mindscape
a centre for creative development in Sunnyside

edna peres

Submitted in partial fulfilment of the requirements for the degree Magister in Architecture [Professional], in the Faculty of Engineering, the Built Environment and Information Technology.

University of Pretoria
Department of Architecture
November 2005

Mentor and study leader: Rudolf van Rensburg
dedicado aos meus pais

*dedicated to my parents*
Buildings have a profound effect on the human psyche.
Lives slowly unfold within their spaces.
Society either dictates, or is dictated by them.
In a sense, they become living things, constantly communicating through their spatial qualities and capable of being manipulated to suit changing needs and desires. Yet, the human element is often neglected... buildings become empty shells designed for an average human being or for a specific function. The objective becomes the profitability of capital to attain a desired form versus that which they could be:
Enablers.
manifesto 5

contents 6
list of figures 8
introduction 11

1 contextual study parameters 013
the city 014
socio-economic conditions urban features 021
site construction 027
biophysical analysis 030

2 brief 035
problem statement 037
desired outcomes 038
client, stakeholders and administrators 044
site requirements 045

3 design philosophy 47
imageability 049
a new order 054
sensuous architecture 056
the subconscious effects of space 058
placemaking 060

4 theoretical investigation 63
overview psychology in architecture 064
children’s spaces 066
designing stimulating spaces 072
5 design development 77
initial concepts 79
refinement 81
layered design solution 83
reprogrammable spaces 91

6 technical investigation 97

All illustrations are by the author unless otherwise specified.

Illus. 01: MINDSCAPE
Illus. 03: Tshwane Skyline
Illus. 04: Tshwane/ Pretoria landmarks
Illus. 05: Resistance toward the Name change
Illus. 06: Floor detail in Polley’s Arcade
Illus. 07: Menlyn Park: eastern suburbs
Illus. 08: Intersection on Jacob Maree, formal and informal meet.
Illus. 09: Two homeless “residents” of Sunnyside
Illus. 10: Pretoria/ Tshwane in the world context
Illus. 11: Representation of the determining features of the city: topography, rivers and roads
Illus. 12: Aerial photo of central Tshwane. [GIS UP, 2005]
Illus. 13: Aerial photo of Sunnyside. [GIS UP, 2005]
Illus. 14: Land uses within Sunnyside: commercial, residential and other.
Illus. 15: Site in relation to landmarks and activity nodes
Illus. 16: Sunnyside usage construction_ a locus with further development opportunities.
Illus. 17: Figure ground study of central Sunnyside
Illus. 18: Ground figure of central Sunnyside showing high and low densities
Illus. 19: Site in relation to major vehicular movement routes
Illus. 20: Aerial photo showing the site and surrounding streets
Illus. 21: Diagrammatic representation of the main movement routes, activity nodes, intersections and commercial hubs in the city centre.
Illus. 22: 3D view over the site from the South-East showing the existing buildings
Illus. 23: Site Construction considering nodes, views, edges, activity areas, linkages and green features
Illus. 24: Views over or from the site mapped on an aerial photo.
Illus. 25: Photos of the neighbouring buildings of various scales and plotted on map
Illus. 26: Photos of Walkerspruit as it meanders through the site.
Illus. 27: “Nou kan ‘n mens behoorlik wandel.” Beeld article showing the upgraded Walkerspruit trail [Unknown, 1984]
Illus. 28: The 50 and 100 year Walkerspruit floodlines between Bourke and Cilliers street. [Tshwane City Engineer, 2005]
Illus. 29: Author’s interpretation of the climatic conditions and the architectural consequences.
Illus. 30: Mapping the types of trees on site
Illus. 31: Possible activities and programmes within the centre [Digitally enhanced image sourced from Tony Stone Images:1998]
Illus. 32: Sensuous exploration of architectural space
Illus. 33: Diagrammatic representation of public/private activities and their interaction
Illus. 34: The sponsors and client representative, N. Quincompoix [LGA], N. Motha [PTA] and L. Benn [Handle]
Illus. 35: Map of the site selection criteria over the city centre
Illus. 36: Fashion and its cyclic nature [Digital manipulation from Elle [spain]: January 2005: 23]
Illus. 37: Renaisssance principles of proportions [Fletcher: 1975: 265]
Illus. 39: August Perret’s new concrete appartments on Rue Franklin, Paris, 1902. [Norwich: 1979: 228]
Illus. 40: Maison Stoclet by Josef Hoffmann, Brussels, 1911. The new Art Nouveau inspired geometry
Illus. 41: Villa Savoye, by Le Corbusier, Poissy, 1929. The Modern Movement emerges
Illus. 45: A new system for architecture, based on fixed rules and associations similar to an equation [Digitally enhanced manipulation]
Illus. 47: Examples of sensuous architecture, rich in experiential qualities. [Digitally enhanced manipulation including, images of de Casas, Moneo, Hadid, Torres and Chillidas]
Illus. 48: The effects of space extend beyond the brain to the rest of the body. [Digitally enhanced manipulation from an image in The Architectural Record, Vol 197, p120]
Illus. 49: Examples of placemaking include, drama, shadows, nature and mystery. Images of Sanaksenao’s work have been digitally manipulated and overlaid by examples of perception
Illus. 50: Mental Mechanics: psychology of the environment meets architectural theory [Digitally manipulated image originally by Oliver in Tony Stone images 1998]
Illus. 51: Remember childhood! [Digitally manipulated image originally by Proudpixie in Communication 2000]
Illus. 52: Middle to lower income groups especially benefit from child care
Illus. 53: Infants are born with inherent learning mechanisms
Illus. 54: Children have a rich variety of skills to develop and to dream [Digital manipulation from Tony Stone images, 1998]
Illus. 55: Children learn through direct experience, especially through movement [Digital manipulation from Communication, 2000]
Illus. 56: Spontaneous, accidental interaction between various users [Digitally enhanced manipulation from Tony stone images, 1998 : Peres, 2005]
Illus. 57: The Brain: the basis for environmental psychology constructs [Digital manipulation from Tony Stone Images, 1998 : Peres, 2005]
Illus. 58: Perception promotes questioning the given, and an exploration of new possibilities [Digitally enhanced manipulation from Tony stone images, 1998]
Illus. 59: View over part of the design proposal
Illus. 61: Sketches showing the initial design concepts on plan including movement routes and axis.

