15.1 Introduction

In modern day societies both urban and rural communities are becoming increasingly complex and often difficult to govern effectively. A wide range of different interests are involved in such communities, and each particular local area is becoming more part of an overall network of social, economical and political transactions, rather than staying a closed society unto itself. Many decisions of a local authority thus transcend its local boundaries and impact on a wide range of other civil and corporate role players. Within this context, the new system of developmental local government is in need of strong political leadership that is able to make difficult policy judgements and decisions and to guide the actions of the municipal administration in order successfully to promote the social and economic well-being of its local communities. Accordingly, the White Paper on Local Government has identified various principles whereby political leadership should be able to fulfil its diverse obligations. These principles can be summarised as follows:¹

- To provide community-wide leadership and vision Many local communities are diverse, with multiple interests combined. New partnerships and coalitions of common interests can be built through a specified local vision which in turn should encourage and promote local government.

- To constantly build capacity and implement policy initiatives: Governing is about making choices. Such choices include the prioritisation of interests to the allocation of limited resources. Capacity and progress cannot be achieved if political representatives do not understand the dynamics of a local area and if they do not anticipate changes and learn from past mistakes.

• *To be accountable and transparent* Apart from being basic constitutional principles, accountability and transparency require political leadership that should account to their community regularly, apart from during normal elections and should do so openly and without personal or political hidden agendas. Both accountability and transparency involve the community, increase legitimacy and deepen democracy.

• *To build partnerships and coalitions* Strong partnerships and coalitions, with local, national and even international actors must be developed in order to achieve positive development.

• *To represent the diversity of interests* First and foremost, municipal representatives should strive for the best interests of the municipality as a whole. Narrow political ideologies do not serve all interests and can be very detrimental to many. Marginalised sections of communities must also be identified and their interests protected.

• *To ensure and demonstrate value for money* Local taxes should be utilised to the maximum benefit of each local community. All local administrations must be efficient and effective and should constantly seek ways to enhance performance and quality services.

In order to achieve and facilitate the abovementioned principles, the Constitution allows and provides for special measures that are directed at supporting the internal procedures and functions of all municipalities. Various options are available to cater for different scenarios. For example, all municipalities must

• decide if powers should be delegated to other functionaries in the council and, if so, which ones

• decide whether to establish an individual or collective executive system

• determine which committees should be established to enhance decision making and ensure effective governance.²

Many of these issues have now been given direct constitutional protection or are constitutionally authorised to be prescribed in mostly national legislation. Both the

² With regard to the delegation of executive powers, which is a common phenomenon in most governmental systems, each municipal council should make a careful assessment of its abilities and circumstances. In general, the delegation of powers, enhances both accountability and efficiency. Smaller executive bodies have more ability to act quickly and effectively than larger legislatures, but are not removed from accounting to the full council on executive or administrative obligations.
constitutional and other legislative provisions are subsequently investigated and discussed.

15.2 The basic constitutional framework regarding the internal procedures of municipal councils

In respect of the internal procedures of municipal councils, the Constitution states the following:3

(1) A Municipal Council
   (a) makes decisions concerning the exercise of all the powers and the performance of all the functions of the municipality;
   (b) must elect its chairperson;
   (c) may elect an executive committee and other committees, subject to national legislation; and
   (d) may employ personnel that are necessary for the effective performance of its functions.

(2) The following functions may not be delegated by a Municipal Council:
   (a) The passing of by-laws;
   (b) the approval of budgets;
   (c) the imposition of rates and other taxes, levies and duties; and
   (d) the raising of loans.

(3) (a) A majority of the members of a Municipal Council must be present before a vote may be taken on any matter.
   (b) All questions concerning matters mentioned in subsection (2) are determined by a decision taken by a Municipal Council with a supporting vote of a majority of its members.
   (c) All other questions before a Municipal Council are decided by a majority of the votes cast.

(4) No by-law may be passed by a Municipal Council unless
   (a) all the members of the Council have been given reasonable notice; and
   (b) the proposed by-law has been published for public comment.

(5) National legislation may provide criteria for determining
   (a) the size of a Municipal Council;

3 See the Constitution s 160.
(b) whether Municipal Councils may elect an executive committee or any other committee; or
(c) the size of the executive committee or any other committee of a Municipal Council.

(6) A Municipal Council may make by-laws which prescribe rules and orders for
(a) its internal arrangements;
(b) its business and proceedings; and
(c) the establishment, composition, procedures, powers and functions of its committees.

(7) A Municipal Council must conduct its business in an open manner, and may close its sittings, or those of its committees, only when it is reasonable to do so having regard to the nature of the business being transacted.

(8) Members of a Municipal Council are entitled to participate in its proceedings and those of its committees in a manner that
(a) allows parties and interests reflected within the Council to be fairly represented;
(b) is consistent with democracy; and
(c) may be regulated by national legislation.

Although the provisions of the Constitution seem simple and precise, it will become evident that there are many uncertainties and issues that are in need of a more complete and clearer interpretation. Some of these have already been the focus of legal disputes and judicial interpretation.\(^4\) In order to understand the various constitutional provisions regarding the internal procedures of a municipal council, each of the provisions will be investigated and discussed individually. In each instance, the fuller legal framework as provided by national legislation will be highlighted.

**15.2.1 Internal procedure with regard to municipal councils**

**15.2.1.1 Decisions by municipal councils**

The Constitution makes it very clear that the municipal council is the body that makes the decisions in a municipal jurisdiction in respect of the exercise of all powers and the performance of all the functions of that relevant municipality.\(^5\) As a general rule, it is thus the municipal council that takes responsibility for its powers and

---

\(^4\) Refer, eg, to s 160(6) below and the case law on such subsection.

\(^5\) See the Constitution s 160(1)(a).
functions. It is possible, however, for a municipal council to delegate many such powers or functions to other functionaries, such as an executive committee or an executive mayor. Despite such delegations, the relevant municipal council still retains the final responsibility and accountability.

15.2.1.2 Electing a chairperson/speaker

A municipal council is obligated to elect its own chairperson. This mandatory requirement seems to point to the fact that each municipal council in the new local government systems must elect an internal chairperson and that such a person must be elected by the municipal council itself. This requirement is further expanded upon by the Municipal Structures Act. According to the Structures Act, each municipal council must have a chairperson who is subsequently called the “speaker”, and who is elected from amongst the councillors of the municipal council at the council’s first sitting after its election or when it is necessary for the council to fill a vacancy. The task to elect a speaker is a specific obligation of a municipal council. When a speaker is to be elected, the municipal manager of the municipality or, if he/she is not available, a person designated by the MEC for local government in the province, is to preside over the election process. Schedule 3 of the Structures Act specifically sets out the procedure that is to be followed when a speaker or a mayor is elected. A councillor may not hold office as speaker and mayor or executive mayor at the same time.

---

6 Powers and functions in this respect would seem to include both legislative and executive powers and functions.

7 See the Constitution s 160(1)(b).

8 See the Structures Act s 36(1)-(2).

9 See the Structures Act s 36(3)-(4) and Sch 3. According to Sch 3, the presiding person must first call for the nomination of candidates. A nomination must be carried out in a prescribed manner, signed by two members of the Municipal Council and must be accepted in writing by nominee. Names are then announced, but no debate over names is allowed. If only one candidate is nominated, he/she must be declared elected. If there is more than one candidate, an election procedure is prescribed together with an elimination procedure if no candidate receives a majority of votes. If no election can be achieved, a further meeting must be held within seven days, and the election procedure is applied again.

10 This is not relevant in all instances. In municipalities with either a plenary executive system or a plenary executive system combined with a ward participatory system, the speaker must be called the mayor. In such municipalities, the mayor and speaker is the same person, although the position is called mayor and not speaker. See the Structures Act s 36(5).
The speaker of a municipal council has specific functions to perform. These functions include the following:\textsuperscript{11}
\begin{itemize}
  \item to preside at meetings of the municipal council
  \item to perform the duties and exercise the powers delegated to the speaker in terms of section 59 of the Local Government: Municipal Structures Act
  \item to ensure the council meets \textit{at least} quarterly
  \item to maintain order during meetings
  \item to ensure compliance in the council and council committees with the code of conduct of councillors as set out in Schedule 1 of the Local Government: Municipal Systems Act
  \item to ensure council meetings are conducted in accordance with the rules and orders of the council.
\end{itemize}
In normal circumstances, the speaker of a municipal council is elected for a term ending when the next council is declared elected. The term thus normally corresponds with the term of the municipal council. However, a speaker will have to vacate office during a term if that person
\begin{itemize}
  \item resigns as speaker
  \item is removed from office
  \item ceases to be a councillor of the relevant municipality.\textsuperscript{12}
\end{itemize}
A speaker may be removed only by a municipal council itself, and only by resolution adopted by the council. Prior notice of an intention/motion to move for the removal of the speaker must be given. Although the Structures Act does not specify the notice period, a reasonable time would seem sufficient. What is to be regarded as a “reasonable time” is not entirely certain, but it is submitted that such time that would allow the different political parties represented in the council to discuss and consider the proposed removal would suffice. It should also be noted that the Structures Act does not require a special majority for the removal of the speaker. It therefore seems acceptable to assume that a normal quorum and a normal majority of votes in favour or against a removal will be lawful.\textsuperscript{13} If a speaker is absent or not available to per-

\textsuperscript{11} Refer to the Structures Act s 37. According to this section, it is important for any newly elected speaker to obtain a copy of the rules and orders of the council and to ensure he/she is up to speed with any powers that might be delegated to the office of speaker.
\textsuperscript{12} See the Structures Act ss 38 and 39.
\textsuperscript{13} See the Structures Act s 40 read together with the Constitution s 160(3).
form the functions of speaker or if there is a vacancy in the office, the municipal council must elect another councillor to act as speaker.14

