**ROLE OF CODE-SWITCHING IN TEACHING  
AND LEARNING IN SELECTED SENIOR SECONDARY SCHOOLS  
IN BOTSWANA**

by

**Tsaona S Mokgwathi**

Thesis submitted in partial fulfillment of the requirements for the degree of

DPhil (Applied Linguistics)

at the

University of Pretoria, South Africa, 2011

Pretoria, South Africa

## **DEDICATION**

**This piece of work is dedicated to my late father Royal Seitsiwe Mathula, the man who shaped my life and instilled in me the value of education.**

## ACKNOWLEDGEMENT

Embarking on a Ph. D is no easy task, and one would not know it until you find yourself swimming through the deep and dark waters in search of new knowledge. However, the main source of hope is one's supervisor who acts as the 'life-saver' through the long and arduous journey. Professor Vic N. Webb of the Department of Afrikaans' Centre for Research in the Politics of Language was my 'life-saver' and my immense gratitude goes to him. He guided me from the research proposal stage until the finalization of this thesis. His constructive criticism taught me how to apply my mind fully and to develop scholarly analysis that enabled me to critically interrogate my data in order to arrive at the conclusions of this thesis. Without his guidance, encouragement and advice I would not have been able to produce this piece of work. His professional assistance ensured that I remained focused on my goal.

Truly, the production of a piece of academic work at this level is a collective effort of many colleagues, friends and family. However, I would like to particularly acknowledge the following staff members of the Department of Statistics at the University of Pretoria for their contribution which made my burden a lot easier to carry: Ms Jaqui Sommerville, the Computer Programmer who gave me invaluable assistance as I prepared for the practical data collection stage of my study. She worked with me from the questionnaire design stage up to data analysis stage and continued to render me professional support as I wrote my thesis. Her patience and readiness to assist whenever I needed further analysis of the data were amazing. I will always treasure the professional relationship we developed as I worked on my thesis. Mrs. Fransonet Reyneke, a Statistician who acted as my consultant as I analysed the data. When my knowledge of Statistics seemed to fall short, Mrs. Reyneke was willing to unravel the mysteries of numbers for me. Dr. Hermi Borraine who advised me on sampling at the initial stage of my study as I prepared for the field research. Mrs. Rhuhandu Bron and Mrs. Jankowitz who assisted with data capturing in preparation for the quantitative analysis of the data. The speed at which they performed this task was amazing. Mrs. Rita Badenhorst, Subject Librarian at the University of Pretoria Library for her invaluable assistance on literature search. Prof. De Kok who proof-read the initial chapters of my thesis. My 'adopted' son, Karabo Modipane at the University of

Pretoria who sharpened and enhanced my computer literacy skills which made it possible for me to include graphic illustrations in my thesis.

At the University of Botswana I would like to acknowledge the assistance of the following: Professor Dele Akindele who acted as my resident mentor and critiqued my work in order to ensure that I do not navigate off the path I had initially set for myself. His selflessness in mentoring me after my return from the University of Pretoria showed me that he was truly an academic at heart. Dr. Joel Magogwe, a colleague for the assistance he rendered as I did the final touches on my thesis. Dr. Mandu Gasennelwe-Jeffrey for the support she rendered as a colleague, friend and sister during our stay at the University of Pretoria and after my return back home. She showed me that the spirit of 'botho' (ubuntu) is still alive in Africa. Mrs. Olivia Mokgathe, also a colleague, friend and sister for her valuable contribution during the data analysis stage.

It would not have been possible for me to pursue my Ph.D studies had it not been for my employer, the University of Botswana, who granted me study leave and fully sponsored me during the course of my studies. I shall forever be grateful for this privilege. My gratitude also goes to the University of Pretoria for extending graduate sponsorship to me which enabled me to pay for professional services I received in relation to the production of this piece of work. I am also indebted to the Ministry of Education and Skills Development for granting me the permission to use their schools as sources of data for my research. The cooperation I received from the four schools in the study enabled me to collect data for the study. School heads allowed me to access their schools; the teachers who participated in the study allowed me to sit, observe and audio-tape their lessons, and also completed questionnaires for me; and the learners of the classes selected for participation in the study welcomed me in their classes and also completed questionnaires for me. Without their cooperation, this study would not have taken off the ground.

On the social front, I would like to extend my sincere gratitude to Mr. and Mrs. Dintho and their children who opened their home for me and made me feel at home away from home during my field research in the North East region. Mrs. Runyowa and Mrs. Madzivanyika, teachers at Legae Primary School, who provided my youngest son with the motherly support he badly needed during my absence. They have shown me that

you do not have to be a blood relative to be of such immense assistance. They have proven that sometimes ‘water may be thicker than blood’.

