Dear Mrs. X

**Participation in a research project**

This is a friendly invitation to you and (child Y) to participate in my research about “The influence of discourses on educators’ and learners’ perceptions and practice in home schooling”.

The aim of my study is to investigate the influence of discourses on home school educators’ and learners’ perceptions and practice of home schooling. The focus will be on home school educators' and learners' own experiences, ways of giving meaning and the values that underpin their specific subculture. Knowledge in this regard might contribute to a deeper understanding of the unique nature of the home school context and the implications of this for the teaching and learning that take place in the home school.

I intend conducting separate interviews with home school educators, fathers and learners and would also like to visit the home school on three occasions in order to observe the day-to-day activities. During these visits I want to make video recordings. I would like to conduct a reflective interview with the home school educators. Lastly I intend to administer a single selected projection plate to each home school educator, father and learner.

I do not foresee that you will experience any risk or discomfort during your participation in my study. There is however always the possibility that problems, needs or underlying emotions might surface when projection plates are administered. Should this happen, I will facilitate access to support.

Your participation is voluntary and you may withdraw from the research at any time. Your decision to withdraw will have no negative consequences. The information obtained from the study is confidential. The results of the study will be published but you and (child Y) will remain anonymous. My supervisor will be the only person to have access to the information during the study, but not to your identity.

I would appreciate your consent and also your assent as the parent of (child Y) to participate in the study. I will explain the research process to (child Y) beforehand and also obtain his/her assent.

Dear (child Y)

**Participation in a project**

This is a friendly invitation to you to participate in my project. I would like to visit you, to discuss your instruction in home school. The reason for my visit is to gain a better understanding of home schooling. I am not here to say whether it is good or bad, but to find out how you feel about it and what it is like for you to learn at home.

I would also like to visit you in the home school a few mornings, to see what you do everyday. When I come to visit I am going to bring my video camera to help me remember everything that happens. One of the days I am going to bring a picture and would like you to tell me a story about the picture.

I have already spoken to your mother and asked her if she would mind if I came to visit, and she said that she didn’t mind. Now I would like to know whether my visits would also be okay with you.

Yours sincerely

Lizebelle
(072 483 7004)
I give my assent for Lizebelle to visit my home school that we may talk about my home school. I also agree to look at the pictures and tell stories about them.

_Deelname aan ’n navorsingsprojek_

Hiermee ’n vriendelike uitnodiging aan u om deel te neem aan my studie rakende “Die invloed van diskoerse op opvoeders en leerders se persepsies en praktyk in tuisskoling”.

Die doel van my studie is om ondersoek in te stel na die diskoerse wat tuisskool opvoeders en tuisskool leerders se persepsies en praktyk van tuisskoling beïnvloed en die voortspruitende gestaltegewing aan die tuisskoolonderrig praktyk. Die fokus sal hiermee gerig word op die tuisskool opvoeders en leerders se eie ervarings, wyses van betekenisgewing en waardes wat hul besondere subkultuur onderlê. Kennis in die verband kan hopelik bydra tot dieper begrip van die unieke tuisskoolonderrig konteks en die implikasies hiervan vir die onderrig- en leergebeure.

Ek wil graag afsonderlik onderhoude voer met tuisskool opvoeders, vaders en leerders en by drie geleenthede die tuisskool bywoon om die verloop te observeer en video-opnames daarvan te maak. Ek sal dan graag ’n reflektiewe onderhoud met die tuisskool opvoeder wil voer. Ek beoog ten slotte om ’n enkele geselekteerde projekspieplaat met elke tuisskool opvoeder, vader en tuisskool leerder te gebruik.

Ek voorsien nie dat u enige risiko of ongemak sal ervaar tydens u deelname aan my studie nie. Die moontlikheid bestaan egter altyd dat ’n probleem of behoefte te voorskyn kan kom of dat diepe liggende emosies na die oppervlakte kan kom tydens die gebruik van projekspieplee. Indien dit gebeur sal ek toegang tot ondersteuning fasiliteer.

U deelname is vrywillig en u kan enige tyd van die navorsing onttrek. Die besluit om te onttrek sal geen negatiewe gevolge vir u inhou nie. Die inligting wat uit die studie verkry word is vertroulik. Die resultate van die studie sal gepubliseer word, maar u anonimiteit sal te alle tye gehandhaaf word. My supervisor is die enigste persoon wat tydens my studie toegang tot die inligting gaan hê (ofskoon nie tot u identiteit nie).

