A STUDY OF COMPUTER INTEGRATED EDUCATION IN SECONDARY SCHOOLS IN NYANZA PROVINCE, KENYA

by

FLORENCE ODERA

Submitted in partial fulfilment of the requirements for the degree

PHILOSOPHIAE DOCTOR (PhD)

in the

DEPARTMENT OF CURRICULUM STUDIES
FACULTY OF EDUCATION

at the

UNIVERSITY OF PRETORIA

Promoters: PROF W. J. FRASER
PROF L. R. KILLEN

Pretoria
October 2002
DECLARATION

I declare that this research report handed in herewith for the degree of Doctor of Philosophy at the University of Pretoria is the researcher's independent work. It has not been submitted for a degree or examination before in this or any other university.

FLORENCE Y. ODERA

1st September

21st day of 3rd 2002.
DEDICATION

This work is dedicated to my late parents, Andronico and Nerea, who inspired and motivated me to love education and believed in the education of girls as a catalyst to better family living.
ACKNOWLEDGEMENTS

I am deeply indebted to my supervisors Professor Fraser and Professor Killen for their excellent supervision, valuable help, expert guidance, suggestions, commitment, material support and constructive comments that contributed much towards the completion of this study.

I would particularly register my special thanks to Professor Fraser, Head of Department of Teaching and Training at the University of Pretoria whose deep concern and understanding of my plight provided motivation and encouragement and professional guidance I needed for this study.

I am also gratefully indebted to Professor Killen for his committed intellectual support in the preparation of this study that enabled me to complete this work in good time.

I wish to acknowledge with a lot of thanks the financial assistance I received from the Institute of Research and Postgraduate Studies at Maseno University for my field research in secondary schools in Nyanza Province. Second, to finance part of the residential fees for 2002, and providing me with a return-air-ticket from South Africa to Nairobi.

I would also like to express my sincere gratitude to the University of Pretoria for the scholarship award that helped to meet part of my financial requirements for this study. Similarly, I wish to thank my son Tom Mboya for financial support and encouragement without which I would have not completed this course.

My deep appreciation is given to individuals and organisations that provided me with support which I needed for this research project. Particular thanks go to the former Principal of Maseno University, Professor David Serem, and Professor Obura and the entire committee members who granted me leave of absence from the university to pursue this study.
I would also like to sincerely thank my husband Mr Odera Ongudu for his love, patience, and his untiring support for my academic pursuit since 1960s. Thank you for the understanding and sacrifice in allowing me to be away from our home. I am equally indebted to all my children for their material and help in one way or another, moral support and constant encouragement that contributed towards the completion of this research.

I wish to register my appreciation for Elana Mauer and Swanepoel for their assistance in data processing of the questionnaire survey and statistical part of this research project.

Lastly, my special gratitude to Almighty God whose protection and guidance enabled me to overcome the problems that came my way several times, but through trust the Mighty power of the Holy Spirit filled me with inspiration, and determination to succeed.
ABSTRACT

This study is about computer-integrated education focusing on public secondary schools in Nyanza Province, Kenya. It is concerned with the investigation of issues involved in the implementation of computer technology in secondary education. The purpose of the study was to investigate how computers are used in schools and to provide evidence on the obstacles that inhibits effective implementation of computers in teaching and learning. It examined government policy, curriculum guidelines, secondary school computer policies and the school departmental policies regarding the use of computers in the classroom. A review of relevant literature explored the use of computers in teaching and learning in developed and developing countries.

Data were collected from Officers in the Ministry of Education, the Director and a Curriculum specialist at the Kenya Institute of Education (KIE) using structured interviews, from Principals and Heads of Department, using questionnaires in order to obtain qualitative and quantitative data. A semi-structured interview was also used for in-depth investigation with computer teachers. The data collected were analyzed through the use of descriptive statistics and tabulation. A sample of two Senior Education officers, two Curriculum Specialists, 25 Principals, 89 Heads of Department and 20 teachers participated in the investigation representing rural, urban and suburban areas.

