Leisure tourists' satisfaction regarding their meal experience at Lesedi Cultural Village

by

Heidi Cecelia Kleynhans

Script submitted in partial fulfillment of the requirements for the degree

Master in Consumer Science: General

in the Faculty of Natural and Agricultural Sciences
Department of Consumer Science
University of Pretoria
Pretoria

November 2003
To my parents and brother
This script is not just the result of personal sustained self-study and many hours of hard work, but was made possible through the support and encouragement of various people. Therefore, I wish to thank the following individuals and institutions:

Mrs. G du Rand who, as study leader, gave up much of her time on this study. Thank you for your positive attitude, guidance and encouragement, which I received throughout the course of my study.

Prof. HM de Klerk who, as co-study leader, provided guidance as to the form and content of the study.

Colleagues, co-students and students of the Department of Consumer Science at the University of Pretoria, for their encouragement, interest, motivation and support during my study.

Dr. L Louw from the Department of Statistics at the University of Pretoria for her valuable advice and assistance in the analysis of the statistics. Thank you for your friendly helpfulness and encouragement.

Mrs. E Mauer and personnel from the computer centre, who helped with the adjustment of the questionnaire for computer purposes, as well as with the transformation of the information into results. I thank you.

Mr. B Kruger, Mrs. G van Gerle, Marius and personnel of Lesedi for the opportunity to use Lesedi as the focus of my study, and to collect the data on the premises. Without it, the study could not have been done. Thank you for your friendliness and helpfulness, your co-operation and time.

Family and friends for their sustained and unfailing interest and encouragement. Thank you very much.
This script is dedicated, with great appreciation and thankfulness, to my parents as a token of recognition of their sacrifices throughout the years, and for everything that I have learned from them. Thank you for making it possible for me to study further, for the endless encouragement, motivation, consolation, belief and love.
South Africa is increasingly becoming a destination for leisure tourists. Many are interested in cultural tourism. There is a need for empirical research into this field of hospitality and tourism, which this study aims to address.

Lesedi Cultural Village (Lesedi) is an establishment where tourists can experience five of the ethnic cultures of South Africa. As part of the experience, a meal is served which is advertised as “The greatest African feast”. The actual food served is not necessarily culturally authentic in nature. Consequently expectations of the meal experience might be created which cannot be satisfied.

This investigation commences with a literature study to establish the components of a meal experience, namely food, service and atmosphere. Thereafter factors are established through the literature survey that are required for satisfaction of a meal experience.

These concepts are set out in an adaptation of an existing model of Kivela, Inbakaran and Reece (1999). The adapted model is used as the basis for a field survey of the opinions of leisure tourists visiting Lesedi. The survey was conducted using a self-administered questionnaire. The results were analysed statistically.

Prior to the survey, objectives for the study were set to compare the findings of the literature study with the respondents’ views about the meal experience at Lesedi. The objectives were to determine whether:

Objective 1: leisure tourists’ expectations regarding the meal experience and its components were met, and whether they were satisfied with the current meal experience

Objective 2: leisure tourists would be willing to return or refer others to Lesedi

Objective 3: it is necessary to have a cultural-specific menu to satisfy the leisure tourists’ expectations

Objective 4: certain components of the meal experience impressed the leisure tourists the most

Objective 5: there is a significant relationship between food, service and atmosphere regarding the meal experience
Objective 6: other aspects have significant relationships with the components of the meal experience (food, service and atmosphere)

The tourists’ expectations and satisfaction with the meal experience were met to a high degree. The majority of respondents indicated they would return or refer others to Lesedi. While it is not necessary to have a cultural-specific menu to satisfy tourists’ expectations, the current menu could be enhanced by the inclusion of some cultural-specific items.

Aspects of the components of the meal experience, which were considered by the respondents to have impressed them the most were also determined.

A significant relationship exists between food and service but only a tendency to a relationship exists between food and atmosphere as well as between service and atmosphere. Service appears to play a slightly more important role in satisfying the meal experience than does food. Atmosphere supports the other two components (food and service).

Suggestions were made, for consideration by the management of Lesedi, regarding possible improvements to the components of the meal experience.
Suid-Afrika is toenemend besig om ‘n gewilde bestemming vir vakansie toeriste te word. Hulle is hoofsaaklik die tipe toeriste wat geïnteresseer is in kulturele toerisme. Daar is egter ‘n behoefte aan empiriese navorsing op die gebied van gasvryheid en toerisme. Dit is dan ook, wat hierdie studie wil aanspreek.