15.2.1.3 Executive and other committees or functionaries
Apart from the election of a chairperson, a municipal council may also elect an executive committee and other committees, subject to national legislation. On the point of the establishment of committees subject to national legislation, the Constitutional Court has already determined the following: In the case of Executive Council, KZN v President of the RSA,15 two provincial governments instituted proceedings in the court which challenged the constitutional validity of certain provisions of the Local Government: Municipal Structures Act16. It was contended inter alia, that the Act encroached on the constitutional powers of municipalities, especially a municipal council's power to elect executive committees or other committees in violation of section 160(1)(c) of the Constitution. The court held that section 160(1)(c) conferred this power "subject to national legislation", which meant that the right of municipalities to elect committees would not prevail where there was national legislation to the contrary. The national legislation referred to in section 160(1)(c) had to include any other legislation passed by Parliament in terms of chapter 7 of the Constitution. If the legislation was within the scope of national legislation sanctioned by chapter 7, the municipal power to elect committees had to be exercised, subject to that legislation. The municipal power to elect executive or other committees was therefore subordinate to these provisions and to the provincial power to select types of municipality. If this had the effect of precluding particular municipalities from electing executive or other committees, that resulted from the provisions of the Constitution itself and could not be challenged as being a breach of section 160(5)(b).17 It is important to note that a municipal council is not obliged to elect an executive committee, as was the position under the interim Constitution. Subject to the new legislative framework

14 The Act is unfortunately somewhat uncertain in this regard, as two different situations can occur. Eg, if a speaker is absent or unavailable, the newly elected speaker will act as only acting speaker, and will be replaced by the usual, elected speaker upon his/her return or availability. When there is a vacancy in the position of the speaker, the next-elected speaker should be the elected speaker of the municipal council until the end of the remaining term of the municipal council. Strictly speaking, the person is thus not acting temporarily as speaker for another person. See the Structures Act s 41.
15 2000 (1) SA 661 (CC).
17 See paras 87-88 at 699-700.
and based on the specific type of municipality that has been established, a municipal council may decide to elect an executive committee.\textsuperscript{18} The new legislative framework makes provision for various committees or internal functionaries. Apart from general criteria applicable for the establishment of committees, the Structures Act also contains specific requirements applicable to the various committees or functionaries. Each of the sets of requirements will be discussed below.

15.2.1.4 Criteria for the establishment of committees
According to the Structures Act, three general criteria are laid down for the establishment of a committee(s). A municipality may establish a committee as provided for in the Act if:

• the municipality is of a type that is empowered in terms of the Act to establish a committee of the desired kind\textsuperscript{19}

• the establishment of the committee is necessary.\textsuperscript{20} When the necessity of the establishment of a certain committee is evaluated, the following factors should also be taken into account:

  (a) the extent of the functions and powers of the municipality

  (b) the need for the delegation of those powers and functions in order to ensure efficiency and effectiveness in their performance

  (c) the financial and administrative resources of the municipality available to support the proposed committee.\textsuperscript{21}

• in the case of the establishment of an executive committee, the municipality has more than nine councillors.\textsuperscript{22}

15.2.1.5 Requirements regarding the composition, functions and procedures of executive committees
Only certain municipalities may establish executive committees. These are municipalities that are defined or classified as municipalities with

• a collective executive system

\textsuperscript{18} See the Structures Act ss 7-11.
\textsuperscript{19} In respect of the various types of municipalities, see the Structures Act ss 7-11. According to the Structures Act ss 42, 54, 61 and 72 only municipalities of specific type may establish certain committees or functionaries.
\textsuperscript{20} The necessity of a committee will depend on the relevant circumstances of each municipality. Almost all larger municipalities will need certain committees in order to fulfil and execute their functions and duties.
\textsuperscript{21} See the Structures Act s 33(b)(i)-(iii).
\textsuperscript{22} The Structures Act s 33(c).
• a collective executive system combined with a sub-council participatory system
• a collective executive system combined with a ward participatory system
• a collective executive system that is combined with both a sub-council and a ward participatory system.\textsuperscript{23}

If a municipal council establishes an executive committee, it must elect as members of the committee a number of councillors who will ensure effective and efficient municipal government. However, the Structures Act determines that no more members than 20% of the councillors of the council or 10 councillors, whichever is the least, may be elected. It is further also required that an executive committee may not have fewer than three members.\textsuperscript{24} The Act further determines that an executive committee be composed in such a way that parties and interests represented in the municipal council are represented in the executive committee in substantially the same proportion that they are represented in the council. This section must be read together with section 160(8) of the Constitution, which requires that the members of a municipal council be entitled to participate in the proceedings of the council and of its committees, allows parties and interests reflected in the council to be fairly represented, is consistent with democracy and may be regulated by national legislation.\textsuperscript{25} The Structures Act also provides that a municipal council may determine any alterna-

\textsuperscript{23} See the Structures Act s 42(1) read together with ss 8(a), (b), (c) and (d), 9(a) and (b) and 10(a). It is clear from the Act that any municipality that has a collective executive system or combination with such an executive system may establish an executive committee.

\textsuperscript{24} See the Structures Act s 43. It thus seems clear that an executive committee can never have more than 10 members. Eg, if a municipal council consists of 30 councillors and decides to establish an executive committee, the committee will consist of 6 councillors. 30 x 20% = 6. Six is fewer than 10, thus only 6 members. If a municipal council consists of 100 members, the executive committee will have 10 members. 100 x 20% = 20, whichever is fewer than 10 = 10.

\textsuperscript{25} This requirement has caused several legal disputes both under the interim Constitution and the Constitution. See also the Structures Act s 43. See, eg, the case of Democratic Party and Others v Brakpan TLC and Others 1999 (4) SA 339 (W), where it was mentioned that it is not the function of the court to prescribe to a council the number of members which must comprise its executive committee or what system of proportional representation it should adopt in electing such members; such a function has been entrusted to the legislature. The court is however obligated to intervene if the exercise of such powers negates the right[s] conferred on members in terms of the Constitution s 160(8)(a). It was further stated that the objective and purpose of s 160(8)(a) is to ensure, as far as is practically possible, that members that are representing political parties in the council participate fairly in the committees of the council. Such fairness is then determined according to the representation of the parties on the council and not according to political support amongst the electorate. It is the parties and interests within the council that must be fairly represented. The court finally held that the decision to appoint an executive committee of only ANC and NP members, notwithstanding the fact that the DP had equal representation to the NP within the council, was unconstitutional. See at 344-345.
tive mechanism for the election of an executive committee, provided that it complies with section 160(8) of the Constitution.26

Executive committees have specific powers and functions, and thus play an important role in the overall performance and exercise of municipal obligations and duties. In this regard the Structures Act determines the following:

- An executive committee is regarded as the principal committee of a municipal council. It is also the committee of a municipal council which receives reports from all other committees, which must then be forwarded by the executive committee, together with its recommendations to the municipal council itself. This requirement is applicable only when it (the executive committee) cannot dispose of such matters in terms of its delegated powers.27

- The executive committee is obligated to
  (a) identify the needs of the municipality
  (b) review and evaluated those needs in order of priority
  (c) recommend to the municipal council strategies, programmes and services to address priority needs through the integrated development plan and estimates of revenue and expenditure. The executive committee should in such instances take any applicable national and provincial developmental plans into account.
  (d) recommend or determine the best methods possible to deliver its strategies, programmes and services to the maximum benefit of the community.28

- An executive committee, when performing its duties, must comply with various legislative requirements. In this regard, the Structures Act determines that an executive committee must:29
  (a) identify and develop criteria in terms of which progress in the implementation of the council’s strategies, programmes and services can be evaluated. Such criteria can include Key Performance Indicators (KPI) relevant to the municipal council or that are common to local government in general

---

26 See the Structures Act s 43(3). It thus seems that while the composition of an executive committee is strictly determined, alternative procedures for the election of the members of such executive committee can be provided for.
27 See the Structures Act s 44(1)(a)-(b).
28 Such recommendations or determinations may include partnerships and other approaches. See the Structures Act s 44(2)(a)-(d).
29 See the Structures Act s 44(3)(a)-(h).
(b) evaluate progress against the KPI
(c) review the performance of the municipality in order to improve the economy, efficiency, effectiveness, efficiency of credit control, revenue and debt collection services and also the implementation of the municipality’s relevant by-laws
(d) monitor the management of the municipality’s administration in terms of the policy directions of the municipal council
(e) oversee the provision of services to communities in a sustainable manner
(f) perform such duties and exercise such powers as the municipal council may delegate to it
(g) report annually on the involvement of communities and community organisations in the affairs of the municipality
(h) ensure that regard is given to public views and report on the effect of consultation on the decisions of the council.

Apart from the reporting duties mentioned above, an executive committee is generally obligated to report to the municipal council on all decisions taken by the committee.30

Members of an executive committee must be elected from among the members of a municipal council and by the municipal council itself within 14 days of the council’s election or, if it is a district council, within 14 days after the last of the local councils has appointed its representatives to that district council.31 If the type of municipality has been changed to a type that may establish an executive committee, within 14 days the municipal council of the new type of municipality must also elect the members of the executive committee.32 Subject to any vacancies, members of an executive committee are elected for a term ending when the next municipal council is declared elected.33 Members of an executive committee are not always elected for

---

30 This relates to all aspects where an executive committee has the power or authority to take certain decisions itself and thus to bind the municipal council. One must remember that the municipal council is always ultimately responsible for all decisions taken within that municipality’s structures. It speaks for itself therefore that a municipal council must be updated regularly and informed of all decisions that the municipal council itself has not taken directly. See the Structures Act s 44(4).
31 See the Structures Act s 45(a)-(b).
32 See the Structures Act s 45(c) as substituted by Act 1 of 2003 s 1.
33 In essence, the term of members of an executive committee is similar to the term of a municipal council in normal circumstances. Refer to the Structures Act s 46. The term of office as an ex-
the full term of office, as vacancies can occur. A member of an executive committee must vacate his/her office during a term if that member

• resigns as a member of the executive committee

• is removed from office as member of the executive committee in terms of section 53 of the Act

• ceases to be a councillor.