It was established from the data obtained that the Kenya Government formulated a policy and supports the use of computers in secondary schools but there was no written policy document or guidelines circulated to schools for the implementation of the policy. It was further revealed that the government had no funds for purchasing computers for schools. Further results indicated that KIE had developed a Secondary Computer Syllabus and distributed it to some secondary schools, but no evaluation was done to assess the effectiveness of computer education in schools.
Most of the Principals reported having a computer policy and practiced whole school integration of computers in education, and using computers to teach computer literacy, traditional subjects and in administrative work. It was also found that a few HODs had departmental policies for the use of computers and were applying computer technologies in the teaching of the traditional subjects such as Accounting, English language, Mathematics and Science Education. Furthermore, computer teachers saw themselves as competent with computer literacy skills and taught students word processing, spreadsheets, database and programming. They were less confident to integrate computers into traditional subjects, although some of them integrated computers into various subject topics.

Barriers to computer integration into traditional subjects that were identified by the participants as lack of teacher training in the use of computer technology in the teaching of subjects and lack of adequate computers and lack of suitable software. The study suggests that systematic teacher preparation at pre-service and in-service course would facilitate effective integration and use of computers in teaching and learning. Finally, the study identified various limitations and makes suggestions for further research direction and recommendations for improvement and immediate action. A model of re-training of teachers is proposed to assist Principals of schools in the task of staff development in CIE.

CHAPTER 1 PROBLEM STATEMENT AND DESCRIPTION OF THE RESEARCH METHODOLOGY

1.1 Introduction

1.2 Background to the study Problem

1.3 Statement of the Problem

1.4 Objectives of the Study

1.5 Significance of the Study

1.6 Scope and Limitation of the Study

1.7 Basic Assumptions

1.8 Research questions

1.9 Conceptual Framework

1.10 Research Strategy and Methods

  1.10.1 Introduction

  1.10.2 Review of literature

  1.10.3 Field research procedures

  1.10.4 Data collection instruments

    1.10.4.1 Structured interview method

    1.10.4.2 Semi-structured interview method
## 1.10.4.3 The questionnaire survey method

1.10.5 Sources of data

1.10.6 The sample of the schools that participated in the investigation

1.10.7 The pilot study

1.10.8 Administration of research questionnaires

1.10.9 Data collection procedures

1.10.10 Data analysis

### 1.11 Definition of Terms

### 1.12 Plan of the research project on the use of computers in secondary schools

### 1.13 Organization of the Thesis

### 1.14 Summary

---

### CHAPTER 2 ROLES AND FUNCTIONS OF COMPUTERS IN THE LEARNING ENVIRONMENT

#### 2.1 Introduction

#### 2.2 Government policies on the use of computers in schools

#### 2.3 Functions of computers in secondary schools

#### 2.4 The potential of computers as tools for instruction

#### 2.5 Reasons for using computers in classroom instruction

#### 2.6 Patterns of using computers in teaching and learning

#### 2.7 Benefits of using computers in teaching and learning

#### 2.8 Disadvantages of computers in teaching and learning

#### 2.9 Definition of Computer Integrated Education

#### 2.10 Teaching and learning with computers in the classroom

   #### 2.10.1 Planning for teaching with computers

   2.10.1.1 Preparing the schemes of work

   2.10.1.2 Teachers preparation for teaching with computer technology

   2.10.1.3 Lesson planning

   2.10.1.4 Lesson presentation

   #### 2.10.2 Evaluation of the teaching and learning processes

---

---
2.10.3 Appropriate teaching strategies 52
   2.10.3.1 Teacher-centred approach 53
   2.10.3.2 Student-centred-approach 53
2.10.4 The concept of learning and CIE 54
   2.10.4.1 Behaviourist approach to teaching and learning 55
   2.10.4.2 Constructivist approach to teaching and learning 56
2.10.5 Facilitation of learning via the computer 57
2.10.6 The teachers' role in CIE learning environment 58
   2.10.6.1 How computers help students to learn 58
2.11 The relevance of CIE to teaching and learning 59
   2.11.1 Using computers as tools in classroom instruction 60
   2.11.2 Defining computer literacy skills 61
   2.11.3 Using the computer to learn how to use word processing 63
      2.11.3.1 Using Word Processor to improve writing skills 64
      2.11.3.2 Using Word Processor for revision work 66
   2.11.4 Using computers to learn Spreadsheet 66
   2.11.5 Using computers to learn Programming 67
   2.11.6 Using computers to maintain Databases 69
2.12 Integration and use of computers in curriculum subjects 71
   2.12.1 Learning mathematics with computers 71
   2.12.2 Learning science with computers 73
      2.12.2.1 Pre-instructional simulation 78
      2.12.2.2 Post-instructional simulation 78
   2.12.3 Learning social studies with computers 79
   2.12.4 Using computers to improve learning foreign languages 81
   2.12.5 Using computers to learn graphics 82
2.13 Summary 84
CHAPTER 3 FACTORS FACILITATING AND AFFECTING THE USE OF COMPUTERS IN SCHOOLS