Lesedi Kulturele Stat (Lesedi) is ‘n onderneming waar toeriste vyf van Suid-Afrika se etniese kulture kan ervaar. As deel van die hele kulturele ervaring, word ‘n maaltyd bedien wat geadverteer is as “The greatest African feast”. Die voedsel wat wel bedien word, is egter nie noodwendig eg kultureel van aard nie, wat dus kan aanleiding gee dat verwagtinge van die maaltydervaring geskep word wat nie bevredig kan word nie.

Die ondersoek is voorafgegaan deur ‘n literatuurstudie om die komponente, wat die maaltydervaring uitmaak, vas te stel naamlik voedsel, diens en atmosfeer. Hierna is faktore, wat sal lei tot die bevrediging van die maaltydervaring, deur middel van die literatuuroorsig bepaal.

Die konsepte is uiteengesit in ‘n aangepaste model van Kivela, Inbakaran en Reece (1999). Die aangepaste model is gebruik as die basis vir die ondersoek oor die menings van die vakansie toeriste wat Lesedi besoek. Die ondersoek is uitgevoer deur gebruik te maak van self toegediende vraelyste waarna die resultate statisties geanaliseer is.

Voor die ondersoek uitgevoer is, is doelwitte vir die studie gestel. Die doelwitte is om te bepaal of:

**Doelwit 1:** die vakansie toeriste se verwagtinge en tevredenheid met betrekking tot die maaltydervaring en die onderskeie komponente bevredig is.

**Doelwit 2:** die vakansie toeriste bereid sal wees om terug te keer of ander na Lesedi te verwys

**Doelwit 3:** dit nodig is vir ‘n instelling soos Lesedi om ‘n kultureel-spesifieke spyskaart te hê om die vakansie toeriste se verwagting ten opsigte van die maaltydervaring te bevredig
Doelwit 4: die komponente van die maaltydervaring die vakansie toeriste beïndruk het

Doelwit 5: daar 'n betekenisvolle verband tussen die komponente voedsel, diens en atmosfeer met betrekking tot die maaltydervaring is

Doelwit 6: ander aspekte betekenisvolle verband met die komponente van die maaltydervaring toon (voedsel, diens en atmosfeer)

Daar is bevind dat die vakansie toeriste se verwagtinge en tevredenheid met die maaltydervaring is tot 'n hoë mate bevredig is. Die meeste van die respondente het aangedui dat hulle bereid is om terug te keer of ander na Lesedi te verwys. Alhoewel dit nie nodig is om 'n kultureel-spesifieke spyskaart te hê in 'n onderneming soos Lesedi, om aan die toeriste se verwagting te voldoen nie, kan die huidige spyskaart versterk word deur sommige kultureel-spesifieke items in te sluit.

Die aspekte van die komponente van die maaltydervaring, wat die respondente (vakansie toeriste) geag het wat hulle die meeste beïndruk het is ook bepaal.

'N Betekenisvolle verband is bepaal tussen voedsel en diens, maar slegs 'n tendens tot 'n verhouding is tussen voedsel en atmosfeer getoon, asook tussen diens en atmosfeer. Daar is aanduidings dat diens 'n effe belangriker rol speel in die bevrediging van die maaltydervaring as wat voedsel doen. Die atmosfeer ondersteun egter die ander twee komponente (voedsel en diens).

Aanbevelings vir oorweging deur die bestuur van Lesedi ten opsigte van moontlike verbeteringe aan die komponente van die maaltydervaring is gemaak.

CHAPTER 5: DATA ANALYSIS AND DISCUSSION

5.1 INTRODUCTION ......................................................................................................74

5.2 THE MANAGER'S VIEW REGARDING THE FUNCTIONING OF LESEDI ..........75

5.3 RESEARCHERS OBSERVATIONS ........................................................................77

5.4 THE PROFILE OF THE LEISURE TOURISTS (DESCRIPTIVE STATISTICS)......78

5.4.1 Country of origin.....................................................................................................78

5.4.2 Gender-age distribution..........................................................................................79

5.4.3 The leisure tourists' previous experience and knowledge......................................81
  5.4.3.1 Have the leisure tourists dined at Lesedi before? ..............................................81
  5.4.3.2 Have the leisure tourists dined at similar establishments before? .................82
  5.4.3.3 Do the leisure tourists have knowledge regarding the traditional cultural-specific food of the ethnic tribes depicted at Lesedi? ..................82
  5.4.3.4 Do the leisure tourists have knowledge regarding the traditional cultural-specific food of other tribes or nationalities? .................................82

5.5 COMPARISON OF THE FINDINGS WITH THE OBJECTIVES OF THE STUDY (DESCRIPTIVE STATISTICS) .................................................................82