Illus. 62: Model showing aerial view of a stage of design refinement [Sacket:2005]

Illus. 63: The refined designed versus the initial conceptual computer drawings

Illus. 64: Diagram showing the visual links between the interior and exterior spaces.

Illus. 65: Representation of some of the public residual, or accidental, spaces.

Illus. 66: The exploratorium on plan and 3D

Illus. 67: Environments which promote learning through playing [Digitally enhanced image]

Illus. 68: Areas for indoor/outdoor community activities and sketches representing some spaces.

Illus. 69: Sketches representing some reprogrammable spaces.

Illus. 70: 3D digital model of the final design

Illus. 71: 3D diagramme of the structural composition of elements

Illus. 72: Various floor materials are shown; paving, cast in situ concrete, mosaic, rubber tiles and plywood

Illus. 73: The diagramme indicates the areas over which sheet metal or concrete placed.

Illus. 74: Arrows indicate main movement axis

Illus. 75: Examples of timber and concrete to be used in the building design

Illus. 76: Material examples to be sourced for the design

Illus. 77: Passive control systems of orientation and cross-ventilation

Illus. 78: The effects of solar angles on part of the design facing east

Illus. 79: All technical drawings have been grouped together under a single illustration in chapter 7

Illus. 80: Barcelona Forum, showing its form, plans and details [Digitally enhanced image sourced from Architectural Review no. 216. 2004]

Illus. 81: Plot youth centre manipulates landscape as shown in the photos and plan [Digitally enhanced image sourced from Architectural Review no. 249:2004]

Illus. 82: Yokohama terminal [Digitally enhanced image sourced from Domus no. 851. 2004]

Illus. 83: Casa da musica create form by wrapping programme and analyses traditional spaces [Digitally enhanced image sourced from Architectural Review no. 223. 2004]

Illus. 84: Faraday Precinct. Images show some spaces within the area are still not used [Digitally enhanced image sourced from Architectural Digest South Africa 2004]

Illus. 85: Informal activities occurring throughout Tshwane.
Mindscape, the subject of this dissertation, is a centre for creative and holistic development in Sunnyside, which will demonstrate how built environments communicate with users through their perception and sensory exploration. The topic covers various fields. The context of the study will be discussed initially, followed by the brief itself. Thereafter, the findings resulting from research conducted in the fields of developmental and environmental psychology will be provided. Architectural theory will then be investigated. The study will conclude with the interpretation of these findings into a new architectural form, supported by design studies and analytical tools.