When a vacancy has occurred and needs to be filled, such filling is subject to section 43 of the Act.\textsuperscript{34}

Although the new legislative framework for local government makes provision for the election of an executive mayor in certain circumstances, the election of a mayor is not restricted to such executive systems of municipality only. Accordingly, a municipal council must elect a member of its executive committee as the mayor, and if so approved by the MEC in the province, also a deputy mayor.\textsuperscript{35} The election of a mayor or deputy mayor takes place according to the procedure set out in Schedule 3 of the Act. When a mayor or deputy mayor is elected, he/she is elected for the duration of that person’s term of office as member of the executive committee.\textsuperscript{36} Similar to membership of the executive committee, a mayor or deputy mayor must vacate his/her office during a term if that person

• resigns as mayor or deputy mayor

• is removed from office as a member of the executive committee;

• ceases to be a member of the executive committee.\textsuperscript{37}

\begin{flushright}
executive committee member can also be shortened if the type of municipality has been changed to a type which does not allow for the establishment of an executive committee. See Act 1 of 2003 s 2.\textsuperscript{34}

This again emphasises the fact that if vacancies do occur, the proportional representation systems must still apply. If, eg, a member of political party A resigns, a fellow member of that party should take up such membership. The reflection of parties and interests in the executive committee as a committee of the municipal council should be maintained, as was determined according to the election results. The filling of vacancies cannot be used by the majority party in the municipal council to strengthen its own representation in the executive committee. See the Structures Act s 47(2).\textsuperscript{35}

It is important to note that a mayor or deputy mayor is not elected by the executive committee itself, but by the municipal council. The mayor or deputy mayor must be a member of the executive committee before he/she is elected, however. The facts thus speak for themselves that the election of a mayor or deputy can take place only once the executive committee has been elected or when it is necessary to fill a vacancy. See the Structures Act s 48(1)-(2).\textsuperscript{36}

Although the new legislative framework does not directly make mention of the time when a mayor or deputy is to be elected, it is submitted that such election should take place simultaneously with the election of the members of the executive committee, or very shortly thereafter. Because of the important role that a mayor plays within the executive structures of a municipality, a quick and speedy election of such a person is essential. The election of mayor or deputy mayor is conducted in terms of the procedures set out in the Structures Act Sch 3. See also the Act s 48(2).\textsuperscript{37} See the Structures Act s 48(4)(a)-(c).
No person may hold office as mayor or deputy mayor in the same council for more than two consecutive terms. If a person is elected to fill a vacancy in the office of mayor or deputy mayor, the period between that election and the next election of a mayor or deputy mayor was originally regarded as a term of office. During 2003 the Structures Act was amended to determine that when a vacancy in the office of mayor or deputy mayor is to be filled, the period between such election and the next election of mayor or deputy mayor is not regarded as a term. Any time served by a person in order to fill a vacancy or when the type of municipality has been changed to one which requires a mayor or deputy mayor, such a term is also not regarded as a term of office as mayor or deputy mayor. A mayor whose two consecutive terms have expired may not immediately after the expiry be elected as deputy mayor.

The person elected as mayor in an executive committee system has specific powers and functions. The mayor normally presides at meetings of the executive committee and performs the necessary duties, including any ceremonial functions, and he/she exercises the powers delegated to the office of mayor by the municipal council or executive committee. If a mayor is absent or not available, the deputy mayor will exercise the powers and perform the duties of the mayor. It should be noted that the mayor may also delegate duties to the deputy mayor.

Generally speaking, it is the mayor that decides where and when the executive committee should meet. However, if a majority of the members of an executive committee requests the mayor in writing to convene an executive committee, the mayor is obligated to convene such a meeting at a time and place set out in the

38 The position is the same regarding a deputy mayor or deputy executive mayor. A person may hold office for only two consecutive terms.
39 This position is now similar to the position or office of president or premier. When a person is elected to fill a vacancy in the office of the president on national level or the office of premier on a provincial level, the period between that election and the next election of either the president or the premier is not regarded as a term of office. See the Constitution ss 88(2) and 130(2). See the Structures Act s 48 as amended by Act 1 of 2003 s 3.
40 See the Structures Act s 48(6). The time period that is required is not certain, however. It is submitted that a term should pass before a former mayor who has served two consecutive terms as such can be elected as a deputy mayor. Arguably, the position should not be the same with regard to a deputy mayor who has served consecutive terms as deputy and now stands to be elected as mayor. If the legislator intended such requirements, it would have been included in the legislation. The elevation from deputy mayor to mayor should not be restricted/delayed by a certain time period.
41 If a mayor is absent or not available and there is no deputy mayor, or he/she is also absent or not available, then the members of the executive committee designated as such by the mayor in writing will act as mayor, or if the mayor has not designated anyone, the members of the Executive

continued on next page
written request. If both the mayor and deputy mayor are absent from a meeting and if there is a quorum of members present, the members present must elect another member to preside at the meeting.

It is standard practice for an executive committee to determine its own internal procedures and functioning. Accordingly, an executive committee, by resolution taken with a supporting vote of a majority of its members, may determine its own procedures subject, however, to any directions and the rules and orders of the relevant municipal council. The Structures Act determines not only the rules and orders of a municipal council, but also the fact that a majority of the members of an executive committee constitutes a quorum for a meeting. Decisions or questions before the executive committee are further decided if there is agreement/consensus among at least the majority of the members present that form a quorum. If there is an equality of votes on any question (an equal number of votes against and in favour of a matter), the person presiding must exercise a casting vote. Such a casting vote is in addition to that member’s normal vote as a member of the executive committee.

Lastly, it is important to note that members of an executive committee may be removed from office as members of the executive committee. A municipal council is authorised to remove one or more or all members of its executive committee by resolution. The municipal council must ensure that it acts within the ambit of the law, however. Before a member or members of an executive committee are removed, prior notice of the intention to move for a motion for removal must be given. If all the members of an executive committee are removed, a new election of members and of the mayor or deputy mayor, if applicable, must be held in terms of sections 45

---

42 Committee can elect someone from amongst its members to act as mayor. The Structures Act s 49(1)-(3).
43 It is submitted that the majority in such instances refers to an absolute majority, which requires a 50% + 1 of all the members of the executive committee. See the Structures Act s 50(1).
44 In this respect the Constitution s 160(6) determines that a municipal council may make by-laws which prescribe rules and orders for the council’s internal arrangements, business and proceedings and the establishment, composition, procedures, powers and functions of its committees. See also the Structures Act s 51.
45 To illustrate by way of an example: If an executive committee consists of 8 members, at least (4 + 1) 5 members will constitute a quorum, and at least 3 members should be in agreement in terms of a decision. See the Structures Act s 52(1)-(3).
46 See the Structures Act s 53(1). Note also that according to the Constitution s 160(3) a majority of members of the municipal council must be present and that such a decision will be decided by majority votes of the members present. Refer also the Structures Act s 30.
and 48 respectively. Any new election will subsequently also be subject to the requirements of section 43 of the Structures Act.\footnote{See the Structures Act s 53.}

**15.2.1.6 Requirements regarding the composition, functioning and procedures of executive mayors**

In the new local government system, only municipalities with a mayoral executive system or such a system combined with a sub-council participatory system or ward participatory system are allowed to have or establish an executive mayor.\footnote{See the Structures Act ss 54(1) and 8(e), (f), (g), (h), 9(c) and 10(b).} If a municipal council has decided to choose an executive mayor, it must elect an executive mayor from among its members. If the MEC for local government so approves, an executive deputy mayor may also be elected from among the members of the municipal council. Furthermore, an executive mayor must be elected within 14 days after the date from which the type of municipality has been changed to a type that allows for an executive mayor.\footnote{See the Structures Act s 55(1)(c) as substituted by Act 1 of 2003 s 4.} The election of an executive mayor must be held at a meeting of the municipal council within 14 days of the council’s election or, in the case of a district council, within 14 days after the last one of the local councils has appointed its representatives to the district council. The election of an executive mayor or deputy mayor is prescribed in Schedule 3 of the Structures Act. Any vacancy in the office of executive mayor or deputy executive mayor must be filled when necessary.\footnote{See the Structures Act s 55. According to Sch 3, certain formal requirements and procedures must be complied with.}

Similar to the position of an executive committee, an executive mayor has specific powers and functions. In this respect an executive mayor is entitled to receive reports from committees of the municipal council and forward such reports together with a recommendation to the municipal council in instances when the matter cannot be disposed of by the executive mayor himself/herself in terms of the powers delegated to his/her office. An executive mayor has the same obligations as an executive committee.\footnote{See s 56(2)(a)-(c) and (3)(a)-(h). The mayor must identify the needs of the municipality, prioritise needs and make recommendations to the municipal council.} In municipalities that have established an executive mayor, such an executive mayor is obligated to perform ceremonial functions if the municipal council so determines, and he/she must report to the municipal council on all decisions
taken by his/her office. If the executive mayor is absent, not available or if the office is vacant, the deputy mayor, if applicable, exercises all powers and performs the duties and functions of the executive mayor.  

An executive mayor and deputy executive mayor must be elected for a term ending when the next council is declared elected or when the type of municipality is changed to one not allowing for an executive mayoral system. No executive mayor or deputy mayor may serve as such for more than two consecutive terms. When filling a vacancy, such a vacancy period is not regarded as a term. This position is the same regarding the term of office as mayor or deputy mayor in both the executive committee system or the mayor executive system. The period served as mayor or deputy mayor in instances where the type of municipality has been changed is also not regarded as a term of office. As in the executive committee system, an executive mayor whose two consecutive terms have expired may not be elected as deputy executive mayor immediately after such expiry.  

The term of an executive mayor is not always fixed until the next council is declared elected. By resolution, a municipal council may remove its executive mayor or deputy mayor from office. Prior notice of an intention to propose a motion for removal must be given.  

Apart from removal, an executive mayor or deputy will also have to vacate his/her office during a term if he/she resigns, is removed or ceases to be a councillor of the municipal council.  

