Submitted in partial fulfillment of the requirements for
the degree of Magister in Architecture (Professional)
in the Faculty of Engineering, Built Environment and
Information Technology

University of Pretoria

November 2010

by_Louise de Villiers

Studio master_ Arthur Barker
Study leader_ Carin Combrinck

The project explores the expression of meaning in architecture against the backdrop of the City of Tshwane Metropolitan Municipality as post-apartheid capital city. The architectural aim of the project is the consolidation of the National Department of Home Affairs and the design of the headquarters of this department.

The project starts with a brief exploration of the context of a post-colonial and post-apartheid city, and the aims and identity linked to an African democracy in the context of multiple cultural identities. The search for a national identity is linked to the existential question of 'being', which is related to an experiential understanding of physical surroundings.

Case studies include recent public buildings that form part of an era of searching for identity and contribute to the discovery of an underdeveloped element of multi-sensory experience in recent architectural projects related to the new democratic government.

UNIVERSITEIT VAN PRETORIA **OF THANKS**
UNIVERSITY OF PRETORIA
YUNIBESITHI YA PRETORIA

My sincere thanks to my study leader, Carin Combrinck, and our studio master, Arthur Barker, for their encouragement, support and advice.

Special thanks to Tjaard Botha at the Department of Public Works for his friendly assistance and continued availability.

Thanks for their support to my family and friends who were continually subject to various discussions related to my thesis.
