# carbon minus

a research centre for green technology

focussing on resource :  
efficiency to achieve a :  
carbon minus footprint :

UNIVERSITEIT VAN PRETORIA  
UNIVERSITY OF PRETORIA  
YUNIBESITHI YA PRETORIA

by Andri Fourie

\_mentor: Gary White  
\_study leader: Nicholas Clark  
\_course co-ordinator: Prof. Karel Bakker

\_submitted in fulfilment of part of the requirements for the degree Magister in Architecture [Professional] in the Faculty of Engineering, Built Environment and Information Technology, University of Pretoria, South Africa.

November 2008

## \_list of figures

### Chapter 1\_introduction

fig. 001 [a] natural energy sources, *Global Perspectives*, 2007, p. 25.

fig. 001 [b] satellite image of antarctic ice receding, [http://www.fantom-zp.com/wp\\_42\\_anarctic.html](http://www.fantom-zp.com/wp_42_anarctic.html).

fig. 002 coral reefs threatened by global warming, *Urban Green File*, April 2008, p.49. Edited by author.

fig. 003 biodiversity being threatened, *Domus*, February 2008, p.2.

fig. 004 iceland glaciers melting, <http://www.neus.bbc.co.uk>.

fig. 005 natural forest, *Domus*, February 2008, p. 95.

fig. 006 deforestation of the amazon, <http://kellypettit.wordpress.com>.

fig. 007 deforestation, <http://www.earthcool.com>.

fig. 008 storm on the horizon, <http://www.wangoratta.vic.gov.au>.

fig. 009 thunder storm, <http://www.freefoto.com>.

fig. 010 an increase in severe storms, <http://www.thunderbay.worldweb.com>.

fig. 011 a magnetic storm, <http://www.freefoto.com>

fig. 012 satellite view of a storm, <http://www.thunderbay.worldweb.com>.

fig. 014 floods, <http://www.news.bbc.co.uk>. Edited by author.

fig. 015 specie extinction, <http://www.news.bbc.co.uk>.

fig. 017 thinning ice pose threats for eskimo's, <http://www.bigtravelweb.com>.

fig. 018 rising sea temperatures, <http://www.earth-cool.com>

fig. 019 receding polar ice and rapid flora expansion, <http://www.earth-cool.com>.

fig. 020 queue at a Los Angeles gas station, May 11, 1979, *Domus*, February 2008, p.6.

fig. 021 specie extinction, <http://www.neus.bbc.co.uk>.

fig. 022 khoi-san, <http://www.freefoto.com>

fig. 023 floods in India, <http://www.news.bbc.co.uk>.

fig. 024 khoi-san, <http://www.freefoto.com>.

fig. 025 polar bears, <http://www.earth-cool.com>.

fig. 026 coockle-store heating system, Hawkes, D. 2002, p. 9.

fig. 027 William Cooks' steam heating system of 1784, Hawkes, D. 2002, p.9.

fig. 028 cotton mill, Hawkes, D. 2002, p. 8.

fig. 029 kitchen of the Royal Pavilion, Hawkes, D. 2002, p. 8.

fig. 030 transformation towards a centralized heating system, Hawkes, D. 2002. p. 11

fig. 031 hot water heating system, Hawkes, D. 2002, p. 10.

fig. 032 Charles Barry's ground floor air shafts, Hawkes, D. 2002, p. 12.

fig. 033 fully integrated warm-air system, Hawkes, D. 2002, p. 15

fig. 034 advanced heating and cooling ventilation, Hawkes, D. 2002, p.16.

fig. 035 illustration of a heating and ventilation system, Hawkes, D. 2002, p. 12.

fig. 036 ventilation ducts, Hawkes, D. 2002, p. 13.

fig. 037 new envionmental friendly tools by Henri Labrouste, Hawkes, D. 2002, p. 14.

fig. 038 seperation of the structure and its function, Hawkes, D. 2002, p. 17

fig. 039 air conditioning diagram, Hawkes, D. 2002, p. 20.

fig. 040 reducing the building skin to a transparent envelope, Mies van de Rohe, Hawkes, D. 2002, p. 18.

