

**Detection, characterisation and suppression of  
*Ralstonia solanacearum***

**by**

**Wilma van Broekhuizen**

**Submitted in partial fulfilment of the requirements for the degree of**

**M.Sc. (Agric) Plant Pathology**

**In the Faculty of Natural and Agricultural Sciences**

**Department of Microbiology and Plant Pathology**

**University of Pretoria**

**Pretoria**

**May 2002**

**I would like to dedicate this study  
to my parents.  
Without you none of this would have  
been possible.**

**Thank you for everything.**

## ACKNOWLEDGEMENTS

### **I would like to thank the following people and institutions:**

Prof. L. Korsten, my promoter, for her advise, guidance and encouragement throughout these studies.

Prof. P.S. Hammes, my co-promoter, for making it possible to work and stay on the experimental farm.

Mrs. L. Stander for her interest, advice and motivation.

Mr. A.E. Beyers and his team at the experimental farm for their general assistance.

Dr. G. Swart for all her help and guidance with the molecular work.

Dr. M. Oosthuizen for her help concerning the analysis of the molecular work.

Mr. N.J.J. Mienie and Mrs. R. Gouws for their advice and making their literature sources available to me.

The National Research Foundation for their financial support.

Potato South Africa for their interest in this project.

My family and friends for their love and support.

Finally, but most important, my Creator for the strength to persevere.

## CONTENTS

<b>CHAPTER 1</b>	<b>GENERAL INTRODUCTION</b>	1
	Literature Cited	4
<b>CHAPTER 2</b>	<b>LITERATURE REVIEW</b>	8
	1. Introduction	8
	2. Potato Production in South Africa	9
	3. Potato Bacterial Wilt	10
	3.1. Symptom Expression	10
	3.1.1. Aboveground Symptoms	10
	3.1.2. Symptoms on Tubers	11
	3.2. Occurrence of Potato Bacterial Wilt	13
	4. <i>Ralstonia solanacearum</i>	13
	4.1. General Description	13
	4.2. Taxonomy	14
	4.3. Worldwide Distribution	17
	4.4. Host Range and Specificity	18
	4.5. Epidemiology	19
	4.5.1. Survival	19
	4.5.2. Source of Inoculum and Dispersal	20
	4.5.3. Conditions Favourable for Disease Development	21
	4.5.4. Mechanism of Infection and Colonisation	21
	4.5.5. Influence of Environmental factors on the Virulence of <i>Ralstonia solanacearum</i>	23
	a) Phenotypic Conversion	23
	b) Virulence Factors	25
	c) Regulation of Virulence	26
	4.6. Detection and Isolation	27
	4.7. Control	28
	4.7.1. Field Selection and Preparation	29
	a) Field Selection	29

b) Crop Rotation, Bare Fallow Practices and Intercropping	30
c) Soil Preparation	30
4.7.2. Planting and Crop Development	31
a) Pathogen-free Propagative Material	31
b) Resistant Cultivars	32
c) Time or Season of Planting	34
d) General Cultural Practices	34
e) Chemical Control	36
f) Biological Control	36
4.7.3. Harvesting and Storage	38
a) Sanitation Practices	38
b) Time of Harvest	38
5. Literature Cited	38

<b>CHAPTER 3</b>	<b>DEVELOPMENT OF AN ALTERNATIVE DETECTION METHOD FOR <i>RALSTONIA SOLANACEARUM</i> IN SOIL</b>	51
1. Introduction		52
2. Material and Methods		53
2.1. Plant Material		53
2.2. Cultures		54
2.3. Suspension Preparation, Inoculation and Evaluation		54
2.3.1. Evaluation of Pathogen Growth in Different Enrichment Broths		54
2.3.2. Evaluation of Host-Pathogen Interactions in Different Enrichment Broths		55
2.3.3. Evaluation of Host-Pathogen Interactions in Different Enrichment Broths Containing Soil		55
2.4. Comparison Between the Trapping Technique and Procedures Used in South Africa for the Detection of <i>R. solanacearum</i> in Soil Samples		56
2.4.1. Lowest Pathogen Concentration Detectable		56

a) Trapping Technique	56
b) Selective Media	56
c) ELISA	57
2.4.2. Economic Comparison	57
2.4.3. Detection from Soil Samples	57
a) Soil Sampling	57
b) Comparison Between Different Techniques	58
3. Results	58
3.1. Suspension Preparation, Inoculation and Evaluation	58
3.1.1. Evaluation of Pathogen Growth in Different Enrichment Broths	58
3.1.2. Evaluation of Host-Pathogen Interactions in Different Enrichment Broths and Different Enrichment Broths Containing Soil	59
3.2. Comparison Between the Trapping Technique and Procedures Used in South Africa for the detection of <i>R.</i> <i>solanacearum</i> in Soil Samples	59
3.2.1. Lowest Pathogen Concentration Detectable and Economic Comparison Between Different Techniques	59
3.2.2. Detection from Soil Samples	60
4. Discussion	62
5. Literature Cited	64

## **CHAPTER 4 CHARACTERISATION OF SOUTH AFRICAN *RALSTONIA* *SOLANACEARUM* ISOLATES USING MOLECULAR TECHNIQUES**

1. Introduction	68
2. Material and Methods	70
2.1. Bacterial Strains	70
2.2. DNA Extraction	70
2.3. PCR Amplification and Restriction Fragment Length Polymorphism Analysis	70

2.3.1. Enterobacterial Repetitive Intergenic Consensus	70
2.3.2. Ribosomal Intergenic Spacer Analysis	71
2.3.3. Restriction Fragment Length Polymorphism Analysis	71
2.4. Gel Electrophoresis and Data Analysis	71
3. Results	72
3.1. PCR Amplification	72
3.1.1. Enterobacterial Repetitive Intergenic Consensus	72
3.1.2. Ribosomal Intergenic Spacer- and Restriction Fragment Length Polymorphism Analysis	72
4. Discussion	75
5. Literature Cited	76

## **CHAPTER 5 SUPPRESSION OF *RALSTONIA SOLANACEARUM* IN SOIL USING HERBAL PLANT MATERIAL**

1. Introduction	81
2. Material and Methods	82
2.1. Cultures	82
2.2. Plant Material	83
2.3. Host Determination	83
2.4. <i>In Vitro</i> Tests with Crude Extracts	84
2.5. Soil Suppression (a)	84
2.6. Stem Inoculation	85
2.7. Soil Suppression (b)	85
3. Results	86
3.1. Host Determination	86
3.2. <i>In Vitro</i> Tests with Crude Extracts	86
3.3. Soil Suppression (a)	87
3.4. Stem Inoculation and Soil Suppression (b)	87
4. Discussion	87
5. Literature Cited	90

<b>CHAPTER 6</b>	<b>GENERAL DISCUSSION</b>	95
	Literature Cited	97
<b>SUMMARY</b>		100
<b>OPSOMMING</b>		101
<b>APPENDIX 1</b>		102
<b>APPENDIX 2</b>		104