An important addition to an executive mayor system is the appointment of a mayoral committee. According to the Structures Act, if a municipal council has more than

---

52 See the Structures Act s 56(4)-(6). In a system with an executive mayor, the office of executive mayor is vested with both the executive authority and ceremonial duties. Note that if the executive mayor is absent or not available to perform his/her functions and there is no deputy mayor or such a deputy mayor is also absent or unavailable, then the council must designate a councillor to act as executive mayor. See the Act s 56(7) as amended by Act 51 of 2002 s 16(b).  

53 The reasoning for such provisions seems to be to allow other members of a municipal council an opportunity to obtain experience as mayor and deputy mayor, to allow for new leadership and to ensure that powers are not fixed in one or two individuals. An aspect that is unclear is if an executive mayor, after serving two consecutive terms, and after he/she has sat out a term, can be elected again as mayor or deputy mayor. In this regard it is submitted that should a person be allowed to serve as mayor or deputy again, this would be contrary to the intention of the legislator. In both national and provincial spheres, once a president or premier has served his/her consecutive terms, such a person cannot again be elected to that office or position. See the Constitution ss 88 and 130. This should also be the position on local government level. However, the position is different if a mayor is elected as deputy mayor or vice versa. Only the requirement of s 57(2) is relevant to such situations.  

54 Refer to the Structures Act s 58.  

55 See the Structures Act s 59.
nine members and has established an executive mayoral system, then its executive mayor:\textsuperscript{56} 
\begin{itemize}
  \item must appoint a mayoral committee from among the councillors to assist the executive mayor
  \item may delegate specific responsibilities to each member of the mayoral committee
  \item may delegate any of the executive mayor’s powers to the members of the committee and
  \item may dismiss a member of the mayoral committee.
\end{itemize}

The mayoral committee is comparable with the cabinet of the president on a national level or an executive council on a provincial level.\textsuperscript{57} A mayoral committee must consist of the deputy executive mayor, if applicable, and as many councillors as may be necessary for effective and efficient government. However, no mayoral committee may have more members than 20\% of the councillors of a municipal council or 10 councillors, whichever is the least.\textsuperscript{58}

The powers and functions of an executive mayor as may be designated by the municipal council must be exercised and performed by the executive mayor \textit{together} with the other members of the mayoral committee.\textsuperscript{59} Generally speaking, the members of a mayoral committee will remain in office for the term of the executive mayor who has appointed them. However, if the executive mayor vacates office, the mayoral committee will also dissolve.\textsuperscript{60}

\begin{footnotes}
\footnote{56}{See the Structures Act s 60(1)(a)-(d).}
\footnote{57}{In both the national and provincial spheres of government the members of cabinet or members of executive councils are appointed by the president or premier and are given tasks by them and can be dismissed by them respectively. See the Constitution ss 91 and 132. There seems to be uncertainty, however, if a mayoral committee must be appointed in a manner that allows parties and interests reflected in the municipal council to be fairly represented. In light of the Constitution s 160(8), it seems that such appointment should indeed be proportional.}
\footnote{58}{Eg, if a municipal council has 40 members, a mayoral committee can consist out of 8 members. 40 x 20\% = 8. A municipal council with 150 members can have a mayoral committee of only 10 members. 150 x 20\% = 30. The least between 30 and 10 is 10. See the Structures Act s 60(2). The mayor is also a member of the mayoral committee and must be calculated within the membership total.}
\footnote{59}{See the Structures Act s 60(3). The wording “together with the other members” indicates that the mayoral committee should act on consensus. The executive mayor should consult the other members and should act on their advice. He/she is not merely obligated to consult such members and then act on his/her own accord. The decision-making process of a mayoral committee seems to be left for such committee self to decide. Normally majority decision making or sufficient consensus would be employed.}
\footnote{60}{Read the Structures Act s 60(5) together with s 59.}
\end{footnotes}
15.2.1.7 The establishment, powers and internal arrangement of metropolitan sub-councils

Apart from an executive committee and an executive mayor, the Structures Act also provides for the establishment of metropolitan sub-councils and ward committees. Only metropolitan municipalities with a collective executive system or mayoral executive system that is combined with a sub-council system may establish metropolitan sub-councils.61

If a metropolitan municipality decides to establish metropolitan sub-councils, it must do so by passing a by-law which should:

• determine the number of sub-councils to be established
• determine an area within the municipal area that will consist out of a cluster of adjoining wards for each sub-council
• establish a sub-council under a distinct name in each area
• determine a mechanism that complies with Part 2 of Schedule 4 for the appointment of councillors in terms of section 63 of the Structures Act
• provide for an equitable financial framework in terms of which the sub-councils must function and
• regulate any other relevant matters.62

When wards are clustered together to determine the area of a metropolitan sub-council, the municipal council must apply the criteria set out in sections 24 and 25 of the Demarcation Act, insofar as they can be applied, and must also consult the Demarcation Board regarding such exercise.

After metropolitan sub-councils have been established, each of such sub-councils shall consist of

• the councillors representing the wards in the sub-council area
• an additional number of councillors that are allocated in terms of Part 1 of Schedule 4 of the Structures Act.63

Schedule 4 determines that the component of seats in section 63(1)(b) of the Structures Act, which refers to the allocating of seats to parties, is allocated to each party

---

61 See the Structures Act s 61(1) read with s 8(b), (d), (f) and (h).
62 Note that before the by-law is passed, a process of public consultation must have been undertaken. See the Structures Act s 62 as amended by Act 20 of 2002.
63 See the Structures Act s 63(1)-(2).
in accordance with the following formula:\(^64\)

\[
\frac{A \times B}{C}
\]

If the equation results in fractions, such fractions are to be disregarded. The seats allocated in terms of section 63(1)(b) must be allocated to parties represented in the metro council in a manner that will allow parties and interests reflected in the council to be fairly represented in the metro sub-council and that is consistent with the principle of democracy. In order to facilitate party representatives on the metro sub-council, each party represented in the metro council must designate their representatives to each metro sub-council from amongst their councillors not representing wards. No councillor may serve on more than one sub-council, and vacancies must be filled as they occur. Schedule 4 does not apply in cases where
- metropolitan sub-councils are established;
- the areas of existing metro sub-councils are changed; or
- the number of existing metro sub-councils are changed, after the composition of a metro council has changed as a result of the provisions of Schedule 6B of the Constitution.

In such cases, the additional number of councillors is determined by the metro council, so as far as possible the seats held by proportional representative councillors are equally distributed amongst all the metro sub-councils.\(^65\)

The councillors referred to in section 63(1)(b) must consist of councillors elected to the metro council from party lists in terms of Part 3 of Schedule 1 and must be appointed in terms of Part 1 of Schedule 4 or section 62(1)(cA) of the Act. It must be emphasised that item 3 of the code of conduct for councillors as set out in Schedule 1 to the Systems Act, which deals with the attendance at meetings, does not apply to the speaker, executive mayor, a member of the mayor committee or a member of the

---

\(^{64}\) A = total number of valid votes cast for each party on the party vote in the area of the metropolitan sub-council; B = the total number of valid votes cast for each party on the party vote in the total area of the metro council; and C = the total number of seats allocated to each party in the metro council in accordance with Sch 1 Part 3.

\(^{65}\) See the Structures Act s 63(1)(b) as amended by Act 2 of 2003 s 9.
executive committee in respect of meetings of a metro sub-council of which such an office bearer is a member.  

In respect of powers and functions, a metro sub-council has such duties and powers as the metro council may delegate to it, and it may make recommendations to the metro council on any matter affecting its area. In respect of delegated powers, a metro sub-council may advise the metro council on what duties and powers should be delegated to it.  

A metro sub-council must further elect one of its members to be the chairperson of that sub-council. In normal circumstances the term of members of a metro sub-council will be until the next metro council is declared elected. However, where a section 63(1)(b) member of a metro sub-council is replaced as a result of the provisions of item 6(b) of Schedule 6B to the Constitution, the newly appointed member is appointed for the remainder of the replaced member’s term, subject to section 67. Vacancies in sub-council membership can occur if a councillor resigns as a member of the sub-council or ceases to be a councillor in general, however.  

Subject to any directions of the metro council, the chairperson of a metro sub-council decides when and where the sub-council will meet. However, if a majority of members makes a request to the chairperson in writing, the chairperson must convene a meeting as requested. At meetings of the sub-council, the chairperson will preside. If the chairperson is absent but a quorum is present, then the members present must elect a member to preside at that meeting. With a supporting vote of a majority of its members, all metro sub-councils are allowed to determine their own internal procedures. Such procedures are subject to any directions of the metro council, however. Quorums in sub-councils are achieved when a majority of the members are present. Questions or decisions before the sub-council are then decided if there is agreement among at least the majority of the members present that form a quorum. If there is an equality of votes on any question, the member presid-

---

66 See the Structures Act s 63(3).
67 It is important that a proper evaluation of the capacity and capabilities of the metro sub-councils be undertaken before unrealistic and unachievable powers or duties are delegated. One must remember that the metro council will ultimately have the responsibility regarding the duties and provision of services. Refer to the Structures Act s 64.
69 Again, this refers to a normal majority of 50% + 1. If a sub-council consists of 12 members, at least (6 + 1 =) 7 members must be present to form a quorum and at least 50% + 1 of the members present must agree or vote in favour of a question. See the Structures Act ss 68-70.
ing must exercise a casting vote in addition to that member’s normal vote as a member. Lastly, all metro sub-councils are permitted to appoint internal committees, including a management committee. Members of the committees are appointed from among the members of the sub-council itself, and the main purpose of such committees is to assist the sub-council in the performance of its duties and the exercise of its powers.  

15.2.1.8 The establishment, powers and functions of ward committees

Similar to the position mentioned above, only metropolitan and local municipalities with a collective executive system or a mayoral executive system may establish ward committees. The main objective of a ward committee is to enhance participatory democracy in local government.

If a metro or local council decides to have ward committees, it must establish a ward committee for each ward in the municipality. A ward committee consists of:
- the ward councillor, who must also be the chairperson of the ward committee
- not more than 10 other members.