Ek versoek dus vriendelik u instemming en ook u toetstestemming as ouer van (kind Y) om deel te neem aan die studie. Ek sal vooraf die proses ook aan (kind Y) verduidelik en sy/haar instemming verkry.

**Deelname aan ‘n projek**

Ek wil jou vriendelik uitnooi om deel te neem aan my projek. Ek sal graag by jou wil kom kuier en met jou gesels oor jou tuisskool. Ek wil graag meer weet oor tuisskoolonderrig sodat ek dit beter kan verstaan. Ek is nie hier om te sê dit is goed of sleg nie maar om uit te vind hoe jy daaroor voel en hoe dit vir jou is om skool te gaan by die huis.

Ek sal ook graag ‘n paar oggende by jou wil kom kuier in die tuisskool om te sien wat julle elke dag doen. Wanneer ek kom kuier gaan ek my video kamera saambring sodat ek alles kan onthou van wat jy daardie dae gedoen het. Ek gaan ook die een dag ‘n prentjie saambring waarna ons gaan kyk en waaroor ons ‘n storie gaan vertel.

Ek het reeds met jou mammie gepraat en vir haar ook gevra of dit reg is as ek by julle kom kuier en met julle gesels en sy het gesê dit sal reg wees. Ek wil nou by jou weet of dit vir jou ook sal reg wees as ek kom kuier.

Vriendelike groete

Uittreksel uit Gevallestudie A as voorbeeld van die data

(Onderhoude van Moeder A, Vader A en Kind A)
**N1**: So for now I would like us to start by talking because I don't know I have seen you now on two occasions but I don't know you and I don't know your family, so I would just like you to start by just talking about you know tell me a bit more about yourself, about your family and each individual member of the family from your opinion, from your point of view.

**1M1**: Okay well I am one of three daughters and I am the oldest and we are very much a Christian family. And I met my husband up here while I was doing nursing and got married to him. He wasn't in our religion so that was a bit of a problem in the beginning. And after four years of marriage he basically came over into our religion. Before and as the children. I had a miscarriage before I had **** and that was the turning point on his part. And he started becoming a Christian and it was from that point. So since **** was born we have lived a Christian life with good morals and good values and that was one of the main reasons why we decided to home school. **** then was born and she was to me what people would call say a difficult child. She had colic, she was crying all the time, she teether early. It was just one problem after the other. Then we would noticed
that she was hyper allergic. And when I started going back
to work we left her with her granny and the granny had cats
and we didn't know that this was one of the things that ****
was allergic to. So every morning between 2:00 and 3:00 in
the morning she would vomit terribly and she was sick all
the time. Her tonsils were always infected and it was only
later that we realized she was allergic to cats and she was
exposed to these cats every day. So with her asthma she
ended up in hospital a few times. And then that was one of
the reasons also that we decided to home school because
then we realized she was allergic to grasses and things and
those kind of things are everywhere at the schools. And
being a nurse myself I am I am more a nature, nature,
natural girl. I didn't want to go for all the medications and
things so we keep her controlled at home as natural as
possible without any medication, cortisone, etc.

<table>

because I then got married in my second year cause I met my husband on the air force. Well he was doing his army training on the airplane because he is a pilot. He was a pilot and we met on the one trip, we were going down to Cape Town to visit my parents and he was the airman on the crew and that is how we met. So then it became very difficult because he wasn't allowed to visit me in my room here and I was the only person up here I had no family here and so we got married. And then after that I left my studies. And so and I nursed from 1992 till about 8 years ago. So it has been 10 or 11 years that I nursed.

opposite. Hmmm where **** is a perfectionist, likes her set ways. Shirley is easy going, Shirley slept through, she slept in her own cot. **** didn’t want to be without me, **** was extremely clingy. She wanted to be picked up 24/7. If I put her down in her cot she would start crying. And Shirley again was a total opposite, an easy going child. Although hmmm **** is a lot more perfectionistic in her school work, likes to get her stuff done. Shirley would just keep quiet and she knows if she doesn’t talk too much she might get out of it. Whereas **** would insist that she wants to get her things done straight away.

<td>1M6:</td>
<td>Well, Shirley would get far in life by just being so easy going. She fits in, she is lovable, friends come and visit. It doesn’t matter what age they are they would rather stick with Shirley than with **** because **** likes to tell people what to do and how to do it. Where Shirley the younger one, is you decide what to do and you know and she falls in with anything. And it makes her much more easy going as as a person or as a child. Hmmm I can’t really tell you more about that. Does that explain it (laugh)?</td>

GEVAL 1 – MOEDER (Reflektiewe onderhoud)

Ons het by die kombuis tafel gesit en gesels. Moeder sê vir die kinders hulle kan gaan doen net waarvoor hulle lus is.

