions checklist and a permissions request form is available at:
  - http://www.emeraldinsight.com/authors/writing/best_practice_guide.htm
  - http://www.emeraldinsight.com/authors/writing/originality.htm
Timetable from submission to initial feedback to authors

- The Editor(s) do an initial read to determine if the subject matter and research approach is appropriate for the journal (approx. 1 week)
- The Editor(s) identify and contact two reviewers (approx. 1 week)
- Reviewers usually have 6-8 weeks to complete their reviews
- The Editor(s) assess the reviewers' comments and recommendations and make a decision (approx. 2 weeks)
- **Expected time from submission to review feedback: 3-3.5 months**
How to increase electronic dissemination

• Use a short descriptive title containing main keyword – don’t mislead

• Write a clear and descriptive abstract containing the main keywords and following any instructions as to content and length

• Provide relevant and known keywords – not obscure new jargon

• Make your references complete and correct – vital for reference linking and citation indices

• All of this will make your paper more discoverable which means more dissemination and possibly more citation
Editorial supply chain and journal management structure: journals

Author → Editor → Publisher/Managing Editor → Production → Users

Author:
- Quality research papers
- EAB and reviewers
- Solicits new papers
- Handles review process
- Promotes journal to peers
- Attends conferences
- Develops new areas of coverage

Editor:
- The link between the publishing company and editor
- Helps editors succeed in their role and build a first class journal
- Overall responsibility for journal
- Promotion and marketing
- Attends conferences
- Handles production issues

Publisher/Managing Editor:
- QA – sub-editing and proof reading
- Convert to SGML for online databases
- Print production
- Despatch
- Added value from publisher

Production:
- Access via library
- Hard copy
- Database
- Third party

Users:
- Research
Once you have submitted your article

- **A request for revision is good news!** It really is
  - You are now in the publishing cycle. Nearly every published paper is revised at least once
  - Don’t panic!
  - Even if the comments are sharp or discouraging, they aren’t personal
  - “Stephen Wojtal likes to let reviews sit for a week to let his blood pressure return to normal”.

- **If your paper is rejected:**
  - Don’t give up!
    Everybody has been rejected at least once

- **Ask why, and listen carefully!**
  Most editors will give detailed comments about a rejected paper. Take a deep breath, and listen to what is being said

- **Try again!**
  Try to improve the paper, and re-submit elsewhere. Do your homework and target your paper as closely as possible

Keep trying!

Institutional Repository

I am an Emerald Author- can I place my article in a repository?

Yes. However, it must be the Author’s own version. It can include all the editorial changes but it must be in a different format, different font and different layout, and have none of the Emerald logos, branding or watermarks. It must also carry a license statement and include a link to the journal homepage.