glass facade by Le Corbusier, Hawkes, D. 2002, p. 19.

ye, Hawkes, D. 2002, p.21.

fig. 043 service system diagram, Hawkes, D. 2002, p.25.

fig. 044 extract duct by Le Corbusier, Hawkes, D. 2002, p. 24.

fig. 045 isometric service integration, Hawkes, D. 2002, . 25.

fig. 046 hiding the vertical duct system, Hawkes, D. 2002, p. 22.

fig. 047 service installations, Hawkes, D. 2002, p. 23.

fig. 048 hidden service network, Hawkes, D. 2002, p. 26.

fig. 049 fully artificial environment, SCSD school prototype, Hawkes, D. 2002, p.29.

fig. 050 relation of structure and mechanical plant, Hawkes, D. 2002, p. 28.

fig. 051 Louis Kahn's Richards Memorial Lboratories, an axonometric showing service tower, Hawkes, D. 2002. p. 30.

fig. 053 Louis Kahn's 'served and 'servant' spaces, Hawkes, D. 2002, p. 31.

fig. 054 interior gallery, Hawkes, D. 2002, p. 32

fig. 055-054 Pompidou centre and Lloyds building by Richard Rogers and Renzo Piano, Hawkes, D. 2002, p. 34.

fig. 056 Robert Venturi on illusion of natural light, Hawkes, D. 2002, p. 32.

fig. 057 environmenally layered envelope, Hawkes, D. 2002, p.36.

fig. 058 pure environmental scenography, Hawekes, D. 2002, p. 36.

fig. 059 brise-soleil-signalling the external envelop of the modern building, Hawkes, D. 2002, p. 35.

fig. 060 a building's external envelope, Hawkes, D. 2002, p. 39.

fig. 061 a cross section in which all dwelling's sevice needs could be met, Hawkes, D. 2002, p. 39.

fig. 062 defining the stages of climate variations, Victor Olgyay, Hawkes D. 2002, p. 40.

fig. 063 express of natural ventilation, Hawkes, D. 2002, p. 40.

fig. 064 reinterpretation of crystal palace, Hawkes, D. 2002, p. 38.

fig. 065 development of bioclimatic design, Ken Yeang, Hawkes, D. 2002, p. 41.

fig. 066 the "vitruvian" model of environmental design, Hawkes, D. 2002, p. 38.

fig. 067. the cornerstones of bioclimatic design, Norman Foster, Hawkes, D. 2002, p. 41.

fig. 068 a taxonomy of environmental architecture, Hawkes, D. 2002, p. 41.

### Chapter 2\_urban context

fig. 069 aerial photo of Pretoria, University of Pretoria, Department of Geography

fig. 070 site's African context, author.

fig. 071 aerial photo of Pretoria CBD, 2004, University of Pretoria, Department of Geography, 2004.

fig. 072 figure ground of study area, author.

fig. 073 aerial photo of Pretoria CBD, Tshwane Metropolitan Framework, 2006.

fig. 074 aerial photo of Pretoria CBD, Tshwane Metropolitan Framework, 2006.

fig. 075 aerial photo of University of Pretoria, University of Pretoria, Ou Lettere Archive, 1967.

fig. 076 aeria l photo of the University of Pretoria, University of Pretoria, Department of Geography, 2004.

fig. 077 figure ground study of study area, author.

