**DEGREE: Philosophiae Doctor (Information Technology)**

## ABSTRACT

The traditional workplace evolved over time, moving through different waves or phases of change. The phases, although prevalent in different stages in different countries, have been characterised by various technological developments. The virtual workplace evolved as part of the Information Age or Fifth Wave, bringing with it its own unique characteristics and requirements. These unique characteristics, such as the speed at which information is communicated, crossing of time and space boundaries, social networks and requirements, such as sustainable high speed internet connectivity, are evident in the relationship between people, processes and the virtual workplace.

This study explored the manner in which virtual workers executed their activities through the use of technology, the type of business processes supporting them and the challenges experienced by them. The proposed framework for the management of people, processes and places in the virtual workplace was subsequently derived. The framework has as aim to represent the relationship between people, processes and places components in the virtual workplace and in doing so providing a management framework supporting the virtual workplace. The people, processes and places components have been incorporated in the management, technology and practice sections of the framework, thereby providing a framework based on the relationship between people, processes and places.

This study also developed the Extended Hermeneutic Circle of Learning which was used as guideline for the research conducted as part of this thesis. The deeper understanding created through the use of this research guideline assisted in providing structure to the research, thus enabling the researcher to derive the proposed framework for the management of people, processes and places in the virtual workplace.

## KEYWORDS

People, Process, Place, Virtual Workplace, Time, Space, Extended Hermeneutic Circle of Learning, Management Framework

## DECLARATION

I, Ilse Geldenhuys, declare that

### ***THE MANAGEMENT OF PEOPLE, PROCESSES AND PLACES IN THE VIRTUAL WORKPLACE***

is my own work and that all sources used and/or quoted have been indicated.

All the sources are acknowledged by means of a complete bibliography.

The thesis was language edited by MMJ Gerber, Language practitioner at the Directorate: Language Services, University of South Africa, with qualification BA (Lang) (THOD).

**Ilse Geldenhuys**

**2010- 11- 14**

*To*

*Theo, our children, grandchildren and Kobie,*

*I love you dearly. I am because of you.*

## ACKNOWLEDGEMENTS

This study is the peak of many years of part time study done with the unconditional love and support of those dear and precious to me.

It is with great humbleness that I thank our heavenly Father who blessed me beyond imagination with the abilities, strength and endurance to embark on and complete this study. Glory to God.

My sincere appreciation to:

- The University of Pretoria for the opportunity to study towards this outstanding degree.
- My study leader, Prof Carina de Villiers, whose invaluable guidance, support and advice helped me in achieving this goal. I could not have wished for a better supervisor.
- My co-study leader, Prof Patricia Alexander, who provided important insights and perspectives.

My deepest and utmost appreciation to:

My jewel of a husband Theo, who stood by me every step of the way; who never lost confidence in my abilities to complete this study and whose unwaveringly love and support made this journey possible. Liefde, thank you for your love and the countless ways in which you have supported me, for the many hours of hard work designing the page layouts, for compiling the graphics included in this thesis and for the making of the data recordings. Truly, you are a pillar of strength.

Our children and grandchildren whose unselfish sacrifices, love and support provided me with the courage to complete this degree.
