THE NATURE OF MATHEMATICS TEACHERS' REFLECTIVE PRACTICE

by
Anna Barbara Posthuma

A thesis submitted in fulfilment of the requirements for the degree of
Doctor of Philosophy (PhD)

Department of Science, Mathematics and Technology Education

Faculty of Education

University of Pretoria

Supervisor: Prof JG Maree
Co-Supervisor: Dr GH Stols

2011

Acknowledgements

There are a number of people who graciously helped me to complete this research. I wish to personally and publicly thank all who supported me during the course of this research.

Thank you Prof Kobus Maree, my supervisor, for the excellent professional and personal support that you provided in the completion of this research. Dr Gerrit Stols my co-supervisor, I am grateful for your unwavering belief in me and encouragement to stay positive while engaged in this research. Mr A.K. Welman, thank you for editing the language of this thesis in such a professional way.

My family encouraged me for the duration of the research project and I want to thank Arend (my husband), for his faith in me; my daughter Jacomien Muller, for always being willing to listen to my ideas; and my children (Arend and Drinie Posthuma, Louise and Eben Karsten and Dave Muller) for your love and inspiration.

Without the five mathematics teachers who agreed to share their teaching lives with me this research would not have been possible. Thank you for giving up your free afternoons for group reflections and the positive feedback I received from you towards the end of the research project. An empowered teacher is a reflective decision-maker, who finds joy in learning and in investigating the teaching and learning process—one who views learning as construction and teaching as a facilitating process to enhance and enrich development (Fosnot, 1989, p. xi).

Lastly, I dedicate this research study to my grandchildren, Ciska and Anoux.
I hereby declare that this thesis submitted for the degree Doctor of Philosophy at the University of Pretoria, South Africa, is my own original work and has not been submitted for any degree or examination at any other institution of higher education. I further declare that all sources cited or quoted are indicated and acknowledged by means of a comprehensive list of references.

Anna Barbara Posthuma

28 June 2011.
Summary

Thoughts about reflection and reflective practice have evolved over many decades, through carefully constructed theory and research applications, mainly based on the work of Dewey (1933) and Schön (1983). Evidence also exists in the literature that the ability to reflect on practice is considered a necessity for effective instruction (Sowder, 2007). By reflecting critically teachers become more positive in the search for a new understanding of their teaching practice and design more ways to deal with the challenges that confront them daily. When teachers act reflectively, they consider carefully the problems in their own teaching and think about how those problems are related to their educational or social context. They are aware of the consequences of their teaching and how their own assumptions or beliefs can influence their teaching.

This main purpose of my research study was to explore the nature of mathematics teachers’ reflective practice in the context of lesson study. To achieve this aim, an in-depth exploration of five mathematics teachers’ reflection before, during and after teaching a lesson was conducted. The possible relationship between these teachers’ reflection and their classroom practice was also examined. The research also aimed to explore whether and how mathematics teachers’ reflections differ from the conceptualisations of reflection in classroom practice as found in the literature. Contextual factors that might influence the nature of mathematics teachers’ reflective practice were also investigated.

My findings indicate that the mathematics teachers in my sample have a limited understanding of the concept of reflection. Furthermore, based on lesson plan analysis, there was no evidence that these teachers reflect-for-action. However, they all reflected on-action verbally and in writing, and three of the five teachers reflected-in-action while teaching. They all reflected on Level R1 (recall level of reflection) and Level R2 (rationalisation level of reflection) and three teachers reflected critically on their learners’ understanding of mathematics and their own teaching of concepts towards the end of the research project (Lee, 2005). Language and the lesson study group experience emerged as contextual factors that seemed to influence the teachers’ reflection.

Although the research study’s results cannot be generalised due to the small sample, I believe that through engaging in the lesson study experience the five teachers of this study
improved their reflective practice, reporting an increase in self-knowledge and finding new ways of teaching mathematics to learners.

**Key words:** Reflection; Reflective practice; Reflective thinking; Mathematics; Reflection-for-action; Reflection-in-action; Reflection-on-action.
Table of Contents

Chapter 1 .............................................................................................................................. 1
  1.1 Orientation and background ....................................................................................... 1
  1.1.1 Earliest views on teachers as reflective practitioners: Dewey and Schön ............. 1
  1.1.2 International research on teachers’ reflective practice ................................. 2
  1.1.3 Research on teachers’ reflective practice reported in Southern Africa .......... 3
  1.2 The context of this research study ....................................................................... 4
  1.3 Rationale for the study ........................................................................................... 5
  1.3.1 Personal interest in teachers’ classroom practice ................................................ 5
  1.3.2 Concern about mathematics teachers’ ability to reflect on their practice .......... 5
  1.3.3 Evidence for the need to reflect critically on teaching practice from research ...... 6
  1.4 Statement of purpose ............................................................................................... 6
  1.5 Research questions ................................................................................................... 6
  1.6 Methodological considerations ................................................................................... 7

