

**The medicinal value of Amaryllidaceae and Asteraceae species used in
male circumcision**

by

Fikile Dilika

**Submitted in partial fulfillment of the requirements for the degree Doctor
of Philosophiae (Plant Physiology)**

Department of Botany

In the Faculty of Natural and Agricultural Sciences

University of Pretoria

Pretoria

Promoter: Prof J.J.M. Meyer

CONTENTS

CHAPTER	PAGE
1. Introduction	1
1.1. Background.....	2
1.1.1. General	2
1.1.2. Isolation of bioactive compounds from plants.....	5
1.1.3. Bioactivity determination.....	11
1.2. Objectives of the study	17
1.3. Scope of the thesis	18
1.4. Structure of the thesis	25
1.5. References	29
2. Antibacterial activity of linoleic- and oleic acids isolated from <i>Helichrysum pedunculatum</i> used in circumcision rites.....	34
2.1. Abstract.....	35
2.2. Introduction.....	37
2.3. Experimental.....	37
2.4. Results.....	41
2.5. Discussion.....	42

I declare that the dissertation herewith submitted for the degree of PhD (Plant Physiology) at the University of Pretoria, has not been previously submitted by me for a degree at any other university or institution of higher education.

1. Introduction	1
1.1. Background.....	2
1.1.1. General	2
1.1.2. Isolation of bioactive compounds from plants.....	8
1.1.3. Bioactivity determination.....	11
1.2. Objectives of the study	17
1.3. Scope of the thesis	18
1.4. Structure of the thesis	20
1.5. References	21
2. Antibacterial activity of linoleic- and oleic acids isolated from <i>Helichrysum pedunculatum</i> used in circumcision rites.....	34
2.1. Abstract.....	35
2.2. Introduction.....	37
2.3. Experimental.....	37
2.4. Results.....	41
2.5. Discussion.....	42
2.6. Acknowledgements.....	78

2.6. Acknowledgements.....	43
2.7. References.....	43
5. Acetylcholinesterase inhibitory activity of galanthamine	
2. Centrifugal partition chromatographic isolation of bioactive compounds from <i>Helichrysum pedunculatum</i> (Asteraceae) and <i>Boophone disticha</i> and <i>Scadoxus multiflorus</i> (Amaryllidaceae) using receptor binding assay.....	45
3.1. Abstract	46
3.2. Introduction.....	48
3.3. Materials and methods.....	50
3.4. Results and discussion.....	56
3.5. Acknowledgements.....	60
3.6. References.....	61
4. Preliminary investigation of <i>Boophone disticha</i> and <i>Scadoxus multiflorus</i> for acetylcholinesterase inhibitory activity.....	65
4.1. Abstract.....	66
4.2. Introduction.....	68
4.3. Materials and methods.....	69
4.4. Results and discussion.....	73
4.5. Acknowledgements.....	76

4.6. References.....	76
5. Acetylcholinesterase inhibitory activity of galanthamine isolated from <i>Scadoxus multiflorus</i>.....	81
5.1. Abstract.....	82
5.2. Introduction.....	84
5.3. Materials and methods.....	85
5.4. Results and discussion.....	88
5.5. Acknowledgements.....	90
5.6. References.....	90
6. General discussion and conclusion	94
6.1. Introduction.....	95
6.2. Antibacterial activity of linoleic- and oleic acids isolated from <i>Helichrysum pedunculatum</i> used in circumcision rites.....	96
6.3. Centrifugal partition chromatographic isolation of bioactive compounds from <i>H. pedunculatum</i> (Asteraceae), <i>Boophone disticha</i> and <i>Scadoxus</i> <i>multiflorus</i> (Amaryllidaceae using receptor binding assays.....	97

6.4.	Preliminary investigation of <i>B. disticha</i> and <i>Scadoxus multiflorus</i> for acetylcholinesterase inhibitory activity.....	97
6.5.	Acetylcholinesterase inhibitory activity of galanthamine isolated from <i>Scadoxus multiflorus</i>	98
6.6.	References.....	99
7.	Summary.....	104
8.	Acknowledgements	107