A metro or local council must further make rules regulating the election procedure of the ward committee members other than the chairperson. Such rules must take into account the need for women to be equitably represented in the ward committee and also the need to represent the diversity of interests in the ward. The rules must furthermore regulate the circumstances under which a ward committee member must vacate his/her office and the frequency of meetings of ward committees.

In an effort to enhance participatory democracy, ward committees have been given specific powers and functions. A ward committee may make recommendations on any matter affecting its ward to either the ward councillor or through the ward councillor, to the relevant municipal council or its executive committee or executive mayor, or even the metro sub-council if applicable. All ward committees have such duties and powers as the municipal council may delegate to it.

---

70 See the Structures Act s 71.
71 See the Structures Act s 72(1)-(3) read together with ss 8(c), (d), (g) and (h) and 9(b), (d) and (f).
72 See the Structures Act s 73(1)-(4). The Act also allows a metro or local council to make administrative arrangements to enable ward committees to perform their function and exercise their powers effectively. Such arrangements should include technical and administrative support through the provision of advice or infrastructure.
73 Refer to the Structures Act s 74.
Generally speaking, the members of a ward committee are elected for a term as is
determined in terms of the rules of the metro or local council. Vacancies in mem-
bership of ward councillors, apart from a vacancy in the office of the elected ward
councillor himself/herself, must be filled in terms of a procedure determined by the
relevant municipal council. It is important to note that no remuneration is payable to
members of a ward committee apart from the relevant ward councillor. Again, em-
phasis should be placed on the fact that ward committees are directed at achieving
and enhancing participation by local residents in ward-related matters. Such commit-
tee members are not official office bearers of the relevant municipal council and are
thus not remunerated for their services. It is lastly also possible for a metro or local
council to dissolve a ward committee if that committee fails to fulfil its objectives.

15.2.1.9 Other committees of municipal councils
Apart from the committees mentioned above, a municipal council may also establish
one or more committees necessary for the effective and efficient performance of any
of its powers or functions. The members of such committees are appointed from
among the members of the municipal council by the municipal council, and the mu-
unicipal council is also permitted to dissolve a committee at any time. When so-
called section 79 committees are established, the municipal council must adhere to
the various legislative requirements:
• It must determine the functions of the committee.
• It may delegate duties and powers to the committee.
• It must appoint the chairperson of the committee.
• It may authorise a committee to co-opt advisory members to the committee, who
  are not members of the council, within the limits determined by the municipal
council.
• It may remove a member of a committee at any time.
• It may determine a committee’s procedure.

---

74 See the Structures Act ss 73(3)(b) and 75 read together.
75 Refer to the Structures Act ss 77-78 respectively.
76 Such committees are often referred to as “s 79 committees” or “portfolio committees”.
77 The establishment of such committees should comply with s 160(6)(c) regarding the estab-
ishment of *inter alia* committees and the Constitution s 160(8), which requires proportionality in
such committees. See also the Structures Act s 79.
78 See the Structures Act s 79(2)(a)-(f).
If a municipal council has an executive committee or an executive mayor, it may appoint, in terms of section 79, certain committees of councillors to assist the executive committee or the executive mayor respectively. The number comprising such committees may not exceed the number of members of the executive committee or the mayoral committee, as was discussed above. Depending on the circumstances, either the executive committee or the executive mayor:

- appoints a chairperson for each committee
- may delegate any power and duties to such committees
- is not divested of responsibility of such powers or duties, however
- may vary or revoke any decision taken by a committee, subject to any vested rights.

All section 80 committees must report to either the executive committee or the executive mayor in accordance with the directions given by the executive committee or executive mayor, whichever is applicable.

### 15.2.1.10 The employment of municipal personnel

The Constitution specifically entrenches the authority of a municipal council to employ personnel that are necessary for the effective performance of its functions. Each municipal council must therefore decide which personnel should be appointed and if such personnel can be afforded by the municipality concerned. Although generally speaking it is open for a municipal council to employ personnel, every municipal council is obligated to appoint a municipal manager who is to head the administration and also the accounting officer for the municipality. When necessary, a municipal council must also appoint an acting municipal manager. A person that is appointed as a municipal manager must have the relevant skills and expertise to perform the duties and functions associated with such a post.

---

79 Where a municipal council has established an executive mayor, the mayor must appoint a mayor committee if the council have more than 9 members. Such mayor committee may never have more than 10 members. See s 60 of the Structures Act. Therefore, a s 80 committee, appointed in terms of s 79, can never have more than 10 members as a maximum. See the Structures Act s 80(2).

80 Refer to the Structures Act s 80(3)(a)-(d).

81 In the former local government dispensation a distinction was made between committees with authority to bind the municipal council through its decisions and committees that performed only administrative functions without binding authority. See, eg, the Transvaal Ordinance on Municipal Administration, O17 of 1939 ss 59 and 60.

82 Apart from sophisticated managerial skills, a municipal manager should also have wide knowledge of local government matters as well as experience in public administration. See the Structures Act s 82.
15.2.2 Aspects regarding the delegation of powers and functions in local government structures

It is an accepted practice in many governmental systems and public departments to allow and provide for the delegation of powers by one functionary to another. Generally speaking, the power or authority to delegate a power or function entails the lawful transfer of such a power or function from a structure which has legally been vested with a power or performance of such a power or function to another structure. Such delegation of authority is directed mainly at ensuring more effective and sufficient decision making within governmental structures. Because of its importance, the Constitution specifically entrenches the principles of agency and delegation. In this regard, section 238 of the Constitution states as follows:

An executive organ of state in any sphere of government may-

(a) delegate any power or function that is to be exercised or performed in terms of legislation to any other executive organ of state, provided the delegation is consistent with the legislation in terms of which the power is exercised or the function is performed; or

(b) exercise any power or perform any function for any other executive organ of state on an agency or delegation basis.

In its position as an executive organ of state in the third sphere of government, a municipal council is therefore constitutionally authorised to delegate any power or function that is to be exercised or performed in terms of legislation to any other executive organ of state. Such delegation must be consistent with the legislation in terms of which the power is exercised or the function is performed. Consequently, any delegation of authority must be evaluated against either the Constitution or other legislation applicable to such delegation.

Apart from section 238, a further constitutional provision regarding the delegation of powers on local government sphere is found in section 160(2) of the Constitution. According to the subsection and notwithstanding the provisions of section 238, certain functions may not be delegated by a municipal council. Such functions include

---

83 In the case of Executive Council, Western Cape Legislature v President of the RSA 1995 (4) SA 877 (CC) the Constitutional Court inter alia held that there was nothing in the interim Constitution prohibiting parliament from delegating subordinate regulatory authority to other bodies. The court stated that the power to delegate authority was necessary for effective law making. See para 51 at 899D-E.
• the passing of by-laws
• the approval of budgets
• the imposition of rates and other taxes, levies and duties and
• the raising of loans.

All such functions must be taken by the municipal council itself and may not be delegated to another functionary such as an executive committee or an executive mayor. See the case of Executive Council, Western Cape v Minister of Provincial Affairs, where the Constitutional Court per Ngcobo J held that section 160(2) of the Constitution simply prohibited municipalities from delegating certain matters. Section 160(2) did not give municipalities an unqualified right to delegate any other matter, however. Section 160(2) indeed provided how the power to delegate might be exercised and to which structures it might be delegated. The section did not in any way take away from municipalities the power to delegate matters except those excluded by the subsection. The court further confirmed that section 154(1) of the Constitution conferred wide legislative authority on the national government in respect of municipalities, and it authorised both national and provincial governments to enact legislation to empower municipalities to manage their affairs. According to the court, such legislative authority was wide enough to confer authority on the national government/parliament to enact section 32 of the Structures Act. The enactment of section 32, which required a municipal council to develop a system of delegation that would maximise administrative and operational efficiency was therefore not inconsistent with section 160(2) of the Constitution.

15.2.2.1 The new system for delegation in local government

Apart from the constitutional requirements regarding the delegation of powers, the new legislative framework for local government established under the Constitution also contains several aspects regarding the delegation system that must be developed. In this regard the Local Government: Municipal Systems Act determines that a municipal council must develop a system of delegation that will maximise the admin-

84 Cf the case of Kritzinger v Newcastle Local Transitional Council and Others 2000 (1) SA 345 (N), where the court held that the Constitution s 160 did not mention the right to delegate to the executive committee the power to determine whether civil proceedings should be instituted or defended as one of those aspects which municipal councils were precluded from delegating. See at 350B-H.
85 2000 (1) SA 661 (CC).
86 Refer to paras 126-129 at 711-712.
istrative and operational efficiency of the municipality. The system of delegation must also provide for adequate checks and balances. The Systems Act furthermore determines that, according to the system of delegation, appropriate powers may be delegated to any of the municipality’s other political structures, political office bearers, councillors or staff members. Certain powers may not be delegated to such functionaries, however. These powers are:

- a power mentioned in terms of section 160(2) of the Constitution
- the power to set tariffs
- the power to decide to enter into a service delivery agreement in terms of section 76(b) of the Systems Act
- the power to approve or amend the municipality integrated development plan (IDP).

The system of delegation may also instruct any political structure, political office bearer, councillor or staff member to perform any of the municipality’s duties. Notwithstanding the fact that certain powers or duties have been delegated to other functionaries by a municipal council, such delegation authority is not absolute, and accordingly the system of delegation may also provide for the withdrawal of any delegation or instruction.

When a delegation or instruction is given, there are specific requirements that legally must be met. These requirements can be summarised as follows:

- A delegation or instruction must not conflict with the Constitution, the Systems Act or Structures Act.
- It must be in writing.
- It is subject to any limitations, conditions and directions that the municipal council may impose.
- It may include the power to sub-delegate a already delegated power.

