## **Word of thanks.**

I would like to express thanks to the following persons who without their contribution the writing of this dissertation would not have been possible:

Prof Nel, for his patience, guidance and expertise. Without him, this thesis would not have been possible.

The Department of statistics at the University of Pretoria, Jeanette Paal and in particular Jaqui Sommerville from Research Support staff for all the analysis that she did using the SAS program and the graphs that she put together so efficiently. Dr A. Smit for his assistance and guidance.

The Churches who have taken part (NG Kerk Lichtenburg; Asbury United Methodist Church, Allentown, PA USA; Prestbury Methodist Church) – thank you for your willingness to try something out which has not been tested. I would like to thank especially the Lichtenburg Methodist Church for all the time and opportunity they afforded me.

The Moravian College, Bethlehem, USA for the generous use of their library.

For those who assisted in the editing, Dianne Coke, Joan Crookes, Ralph Jarvis and Alan Bester.

To my family.

This thesis is dedicated to those who have been labeled as having learning problems.