3.1 Introduction

3.2 Factors that encourage the introduction and use of computers in schools
   3.2.1 The need for educational reform
   3.2.2 Teacher knowledge and skills are necessary for curriculum innovation
   3.2.3 The necessity of resources for teaching and learning with computers
   3.2.4 The availability of time for the use of computers in teaching and learning
   3.2.5 Provision of incentives and encouragement to teachers using computers in teaching
   3.2.6 Teachers' participation in the initial computer technology innovation
   3.2.7 Commitment by the school authority to the use of computers in teaching and learning
   3.2.8 Commitment by the government to the use of computer technology innovation in schools

3.3 Factors that affect the use of computers in teaching and learning
   3.3.1 Lack of teachers' preparation to integrate and use computers in teaching and learning
      3.3.1.1 The training of teachers to integrate computers into teaching traditional subjects
      3.3.1.2 Pre-service teacher training course in computer integrated education
      3.3.1.3 In-service teacher training on the use of computer integrated education
      3.3.1.4 School-based workshops/seminars for serving teachers on CIE
   3.3.2 Attitudes of teachers towards computers in education
   3.3.3 Lack of computers for teachers to use in teaching and learning
   3.3.4 Accessibility of computers and resources for teaching and learning
   3.3.5 Technical support for effective use of computer in schools
   3.3.6 Lack of adequate time use computers in teaching and learning

3.4 Other factors to be considered in the use of computers in education
3.4.1 The use of computers to motivate students to learn
3.4.2 The cost of using computers in teaching and learning
3.4.3 Cost-effectiveness of the use of computers in teaching and learning
3.4.4 Support from the school for the use of computers in teaching and learning

3.5 Summary

CHAPTER 4 RESEARCH METHODS APPLIED AND CONTENT VALIDATION OF THE QUESTIONNAIRES

4.1 Introduction
4.2 Planning for field research
4.3 Specific objectives of the field research
4.4 Formulating research questions
4.5 The content validation of the questionnaires

4.5.1 Questionnaires 1, 2, 3: background information of participants and the schools

4.5.2 Questionnaires 1, 2, 3, 4 on policies and the use of computers in schools
4.5.3 Questionnaires 1 and 2

4.6 Collection of data

4.6.1 Choosing the sample

4.7 Data collection procedures

4.7.1 The consideration of the review of literature
4.7.2 Use of structured interview method to collect data
4.7.3 The application of questionnaires during the investigation
4.7.4 Use of semi-structured interviews to collect data

4.8 Administration and application of the instruments

4.8.1 Seeking permission to conduct interviews
4.8.2 Pre-interview arrangements
4.8.3 Interviews with Officials from the Ministry of Education, KIE and computer teachers

4.9 The general plan for data analysis

4.10 Problem with data collection and field research experiences
CHAPTER 5 INTERVIEWS WITH MINISTRY OF EDUCATION OFFICERS CONCERNING THE INTRODUCTION OF COMPUTERS IN PUBLIC SECONDARY SCHOOLS