Last but not least, I would like to extend my heartfelt gratitude to my family and relatives who supported me in many ways and understood my long absence from home. Their constant encouragement whenever I was losing hope of ever achieving my goal will always be treasured. In particular, my appreciation goes to my husband Anthony Mokgwathi who was the sole parent to our three children in addition to attending to our projects and progressing our plans; my three children Omphitlhetse, Topo and Modiegi who made my burden easier by concentrating on their studies every year despite my absence as their ‘home tutor’; my niece Olerato who stepped into my shoes to be ‘domestic mother’ to my youngest son and helped him with his home work every evening; my mother who was a true granny to my children and saw it fit to leave her home occasionally and travel a thousand of kilometers to visit them despite her advanced age and fragile health; my sister and friend Mohepiemang who was selfless in doing whatever she could to render assistance to my family; my niece Onneile and my brother Sekgele who stepped in to provide transport for my son to and from school whenever the need arose. Indeed, family is great and I will forever be indebted to all of you.

Finally, I would like to express my sincere gratitude to Linette Downes-Webb (edLETTERA CONSULTANTS) who edited the entire manuscript for me. The professional work she did for me (despite the pressure she worked under) has resulted in a bond of friendship between us.

## SUMMARY

This qual-quant case study investigated the role of code-switching (CS) in education in four senior secondary schools in Botswana. CS is a communicative strategy used in many places, including Botswana, during formal and informal social occasions. CS also occurs in education; however, its occurrence is viewed as a somewhat problematical phenomenon – that it signals the speaker’s lack of proficiency in the Language of Learning and Teaching (LoLT). The study also investigated if CS in the classroom contravenes the country’s Language-in-Education Policy (LiEP), which states that English is the medium of instruction throughout the education system (Botswana Government White Paper No.2 of 1994).

The study found that CS occurrence in teaching and learning has positive and negative educational effects. However, its use has adverse implications for the LiEP of Botswana. Consequently, recommendations are made on the effective use of CS and on the revision of the LiEP.

The study is divided into nine chapters. Chapter One is the introduction and covers: Botswana’s language situation, including the status of English generally and in education in particular, the statement and analysis of the problem, research questions and the importance of the study.

Chapter Two gives a comprehensive review of the literature on CS generally and CS in education in particular. The key words are: code-switching, code-mixing, borrowing, nonce-borrowing and re-borrowing / double-plural. Botswana’s LiEP is also discussed with respect to language planning, education and educational development.

Chapter Three discusses the research design and the data-collection methods. These include: the research sites, sample selection and sampling procedures, data-collection instruments and their administration, and the independent and dependent variables used in data-collection. The importance of pre-testing the research instruments, ethical aspects observed and problems encountered during the data-collection stage are also highlighted. The role of the University of Pretoria’s Statistics Department is also

explained. Hymes' mnemonic of SPEAKING used in the analysis of the qualitative data is also described.

Chapter Four presents the quantitative analysis of the respondents' demographic details, and highlighting the differences and similarities identified.

Chapters Five and Six present the results from the quantitative analysis of the teachers' and learners' data. The former presents the teachers' evaluation of the learners' language proficiency in class; the latter presents the learners' subjective self-evaluation of their own English proficiency and their evaluation of teachers' proficiency in English. Furthermore, both chapters respectively present the teachers and learners' views on the role of English, Setswana and other indigenous languages in education as LoLT, and their attitude towards CS in education. The significance or the non-significance of the analyzed results is also presented.

Chapter Seven presents the results from the qualitative analysis of the data (through the application of Hymes' mnemonic of SPEAKING) obtained through lesson observations.

Chapter Eight deals with the interpretation and discussion of the results through answering the main research questions.

Chapter Nine presents the study's summary, conclusions and recommendations on CS in the classroom and on Botswana's LiEP. The study's limitations and implications for further research are also discussed.

