VEGETABLE GARDEN
PLAN OF ACTION

The one we have is a rough field, we want it to be big & well ploughed.

We want to have a variety of vegetables for winter & summer seasons.

We want to try fruits like strawberries, tomatoes & lettuce.

When we have got a big fields, we will approach our municipality to help us with pipes for irrigations.

Big fields will not mean for feeding healthy food only but money in their pockets too.

In future we want to cook soup for the learners from the vegetable comes from the garden.

By that vegetable garden, the community specifically the sick one must not see them as if they are aloof.
