APPENDICES

URBAN ANALYSIS 8.1
LIST OF FIGURES 8.2
REFERENCES 8.3
8.1 Urban Analysis

The following figures 8.1-8 represent the rest of the urban grain analysis as set out in chapter three of the Document. The analysis as stated previously is done at the hand of numerous performance criteria as detailed in chapter three.

The Summary of the complete analysis can be seen in figure 3.17 as a representational diagram of a city blocks urban performance.
Figure 8.6: Adaptability analysis

Figure 8.7: Quality of the public realm analysis

Figure 8.8: Legibility analysis
## List of Figures

### 1 Brief

1.1 Design development section through facility, landscape and circulation (Author)

1.2 Concept sketch of lab surface interface (Author)

1.3 Design development section through central connective atrium (Author)

### 2 Context

2.1 Regional scale location diagram (Author)

2.2 Regional scale areal photograph (Mr.SidGEO View)

2.3 Metropolitan scale areal photograph (Mr.SidGEO View)

2.4 Precinct scale aerial scale photograp (Mr.SidGEO View)

2.5 Metropolitan scale location diagram (Author)

2.6 1921 Campus Development (A.D Destinatum)

2.7 1943 Campus Development (A.D Destinatum)

2.8 1960 Campus Development (A.D Destinatum)

2.9 1970 Campus Development (A.D Destinatum)

2.10 1982 Campus Development (A.D Destinatum)

2.11 Educational soft open spaces (Author)

2.12 Functional soft open spaces (Author)

2.13 Buffer soft open spaces (Author)

2.14 Hard open space structure (Author)

2.15 Campus figure ground study (Author)

2.16 Campus soft open space structure (Author)

2.17 Campus building use study (Author)

2.18 Campus possible development sites (Author)

2.19 Campus circulation and axis study (Author)

2.20 Site location diagram (Author)

2.21 Site and Precinct location diagram (Author)

2.22 Site surround development potential diagram

2.23 Current site use aerial photograph (Mr.SidGEO View)

2.24 Public transport surrounding campus diagram (Author)

2.25 Site climate analysis diagram (Author)

2.26 Panorama of Southern neighbour (Visual Arts) (Author)

2.27 Panorama of eastern neighbour (Boukunde) (Author)

2.28 Panorama of Norther neighbour (Music Department) (Author)

2.29 Site location diagram (Author)

2.30 Panorama of Fever tree lane (Author)

2.31 Diagram showing neighbouring site features (Author)

2.32 Photograph of Boukunde`s Western facade (Author)

2.33 Photograph of Boukunde`s Northern facade (Author)

2.34 Boukunde location diagram (Author)

2.35 Visual arts location diagram (Author)

2.36 Photograph of Visual Arts main entrance (Author)

2.37 Photograph of Visual Arts` NE corner (Author)

2.38 Photograph of Administration Northern facade (Author)

2.39 Aerial photograph of the Administration building (A.D Destinatum)

2.40 Administration location diagram (Author)

2.41 Musaijn location diagram (Author)

2.42 Photograph of Musaijn main entrance (Author)

2.43 Photograph of Musaijn Western facade (Author)

2.44 Site access and movement analysis sketch diagram (Author)

2.45 Site views diagram (Author)

2.46 Panorama of main Tukkie laan and ring road intersection (Author)
2.47 National Research context diagram (Author)
2.48 Regional Research context diagram (Author)
2.49 International Research context diagram (Author)
2.50 Agriculture research storage and wash area analysis diagram (Author)
2.51 Natural sciences research lab analysis diagram (Author)
2.52 New Fabi research Lab analysis diagram (Author)
2.53 Engineering research lab write up area analysis diagram (Author)
2.54 Engineering research lab analysis diagram (Author)