 CHAPTER 6 THE ROLE OF THE PRINCIPALS AND HEADS OF DEPARTMENT IN COMPUTER INTEGRATED EDUCATION: POLICY AND PRACTICE

6.1 Introduction 170
6.2 Research findings 171
6.2.1 Information about responding institutions 171
6.2.2 Category of schools that participated in the investigation 173
6.2.3 The number of students in the schools that participated in the investigation 174
6.3 Personal details of the participants in the investigation 176
6.3.1 Population of the teaching staff in responding institutions 177
6.3.2 Age distribution of Principals and Heads of Department who participated in the investigation 179
6.3.3 Participants’ years of teaching experience 180
6.3.4 Principals and HODs’ experience with the use of computers 182
6.3.5 Principals and HODs years of service in computer education in the schools that were investigated 183
6.3.6 Highest academic qualification attained by the Principals and HODs in the schools that participated in the investigation 184
6.3.7 Principals’ professional training 184
6.4 The introduction of computers in schools: policy and practice in the schools that participated in the investigation 185
6.4.1 Priority given to computer integrated education in study schools 189
6.4.2 The implementation of school policy for the use of computer in teaching and learning 191
6.4.3 Priority given to implementation of school departmental computer policy 193
6.4.4 Guidelines for the implementation of computer education in schools that
that participated in the investigation

6.5 Finance and resources allocation for the use of computer education in schools

6.5.1 The cost of purchasing computer equipment

6.5.2 Amount of money allocated to departments for computer equipment

6.6 Availability of computers and support materials in schools that participated in the investigation

6.6.1 The present conditions of computers available in study schools

6.6.2 Number of computers used by the staff in schools that participated in the investigation

6.6.3 Accessibility of computer equipment to teachers

6.6.4 Principals’ general comments on the use of computers in their schools

6.7 Principals’ responses on teachers’ use of computers in teaching and learning

6.7.1 Current use of computers by teachers in schools that participated in the investigation

6.7.2 Kinds of computer programs used in schools that participated in the investigation

6.7.3 Computer skills learnt by students

6.7.4 The role of computers in departmental teaching and learning

6.7.5 Advantages of using computers during facilitation of learning in the classroom

6.7.6 Availability of computer education timetable in schools investigated

6.7.6.1 Departmental computer timetable in schools investigated

6.7.6.2 Frequent use of the computers by departmental staff

6.7.7 Principals’ comments on the integration of computers in subjects teaching

6.7.8 Principals’ comments on the value of computer programs in teaching and learning in their schools

6.7.9 HODs’ views about the values of computers as tools for teaching and learning

6.7.10 Implementation of computer integrated education in secondary schools

6.7.11 HODs evaluation of CIE in departmental subjects teaching

6.7.12 Parents’ and Board of Governors support for computer education in
6.7.13 Principals’ comments on the use of computers to enhance learning 229
6.8 Training of Principals and Heads of Department in the use of computers 229
6.8.1 Types of computer training Principals and HODs received 231
6.8.2 The importance of training to the Principals 233
6.8.3 Other courses attended by Principals on the use of computers 236
6.8.4 Percentage of teachers who are computer literate in the schools investigated 237
6.8.5 The role of the school in staff development for computer education 238
6.9 Technical and physical problems regarding the use of CIE in schools 239
6.9.1 Steps taken by the participants to solve the problems 241
6.9.2 Suitable facilities for the use of computers in schools 242
6.9.3 Technical supports for effective use of computers in schools 243
6.9.4 Number of classrooms in schools that participated in the investigation 247
6.9.5 Availability of electricity in schools that participated in the investigation 248
6.10 Principals views and attitudes about the value of computers in education 249
6.10.1 Heads of Department attitudes towards the CIE in their schools 249
6.10.2 HODs comments on disadvantages of the use of computers in education 250
6.10.3 Views about the use of computers to introduce new ideas to teaching and learning 251
6.11 Suggestions for further improvement of CIE in schools 251
6.12 Summary 252