<table>
<thead>
<tr>
<th>N1:</th>
<th>Okay I am going to continue in English again like I did last time. Okay I want to start off by, you know something that was very positive for me, something that when I went back to the interviews and mostly in the observations it was quite evident that you have got this amazing ability to be very patient with the children regarding their school work. And not just in the school but in general as well. I mean I have seen you interacting with them on a more informal way in the house but specifically now the home school. It stood out in the interviews and it is amazing that you manage to do that. With that is your ability to manage everything. It is quite a lot on you I mean this is not a small house, it is quite a big house. And you manage the whole house hold. You have got a maid once a week which is not really a lot. And you still manage to run the household, to make sure there are food on the table and together with this you run the home school quite sufficiently it seems from what I saw. So my next question is how do you manage all of this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1MR1:</td>
<td>Okay I do believe patience is patience is a virtue (laughs). Something I pray for all the time because it is easy to lose your patience and then you spoil the whole day and everything just go downhill from there. So it is to keep your patience on a level that it is controllable. It is a big thing and obviously it does get better with time and with a lot of prayer (laughs). So yes I think patience and dividing your time into into where you have now is a time for eating now is a time for cleaning, this needs to be done and the</td>
</tr>
</tbody>
</table>
children need to help. So they are in charge of their own rooms, their bathroom and I just go around and top up. It is a great help that I have the maid once a week but all the other things. Else I’ll get up earlier than them and I’ll do the washing and the ironing and things like that. Hmmm time for their school we try and stick with the three hours a day with school or whatever papers they need to do a day. Hmmm so I divide up my time so there is enough time for everything. Yes there are days when I don’t get to everything. Then I make up over weekends for that kind of thing or when later on at night when the children go and sleep.

N2: Alright. Tell me a bit more, you say you pray quite a lot about things. Tell me a little bit more of that aspect (she interrupts me).

1MR2: Well obviously I yes I have had times where I feel I have lost my patience. You know when a child comes and tell me that they can’t do it when I know they have got the ability too. Either they, you mustn’t just say you can’t do it. I want to see the child at least try. And there is a difference between I think because that is the helpful thing about the mother knowing what the child can do cause the mother is with the child all the time. The mother knows when the
child has actually tried or if they just give up without wanting to try. So we you know there has been times when I get impatient when I say this is not it, this is not it and mommy is getting angry with you because you are not trying and then they are obviously going into a crying. I have one child that will go into a crying spell and say, “I have tried, I have tried”. And I say, “No I haven’t seen you try, where is your piece of paper where you actually showed me where you have tried to do the sum so that I can see where you have made the mistake”. And then she will apologize and she will show me on the paper where she struggled and she normally gets it right then and I say, “See what happens if you actually try”. But it’s a it’s a it’s a thing where actually I have just learned over this last three, four years that I don’t lose my patience. When they start crying I just keep quiet, wait for them to work it out with themselves. It normally takes less than five minutes. They normally come around and say I am sorry mommy and then try again. We give each other a hug and a love and that is it. Sometimes when the morning starts out wrong. It happens very seldom. I just, I know there is just a wrong spin it around and normally all I do is pray. The moment you pray and you ask, “Lord please be with us, let us find
comfort, let us try our best with our school, etc”. There is a whole new different spirit in the room and we can work from there further. It is a lot quieter, they don’t fight with each other, they try their best, everything just work out fine. And yes I am a Christian and I believe as you grow in your Christianity you learn, you are more patient. You become more kind, more loving, more giving, all those attributes of a Christian comes over time. And you know I am I am 36 already so it comes with age as well that you learn to mellow a bit. I would say that’s the words. I don’t know if that answers your question.

N2: Alright. Tell me a bit more, you say you pray quite a lot about things. Tell me a little bit more of that aspect (she interrupts me).

