The Faculty of Economic and Management Sciences emphasises integrity and ethical behaviour with regard to the preparation of all written assignments.

Although the lecturer will provide you with information regarding reference techniques, as well as ways to avoid plagiarism, you also have a responsibility to fulfil in this regard. Should you at any time feel unsure about the requirements, you must consult the lecturer concerned before submitting an assignment.

You are guilty of plagiarism when you extract information from a book, article, web page or any other information source without acknowledging the source and pretend that it is your own work. This does not only apply to cases where you quote the source directly, but also when you present someone else's work in a somewhat amended (paraphrased) format or when you use someone else's arguments or ideas without the necessary acknowledgement. You are also guilty of plagiarism if you copy and paste information directly from an electronic source (e.g., a web site, e-mail message, electronic journal article, or CD-ROM) without paraphrasing it or placing it in quotation marks, even if you acknowledge the source.

You are not allowed to submit another student's previous work as your own. You are furthermore not allowed to let anyone copy or use your work with the intention of presenting it as his/her own.

Students who are guilty of plagiarism will forfeit all credits for the work concerned. In addition, the matter will be referred to the Committee for Discipline (Students) for a ruling. Plagiarism is considered a serious violation of the University's regulations and may lead to your suspension from the University. The University's policy regarding plagiarism is available on the Internet at http://www.library.up.ac.za/plagiarism/index.htm.

For the period that you are a student in the Faculty of Economic and Management Sciences, the following declaration must accompany all written work that is submitted for evaluation. No written work will be accepted unless the declaration has been completed and is included in the particular assignment.

I (full names & surname): Elizabeth Ann Kruger

Student number: 97003787

Declare the following:

1. I understand what plagiarism entails and am aware of the University's policy in this regard.
2. I declare that this assignment is my own, original work. Where someone else's work was used (whether from a printed source, the Internet or any other source) due acknowledgement was given and reference was made according to departmental requirements.
3. I did not copy and paste any information directly from an electronic source (e.g., a web page, electronic journal article or CD ROM) into this document.
4. I did not make use of another student's previous work and submitted it as my own.
5. I did not allow and will not allow anyone to copy my work with the intention of presenting it as his/her own work.

ABSTRACT

South Africa’s hosting of the 2010 FIFA World Cup™ came at a time when the position as host of a high-profile mega-event has become a sought-after status for countries worldwide. Not only do these events hold the promise of extensive triple-bottom-line legacies, but they also offer an extremely powerful destination marketing platform. However, no destination is guaranteed success and sustainable competitiveness by being offered the once-off opportunity to host a major international event. This study focuses on the ways and measures in which mega-events can contribute to destination competitiveness in its entirety as depicted in a popular model of tourism destination competitiveness. Existing literature on destination competitiveness and mega-events, as well as comparative case studies of recent mega-events were explored to furnish a set of apparent key success factors for the sustainable hosting of mega-events. This set of factors was then tested within a case study context through the collection of primary and secondary qualitative data. Industry experts from both the tourism and events industries in the City of Tshwane were interviewed on the eve of the 2010 FIFA World Cup™. In addition, strategic documents and other secondary data were investigated to form an understanding of the role of the event as a potential catalyst for destination development. The City’s competitiveness was evaluated before the event, and compared to an evaluation of its perceived competitiveness as a result of the event. Based on the findings, a set of five critical success factors was developed. It includes the need to address events as a strategic destination priority; effective stakeholder identification and role clarification; resource management for the event; alignment of the event strategy with the overall destination marketing strategy; and pro-actively addressing environmental issues. These factors are presented within a timeframe before, during and after the actual event. Through the proposed framework, it may be possible to manage the hosting of events in such a way as to contribute to sustained, holistic competitiveness of the host destination; ensuring alignment with the overall destination marketing and management strategy.

KEYWORDS: destination competitiveness, mega-events, 2010 FIFA World Cup™, critical success factors
ACKNOWLEDGEMENTS

The author would like to express her gratitude toward the Department of Economic and Management Sciences at the University of Pretoria who funded this research through a most valuable internship program. Sincere thanks goes to my study leader for his guidance, enthusiasm, communicable perseverance and time committed to the study. Also to the research participants who gave up their time during the final preparations for the 2010 FIFA World Cup™. Soli Deo Gloria.
