Vermeulen, M.L. 1998. Practical study guide for students and researchers. Faculty of Education Vanderbijlpark: PU for CHE.

Legislations

Date: ________________

Child participant’s name: ________________________

Name of parent/guardian: ________________________

Researcher: Ansie Fouché, D.Phil. (Social work) student at the University of Pretoria, South Africa. 
9 Erica Street, Arcon Park, Vereeniging 1937.

Promoter: Dr. J.M.C. Joubert, Department of Social Work, University of Pretoria, 0002,

Informed consent

2. Purpose of the study: To develop, implement and evaluate a legally defensible interview protocol for social workers.

3. Procedures: It will be expected of me to bring my child to the office of Mrs. Fouché for between 2-4 sessions, depending on my child’s disclosure process. I understand that Mrs. Fouché will conduct an assessment and also apply a newly developed interviewing protocol. These interviews will be over a period of four weeks at a time that is convenient for my child and me. I understand that this protocol helps children to tell about possible sexual abuse. I take notice of the fact that these services rendered by Mrs. Fouché are free of charge and that I am entitled to some feedback after the interviewing process is completed. If a caseworker is involved I give my consent that feedback may be given by Mrs. Fouché.
4. **Risks and discomforts:** There are no known medical risks or discomforts associated with this research, although my child may experience fatigue and/or stress when taking about the alleged sexual abuse. I understand that Mrs. Fouché is experienced in handling traumatised children and that she will handle my child with the necessary sensitivity. I understand that my child be given as many breaks as he/she needs during the session. I understand that I will not be present during the interviews but that my child can call for me any time he/she wants to.

5. **Benefits:** I understand that there are no direct benefits to me for participating in this research. However, results of the study may help:
   a) Assist my child to relate his/her version about the abuse event(s)
   b) Social workers who have to conduct a legally sound forensic interviewing process.

6. **Participant’s rights:** Allowing my child to participate is voluntary, and I am at liberty to withdraw from the research/meeting at any time.

7. **Financial compensation:** I understand that there will be no financial gain from participating in this study. I understand that the researcher will cover my transport costs if necessary.

8. **Confidentiality:** In order to record exactly what my child says during the interviews, an audio-recording will be made and I give hereby my consent. The tape will only be looked at by the promoter and authorized personnel of the University of Pretoria. I understand that the results of the interviews be kept confidential unless I ask that they be released. The results of this study may be published in professional journals or presented at professional conferences, but my child’s records or identity will not be revealed unless required by law.

9. **If I have any questions or concerns:** I can call Ansie Fouché at: 016-428 3517 or 083 777 3511 at any time during the day or before 21:00 at night.

I understand my child’s rights as a research subject, and I voluntarily consent to participation in this study. I understand what the study is about and how and why it is being done. I will receive a signed copy of this consent form.

Dear ____________________

Talking about things that happened to me and still bothers me.

My work is to find out from children what makes them feel happy about school, family and friends. It is also my job to find out if any person has ever done something to a child that made that child unhappy, uncomfortable or sad in order to see how I or someone else can help the child. If I want to do my job well I must ask the correct questions otherwise children won’t understand me. I also need to remember not to only ask questions but also sometimes ask children to draw pictures. I am busy to study further so that I can become better when I talk to children. I have to talk to children for my studies so that I can learn from the children what is the best way to work and talk with children. I want to know if you are prepared that I can use your pictures and all the things that we discussed here for my studies. I would like to explain more.

Researcher: D.Phil.(Social work) student at the University of Pretoria, South Africa. 
Adres: 
Promoter: Dr. J.M.C. Joubert, Department of Social Work and Criminology, University of Pretoria, 0002,

Informed consent:
1. **Title of study:** Facilitating disclosure of child sexual abuse victims in the middle childhood: a forensic interview protocol for social workers.

2. **Purpose of the study:** To develop, implement and evaluate a legally defensible interviewing protocol for social workers that facilitate a disclosure of child sexual abuse for children in the middle childhood years.
3. **Procedures:** Mom, dad or the aunty will bring you to my office for two to four times. I will tell you when it will be our last session. Mom and I will choose a time that suits you the best. I will make sure that it will not interfere with your school attendance, homework or after school activities. During our sessions I will test new ways of helping children to talk about things that may have happened and made them feel unhappy, sad or uncomfortable. This study of mine is all about me asking the correct questions.

4. **Risks and discomforts:** I have been working for many years with children who feel sad or unhappy about things that happened to them. More than 500 children talked to me. I will show you some of their pictures just now. You cannot get hurt during our sessions. Sometimes it is tough to talk about sad things and I will understand if you don't want to talk about the sad things anymore, I will make sure that we take breaks often, and if you want to leave the room you will be excused. You can at anytime decide if you don't want to be part of this study. I will not be cross at you. We will still continue talking, but I will then not give the information to my teacher. Mom and dad won't be present while we talk, but you can call for them anytime you want.

5. **Benefits:** I am not allowed to give you money or gifts, but by helping me will help many other children to talk to someone that will understand them. I will teach social worker aunties and uncles how to work better with children after this study.

6. **Confidentiality:** Because I work with many children I can’t remember clearly what I asked you, that is why I taped our interview. Only you and I and my teachers will listen to the tapes. Your name will not be on the tape and you and I will choose a different name for your tapes. My teachers love children very much and will never ever laugh at the tape or tell anyone about it. There is one very important rule that I must follow and that is confidentiality. That big word means I am not allowed to talk to anyone about our sessions unless I told you about it. After our sessions I need to write a report, but I will tell you about it, but they will never ever know your name, where you stay, which school you are in or what exactly happened to you. I will only tell them which questions were easy and which ones were difficult for you.
If I have any questions or concerns: Remember you or mommy can call me anytime to ask questions. My number is 016 428 3517 or 083 777 351.

If you are prepared to be part of this study, mom or dad will complete the attached form.

</table>

5. Truth-and-lie check after interview

Did the interviewer ask the child after the interview whether she spoke the truth or lied, and which of the facts given she is not sure about, or was lying about?

6. Using clear and age appropriate language

Did the interviewer?

- Avoid legal words and phrases?
- Clarify labels/concepts/instructions/big words the child uses, to evaluate comprehension?
- Continue with the labels the child used?
- Use pronouns selectively (he, she, their)?
- Avoid using double negative sentences?
- Avoid vague referents (that, there, it)?
- Avoid asking "Why" questions and rather rephrased starting with "what...." or "how...."?
- Keep questions and sentences simple?
- Attempt one main thought per utterance?
- Avoid questions beginning with: "Do you remember?"
- Avoid questions beginning with can you, have you, do you?
- Use as few negatives as possible?

7. Invite free narrative

Did the interviewer?

- Fistly facilitate free narrative? “Tell me everything about...”
- From the child’s free narrative identify themes/topics and explored by introducing topics (“Tell me everything about ..; “tell me more”.)
