APPENDIX 1

SEMI-STRUCTURED INTERVIEW (WORKING WOMEN)

INTERVIEW SCHEDULE FOR HIV AND AIDS INFECTED AND AFFECTED WORKING WOMEN

Section A – Biographical Information

1. How old are you? .................................
2. What is your race group? ...........................
3. What is your job level? ..............................

Section B

Difficulties experienced by women infected or affected by HIV and AIDS

4. HIV AND AIDS is a disease that is not clearly talked about in the communities and workplace. Kindly share with me you personal difficulties, feeling and experiences in your workplace as an HIV infected or affected woman?

........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................

5. Have you ever missed work due to HIV and AIDS related difficulties? If so how did that make you feel?

........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................

6. What will make it easier for you to cope with your difficulties relating to HIV and AIDS in your workplace?

........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................

Section C - The role of EAP

EAP is a confidential Programme that offers help to employees when they have personal or work related problems.

7. Have you ever used EAP for HIV and AIDS related difficulties?

........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................
........................................................................................................................................................................

8. What role (if any) does EAP play in supporting HIV and AIDS infected and/or affected women in your company?
9. How does EAP address your needs as an employee who is HIV infected? **Applicable to those infected only.**

10. How does EAP address your needs as an employee who is HIV and AIDS affected? **Applicable to those affected only.**

11. What kind of experiences (positive and/or negative) have you had in using EAP in your company?

12. What impact did the experiences you outlined (under 11 above) have on your overall perception of EAP in your company?

13. What improvements (with specific reference to HIV and AIDS) would you like to see in the running of EAP for women in your company?

14. Any additional comments?

Thank you for taking the time to respond to these questions.
APPENDIX 2

STRUCTURED QUESTIONNAIRE (EAP PRACTITIONERS)

THE ROLE OF THE EAP IN ADDRESSING THE DIFFICULTIES EXPERIENCED BY WORKING WOMEN RESULTING FROM THE IMPACT OF HIV AND AIDS.

QUESTIONNAIRE TO EAP PRACTITIONERS

Permission for your participation in this study has been granted by the EAPA President. The researcher guarantees all participants that information collected will solely be used for the purpose of this study. You are guaranteed that the information will not be used in a manner that will be damaging to you or your company. It will solely be used to enhance programme management. You are therefore requested to answer the questionnaire with honesty, and to the best of your knowledge.

It will take you about twenty minutes to complete this questionnaire. The questionnaire is divided into 5 sections. Please complete the appropriate section by marking your response with an X in the space provided.

Thank you, for your time in completing this questionnaire.
**PARTICIPANT INFORMATION:**

<table>
<thead>

</tr>
</tbody>
</table>

32. How do women with HIV in your workplace deal with difficulties related to their illness?

- Stay home 1
- Go to the gym 2
- Consult EAP for counselling 3
- Consult traditional healer 4
- Consult spiritual leader 5
- Do not know 6

33. How do women infected and affected by HIV and AIDS access EAP?

- Face to face counselling on site 1
- Office off site, but still in walking distance 2
- Public transport to EAP centre 3
- Telephone contact 4
- Home visits by the EAP practitioners 5

34. Do employees voluntarily accept the use of EAP?

- Yes 1
- No 2
- Uncertain 3

35. Do HIV infected women generally use EAP in your workplace?

- Yes 1
- No 2

36. Do women affected by AIDS generally use EAP in your workplace?

- Yes 1
- No 2

37. What type of referral is mostly noted by EAP regarding women infected and affected by HIV and AIDS?

- Voluntary (self referral) 1
- Informal referral (friend or family member) 2
- Mandatory referral (management) 3
38. Do women with HIV & AIDS have trust and confidence in the EAP?

