Boundaries in the Urban Context: Phenomenal vs. Literal Transparency:
Inter institutional & Disciplinary Research Facility at the University Square, Hatfield

Design project discourse
I am truly blessed. Thank you to the almighty creator; 
For my wonderful family, friends, mentors and strangers that have 
come into my life to support me. These people have kept me going, 
you have kept me going.

The creator would never allow you into a situation that you can't handle.
TABLE OF CONTENTS:
i. List of figures

CHAPTER ONE - CONTEXT ANALYSIS
1. Introduction and background
2. Context study
   a) macro study
   b) micro context study
1. Precedent study
   a) Altering perceptions
   b) Accessibility and orientation
   c) Passive environment control systems
   d) Programme
   e) Spatial interpretation and application

CHAPTER TWO - THEORETICAL DISCOURSE
1. Urban design development
   • Connecting nodes of human activity
   • Stability against the loss of connections
   • A success of retail areas and plazas
   • A path as the edge of a region
   • Priority for creating pedestrian paths
   • The pattern of roads as an organizing principle
   • Necessary discontinuities and seperation
2. The building within the urban context
   • The city: fragmentation versus unity
3. The building
   • Invisible barriers through design
   • Phenomenal transparency
   • Liminality in architecture
   • Multi-layered meaning

CHAPTER THREE - DESIGN REPORT
1. Initial design approach
   a) Urban relationships- redefining barriers
   b) Principle urban issues in the planning process
   c) Concept 1
   d) Concept 2
   e) Concept 3
2. Design development
   a) Spatial Organization
   b) Manipulating perceptions
   c) Addressing entry
   d) Defining the square as a liminal space
   e) Development facilities
   f) Structural concept 1
   g) Structural concept 2
3. Conclusion

CHAPTER FOUR - TECHNICAL REPORT
1. Introduction
2. Precedent study
3. Site and demolition
4. Material selection
5. Structure
6. Vertical circulation
7. Façade treatment
8. Services
9. Thermal comfort
10. Storm water
11. Fire safety
12. Pavers
13. Solar panels

APPENDIX 1
Technical drawings
**TABLE OF FIGURES:**

<table>
<thead>
<tr>
<th>Figure</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.01</td>
<td>Proposed site at UP, Hatfield campus (Author)</td>
<td>2</td>
</tr>
<tr>
<td>1.02</td>
<td>Proposed site Street edge (Author),</td>
<td>2</td>
