DECLARATION

Student Number: 23273918

I declare that this thesis:

“Dialogue or Discipline: Distance Education Support in the Department of Defence

is my own work, being submitted as a requirement for the degree **PHILOSOPHIAE DOCTOR (PhD)** by the University of Pretoria and that all the sources that I have used or quoted have been indicated and acknowledged by means of complete references and it has not previously been submitted for a degree or any examination at this or any other institution

DEDICATION

This work is dedicated to my late father Ebenezer Siphon Barnabas, a school teacher and choir conductor who had a good ear for music especially when sung by his pupils. To my entire family and my in-laws for their support and having confidence in me and being proud of what I was doing, especially my mother, Florence, who sacrificed a lot so that I could keep up with my studies during the difficult times. A special dedication to my wife, Iris, my sons, Simphiwe and Lethabo, and daughter, Nomathamsanqa (Malebo) for believing in me; without their loyalty, love, support, sacrifice and understanding, this work would not have been possible.

**Ndiyabulela Bo Radebe, Bo Bhungane, Bo Mafuz'afulele, Bo Ndlebe'entle zombini,
Bo Zulu; nditsho nakuni BoDlomo, Bo Shubela, Bo Vel'ababhensele – Ndithi
Makube-Cosi kube-Hele**

(simply means I am thankful to my ancestors and singing their praises)

ACKNOWLEDGEMENTS

A special acknowledgement and sincere thanks goes to my previous supervisor, Prof W. J. Fraser without whom this study would not have been possible and his secretary Ms M. Nieman arranging for those never-ending appointments. I also want to acknowledge the advice and support of Dr J. Hendrikz as my co-supervisor.

I wish to express my indebtedness to Brig Gen (Ret) C. Bless, who persisted and encouraged me to undertake this study and entrusted me with her support. I am most grateful to my colleagues at the SANDF College of Educational Technology (COLET) for their inputs and support, especially Col (Dr) A. van der Walt, and Dr A. Voges who would not pass me by without asking about the progress of my studies.

I also wish to especially thank all the SANDF Officers who participated in this study by being willing to be interviewed and/or coordinated the interviews. These officers include Col Laubscher, the Army ETD Director; Col J.J. Wessels, the SA Army College Training Wing Commander; Lt Col W.M. Bangiso, the SA Army College Junior Command Staff Duties (JCSD) course Branch Commander; Lt Col M.J. Venter, the SA Army College Staff Officer 1 (SO1) Training; Col J.W. Janse van Rensburg, Officer Commanding SA Air Force College; Senior Warrant Officer (SWO) M.P. Koekemoer, the SA Air Force College Senior Directing Staff (SDS) Senior Non-Commissioned Officer's (SNCO) Development Wing Commander; Warrant Officer Class 1 (WO1) G.C. Siems, the SA Air Force College Coordinator and Senior Directing Staff (SDS) for the Individual Study (IS) Phase of the Senior Supervisor's course; Lt Col M.J. Miles, the SA Air Force Junior Command Staff Duties (JCSD) course Directing Staff (DS); Col D. Mthimunya, the SAMHS ETD Director; Col E. Du Plessis, the SAMHS Officer Commanding the School for Military Health Training; Lt Col V.P. Bala, the SAMHS Senior ETD Coordinator at the School for Military Health Training, and Lt Col N.M. make, the distance education coordinator at the School for Military Health Training. Staff Sergeant V. Nagel, distance education instructor, Military Police School.

The SA Navy was no longer conducting its studies through the distance learning mode, but a special thanks to R Adm M. Magalefa for attempting to have me gain access to the Navy facilities to conduct this study. I would also like to thank Maj Gen D. Tshiki for his sincere support and encouragement towards the completion of my studies while at the Joint Operations Divisional Headquarters (J Ops Div HQ). I also want to sincerely thank Mrs. V.E. Plint, the librarian at the South African National Defence College (SANDC) for searches on additional information on distance learning, Mrs. C. Ferreira for the final printing of my thesis, Mrs. P. R. Vorster and Mr. J. Rakoma for the final binding, all from the South African National Defence College.

In addition, I am deeply appreciative to the staff at the libraries of the University of Pretoria, UNISA and the Department of Defence (DOD), especially at COLET and the Army Office between the years 2004 and 2008.

Lastly, but not least, I acknowledge with gratitude the financial assistance I received from the Army Office's Study at State Expense, especially Lt Col M.J. Ledwaba, for making sure that this happens without their support, this would have been impossible.

ABSTRACT

The first key to wisdom is this – constant and frequent questioning, for by doubting, we are led to question and by questioning we arrive at the truth (Pierre Peter Aberlard).

The aim of this study was to identify what were the requirements placed on the design of distance education programmes as regards discipline or dialogue and how did these factors impact on student-support in the South African National Defence Force (SANDF).

Education in general is used to classical behavioural objective that outlines precisely for the student what has to be done and is one way of structuring the learning materials. The South African National Defence Force (SANDF), by its very nature, is very familiar with this formal structure and style of doing things. It prescribes the way teaching has to happen and how the outcomes have to be achieved and at times in a very formal way.

Opposed to the above is **dialogue** that calls for a move away from the prescriptiveness of doing something. Doing and thinking now becomes more open through dialogue. Education stakeholders now debate the value of certain content, since content is no more fixed, the admission of students into the programme is not fixed any more and the way examinations are set is also not fixed or prescriptive. There is now a move away from the **disciplinary** way of thinking, that is, thinking in terms of fixed boundaries or discipline any longer – dialogue has opened up options and opportunities.

This research is based on the belief that distance education problems in the Department of Defence (DoD) are as result of outdated and inadequate instructional or programme design methods or approaches, and thus lack student-support.

The four sub-research questions that emanate from the main research question as posed in this research are summarized as follows: (1) What is the distance learning teaching and learning character of the South African National Defence Force (SANDF)? (2) What is the role dialogue in the design of teaching and learning? (3) How are ‘outcomes’ in transactional distance or dialogue achieved? (4) What is the role of dialogue in student empowerment or student support?

The design of this research was based on qualitative approach. The feasibility of the research was assured by focusing on distance learning institutions and practitioners. Literature study and document analysis was utilized as data-collection method. Face-to-face interviews with focused groups and individual interviews utilizing unstructured, open-ended questions on interview schedules were also conducted. In addition, anonymous student reports collected by programme managers at the end of a programme replaced the unavailability of student interviews were utilised.

The findings of the study were that the character of structural design of distance learning programmes in the South African National Defence Force (SANDF) resembles that of the disciplinary approach, and is thus prescriptive. Structure, in terms of the teaching and learning strategies and the substance of the content is largely the mode of practice in the SANDF's distance education system. Communication finds its way into the distance learning system of the Department of Defence as authoritative power source.

The main function of dialogue in the system is to vest the interest of this organization as programme directors and instructors are not fully emancipated. Students and instructors find it difficult to engage constructively academically. Learner-to-learner interaction and freedom of academic discourse is hampered as the result of authoritarian and prescriptive doctrine of a structured curriculum. It is then concluded that student-support in the South African National Defence Force (SANDF) distance education settings does not address requirements of dialogue.