Chapter 2 .............................................................................................................................. 9
  2.1 Introduction ................................................................................................................ 9
  2.2 Theoretical perspectives on reflective practice in education ....................................... 9
  2.2.1 Dewey’s approach to reflective practice ............................................................... 9
  2.2.1.1 Critical evaluation of Dewey’s work ............................................................... 10
  2.2.2 Schön’s approach to reflective practice .............................................................. 12
  2.2.2.1 Critical evaluation of Schön’s work ............................................................... 12
  2.3 Categories of reflection in education ........................................................................ 14
  2.3.1 Van Manen’s levels of reflection ........................................................................ 14
  2.3.2 Valli’s levels of reflection .................................................................................... 16
  2.3.3 Jay and Johnson’s levels of reflection ................................................................. 17
2.3.4 Hatton and Smith’s levels of reflection ............................................................... 17
2.3.5 Lee’s levels of reflection ..................................................................................... 18
2.4 Research studies in education investigating teacher reflection ......................... 19
2.4.1 Overview of research studies dealing with preservice teachers’ reflections 20
2.4.1.1 Concerns about the definition of reflection as revealed in studies dealing with preservice teachers’ reflections 21
2.4.1.2 Research studies reporting on the nature of preservice teachers’ reflections 23
2.4.1.3 Research studies reporting on the content of preservice teachers’ reflections 25
2.4.1.4 Research studies reporting on the moment of student teachers’ reflection 26
2.4.1.5 Research studies reporting on the benefits of or barriers to reflection 27
2.4.1.6 Research studies reporting on contextual factors that influence reflection 28
2.4.2 Summary ........................................................................................................... 28
2.5 The reflective practice of practising teachers ....................................................... 33
2.5.1 Introduction ........................................................................................................ 33
2.5.2 Teacher reflection through self-study ............................................................... 34
2.5.3 Teacher reflection on feedback from learners .................................................... 35
2.5.4 Teacher reflection in communities ..................................................................... 35
2.5.5 Opportunities that potentially allow teachers to become reflective practitioners .37
2.5.5.1 Professional development as an opportunity for teacher reflection 37
2.5.5.2 Professional learning through lesson study 38
2.5.5.3 Professional learning through action research 39
2.5.6 Characteristics of a reflective practitioner ............................................................... 39
2.5.7 Benefits of reflective practice ............................................................................. 41
2.5.7.1 Gaining professional and personal knowledge 41
2.5.7.2 Changing/improving practice 42
2.6 Mathematics teachers’ reflective practice

2.6.1 Introduction

2.6.2 Research studies linking reflection and beliefs about action

2.6.3 Research studies dealing with teachers’ reflection-on-action

2.6.3.1 Lesson study contexts that enhance reflection-on-action

2.6.4 Research studies dealing with teachers’ reflection-for-action

2.6.5 Research studies dealing with teachers’ reflection-in-action

2.7 The conceptual framework for this research study

2.7.1 Definition of reflection and reflective practice to guide this research study

2.8 Conclusion

Chapter 3

3.1 Introduction

3.2 Paradigmatic assumptions and perspectives

3.2.1 Ontological assumptions

3.2.2 Epistemological assumptions

3.2.3 Assumptions about human nature

3.3 Research site and sampling

3.4 Data-gathering procedures

3.5 Data-gathering instruments

3.5.1 Interviews

3.5.2 Observations

3.5.2.1 Individual teacher observation

3.5.2.2 Lesson study group observation

3.5.3 Document collection
4.4.1 Theme 1: Participants’ understanding of reflection ............................................. 92

4.4.2 Theme 2: Reflection-on-action ........................................................................... 94

4.4.2.1 Dianne 94
4.4.2.2 Mary 95
4.4.2.3 Morgan 96
4.4.2.4 Sipho 98
4.4.2.5 Vicky 100

4.4.3 Theme 3: Reflection-for-action ......................................................................... 103

4.4.3.1 Dianne’s lesson planning 103
4.4.3.2 Mary’s lesson planning 104
4.4.3.3 Morgan’s lesson planning 105
4.4.3.4 Sipho’s lesson planning 106
4.4.3.5 Vicky’s lesson planning 106

4.4.4 Theme 4: Reflection-in-action .......................................................................... 107

4.4.5 Theme 5: Content of reflection ....................................................................... 108

4.4.6 Theme 6: Contextual factors that influence reflection ....................................... 110

4.5 Results of lesson study group reflections ............................................................... 112

4.5.1 Discussion of lesson study group reflections on lessons observed .................. 112

4.5.1.1 Lesson study group reflection on Mary’s lesson 112
4.5.1.2 Lesson study group reflection on Morgan’s lesson 113
4.5.1.3 Lesson study group reflection on Vicky’s lesson 113
4.5.1.4 Lesson study group reflection on Sipho’s lesson 114
4.5.1.5 Lesson study group reflection on Dianne’s lesson 114

4.5.2 Final group reflection on being part of the lesson study group ......................... 116

4.5.2.1 Lesson planning 116
4.5.2.2 Teaching mathematics 117
4.5.2.3 Self-observation 117
4.5.2.4 Observation of colleagues ................................. 117
4.5.2.5 Group discussions .................................................. 118
4.6 The reflective journey of each individual participant ................................................. 119
  
4.6.1 Dianne ................................................................. 120
4.6.2 Mary ................................................................. 121
4.6.3 Morgan ................................................................. 122
4.6.4 Sipho ................................................................. 123
4.6.5 Vicky ................................................................. 124

4.7 Conclusion ............................................................................................................. 124

Chapter 5 .......................................................................................................................... 127
  
5.1 Introduction ............................................................................................................ 127
5.2 Chapter summary .................................................................................................. 127
5.3 Verification of research questions .......................................................................... 128
  
5.3.1 Research question 1 ........................................................................................ 128
5.3.2 Research question 2 ........................................................................................ 131
5.3.3 Research question 3 ........................................................................................ 132
5.3.4 Summary of verification of research questions ................................................. 132

5.4 What would I have done differently? ................................................................. 135

5.5 Providing for errors in my conclusions ................................................................ 136

5.6 Conclusions ........................................................................................................... 136

5.7 Recommendations .................................................................................................. 137

5.8 Limitations of the study ......................................................................................... 138

5.9 Last reflections ....................................................................................................... 138