3 Urban Design

3.1 Campus outdoor rooms diagram (Loebl Schlossman & Hackl)
3.2 Campus architectural character (Loebl Schlossman & Hackl)
3.3 Nightime campus lighting (Loebl Schlossman & Hackl)
3.4 Campus as a village (Loebl Schlossman & Hackl)
3.5 Campus main entrances (Loebl Schlossman & Hackl)
3.6 Campus must be a safe environment (Loebl Schlossman & Hackl)
3.7 Campus circulation to separate cars and pedestrians (Loebl Schlossman & Hackl)
3.8 Paths (Author)
3.9 Node (Author)
3.10 Edges (Author)
3.11 Landmarks (Author)
3.12 Districts (Author)
3.13 Overview of campus districts (Group Work)
3.14 Campus image and opportunities analysis (Group Work)
3.15 Campus development potential analysis (Group Work)
3.16 Analysis area (Group Work)
3.17 Campus urban performance analysis avareges (Author)
3.18 Character analysis (Group Work)
3.19 Details and Materials analysis (Group Work)
3.20 Continuity and Enclosure analysis (Group Work)
3.21 Diversity analysis (Group Work)
3.22 Density and Mix analysis (Group Work)
3.23 Ease of Movement analysis (Group Work)
3.24 Initial Interventions map (Group Work)
3.25 Urban fabric division process (CABE, 2006)
3.26 Pedestrian friendly sidewalk set out (CABE, 2006)
3.27 Pedestrian spatial requirements (CABE, 2006)
3.28 Pedestrian sidewalk boundary scale (Office of the Deputy Prime Minister, 1998)
3.29 Proposed ringroad, parking and pedestrian zone (Office of the Deputy Prime Minister, 1998)
3.30 Pedestrian line of sight requirements (Office of the Deputy Prime Minister, 1998)
3.31 Basic street width to height ratios (Office of the Deputy Prime Minister, 1998)
3.32 Ringroad intersection proposed raised junctions (Office of the Deputy Prime Minister, 1998)
3.33 Strategic interventions diagram (Group Work)
3.34 Key interventions diagram (Group Work)

4 Theory

4.1 Mies van der Rohe`s Farnsworth house (Welch, A)
4.2 Mies van der Rohe`s Farnsworth house (Welch, A)
4.3 Mies van der Rohe`s Farnsworth house (Welch, A)
4.4 Hans Hollein’s Abteiberg Museum (Schaefer, H.P)
4.5 Michael Graves’ Portland Public Service Building (Refocus)
4.6 Charles Willard Moore’s Piazza d’Italia (Lockley,W)
4.7 Kas Oosterhuis surface explorations (Kas Oosterhuis)
4.8 Kas Oosterhuis surface explorations (Kas Oosterhuis)
4.9 Kas Oosterhuis surface explorations (Kas Oosterhuis)
4.10 Kas Oosterhuis surface explorations (Kas Oosterhuis)
4.11 International student (Mustav Hamdy) surface exploration
4.12 International student (Mustav Hamdy) surface exploration
4.13 International student (Mustav Hamdy) surface exploration