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>

Thank you for taking the time to respond to these questions
APPENDIX 3

LETTER OF INFORMED CONSENT (WORKING WOMEN)

Faculty of Humanities
Department of Social Work and Criminology
Fax 012 420-2093   Tel  012 420-2325

INFORMED CONSENT FORM TARGET GROUP: WORKING WOMEN

Participant’s Name: ............................................................... Date: .................

Informed Consent

1. **Title of Study:** The role of the Employee Assistance Programme (EAP) in addressing the difficulties experienced by working women resulting from the impact of HIV and AIDS.

2. **Principal Investigator:** Tumi Jantjie, University of Pretoria, Pretoria

3. **Purpose of the study:** To investigate the role of EAP in addressing the problems experienced by working women who are infected and affected by HIV and AIDS in Gauteng.

4. **Procedures:** In this study, you will be asked questions about your age, your work history, family history, health history, your feeling and concerns about EAP services provided at your workplace. The interview will be recorded and will take 45 minutes. This interview will be scheduled at your own convenient time and place.

5. **Risks and Discomforts:** You may feel uncomfortable being interviewed and may start crying but you will be afforded rest and breaks as much as you want. You will not be pressurized to answer any question that makes you uncomfortable.

6. **Benefits:** There are no direct medical benefits but you are afforded a chance to talk about your condition with another EAP practitioner. The study will help researcher to gain a better understanding of the role of EAP in HIV and AIDS counselling.

7. **Participant’s Rights:** You may withdraw from participating in this study at any time. You are free not to answer any question that makes you uncomfortable. Your refusal to participate will in no way jeopardize your future participation or use of the EAP in your workplace.
8. **Confidentiality:** The result of the interview will not be identified by your name or company. The result may be published in professional journal or presented at professional conferences but your identity will not be revealed at any time.

9. **Persons to contact:** If you want to talk to anyone about this research study because you think you have not been treated fairly or think you have been hurt by participating in the study, or you have any other questions about the study, you should call the principal investigator, Tumi Jantjie at 083 7972455 any time during the day or night time or the promoter, Prof L S Terblanche at 012 420 3292.

I …………………………………………., understand my rights as a researcher subject, and I voluntarily consent to participation in this study, I understand what the study is about and how and why it is being done. I will receive a signed copy of this consent form.

Fax 012 420-2093   Tel 012 420-2325

INFORMED CONSENT FORM TARGET GROUP: (EAP Practitioners)

Participant’s Name: …………………………………………………………………... Date: 8/09/2005

Informed Consent

1. Title of Study: The role of the Employee Assistance Programme (EAP) in addressing the difficulties experienced by working women resulting from the impact of HIV and AIDS.

2. Principal Investigator: Tumi Jantjie, University of Pretoria, Pretoria

3. Purpose of the study: To investigate the role of EAP in addressing the problems experienced by working women who are infected and affected by HIV and AIDS in South Africa.

4. Procedures: You will be given a questionnaire about your feelings/attitudes about HIV and AIDS counselling in the workplace. The questionnaire will take 20 minutes to be completed.

5. Risks and Discomforts: No known medical risks or discomforts are associated with the completion of this questionnaire.

6. Benefits: The results of this study will help the EAP practitioners to understand their expected roles in dealing with HIV and AIDS infected/affected women in the workplace.

7. Participant’s Rights: You may withdraw from participating in this study at any time.

8. Confidentiality: The result of the questionnaire will not be linked to your name or the company where you are employed. The results may be published in a professional journal or presented at professional conferences but your identity will not be revealed at any time.

9. Persons to contact: If you want to talk to anyone about this research study because you think you have not been treated fairly or think you have been hurt by participating in the study, or you have any other questions about the study, you should call the principal investigator, Tumi Jantjie at 083 7972455 any time during the day or night time or my promoter, Prof. L S Terblanche at 012 420 3292.

I ……………………………………………, understand my rights as a researcher subject, and I voluntarily consent to participation in this study, I understand what the study is about and how and why it is being done. I will receive a signed copy of this consent form.