- fig. 078 aerial photo of Hatfield precinct illustrating nodes around the University, author.
- fig. 079 figure ground study, illustrating University of Pretoria boundary and access points, author.
- fig. 080 diagrammatic streetscape design proposals, New Songdo City, Kahn, P. 2006, p.44. Edited by author.
- fig. 081 street section of a typical urban streetscape\_city of Tshwane, streetscape design guidelines, second edition, August 2007, p. 16. Edited by author.
- fig. 082 figure ground study of the University of Pretoria, author.
- fig. 083 group framework proposal, Kotze, m. 2008.
- fig. 084. Group precinct analysis proposal, author.
- fig. 085. group framework analysis diagram, Naude, W. 2008.
- fig. 086 various photographs from the University, Ou lettere Archive. Edited by author.
- fig. 087 photograph of the aula, taken by author, 2008.
- fig. 088 photograph of music department symbol, taken by author, 2008.
- fig. 089 photograph of musaion, taken by author, 2008.
- fig. 090 photograph of musaion, taken by author, 2008.
- fig. 091 photograph of engineer tower, taken by author, 2008.
- fig. 092 contributors to global warming, New Songdo City, Kahn, P. 2006, p. 15. Edited by author.
- fig. 093 [a];[h] green architecture of the future, *Domus*, February 2008, p. 10-12.
- Chapter 3\_project proposal
- fig. 093 [b-g] different sustainable strategies and products, *Elle*, April 2008, p. 75-77.
- fig. 094 green star rating system, green building council Australia, Madew, R. 2004, p. 19.
- fig. 095 global water withdrawals, New Songdo City, Kahn, P. 2006, p. 32.
- fig. 096 sustainable development and the city, Kahn P. 2006, p. 20. Edited by author.
- fig. 097 the need to increase government interest and investment parties, New Songdo City, Kahn, P. 2006, p. 29. Edited by author.
- fig. 098 human development index, New Songdo City, Kahn, P. 2006, p. 17. Edited by author.
- fig. 099 humanity's ecological footprint, New Songdo city, Kahn, P. 2006, p. 16. Edited by author.
- fig. 100 burdens of the modern city, New Songdo City, Kahn, P. 2006, p. 14. Edited by author.
- fig. 101 University of Pretoria emblem, <http://www.up.ac.za>
- fig. 102 The Council for Scientific and Industrial Research emblem, <http://www.csir.co.za>
- fig. 103 examples of advanced innovative technologies, *Innovate*, February 2007, p. 27.
- fig. 104 students participating in community projects, *Innovate*, February 2007, p. 12.
- Chapter 4\_the site
- fig. 105 urban precedents, New Songdo City, Kahn, P. 2006, p. 38. Edited by author.
- fig. 106 public transport around University of Pretoria, New Songdo City, Kahn, P. 2006, p. 52. Edited by author.
- fig. 107 aerial photograph of site, taken by author, 2007.
- fig. 110 diagrammatic illustration of the University of Pretoria's circulation routes, author.
- fig. 111 Site analysis diagrammes, author.
- fig. 112 [a-c] Melbourne grammar school, Johan Wardle Architects' *Australian Architecture*, May 2008, p. 86.
- fig. 112 [c] CH2, Mick Pearce, Melbourne, *Architectural Record*, January 2008, p. 127.
- fig. 112 [g] biomimicry, *Domus*, February 2008, p. 37.
- fig. 113-114 proposed projects, *Wettebewerbe aktuell*, Jan 2008, p. 53.
- fig. 115 Facade pattern\_Manchester Civil Justice Centre, *Architecture Australia*, January 2008, p. 63.
- fig. 116 facade treatment, solar shading, *Architectural Record*, december 2007, p. 78.
- fig. 117-120 transparent facade treatment, *Wettebewerbe aktueel*, April 2007, p. 86.
- fig. 121 CH2, Melbourne, Australia, *Architectural Record*, january 2008. p. 131.
- fig. 122-124 exhibition area display, *Wettebewerbe*, April 2007, p. 90-96.
- fig. 125. solar scales, *Domus*, February 2008, p. 15.
- fig. 126 circulation spine, *Wettebewerbe*, November 2007, p. 81.
- fig. 127;129 National museum, *Wettebewerbe*, April 2006, p. 37.
- fig. 128 A japanese inspired courtyard by Edith Cowan, University Library, *Architecture Australia*, January 2008, p. 69.
- fig. 130-140 various images, *Wettebewerbe*, January 2008, p. 80-96.
- fig. 141 arab embassy, Jean Nouvell, <http://www.lsc.org>.
- fig. 145 Cape Town recycling, making an effort, *Urban Green File*, April 2008, p. 29.
- fig. 146 Reducing energy wastage, *Global perspectives*, issue 02, p. 36.
- fig. 148-149 a house resisting natural disasters, *Domus*, February 2008, p. 15.
- fig. 152 before diagram, illustrating problems on site, author.
- fig. 153 after diagram, illustrating solutions to stated problems on site, author.
- fig. 154 circulation diagram of the proposed project, author.
- fig. 155 diagram illustrating circulation spine, author
- fig. 156 diagram illustrating the building form influences, author.
- fig. 157 [a] concept model 1, author  
[b] concept model 2, author  
[c] concept model 3, author  
[d] final concept, author
- fig. 161 30 Bond Street, Green Building council Australia, Madew, R. 2004, p. 17.
- fig. 162 CH2 Mick Pearce, *Architectural Record*, January 2008, p. 130.
- fig. 164 Genzyme centre, Cambridge, Benisch Arch., <http://www.genzyme.com>
- fig. 164 Bedzed, Bill Dunster, Hawkes, D. 2002, p. 36.
- fig 166 Pompidou centre, Paris, Hawkes, D. 2002. p. 34.
- fig. 168 Woolworth's distribution centre, Gauteng, *Urban Green File*, Volume 13, January 2008, p. 31.
- fig. 169 BP headquarters, *Urban Green File*, volume 13, January 2008, p. 10.
- fig. 170 model view of proposed building structure, author.