5 Precedents Studies

5.1 Internal circulation void of the Life Sciences building (Structural Concrete Industries, 2002)
5.2-3 Photos of the external facade of the life sciences building (Structural Concrete Industries, 2002)
5.4 View of lecture hall in the life sciences building (Structural Concrete Industries, 2002)
5.5-6 Photos of the external facade of the life sciences building (Structural Concrete Industries, 2002)
5.7 First floor plan of the NSW Life Sciences research facility (Structural Concrete Industries, 2002)
5.8 Photograph of the glass louvre facade at the Boeinger Ingleheim Pharmacuetical Research Lab (Sauerbruch Hutton)
5.9 Photograph of the glass louvre facade at the Boeinger Ingleheim Pharmacuetical Research Lab (Sauerbruch Hutton)
5.10 Photograph of the circulation void in the Boeinger Lab. (Sauerbruch Hutton)
5.11 Photograph of an interactional space in the Boeinger Lab (Sauerbruch Hutton)
5.12-14 Photograph of the glass louvre facade at the Boeinger Ingleheim Pharmacuetical Research Lab (Sauerbruch Hutton)
5.15 Boeinger research facility FF plan (Sauerbruch Hutton)
5.16 Photograph of the Clark center central courtyard (Foster and Partners)
5.17-19 Photographs of the internal court yard at the Clark Centre (Foster and Partners)
5.20-22 Clark Centre internal spaces (Foster and Partners)
5.23 Section Through the Clark Centre (Foster and Partners)
5.24 Blizzard building atrium view, showing pods and research space (Kiser, K. 2005)
5.25 Internal view in one of the pods in the blizzard building (Kiser, K. 2005)
5.26 Photograph of the external glass facade (Kiser, K. 2005)
5.27 Photograph of mezzanine level circulation in the Blizzard building (Kiser, K. 2005)
5.28 Photograph of the external glass facade and connecting bridge (Kiser, K. 2005)
5.29 Photograph of atrium pods and research space (Kiser, K. 2005)
5.30 Photograph of atrium pods and research space (Kiser, K. 2005)
5.31 Night time Photograph of the exterior of the Prada store (Glynn, S. 2005)
5.32 Section drawing of the Prada store (Glynn, S. 2005)
5.33 Design model of the Prade store (Glynn, S. 2005)
5.34 Photograph of the interior of the Prada store (Glynn, S. 2005)
5.35-39 Photographs of the rhomboid lattice structure of the prada store (Glynn, S. 2005)
5.40 Section drawing of the Prada store (Glynn, S. 2005)
5.41-43 Photographs of the Prada store (Glynn, S. 2005)
5.44 Photograph of the facade of the seattle
5.45-47 Photograph of the lattice structure of the Seattle library (Kiser, K. 2008)

5.48-49 Construction details for the Seattle library lattice structure (Kiser, K. 2008)

5.50 Construction details for the Seattle library lattice structure (Kiser, K. 2008)

5.51 Interior view of the Seattle library common space (Kiser, K. 2008)

5.52 Photograph of the lattice structure of the Seattle library (Kiser, K. 2008)

5.53 Conceptual context rendering of the Autolith design proposal (Serero Architects)

5.54-57 Conceptual projects renderings of the proposed Serero Autolith design (Serero Architects)

6 Design Investigation

6.1 Study of people in landscape as source of light (Author)

6.2 Analogue Generative process A (Author)

6.3 Conceptual facade studies from analogue generation process (Author)

6.7 Analogue Generative process B (Author)

6.8-11 Contextual facade studies from analogue generation process B (Author)

6.12-16 Structural development studies (Author)

6.17-20 Structural development studies (Author)

6.21-24 Structural development studies (Author)

6.25-29 Structural development studies (Author)

6.30-31 Deep surface tubes spatial exploration (Author)

6.32 Initial conceptual rendering of Deep Surface (Author)

6.33-34 Break out spaces exploration (Author)

6.35-36 Conceptual spatial study of atrium (Author)

6.37 Aerial view of deep surface tubes (Author)

6.38-39 Deep Surface spatial study (Author)

6.40 View of quadruple volume atrium and spatial exploration

6.41 Conceptual view from deep surface (Author)

6.42-44 Focal point views as part of formal development (Author)

6.45-47 Focal point views as part of formal development (Author)

6.48 Massing Diagram Indicating main views and axis (Author)

6.49 Conceptual massing diagram indicating main entrances (Author)

6.50 Conceptual massing diagram indicating Transition Zones (Author)

6.51 Conceptual massing diagram indicating connecting atrium axis (Author)

6.52 Combination of view determined formal development (Author)

6.53 Initial Walkway concept (Author)

6.54 Conceptual walkway rendering (Author)

6.55 Walkway from boukunde (Author)

6.56 Walkway from main intersection (Author)

6.57 Preliminary final circulation concept (Author)

6.58 Final Conceptual model of circulation system (Author)

6.59 Sketch investigating main entrance and circulation relationship (Author)

6.60 Perspective artistic impression of one of the proposed atrium zone with all its connective and interactional devices. (Author)

6.61 Perspective artistic impression of one the proposed atrium zone showing the vertical link between structure and space in the atrium zones, as well as daylight penetration at midday in the summer. (Author)

6.62 Perspective artistic impression of one of the proposed atrium zones from the upper laboratory circulations space. (Author)