5.5.1 The extent to which the leisure tourists' expectations regarding the meal experience and its three components (food, service and atmosphere) were met and whether they were satisfied with the current meal experience. (Objective 1) ...........................................................................82
5.5.1.1 The extent to which the leisure tourists’ expectations regarding the meal experience were met .................................................................82
5.5.1.2 The extent to which the leisure tourists’ expectations regarding food were met ..................................................................................83
5.5.1.3 The extent to which the leisure tourists’ expectations regarding service were met .............................................................................84
5.5.1.4 The extent to which the leisure tourists’ expectations regarding atmosphere were met .................................................................85
5.5.1.5 The extent to which the leisure tourists were satisfied with the current meal experience .............................................................................86

5.5.2 The extent to which the leisure tourists would be willing to return or refer others to Lesedi (Objective 2) (DESCRIPTIVE STATISTICS) ........88
5.5.2.1 The extent to which the leisure tourists would be willing to return to Lesedi ......................................................................................88
5.5.2.2 The extent to which the leisure tourists would be willing to refer others to Lesedi .............................................................................88

5.5.3 The extent to which it is necessary to have a cultural-specific menu to satisfy the leisure tourists’ expectations (Objective 3) (DESCRIPTIVE STATISTICS)............................................................................................................89
5.5.3.1 Would the leisure tourists have preferred a complete traditional menu, a menu with some traditional dishes, a menu with traditional ingredients prepared in a westernised manner or the current menu? .........89

5.5.4 The extent to which certain components of the meal experience impressed the leisure tourists the most (Objective 4) (DESCRIPTIVE STATISTICS).................................................................90
5.5.4.1 Which aspects of the meal experience at Lesedi regarding the food, service and atmosphere impressed the leisure tourists the most? .......90

5.5.5 The extent to which there is a significant relationship between food, service and atmosphere regarding the meal experience (Objective 5) (INFERENTIAL STATISTICS)................................................................................100
5.5.5.1 A significant relationship with the grouped variable food as a component of the meal experience ...........................................................100
5.5.5.2 A significant relationship with service as a component of the meal experience ....................................................................................102
5.5.6 The extent to which other aspects have significant relationships with the meal experience and its components (food, service and atmosphere) (Objective 6) .......................................................................................................................... 103

5.5.6.1 Significant relationships between the grouped variable food, service and atmosphere .............................................................................................................. 103

5.6 CONCLUSION........................................................................................................ 105

CHAPTER 6: CONCLUSIONS, EVALUATIONS AND SUGGESTIONS

6.1 INTRODUCTION .................................................................................................. 106

6.2 CONCLUSIONS .................................................................................................. 107

6.2.1 Conclusions with regard to the extent to which leisure tourists’ expectations regarding their meal experience and its components were met and the extent to which they were satisfied with the current meal experience.............................................................................................................. 107

6.2.2 Conclusions with regard to the extent to which leisure tourists would be willing to return or refer others to Lesedi ................................................................. 108

6.2.3 Conclusions with regard to the extent to which it is necessary to have a cultural-specific menu, to satisfy leisure tourists’ expectations ............................... 109

6.2.4 Conclusions with regard to the extent that there was a significant relationship between food, service and atmosphere ....................................................... 109

6.2.5 Conclusions with regard to the extent to which other aspects have significant relationships with the components of the meal experience (food, service and atmosphere) ....................................................................................... 110

6.3 EVALUATIONS .................................................................................................. 111

6.3.1 Introduction...................................................................................................... 111

6.3.2 Reliability of the study ................................................................................. 111
6.3.3 Evaluations of the method of data collections and its usefulness to other researchers .................................................................112

6.3.4 The achievement of the objectives set out for this research study........113

6.3.5 Contributions to the theory of hospitality and tourism......................114
6.3.5.1 The consumer perspective, in particular the systems theory, in the study of hospitality and tourism especially in studies regarding the consumers’ satisfaction..............................................................114
6.3.5.2 The role of cultural specific menu’s in the leisure tourists perception of their meal experience ..............................................................115

6.4 FURTHER RESEARCH POSSIBILITIES...............................................................115

6.4.1 Suggestions regarding the components of the meal experience (food, service and atmosphere) ............................................................116

6.4.2 Suggestions regarding the significant relationships with variables other than the components of the meal experience.............................................................116

6.5 SUGGESTIONS FOR LESEDI...............................................................117

6.5.1 Food.................................................................................................117
6.5.2 Service..............................................................................................117
6.5.3 Atmosphere......................................................................................118