- fig. 171; 175 Glass facade, Civil Justice centre in Australia, *Architecture*, January 2008, p. 71.
- fig. 172 sketch elevation of western facade, author
- fig. 173 sketch elevation of western facade concept, author.
- fig. 176 concept sketches illustrating the ventilation study of the proposed project, author.
- fig. 177 schematic diagram of the absorption refrigeration cycle, author.
- fig. 178 [a] section illustrating night cooling, author  
[b] section illustrating passive mode ventilation, author
- fig. 179 [a] section illustrating active ventilation mode, author  
[b] table of required ventilation rates in the proposed building, author  
[c] heat exchanger, Gondzik, W. 2007, p. 175.
- fig. 180 [a] section illustrating heating strategy of the proposed facility, author.  
[b] schematic diagram of thermal heat gain, Grondzik, W. 2007, p. 157.
- fig. 181 [a] sun-study of the north facade, author  
[b] sun-study of the west facade, author  
[c] northern directed facade, Holm, D. 1996, p. 9.
- fig. 182 [a] sun study of north facade, author  
[b] sun-study of the west facade, author  
[c] relationship between the earth and the sun, Holm D. 1996, p.4
- fig. 183 [a] sun-study of the north facade, author  
[b] sun-study of the west facade, author  
[c] solar shading devices, Holm, D. 1996, p. 13
- fig. 185 section illustration sun device, author
- fig. 186, section of CHw north facade, *Architectural Record*, January 2008, p. 128.
- fig. 187 model view illustrating the central circulation spine, author
- fig. 189 Glass facade reflecting, *Architecture Australia*, May 2008, p. 85.
- fig. 190 transparent circulation spine, *Architectural Record*, December 2007, p. 71.
- fig. 192 concept sketches, author
- fig. 193 [a] concept detail of west facade louve system, author  
[b] model view of stacking chimneys
- fig. 195 [a] multiuse room to provide daylight distribution, Grondzik, W. 2007, p. 71  
[b] armstrongs infusions canopy, <http://www.armstrongceilings.co.uk>  
[c] general lighting from recessed luminaires, Grondzik, W. 2007, p. 103
- fig. 196 model view of the proposed building's recycle zoning, author.
- fig. 197 diagram of fire escape, author.
- fig. 198 schematic diagram illustrating water harvesting, New Songdo City, Kahn, P. 2006, p. 23. Edited by author.
- fig. 199 [a] model view of water harvesting, author  
[b] table of rainwater harvesting requirements  
[c] model view of building green roof, author
- fig. 200 [a,d] an experimental green roof at Yokahoma National University, Grondzik, W. 2007, p. 51.  
[b] thermal mass diagram Holm, D. 1996, p. 71.