CHAPTER 7 THE USE OF COMPUTERS TO TEACH COMPUTER EDUCATION
INTERVIEWS WITH COMPUTER TEACHERS

7.1 Introduction 256
7.2 Background information about teachers who participated in the investigation
7.2.1 Characteristics of schools from which the interviews were conducted 257
7.2.2 Age and gender distribution of computer teachers 258
7.2.3 Academic qualification of teachers who participated in the investigation 259
7.2.4 Number of students taught by computer teachers
7.2.5 Teachers' years of teaching experience
7.2.6 Teachers' length of service in teaching and learning with computers
7.2.7 Participants' rating of experience with computers in teaching and learning
7.2.8 Types of software packages used by the computer teachers in schools
7.2.9 The role of computers in schools that participated in the investigation
7.3 Teachers report on the use of computers in teaching and learning in the classroom
7.3.1 Why teachers use computers in teaching and learning
7.3.2 How teachers use computers in schools that participated in the investigation
7.3.3 Teachers' preparation to teach with computers
7.3.4 Pattern of using computers in teaching
7.3.5 Software used by students in schools that participated in the investigation
7.3.6 Reasons for integration and use of computers in teaching and learning
7.3.7 Students' knowledge of computer literacy skills
7.3.8 Classroom teachers' level of computer literacy skills
7.4 How students learn with computers
7.4.1 Number of times teachers use computers per week
7.4.2 Integration of computers into teaching subjects topics
7.4.3 Value of using computers in teaching and learning
7.4.4 Benefits of using computers in teaching and learning
7.4.5 Limitations of computers as a tool for teaching and learning
7.5 The impact of computers on students' learning
7.5.1 The impact of computers on students learning of skills and concepts
7.5.2 Recall of what students have learnt
7.5.3 Students' attention and interest to learn
7.5.4 Developing confidence in the use of computers
7.6 Problems and difficulties experienced by teachers with the use of computers
7.6.1 Factors affecting effective use of computers in the classroom
7.6.2 Factors encouraging teachers' decision to use computers in teaching
7.7 Teachers views and attitudes towards the use of computers in teaching and Learning.
7.7.1 Views about computers motivating students to learn 294
7.7.2 Views about the use of computers to increase students’ knowledge 295
7.7.3 Views about the use of computers to widen access to education 296
7.7.4 Teachers’ beliefs on computers to introduce new ideas 297
7.7.5 Teachers’ views about computers improving learning traditional subjects 298
7.7.6 Teachers’ views about computers increasing students’ attention to learning 300
7.7.7 Teachers’ views about computers to improve communication skills 301
7.7.8 Teachers views about computers facilitating learning 302
7.8 Teacher training in the use of computers 303
7.8.1 In-service course attended by teachers on the use of computers 304
7.8.2 Workshops and seminars attended by computer teachers 305
7.8.3 Induction course for teachers on the use of computers in their schools 306
7.9 Selection of computer software for use in schools 307
7.10 Teachers suggestions on integrating computers into their teaching subjects 308
7.11 Teachers recommendations for improvements to computer education in secondary schools 310
7.12 Summary 311

CHAPTER 8 CONCLUSIONS AND RECOMMENDATIONS

8.1 Introduction 316
8.2 Summary of the results of the field investigations 320
8.3 The main research findings and discussions 323
8.3.1 The Government policy 323
8.3.2 The Government’s financial support for computer integrated education in secondary schools 325
8.3.3 The role of the Principals and HODs in the integration and use of computers in their schools 327
8.3.4 Implementation of the school policy on the use of computers 328
8.3.5 Funding of computer integrated education in secondary schools 329
8.3.6 Availability of computers in schools that participated in the investigation 329
8.3.7 Availability of curriculum study guides and texts for the use of computers 330
8.3.8 Access to computers in schools for teachers to use in teaching and learning 331
8.3.9 The use of computers in the schools that participated in the investigation 331
8.3.10 Integration of computers into the teaching and learning of traditional subjects 333

8.4 How computers are used and reasons for using computers in the classroom 334
8.5 Training teachers to integrate and use computers in teaching and learning 337
8.6 Technical and physical facilities, and problems with the use of computers in the classroom 338

8.7 Views and attitudes of the participants about the value of computers in education 339

8.8 Suggestions and recommendations regarding the use of computers in the Classroom 341
8.8.1 Government policy 341
8.8.2 Role of Kenya Institute of Education in developing CIE support materials 343
8.8.3 Provision of computers in public secondary schools 344
8.8.4 The role of the Principal/school in the integration and use of computers in teaching and learning 345
8.8.5 The role of Heads of Department in the implementation of CIE 347
8.8.6 Teachers’ use of computers in the classroom 348
8.8.7 Need for specific pre-service teacher training in CIE 350

8.9 Re-training model for serving teachers in computer integrated education 352
8.10 Limitations of the study 357
8.11 Suggestions for further research 360
8.12 Conclusion 362