---

87 See the Systems Act s 59(1).
88 See the Systems Act s 59(1)(a).
89 Delegation therefore refers not only to the exercise of certain powers, but also to the performance of certain duties. See the Systems Act s 59(1)(b)-(c).
90 See the Systems Act s 59(2)(a)-(f). Refer also to the case of Nelson Mandela Metropolitan Municipality v Greyvenouw CC 2004 (2) SA 81 SECLD, where the court held that the delegation of non-discretionary decisions, such as giving effect to a discretionary decision taken by a Municipal Manager to institute legal proceedings, did not offend against the purpose of the system of delegation of authority. If the Municipal Manager was authorised to exercise the decision, he/she could then legally authorise someone else to fulfil such authority. See para 49-51 and 98-99.
• It does not divest the municipal council of the responsibility concerning the exercise of the power or duty.
• It must be reviewed when a new council is elected or, in the case of a district council, when such council has been elected and appointed.

In order to strengthen and enhance accountability and to ensure a proper check on delegated powers or duties, a municipal council may, in accordance with its internal procedures, review any decision taken by a political structure, political office bearers, councillor or staff member in consequence of a delegation or instruction. Upon such review, the municipal council may either confirm, vary or revoke the decision taken by such functionary, subject to any rights that may have accrued to a person. Apart from a municipal council’s authority to review *mero moto* the exercise of a delegated power or duty, a municipal council must review a decision taken in consequence of a delegation or instruction if at least one quarter of the councillors of the council request the municipal council to do so, in writing.91 A municipal council may also require its executive committee or executive mayor to review any decision taken by a functionary in consequence of a delegation or instruction.92

However, according to the new legislative framework, certain delegations are restricted to executive committees or executive mayors only. In this regard, the powers to:
• take decisions to expropriate immovable property or rights in or to immovable property and
• determine or alter the remuneration, benefits or other conditions of service of the municipal manager or managers directly responsible to the municipal manager may only be delegated to the executive committee or executive mayor, which ever is applicable within a policy framework determined by the municipal council.93 It is also determined that a municipal council may delegate only to an executive committee or executive mayor or chief financial officer the authority to make investments on behalf

91 See the Systems Act s 59(3)(a).
92 The Systems Act s 59(3)(b). It is important to note that any delegation or sub-delegation to a staff member of a power conferred on a municipal manager must be approved by the municipal council in accordance with the system of delegation that has been established in terms of the Act s 59(1). See s 59(4) as added by Act 51 of 2002 s 36.
93 See the Systems Act s 60(1)(a)-(b).
of the municipality, within the policy framework determined by the national minister of finance.  

In order to ensure control over delegated matters, it is determined that a political structure, a political office bearer, a councillor or a staff member of a municipality to whom a delegating authority has been delegated or sub-delegated may or sometimes must refer the matter to the relevant delegating authority for a decision. Furthermore, any person whose rights are affected by a decision taken by a functionary in terms of a power or duty delegated or sub-delegated may appeal against that decision by giving written notice of the appeal and reasons therefore to the municipal manager within 21 days of the date of the notification of the decision. Upon receipt of a notice of appeal, the municipal manager must promptly submit the appeal to the appropriate appeal authority, which must consider the appeal and confirm, vary or revoke the decision. According to the Systems Act, various persons or a combination of persons will be regarded as an appropriate appeal authority, depending on the particular circumstances. For example, if the appeal is against a decision by a staff member other than the municipal manager, then the municipal manager is the appeal authority. If the appeal is against a decision by the municipal manager, then the executive committee or executive mayor is the relevant appeal authority. If a municipality does not have an executive committee or executive mayor, then the municipal council of the municipality is the appeal authority. Lastly, if an appeal is against a decision by a political structure such as an executive committee or executive mayor, or a political office bearer or a councillor, then the municipal council is the appeal authority. This will be the case only where the council comprises less than 15 councillors. Where the council comprises more than 15 councillors, a committee of councillors must be appointed and will be the appropriate appeal authority. It is further required that an appeal authority commence with an appeal within six weeks from the date of referral of the appeal to it and decide the appeal within a reasonable

---

94 The Systems Act s 60(2).
95 See the Systems Act s 61.
96 In this respect it is of importance to note that no variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision. See the Systems Act s 62(3).
97 A special appeal committee must be appointed by the municipal council for such a purpose and must involve councillors who were not involved in the original decision. See the Systems Act s 62(4)(a)-(c).
period. It should be noted that an internal appeal does not detract from any appropriate appeal procedure that is provided for in any other applicable law.98

In an effort to further ensure accountability and oversight in respect of delegated powers, it is determined that a political structure, office bearer, councillor or staff member to whom an authority has been delegated or sub-delegated must report to the delegating authority in such intervals as the delegating authority may require. A delegation or sub-delegation may also be withdrawn or amended, or can even lapse. It is, however, important to note that the withdrawal, amendment or lapsing of a delegation or sub-delegation does not invalidate anything done as a consequence of a decision taken in terms of that delegation or sub-delegation.99

Delegations or sub-delegations should also be reviewed at regular intervals.100 In this regard, and whenever it becomes necessary to review a municipality’s delegations, the municipal manager must submit to the municipal council the following:

• a report on the existing delegations issued in terms of section 59 of the Systems Act and all other delegating authorities and
• recommendations on any changes to the existing delegations which the municipal manager may consider necessary.

If the municipality has an executive committee or an executive mayor, then the municipal manager must submit his/her report and recommendations to the municipal council through such executive committee or executive mayor.101

15.2.3 Quorums and majorities necessary to take lawful municipal decisions

Similarly to the two higher spheres of government, all municipal councils must comply with certain basic procedural requirements in order to take lawful decisions. In this regard the Constitution requires that a majority of the members of a municipal council be present before a vote may be taken on any matter.102 A majority in this respect seems to refer to a normal or simple majority. Such a majority would equate to 50% + 1 of the members of a particular municipal council.103 The Constitution thus

98 See the Systems Act s 62(6).
99 See the Systems Act ss 63 and 64.
100 According to s 59(2)(f), a delegation or instruction must be reviewed when a new council is elected.
101 See the Systems Act s 65(1)-(2).
102 Own emphasis added.
103 Eg, if a municipal council consists of 100 members, then 50 + 1 members must be present to form a quorum and before a vote may be taken.
seems clear that a quorum of at least 50% + 1 of the members of a municipal council must be present before a decision is taken. This requirement is relevant for all matters before the council.104

If a majority of the members of a municipal council is present, then such council may take lawful decisions. There are exceptions to the general rule, however. If an aspect is considered that falls within the ambit of section 160(2) of the Constitution, then it is required that the matter can be determined only by a decision taken by the municipal council with a supporting vote of a majority of its members.105 This subsection seems to indicate a so-called “absolute majority”, which in turn refers to a majority vote/supporting vote of the total number of members of a municipal council. All questions before the municipal council are decided by a majority of the votes cast.106

104 See the Constitution s 160(3)(a). During the restructuring of local government, similar provisions were applicable under the LGTA. See the case of MEC, Development Planning and Local Government v DP 1998 (4) SA 1157 (CC). In this case a dispute arose between members of the Eastern Metropolitan Substructure of the Greater Johannesburg Transitional Metropolitan Council (“the Council”) as to whether or not a simple majority or a two-thirds majority was required for the approval of its budget for the forthcoming financial year. The Council and the appellant brought an urgent application in a High Court for an order declaring a simple voting majority to be sufficient. The application was dismissed with costs. The appellant then applied for leave to appeal directly to the Constitutional Court or, in the event of such leave being refused, to the Supreme Court of Appeal or to a Full Bench of the High Court. The substance of the appeal was the constitutionality of the LGTA 209 of 1993 s 15(5), which provided that the budget of a municipal council had to be approved by a two-thirds majority of that council and that, if the budget for any financial year was not approved by 30 June of that year, the member of the executive council of a province responsible for local government could exercise the power to approve the budget. The basis of the challenge was that s 16(5) was inconsistent with the 1996 Constitution, in that it violated the Constitution s 160(3)(b) read with s 160(2)(b), which required the budget of a municipal council to be approved by a majority of the members of that council. The dispute turned on the meaning of the second sentence of Constitution Sch 6 Item 26(2), which provided that the LGTA s 16(5) and (6) may not be repealed before 30 April 1999. The court finally held that the LGTA s 16(5) could not be repealed and remained in force until 30 April 1999 despite the provisions of the Constitution s 160(3)(b), which would not apply during this limited period. S 16(5) was accordingly consistent with the Constitution s 160(3)(b). See para 53 at 1178 B-D.

105 Refer to the Constitution s 160(3)(b).

106 See the Constitution s 160(3)(c). The following example can be used to illustrate the practical effect of the abovementioned requirements. Imagine a municipal council that consists of 100 members. According to the Constitution s 160(3)(a), at least 50% + 1 (51 or more) members must be present before a vote may be taken. If a vote is to be taken on any matter which falls outside the functions mentioned in the Constitution s 160(2)(a)-(d), then such matters are to be decided by a majority of the votes cast of the members that are present. If we accept that 60 members out of the 100 members are present, then it would seem that the Constitution requires a majority of 50% + 1, thus equating to 30 + 1 = 31 or more votes to decide the matter. It is unclear, however, what the position would be if certain members, although present, abstained from voting. Let’s say that four members of the 60 present do not vote. In this regard it is submitted that the decision is to be taken on the votes cast. If only 56 votes were cast, then the majority of such votes would determine the final outcome. If the matter before the council referred to a s 160(2) matter, then a supporting vote of [the] majority members of the municipal council would be mandated. This would mean that within a council with a total of 100 members, at least 51 (50% + 1) of the members would have to vote in

continued on next page
An important principle to mention here is that municipal decisions such as those taken under the LGTA are not classified as administrative actions, and municipal councils are subsequently not required to provide reasons for their decisions. It seems that municipal decisions cannot legally be attacked on grounds of content; only on grounds of required procedures. This writer does not agree with such an hypothesis, however. Under the new constitutional dispensation, municipalities are required not only to comply with procedural requirements, but also to ensure that the result of certain actions or decisions comply with constitutional obligations.107 This writer agrees that municipal decisions do not fall under the definition of administrative action, however.108

Apart from the mentioned constitutional requirements regarding internal quorums and majorities necessary to take lawful decisions, there is other national legislation which sets out certain requirements. According to the Local Government: Municipal Structures Act,109 the speaker of a municipal council decides when and where the council should meet, subject to section 18(2) of the Act.110 However, the speaker must convene a meeting if a majority of the councillors request in writing that the speaker convene a council meeting. The meeting must then be convened at a time

support of the proposal. It should be clear from the abovementioned explanation that an absolute majority requires more votes than a normal majority.

