

**Developing biopesticides for control of citrus fruit pathogens  
of importance in global trade**

By

**Joseph Obagwu**

Submitted in partial fulfillment of the requirements for the degree of Ph.D. (Plant Pathology)  
in the Faculty of Natural and Agricultural Sciences  
University of Pretoria

2003

## DECLARATION

I, the undersigned hereby declare that the work reported herein is the result of my original research findings.

Name: Joseph Obagwu

Signature & Date:  2003

## ACKNOWLEDGEMENTS

The author would like to thank the following:

- My supervisor Prof. Lise Korsten, and co-supervisor Dr Thierry Regnier for academic guidance and support. They were more like colleagues than supervisors, and I thank them for their simplicity.
- Staff and students' of Plant Pathology Laboratories, Department of Microbiology and Plant Pathology, University of Pretoria for technical support.
- My parents Mr and Mrs Michael Obagwu, and all members of the Obagwu Okpeh and Ella Agbama families for their love.
- Ahmadu Bello University, Zaria, Nigeria for granting me a study fellowship.
- The financial and/or material assistance received from the following bodies or organizations is gratefully acknowledged: German Academic Exchange Service (DAAD), the South African National Research Foundation (NRF), the South African Technology and Human Resources for Industry Programme (THRIP) South African Citrus Growers' Association (SACGA) and Letaba Estates, South Africa.
- Above all, I thank God Almighty for answered prayers.

## **DEDICATION**

This thesis is dedicated to my wife Mrs Joy Ene Obagwu. Words cannot express the way I feel about you. Thank you for your love.

## CONTENT

CHAPTER ONE	GENERAL INTRODUCTION	1
	Literature cited	4
CHAPTER TWO	LITERATURE REVIEW	9
	Literature cited	38
CHAPTER THREE	SCREENING <i>BACILLUS</i> SPECIES FOR ANTAGONISTIC ACTIVITY AGAINST <i>PENICILLIUM DIGITATUM</i> AND <i>PENICILLIUM</i> <i>ITALICUM</i>	53
	Abstract	53
	Introduction	53
	Materials and Methods	55
	Results	60
	Discussion	68
	Literature cited	72
CHAPTER FOUR	EVALUATING THE POTENTIAL OF INTEGRATED STRATEGIES FOR POSTHARVEST CONTROL OF CITRUS GREEN- AND BLUE MOLD AND BLACK SPOT	76
	Abstract	76
	Introduction	76
	Materials and Methods	78
	Results	81
	Discussion	88
	Literature cited	92

CHAPTER FIVE	TESTING POTENTIAL BIOCONTROL PRODUCTS FOR CONTROL OF CITRUS GREEN MOLD UNDER SIMULATED EXPORT CONDITIONS	95
	Abstract	95
	Introduction	95
	Materials and Methods	96
	Results	99
	Discussion	106
	Literature cited	108
CHAPTER SIX	SCREENING PLANT EXTRACTS FOR BIOLOGICAL ACTIVITY AGAINST <i>PENICILLIUM DIGITATUM</i> , <i>PENICILLIUM ITALICUM</i> AND <i>GUIGNARDIA CITRICARPA</i>	111
	Abstract	111
	Introduction	111
	Materials and Methods	112
	Results	119
	Discussion	132
	Literature cited	135
CHAPTER SEVEN	CONTROLLING THE ESTABLISHMENT OF FOOD-BORNE PATHOGENS WITH <i>COPROSMA REPENS</i> EXTRACTS	139
	Abstract	139
	Introduction	139
	Materials and Methods	141
	Results	143
	Discussion	146
	Literature cited	148

CHAPTER EIGHT	GENERAL DISCUSSION AND CONCLUSION	150
	Literature cited	153