## KEY TERMS

Code-switching

Intra-sentential code-switching

Inter-sentential code-switching

Tag-like / emblematic code-switching

Code-mixing

Nonce borrowing

Borrowing proper

Re-borrowing

Language shift

Language planning

Language policy

Language in education policy

INTERPRETATION AND DISCUSSION OF THE RESULTS.....	320
8.1 INTRODUCTION.....	320
8.2 RESEARCH QUESTION ONE: WHAT ARE THE DEFINING CHARACTERISTICS OF THE PHENOMENON OF CS?.....	321
8.3 RESEARCH QUESTION TWO: TO WHAT EXTENT IS CS USED IN EDUCATIONAL SETTINGS IN BOTSWANA?.....	328
8.3.1 Teachers' responses .....	328
8.3.2 Learners' responses.....	330
8.3.3 Summary of teachers and learners' attitudes towards CS .....	331
8.3.4 The qualitative data .....	332
8.3.5 Functions of CS in the classroom.....	335
8.4 RESEARCH QUESTION THREE: CAN THE PHENOMENON IN.....	
BOTSWANA CLASSROOMS BE CALLED CS? .....	341
8.5 RESEARCH QUESTION FOUR .....	348
8.5.1 What are the didactic consequences of CS in the schools?.....	348
8.5.2 Is CS educationally beneficial? .....	357
8.5.3 Does the use of CS in a classroom situation slow down the pace of teaching and learning?.....	362
8.5.4 Is the practice of CS from English to Setswana in a classroom situation discriminatory to non-Setswana speakers? .....	364
8.6 RESEARCH QUESTION FIVE .....	366
8.6.1 Does the use of CS in a classroom situation violate the LiEP of Botswana? .....	366
8.6.2 Is the LiEP consistent with the practical realities of the classroom situation? .....	368

8.6.3 Should the LiEP be revised to ensure that the LoLT promotes maximum delivery and acquisition of knowledge and skills development?.....	373
8.7 RESEARCH QUESTION SIX: DOES THE CURRENT LiEP PROMOTE NEGATIVE PERCEPTIONS ABOUT SETSWANA AND OTHER LOCAL LANGUAGES? .....	377
8.7.1 Teachers' perceptions about Setswana in education.....	377
8.7.2 Learners' perceptions about Setswana in education.....	378
8.7.3 Teachers' perceptions about using local languages (besides Setswana) in education .....	378
8.7.4 Learners' perceptions about using local languages (besides Setswana) in education .....	379
8.7.5 Summary of teachers' and learners' views on using Setswana in education .....	380
8.7.6 Summary of the teachers' and learners' views on using local languages in education .....	381
8.7.7 Qualitative data .....	381
8.8 CONCLUSION .....	382
CHAPTER NINE .....	385
SUMMARY, CONCLUSIONS, RECOMMENDATIONS AND LIMITATIONS.....	385
9.1 INTRODUCTION.....	385
9.2 SUMMARY .....	385
9.3 CONCLUSIONS.....	388
9.3.1. The prevalence of CS in the classroom.....	388
9.3.2. The teachers' attitude towards CS.....	389
9.3.3 The learners' attitude towards CS .....	389
9.3.4 CS to a local language.....	390
9.3.5 Functions of CS in the classroom.....	390
9.3.6 Didactic consequences of CS .....	391
9.3.7. Educational effects of CS.....	393
9.4 RECOMMENDATIONS .....	403
9.4.1 Recommendations on CS in the classroom.....	404
9.4.2 Recommendations on the LiEP.....	405
9.5 LIMITATIONS OF AND IMPLICATIONS FOR FURTHER RESEARCH .....	409
9.6 CONCLUSION .....	411

## TRANSCRIPTION CONVENTIONS

The following symbols were used in the transcriptions of lessons (and also in the extracts reproduced in the text) based on Arthur's conventions (2001, 59):

Te= teacher

Ln= learner

Lns= Learners in chorus

C= class

( ) indicate unclear speech

[BLOCK CAPITALS] indicate comment on an act taking place during the lesson

{ } indicate overlapping speech

Learners' names have been deleted from the transcriptions

Normal sentence punctuation has been used as far as possible, for easy readability of the transcriptions to lay readers.

Commas have been used to indicate normal pauses in the speech; but long pauses or hesitations have been indicated with three full stops (...) or by word [silence]

Plain font has been used in the reproduction of the transcriptions in English in a lesson delivered in English and Setswana in a lesson delivered in Setswana.

**Bold** represents Setswana *code-switching* in an English text and English *code-switching* in a Setswana text.

*Italics* represent translations of Setswana into English.

*Code-switching* texts in English in a Setswana lesson are not translated into Setswana

There are no direct translations for the following frequently used Setswana tags, but are literally used to mean:

- 'Ga kere': 'you agree with me' or 'it is so'
- 'A re a utlwana' : do we understand each other
- 'A re mmogo' : are we together
- 'ke a utlwala sentle' : Am I well-understood
- 'mma' : polite form of address for females meaning 'madam'
- 'rra' : polite form of address for males meaning 'sir'
- 'ee' : short response meaning 'yes'
- 'nnyaa' : short response meaning 'no'
- 'eemm.' contracted form of 'ee mma'

- ‘eerr.’ contracted form of ‘ee rra’
- ‘ee?’ used in the form of a question to solicit a response or to check if the learners agree with the teacher
- ‘mm?’ used to check if learners are following what the teacher is saying
- ‘heh?’ used to imply that one has not understood or to check if the learners are following what the teacher is saying; meaning depends on contextual use.
- ‘aammh’ used to provide a pause in the speech as the speaker still figures out what word to use or what to say.