107 Refer again to the positive obligations set out in the Bill of Rights and also the Constitution ss 152 and 153. See also the constitutional case of the Minister of Health v TAC (No 2) 2002 (5) SA 721 (CC).

108 See Steele v South Peninsula Municipal Council 2001 (3) SA 640 (C). In the case the respondent municipality decided by a majority vote to remove about half of the speed bumps which had been constructed in two “collector roads” in a suburb within its area of jurisdiction. The applicants, who were dissatisfied with the decision, applied in a Provincial Division for an order reviewing and setting aside the resolution so taken. The applicants contended that the resolution was an administrative act of the kind contemplated by the Constitution s 33 and was therefore subject to review. The court held that, although the council’s resolution, apart from that portion of it which related to the allocation of expenditure, could not properly be regarded as legislation, it did not fit comfortably into the notion of administrative action either. The decision by the council rather constituted the exercise of its constitutional authority and “right to govern … the local government affairs of its community” as intended in of the LGTA 209 of 1993 s 10C(3) read with the Act Sch 2A Items 6 and 7. The court further held that the resolution of the council could not be categorised as administrative action: the council passed a resolution pursuant to its statutory obligation to see to traffic control and road safety within its area of jurisdiction and it did not implement any particular law. The council resolution was carried by a majority. It was not a decision taken by a functionary who could be expected to furnish reasons but was a decision taken by a politically elected deliberative assembly whose individual members could not be asked to give reasons for the manner in which they had voted. See at 643-644.

109 The Act s 29.

110 According to the Structures Act s 18(2), a municipal council must meet at least quarterly.
set out in the written request.\textsuperscript{111} This position was affirmed by the Pretoria High Court in 2001 in the case of \textit{Oelofse and others v Sutherland and others}.\textsuperscript{112} The background to the case was the following: The second respondent, a municipal council established in terms of the Municipal Structures Act 117 of 1998, had 12 councillors, elected in the local government elections in November 2000. Six of the councillors (the applicants) formed a group or block in the second respondent council, while the other six formed another group or block. The first respondent, who had been elected the speaker of the second respondent council, was a member of the latter group or block. One of the members of the latter group resigned as a councillor in March 2001, leaving only 11 incumbent councillors. The first respondent then wrote to the other councillors informing them that as "all political parties and interest groups will need … to prepare themselves for the by-election’ he "will not be calling any council meeting before the by-election takes place". The six applicants thereupon signed a written notice calling upon the first respondent to convene a council meeting for 24 April 2001. The first respondent, claiming that the applicants lacked the requisite number of councillors to give a valid notice, declined to convene a council meeting. Relying on section 29(1) of the Act (which provided that "if the majority of the councillors requests the speaker in writing to convene a council meeting, the speaker must convene a meeting at a time set out in the request"), the six applicants applied in a Provincial Division for an urgent order compelling the first respondent to convene a council meeting. The first respondent, in opposing the application, contended that the phrase "a majority of councillors” in section 29(1) did not mean the majority of incumbents without counting any vacancies in the council and that the applicants therefore did not constitute a majority of councillors. The court, as per Bertelsmann J, held that although there was no definition of the word "quorum" in the Act, the legislature had provided in section 35 that a quorum of members was required before a valid meeting of a council could be held. None of the sections of the Act provided a number or formula for the calculation of the relevant quorum. Consequently, the quorum consisted of half the total number of members plus one. From this it followed that a municipal council had to have at least one half

\textsuperscript{111} See the Municipal Structures Act s 29(1). It is submitted that a majority of the councillors would seem to refer to an absolute majority, which would require a majority (50% + 1) of the total number of councillors of the particular municipal council.

\textsuperscript{112} 2001 (4) SA 748 (T).
plus one of the number of potential council seats allocated to it by the MEC for local government to be filled by incumbents before the council could function. The court further held in regard to section 160 of the Constitution that "members" referred to incumbents and that it was clear that a majority of incumbents could request a meeting of the municipal council. The Act clearly provided that, once a council was quorate, the majority of incumbents held sway. The court held accordingly that the application had to succeed. The applicants represented the majority of incumbents ("the majority of the councillors" referred to in section 29(1)) and were entitled to demand that a meeting be convened.

Furthermore, the municipal manager of a municipality or, in the absence of the municipal manager, a person designated by the MEC for local government in the province, must call the first meeting of the council within 14 days after the council has been declared elected or after all the members of a district council have been appointed. Where the composition of a municipal council has been changed as a result of the provisions of item 2, 3 or 7 of Schedule 6B of the Constitution, then, subject to item 6(b) of Schedule 6B of the Constitution, the speaker, must convene council meetings to deal with council matters. The first meeting must be held within 7 days.

According to section 30 of the Structures Act, the basic constitutional requirements regarding municipal council quorums and decisions, as is set out in section 160(3) of the Constitution, are reiterated. However, the Act also provides that if there is an equality of votes on any question, the councillor presiding must exercise a casting vote in addition to his/her normal vote as a councillor. It is further also legislated that before a municipal council is to take a decision on

- any matter mentioned in section 160(2) of the Constitution
- the approval of an integrated development plan for the municipality or any amendment to that plan
- the appointment and conditions of service of the municipal manager and a head of a department of the municipality

the council must first require from its executive committee or executive mayor, whichever is applicable, to submit to it [the council] a report and a recommendation on the relevant matter.  

15.2.4 Internal procedures regarding municipal by-laws

With regard to the internal procedures of municipal councils, the Constitution further requires that no by-law may be passed by a municipal council unless

- all the members of the council have been given reasonable notice of such by-law
- the proposed by-law has been published for public comment.

The enactment of by-laws forms part of a municipality’s legislative powers and is discussed more fully in chapter 14 in this work.

15.2.5 Procedures relating to the size of a municipal council and its committees

The size of a municipal council or of its committees is a very important factor in determining the effectiveness and success of any municipal government. Very large municipal councils tend to be more ineffective than smaller, more compact, councils. The most effective municipal government would need a council that is ideally balanced and that is not too large but also not too small to be unrepresentative of community interests.

In relation to the size of a municipal council, the Constitution determines that national legislation may provide for criteria for determining the size of a municipal council, whether the council may elect an executive committee or other committees and also the size of the executive committee or other committees, if so permitted.

Again the Constitution seems to confirm a need for uniformity regarding the sizes of municipal councils and the committees operating within such councils. This uniformity is then achieved through national legislation, and it is not left to the provinces to determine differently in each province.

15.2.6 The making of by-laws to regulate internal procedures

The Constitution specifically authorises a municipal council to enact or make a by-law which prescribes rules and orders for the internal arrangements of the council. The by-law also regulates the council’s business and proceedings and should further

120 The Constitution s 160 (5)(a)-(c).
121 See the Structures Act ch 3, as was discussed above.
deal with the establishment, composition, procedures, powers and functions of the committees within the relevant council.\textsuperscript{122} In this regard it is important to note that the Constitution seems to enhance some sort of autonomy for municipalities regarding its internal procedures, as well as the functioning and operation of its committees. This position was confirmed in the case of \textit{Executive Council’s WC and KZN v Minister of Provincial Affairs},\textsuperscript{123} where the court held that the constitutional power of legislatures to regulate the internal proceedings of committees was a narrow power, not a broad one, and was related not to the executive committees of these legislatures, but rather to other committees entrusted with specific tasks or portfolios. Section 160(6) of the Constitution had to be interpreted in a similar fashion: although the section conferred an important power upon municipalities, its scope was relatively narrow and did not relate to the power to regulate the establishment or functioning of the executive of municipal councils, whatever form that executive might take, or any other committee of the municipality which was a key part of its democratic structure. It related only to task and working committees which might be established and disestablished from time to time. The court held further that the committees which fell within those contemplated in section 160(6)(c) were those regulated by sections 71, 79 and 80 of the Structures Act. The power of municipalities to appoint committees was subject to section 160(1)(c). Municipalities had the power to elect "an executive committee or other committees subject to national legislation". The effect of section 160(1)(c) was that the power of the municipalities to appoint committees contemplated in section 160(1)(c) was subject to national legislation. Therefore, there could be no objections to sections 71, 79 and 80. Apart from this, these provisions largely repeated the provisions of the Constitution, which afforded municipal councils the power to determine whether to establish committees or not.\textsuperscript{124}

When one is dealing with a municipal council, one should have due regard to such by-laws as regulate the internal functioning. However, it is equally important to remember that municipal by-laws may not be in conflict with national or provincial legislation.\textsuperscript{125} It is therefore safe to say that no by-laws that prescribe rules and orders

\begin{itemize}
\item \textsuperscript{122} See the Constitution s 160(6)(a)-(c).
\item \textsuperscript{123} 2000 (1) SA 661 (CC).
\item \textsuperscript{124} See paras 100-104 at 703-705.
\item \textsuperscript{125} See again the Constitution s 156(3). A by-law that conflicts with either national or provincial legislation is invalid.
\end{itemize}
for internal arrangements, business or proceedings or relating to municipal commit-
tees, may be different from the provisions regarding such aspects that have been
determined in the legislation of the two higher spheres of government.

15.2.7 Procedures regarding the manner of conducting the internal
business of municipal councils

All municipal councils are obligated by the Constitution to conduct their business in
an open manner. In essence this means that all activities of municipalities are
open for public scrutiny and oversight. This obligation is applicable to not only the
municipal council but to all of its committees. Only when it is reasonable to do so
may a municipal council or a committee of a council close its sittings. Such closure
would mean no publicity regarding the content or outcome of a particular issue or
issues. An interesting aspect is that neither the Structures Act nor the Systems
Act deals further with the issue of closure of sittings. In the absence of any other
such legislative provisions, it is up to each individual municipality to enact by-laws
which prescribe rules and orders relating inter alia to its internal arrangements and
its business and proceedings.

