A mini-dissertation submitted in partial fulfillment of the requirements for the Masters degree in Clinical Psychology at the Department of Psychology University of Pretoria

Supervisor: Prof. D. Beyers

March 2003
Acknowledgements

First and foremost I would like to thank my supervisor Professor Dave Beyers for his inspiration and guidance during the writing of this dissertation.

I would also like to thank my family and friends for their support and understanding.

A big thanks to the University of Pretoria for providing excellent resources making this research possible.

Finally I would like to thank my God, Jesus Christ for his guidance and strength.
Abstract

This study is an investigation into the psychosocial themes present in the DSM-IV diagnosis of adolescents diagnosed with a comorbid Disruptive Behavior and Mood Disorder. These themes are viewed from a psychosocial theoretical perspective. The study focuses on answering four questions.

- Firstly, what are the psychosocial themes present in the diagnosis of adolescents diagnosed with a comorbid Disruptive Behavior and Mood Disorder?
- Secondly, how does these themes impact the adolescents psychosocial development?
- Thirdly, what role does these themes play as causative factors of Disruptive Behavior and Mood Disorder symptoms in adolescence?
- and lastly does these themes represent interactional processes reinforcing a reciprocal pattern of behavior and mood disorder symptoms?

These questions are all viewed taking the psychosocial development of the adolescent into account.
# Index

## Chapter 1: Introduction

- 1. Introduction

## Chapter 2: Psychosocial theory and literature survey

- 1. Introduction
- 2. Psychosocial theory
- 3. Psychosocial development of early adolescence
  - 3.1 The life stage of early adolescence
  - 3.2 Developmental tasks
    - 3.2.1 Physical maturity
    - 3.2.2 Formal operations
    - 3.2.3 Emotional development
      - 3.2.3.1 Adolescents and behavior problems
      - 3.2.3.2 Adolescents and depression
    - 3.2.4 Membership in the peer group
    - 3.2.5 Sexual relationships
  - 3.3 Psychosocial crisis
  - 3.4 Resolving the psychosocial crisis
  - 3.5 Radius of significant relationships
    - 3.5.1 Adolescents and their parents
  - 3.6 Coping behavior
  - 3.7 Ego quality vs. core pathology
  - 3.8 Personal identity
- 4. Psychosocial theory evaluated

## Chapter 3: Research method

- 1. Introduction
- 2. Research problems and aims
- 3. Research method
Chapter 4: Results: Psychosocial themes identified

1. Introduction

2. Prevalence of psychosocial themes in 14 cases

3. Common denominators

4. Interactional factors

Chapter 5: Discussion

1. Introduction

2. Psychosocial implications

2.1 The psychosocial crisis

3. Psychosocial themes as causative factors in behavior and mood disorders

5. Psychosocial themes as interactional processes reinforcing a reciprocal pattern of behavior and mood disorder symptoms
Chapter 6: Conclusion 58
   1. Introduction 58
   2. Critique and recommendations 60