**1V2:** Sjoe okay (laughs).

**N3:** Strong points, weak points anything that you want to focus on.

**1V3:** Okay well my wife **** she is definitely to use the words of my kids she is really the glue that keeps us together. She is definitely wonderful with the kids. I know she has trying times with them sometimes during the day. When I come home she wants me sort of to take control, not take control, but take the kids for a bit so that she can have a break. But hmmm no she is very strong, strong woman. I think it is (I can’t make out) to do the homeschooling. I think it is a specific type of person that
can actually take this and run with it without giving up. Cause I think they are getting very trying at times hmmm but ja she is a wonderful person. Very caring, very gentle and patient. Okay with ****, **** I think she is very strong willed. When she gets in her head to do something or not do something she puts up quite a quite a fight but I think is only really temporarily because she often sees the light a few minutes later and will come say sorry she acted wrongly and hmmm she will try and do better, that sort of thing. But she is also a wonderful child and deep down very caring and you can see that even though sometimes she can be quite stubborn hmmm but they are both, both **** and Shirley I think are talented when it comes to creativity. They come up with, I think most kids do, but they come up with some very innovative games and plays. They often put on plays and things like that and they do things that you will not really think of. But ja with their singing and their dancing, very musical, hmmm they are both just wonderful children. Shirley I mean has got a very special spirit about her. Hmmm also not as loud and outgoing well let's put it this way she is definitely more outgoing than **** but she is more quite in the sense that I think it is just her nature that attracts people more than being boisterous and
loud and ja they are just both wonderful children and I wouldn’t trade them for anything.

**N4:** Tell me a little bit about your family. Your values or your principles. What is important for you as a family?

**1V4:** Okay well I am sure **** has told you that we are Christian and hmmmm we obviously place the Lord very high in our lives. So hmmmm probably honesty hmmmm integrity that sort of thing is very high. We obviously try to install Christian values in the children. Hmmm so ja it is just how to live your life as best you can, serving the Lord and being honest. That is ja.

**N5:** How do you manage with your workload being the way it is? You said you don’t get to spend as much time with the children as you would like. How do you manage that? What do you and the kids do together?

**1V5:** Well when we normally, we normally when we get home we are all in the study here. So even if I am working we are all still together. But ja we try sometimes to play soccer in the garden and they like that and hmmmm you sort of just try to be with them even if you are working on different things, just to actually spend time together. Even though you might be on like ja they normally they are playing their games or doing school work on their
computers. **** is on her computer and me on mine (laughs). But at least we are together and we still talk even though we are busy doing different things. So even that is one way we can still be together and bond but we are doing our separate things. Hmmm but ja when I get home and they have got plays planned then I encourage them to do that, sit through them, watch them you know, encourage them (laughs). Ja it is just take a day, we take it as it comes.

**N6:** Alright, now I know you are not directly involved in the day-to-day teaching of the home school, but tell me a little bit of your perception of the home school. How do you feel about it, just generally (he starts talking)

**1V6:** I am very pro it purely because I can just relate to when I went to school and the type of education you get now. I think there would be for me a lot of gaps for the kids. Hmmm I think the home schooling gives the child that individual attention which I think they do need. Hmmm we can’t afford obviously to send our kids to a private school. So that would be the next thing. I think government schools now a day, not even the influences in them, but I just think the quality and level of education, you know I wouldn’t be happy with. So that was my main drive to sort of even way
back then when we started, the way we were talking about it I think it is the quality of education and then the way that the kids at a young age grasps information. I think it is much better to give them that individual kind of attention. So I am very pro it. Like I said it will depend for me largely on the children, what they want hmmm (takes his phone out and says sorry I just want to cancel this). Hmmm you know what their their needs are and that’s what they want to get out of it. Some kids I’d think would want to go to school you know depending on their interaction with the other children there. Depending what the school offer that sort of thing but hmmm I know our kids they seem to be you know from my perspective they seem to be quite happy with the home schooling. Whenever we have asked them if they wanted to go to a normal school they have always said no they are happy with it. I know **** she needs individual attention a lot of the time. It could be bad and good because I think she is in some instances afraid to try because she knows **** is right there. So there is a little bit of tension there. Hmmm but it boils down to what the kids want and whether or not **** is willing or capable, which in this case I think she is.

| <strong>1D7:</strong> | (think) I am really good at drawing. I am really good at well I think I am really good at running but I came third in my running thing. So I think I am good at running but I am not so fast like super zooper. But I like running. |
| <strong>N8:</strong> | Where was this running competition or thing that you did? |
| <strong>1D8:</strong> | Well hmmm it was long ago hmmm. It was like on a Saturday and these people were home schooled. But it was lots the whole church. So we had like like shoot the line whoever can jump the furthest. And like the race I tried to run as fast as I can but I like caught my toe somewhere and I went like smash and it was very painful. So it was hard for me to run but I came third. I've got medals somewhere, somewhere. I have got it down stairs. And once a month on a Saturday we wake up 5 o'clock and we will go and do the fun walk at the zoo at the Pretoria zoo. We do all 5 kilometers. |</p>