6.63 Perspective artistic impression illustrating the interior of the long connective tube (Author)

6.64 Perspective artistic impression illustrating the view of the transitions zone with vertical circulation in the atrium. (Author)

6.65 Perspective artistic impression from the proposed transition zone at second floor level in to the atrium. (Author)

6.66 Perspective artistic impression illustrating the view of the atrium as it will be experienced when entering the research
6.67 Perspective artistic impression illustrating the view of the atrium as it will be experienced when entering the research unit at third floor level. One post graduate research units can be seen to the left as well as the penetrating tube acting as horizontal circulation. (Author)

7 Technical Investigation

7.1 Main structural components rendering (Author)
7.2 Conceptual rendering of main support Structures (Author)
7.3 Conceptual view of support structures (Author)
7.4 Conceptual view of support structure and weather screen to form epi-surface structure (Author)
7.5 3D view of main support structure showing folding surface (Author)
7.6-8 Conceptual structural renderings (Author)
7.9 Primary Support Structure (Author)
7.10 Secondary Support Structure (Author)
7.11 Composite floor deck components (Corus)
7.12 Photograph of floor deck before finish (Corus)
7.13 Tertiary Support Structure (Author)
7.14 Foundation pads (Author)
7.15 Main support columns (Author)
7.16 Primary base beam (Author)
7.17 Secondary base beams (Author)
7.18 Atrium lattice frame (Author)
7.19 Floor beams (Author)
7.20 Main facade lattice frame (Author)
7.21 Floor slabs (Author)
7.22 Mero Tsk node system (Macdonald, J.)
7.23 Diagrid space frame structure (Macdonald, J.)
7.24 Common space frame span to depth ratios (Macdonald, J.)
7.25 3D view of proposed Roof structure make up (Author)
7.26 3D rendering of roof construction at atrium junction (Author)
7.27 View of atrium structure and glazing (Author)
7.28 View from support zone to atrium (Author)
7.29 3D rendering of atrium and circulation zones (Author)
7.30 View of atrium circulation space (Author)
7.31 Zone planning diagram (Author)
7.32 3D view Core facilitie splanning (Author)
7.33 Vertical organisation diagram (Author)
7.34 Prevalent wind direction effect on air pressure and passive ventilation (Author)
7.35 Ventilation zones diagram (Author)
7.36 Passive airflow diagram (Author)
7.37 Deep surface hybrid ventilation system (Author)
7.38 External components to deep surface (weather screen) (Author)
7.39 Internal components to deep surface (sub surface membrane) (Author)
7.40 Hybrid passive ventilation components (Author)
7.41 Smart glass Solarvue components (P.G Smart Glass)
7.42 Smart glass Coolvue components (P.G Smart Glass)
7.43 Summer noon solar incidence angle (Author)
7.44 Equinox noon solar incidence angle (Author)
7.45 Winter noon solar incidence angle (Author)
7.46 Winter shadow analysis on site before intervention (Author)
7.47 Summer shadow analysis on site before intervention (Author)
7.48 Winter shadow analysis after intervention (Author)
7.49 Summer shadow analysis after intervention (Author)
7.50 Stormwater roof drainage system (Author)
7.51 OMA`s Seattle library steel structure Concrete
7.52 Composite floor slab (Corus)
7.53 Space frame structure
7.54 Pilkingtons planar glazing system (Pilkingtons)
7.56 Smart glass coolvue glass (P.G Smart Glass)
7.57 Composite aluminium cladding panels
7.58 Zinc standing seam roof cladding
7.59 Ecoresin cladding panels
7.60 Epoxy resin floor finish
7.61 RGB LED facade lighting
7.62 LED facade lighting systems

8 Appendices

8.1 Height and Massing analysis (Group Work)
8.2 Urban Structure analysis (Group Work)
8.3 Urban Grain analysis (Group Work)
8.4 Streetscapes and landscapes (Group Work)
8.5 Facade and Interface analysis (Group Work)
8.6 Adaptability analysis (Group Work)
8.7 Quality of the public realm analysis (Group Work)
8.8 Legibility analysis (Group Work)
