This investigation involves the CALIS Project conducted in the Free State from 1991 to 1996. The results will be reported in the form of a Ph.D. dissertation to be supervised by Professor Johannes Cronje from the University of Pretoria.

1. How did you initially become involved in the CALIS Project?
2. Why did you decide to become involved in the CALIS Project?
3. Who were the people initially identified to manage the project?
4. Did others later become involved in the management of the Project?
5. Which schools were initially selected to take part in the Project?
6. Were other schools added at a later date?
7. What were the initial goals / aims of the Project?
8. Did these goals change during the course of the Project?
9. To what extent was the then Department of Education of the Orange Free State involved in the Project?
10. What were the important achievements / successes in the implementation of the Project?
11. What were the important shortcomings or failures in the implementation of the Project?
12. At which point of the implementation of the Project was government support withdrawn?
13. What was the nature of this withdrawal?
14. How did you feel at the time?
15. How did other members of the management team react to this withdrawal?
16. How did teachers involved in the Project react to this withdrawal?
17. What effect did this withdrawal have on the Project as a whole?
18. Were there schools / teachers who continued to use computers after the support of the OFS DE had been withdrawn?

19. Why did these schools / teachers continue using computers even after official departmental support had been withdrawn?
20. Are you aware of any of the originally selected schools / teachers who still use computers effectively today?
21. Are there any of these schools that have managed to do this in the absence of extensive material resources?
22. What has enabled these schools to do this?
23. What, in your opinion, would have been the impact of the Project on the sustained use of computers in schools if the support of the OFS DE had not been withdrawn?
24. Is there any other information relating to the Project or the people involved in the Project that you feel should be documented?

Computers in schools: implementing for sustainability

12 November 2005

Dear Participant

You are invited to participate in a research project aimed at identifying influences on the implementation of the CALIS Project (1991-1996) with a view to ensuring the sustainability thereof.

Your participation in this research project is voluntary and confidential. You will not be asked to reveal any information that will allow your identity to be established, unless you are willing to be contacted for individual follow up interviews. Should you declare yourself willing to participate in an individual interview, confidentiality will be guaranteed and you may decide to withdraw at any stage should you wish not to continue with an interview.

Your role in the research process will involve viewing a schedule of interview questions, whereafter you will be asked to respond to these questions. The ensuing narrative will be taped on an audio recorder and will be transcribed by the researcher.

The results from this study will be used to inform the findings presented in a Ph.D. dissertation to be submitted in the Faculty of Education at the University of Pretoria.

If you are willing to participate in this study, please sign this letter as a declaration of your consent, i.e. that you participate in this project willingly and that you understand that you may withdraw from the research project at any time. Participation in this phase of the project does not obligate you to

participate in follow up individual interviews, however, should you decide to participate in follow-up interviews your participation is still voluntary and you may withdraw at any time. Under no circumstances will the identity of interview participants be made known to the Orange Free State Education Department.

Appendix D

Consent

Thank you for agreeing to participate in this study which will take place from 2003 to 2006. This form outlines the purposes of the study and provides a description of your involvement and rights as a participant.

The purposes of this project are:

- 1) to fulfill a course requirement for a Ph.D. study in Computer-integrated Education in the Faculty of Education at the University of Pretoria; and
- 2) to gain insight into and experience on the topic of influences on the implementation of a computer-integrated project, with a view to the sustainability thereof.

Your role in the research process will involve viewing a schedule of interview questions, whereafter you will be asked to respond to these questions. The ensuing narrative will be taped on an audio recorder and will be transcribed by the researcher.

I will use the information from this study to write a case report about you (the respondent). This report (Chapter 4: Findings) will be read by you and the supervisor of this study, in order to check on the accuracy of the report. The case report will not be available to any other person to be read without your permission.

I guarantee that the following conditions will be met:

- 1) If you grant permission for audio taping, no audio tapes will be used for any purpose other than to do this study, and will not be played for any reason

other than to do this study. At your discretion, these tapes will either be destroyed or returned to you.

2) Your participation in this research is voluntary; you have the right to withdraw at any point of the study, for any reason, and without any prejudice, and the information collected and records and reports written will be turned over to you.

3) You will receive a copy of the final report (Chapter 4: Findings) before it is handed in, so that you have the opportunity to suggest changes to the researcher, if necessary.

Do you grant permission for your name to be used in the research report?
