

Screening of avocado rootstock material for tolerance to *Phytophthora cinnamomi*

by

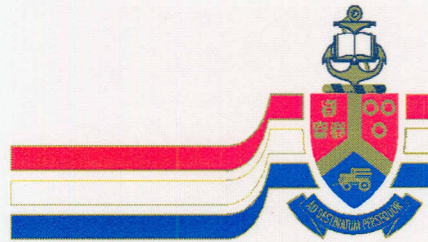

Zelda Bijzet

Submitted in fulfilment of the requirements for the degree of

Magister Scientiae Agriculturae

Department of Plant Production and Soil Science

Faculty of Natural and Agricultural Sciences

University of Pretoria

Pretoria

Republic of South Africa

Supervisor: Prof Dr PJ Robbertse

Co-supervisor: Prof Dr F C Wehner

March 2002

**There is a time in the life of every problem when it is big
enough to see, yet small enough to solve.**

Mike Leavitt

CONTENTS

CHAPTER 1 GENERAL INTRODUCTION

1.1. General introduction	2
---------------------------------	---

CHAPTER 2 LITERATURE REVIEW

2.1. Introduction.....	7
2.2. The host	7
2.2.1. Avocado rootstocks	7
2.2.2. Botany.....	7
2.2.3. Taxonomy of the avocado	10
2.2.4. Origin of various rootstocks	12
2.2.5. Rootstock-scion interactions	14
2.2.6. Current rootstocks in use	17
2.3. The pathogen	19
2.3.1. <i>Phytophthora cinnamomi</i>	19
2.3.2. Taxonomic position of <i>Phytophthora cinnamomi</i>	20
2.3.3. Unique features of <i>Phytophthora</i>	20
2.3.4. Life cycle of <i>Phytophthora cinnamomi</i>	21
2.3.4.1. Asexual life cycle.....	21
2.3.4.2. Sexual life cycle	23
2.3.5. Strains or races of <i>Phytophthora cinnamomi</i>	23
2.3.6. Population structure of <i>Phytophthora cinnamomi</i> in South Africa	24
2.3.7. Variation in pathogenicity among South African isolates of <i>Phytophthora cinnamomi</i>	25
2.3.8. Isolation and detection of <i>Phytophthora cinnamomi</i>	25
2.3.8.1. Isolation from tissue	26
2.3.8.2. Isolation from soil	27
2.3.8.3. Isolation by baiting with selective hosts.....	28
2.3.8.4. Isolation of <i>Phytophthora</i> from bodies of water	29
2.3.9. Maintenance of culture	30
2.3.10. Morphology and identification of <i>Phytophthora cinnamomi</i>	31
2.4. The host-pathogen interaction.....	33
2.4.1. Symptoms on avocado trees	33
2.4.2. Mechanisms of pathogenesis	33
2.4.2.1. Chemotaxis	34
2.4.2.2. Electrotaxis.....	35
2.4.3. Invasion	35
2.4.4. Types of resistance and terminology	36
2.4.4.1. Variance in pathogenicity	36
2.4.4.2. Pathogenicity: The race concept	36
2.4.5. Resistance mechanisms	37
2.4.5.1. External defence mechanisms	37
2.4.5.2. Internal defence mechanisms	37
2.4.5.3. Induced resistance	37

2.4.5.4.	Escape mechanisms	38
2.4.6.	Mechanisms of resistance in avocado	38
2.4.7.	Screening for resistance	41
2.4.7.1.	Methods of screening	41
2.4.7.2.	Favourable conditions for plants and <i>P. cinnamomi</i>	42
2.5.	Conclusion.....	43

CHAPTER 3 OVERVIEW OF THE AVOCADO ROOTSTOCK BREEDING AND SELECTION PROGRAMME AT THE ARC-INTSTITUTE FOR TROPICAL AN SUBTROPICAL CROPS : 1991-1997

3.1.	Introduction.....	46
3.2.	Rootstock breeding	46
3.2.1.	Introduction	46
3.2.2.	Materials and methods	49
3.2.2.1.	Open pollination	49
3.2.2.2.	Poly-cross nurseries (Semi-controlled pollination)	49
3.2.2.3.	Controlled pollination.....	50
3.2.3.	Results and discussion	52
3.3.	Seedling screening for <i>Phytophthora</i> resistance/tolerance	55
3.3.1.	Introduction.....	55
3.3.2.	Materials and methods	56
3.3.3.	Results and discussion	59
3.4.	Clonal multiplication and statistical screening	64
3.5.	Conclusion.....	65

CHAPTER 4 OPTIMISATION OF THE SCREENING PROGRAMME: 1998-2000

4.1.	Suitability of various media for the screening of avocado breeding material with regard to <i>Phytophthora cinnamomi</i> tolerance	67
4.1.1.	Introduction	67
4.1.2.	Materials and methods	69
4.1.2.1.	Media	69
4.1.2.2.	Plants	71
4.1.2.3.	Inoculation.....	71
4.1.2.4.	Trial layout and statistics	72
4.1.2.5.	Assessing the effect of flooding and <i>Phytophthora cinnamomi</i> on the plants in the various media.....	73
4.1.2.6.	Re-isolation of <i>Phytophthora cinnamomi</i> and estimating root infection.....	75
4.1.3.	Results and discussion	75
4.1.3.1.	Root necrosis and recovery of <i>Phytophthora cinnamomi</i>	75
4.1.3.2.	Plant response	77
4.1.4.	Conclusion	79
4.2.	Screening of clonal avocado selections for tolerance to <i>Phytophthora cinnamomi</i>	81

4.2.1. Introduction.....	81
4.2.2. Materials and methods	82
4.2.2.1. Plant material, inoculation and evaluation	82
4.2.2.2. Re-isolation of <i>Phytophthora cinnamomi</i>	83
4.2.2.3. Data analysis.....	83
4.2.3. Results and discussion	83
4.2.3.1. Overall influence of <i>Phytophthora cinnamomi</i> on the root components.....	83
4.2.3.2. Variation amongst selections irrespective of <i>Phytophthora</i> <i>cinnamomi</i> inoculation.....	84
4.2.3.3. Total root component before and after inoculation	85
4.2.3.4. Effect of <i>Phytophthora cinnamomi</i> on the feeder root component	86
4.3. Conclusion.....	88

CHAPTER 5 CLONAL PROPAGATION AS A SELECTION CRITERION OF POTENTIAL NEW AVOCADO ROOTSTOCKS

5.1. Introduction.....	91
5.2. Materials and methods	91
5.3. Results and discussion.....	94
5.3.1. Number of days from grafting to first cut and between cuts	95
5.3.2. Number of cuttings per nurse seed.....	97
5.3.3. Percentage of cuttings that rooted	98
5.3.4. Number of days to rooting.....	99
5.4. Conclusion.....	101

CHAPTER 6 GENERAL DISCUSSION

6. General discussion.....	103

DECLARATION

I declare that this dissertation, for the degree of MSc(Agric), has never been submitted for any degree at any university. The research work reported is the result of my own original investigation, except where acknowledged.