15.2.8 Internal procedures regarding the participation of members of municipal
councils in council proceedings

The final constitutional provision dealing with internal council proceedings relates to
the participation of members in council or committee proceedings. In this respect the
Constitution states that members of a municipal council are entitled to participate in
the proceedings of the council or in the proceedings of the committees within the
council. The Constitution however circumscribes the entitlement to participate in
three ways: firstly, members are entitled to participate in a manner that allows parties
and interests reflected within the council to be fairly represented. What is or should
constitute fair representation is somewhat uncertain and needs better clarification.

---

126 See the Constitution s 160(7).
127 In order to determine the reasonability of closing a council or committee sitting, the council or
committee must determine the circumstances objectively and after due regard to all relevant as-
pects has been given. The Constitution specifically requires due regard to be given to the nature of
the business that is being transacted. See s 160(7). Eg, when a council is considering implementing
a strategic law enforcement operation, it is obvious that the nature of such business requires se-
crecy and non-disclosure.
128 See s 160(6)(a)-(b) above.
129 It should be noted that the Constitution does not exclude certain members or certain commit-
tees. The Constitution therefore seems to suggest that all the members of a council should partici-
pate in all proceedings of the council, if they so wish.
As a starting point, one can argue that fair representation would equate to proportional representation. The *prima facie* wording of the Constitution seems to suggest that the requirement of proportional representation is applicable to all committees of a municipal council. The wording of section 160(8) of the Constitution does not distinguish directly between different municipal councils or any of its committees. When the issue regarding the requirement of fair representation in a council or a committee came before the courts, the highest court in our state held a different view. See the matter of the *DA v Masondo No and another*130. The main issue in the case was whether or not minority parties in the Johannesburg municipal council were entitled to representation on a mayoral committee established under the provisions of the Local Government: Municipal Structures Act. Section 60 of the Act provided that “if a municipal council has more than nine members, its executive mayor (a) must appoint a mayoral committee from among the councillors to assist the executive mayor”. Section 160(8) of the Constitution provided that “members of a municipal council are entitled to participate in its proceedings and those of its committees in a manner that (a) allows parties and interest reflected within the council to be fairly represented”.

The appellants argued that on a proper construction of section 60(1)(a) of the Structures Act, read with section 160(8)(a) of the Constitution, the representation of minority parties is a requirement even if the subsection does not expressly say so. The respondents contended that neither the Constitution nor the Structures Act required a mayoral committee to have minority party representation. Chapter 7 of the Constitution, which contained the framework for local government, provided for three types of executive system in municipal government: a plenary executive system, an executive committee system and the executive mayoral system. The Johannesburg municipal council has the latter system.

The majority members of the Constitutional Court held that the primary function of the mayoral committee was the rendering of assistance to the mayor in the exercise of his authority. This view was supported by the provisions of section 160(6)(c) and (8) of the Constitution which, in context, referred only to committees elected by the municipal council.131 It also held that, although the democratic principle and the requirement of minority party representation in the deliberative processes of local gov-

---

130 2003 (2) SA 413 (CC).
131 See paras 19-20 at 420-421.
ernment were important, so was the need for effective delivery of services. A mayoral committee, which was personally chosen by the mayor to assist in the discharge of his duties as mayor, was simply not the type of committee contemplated by section 160(8). The mayor was entitled to choose that committee because he or she was personally responsible for what it did. To force the mayor to choose a multiparty committee to discharge these responsibilities would be to blur the distinction between an executive mayoral system and an executive committee system. The Structures Act did not describe the mayoral committee as a committee of the municipal council; nor did it expressly require that the mayoral committee should have minority party representation. There were a number of factors pointing to a deliberate distinction in the Act between committees of the municipal council and a mayoral committee. First, the powers granted in section 60(1) of the Act to appoint, dismiss and delegate were given to the mayor, not the municipal council; secondly, the Act expressly required that the composition of the executive committee be representative of parties and interests in the council (section 43(2) of the Act) when dealing with the executive committee system, but not so when dealing with mayoral committees; and, thirdly, there is a deliberate distinction between the mayoral committee and the municipal committees appointed under section 80 of the Act.

The court continued that the power of the municipal council under section 60(3) of the Act to insist that the mayor exercise certain powers or perform certain functions in conjunction with the mayoral committee did not mean that the mayoral committee was a committee of the council. The mayoral committee was accountable to and controlled by the executive mayor only. The mayoral committee was not a committee of the municipal council as contemplated in section 160(8) of the Constitution, and the provisions of the section were thus not applicable to the composition of the mayoral committee. Finally the contention of the appellants that section 60(1)(a) fell foul of section 160(8) of the Constitution because it did not require minority representation on a mayoral committee had to be rejected: since it was clear that the provisions of section 160(8) had no relevance to the appointment of a mayoral committee, it followed that neither the Structures Act nor the Constitution required minor-

132 Paras 22-23 at 421D/E-422A.
133 Paras 24-27 at 422A/B-I, paraphrased.

135 Para 33 at 424D.
ity representation on a mayoral committee. Accordingly, section 60(1)(a) was not in conflict with the Constitution.\(^{136}\)

This writer disagrees with the reasoning of the court, however. Although the conclusion of the court that a mayoral committee is different from other committees and should not allow for proportional representation should be accepted, the basis for the court’s decision is wrong. It is clear that the wording of the Constitution, read together with the Structures Act, is vague and uncertain and that the position should have been corrected through legislative amendments and clarification.\(^{137}\) It is submitted that it is very dangerous for our courts to decide and read things into the legislation where the legislature has failed to express its legislative intentions clearly. Such an assumption of legislative authority could in itself be contrary to the Constitution and could be unconstitutional when tested against the principle of separation of powers. Rather, the courts should demand clarification of an issue from the legislature. Secondly, participation should be allowed in a manner that is consistent with democracy and, thirdly, such participation may be regulated by national legislation.\(^ {138}\)

**15.3 The privileges and immunities of municipal councils and their members**

The protection of members of legislative organs of the state is not new to South Africa’s constitutional system. During the development of the parliamentary system in England, many privileges developed to protect members against interference or pressures from outside the legislature. Although the protection of privileges was originally directed at members of parliament, over the years such protection was also extended to members of other legislatures. Within the new constitutional dispensation in South Africa such privileges have been entrenched on all three spheres of government.\(^ {139}\) In respect of local government, the Constitution confirms that provincial legislation within the framework of national legislation may provide for privileges and immunities of municipal councils and their members.\(^ {140}\)

---

\(^{136}\) Para 34 at 424E-G.

\(^{137}\) See the minority decision of the *Masondo* case *supra* fn 130 at 429 *et seq*.

\(^{138}\) Refer to the Constitution s 160(8)(a)-(c). See also the Structures Act chs 3 and 4.

\(^{139}\) According to the Constitution ss 58, 71 and 117, both members of parliament and of provincial legislatures have certain privileges such as freedom of speech in the legislature or its committees and are also exempted from civil or criminal proceedings in relation to anything they have said or produced before the legislature or any of its committees.

\(^{140}\) See the Constitution s 161. It is conspicuous that the Constitution does not directly entrench the privileges of members of municipal councils in a similar fashion as the protection afforded to the
A closer evaluation of section 161 of the Constitution indicates that the constitutional drafters intended to give more authority to the provincial legislatures in respect of municipal privileges, although not a carte blanche power. The provincial legislatures could each provide for privileges or immunities of municipal councils and their members in each province, but such legislative provisions have to fall within the framework of national legislation. The autonomy regarding privileges and immunities is thus circumscribed by national framework directions. In compliance with the Constitution, the Municipal Structures Act determines that provincial legislation enacted in terms of section 161 of the Constitution provide for at least the following:  

- that councillors have freedom of speech in a municipal council and in its committees, subject to the relevant council’s rules and orders as is envisaged in section 160(6) of the Constitution and
- that councillors are not liable to civil or criminal proceedings, arrest, imprisonment or damages for anything that they have said in, produced before or submitted to the council or any of its committees or for anything revealed as a result of anything that they have said in, produced before or submitted to the council or any committee of the council.

On the point of freedom of speech in municipal council meetings, two particular aspects are of importance. In the first instance, freedom of speech is a constitutionally recognised fundamental right and may only be limited in accordance with the Constitution. Secondly, freedom of speech is important to allow for fair and free political criticism and is a core component of the principle of a democratic government. Confirmation of this position was given in various court decisions.

members of the two higher spheres of government. Such diminution in the protection of local government affairs is somewhat unfortunate. It is submitted, as is the case in respect of other issues, that the Constitution could indeed have provided equal protection to certain constitutional issues for all three spheres of government. The protection given by the Constitution in respect of local government matters merely confirms that national or provincial legislation may provide for certain aspects. Such legislative provisions are much easier to amend and thus provide less protection than the Constitution itself.

141 See the Structures Act s 28(1)(a)-(b).
142 See the Constitution ss 16 and 36 respectively.
143 See, eg, Waters v Khayalami Metropolitan Council 1997 (3) SA 476 (W), where the court held that the censuring of applicant who criticised and requested information regarding other councillors stifled freedom of expression and restricted debate in the respondent’s meetings. The action of the respondent militated against the fundamentals of democracy. The court held that in an open and accountable society those who held power and were responsible for public administration ought to be open to criticism. See at 491C-D. See also the case of De Lille v The Speaker of the National Assembly 1998 (3) SA 430 (C).
It should be noted that the enactment of provincial legislation in terms of section 161 of the Constitution is not compulsory. Provinces may enact such legislation if they so wish. It is thus quite possible that some provincial legislatures will not opt to enact such legislation. To address such situations, the Structures Act provides that until such provincial legislation has been enacted, the privileges referred to in section 28(1) of the Act will apply to all municipal councils in the province concerned.\footnote{See the Structures Act s 28(2).}

Apart from the legislative provisions mentioned above, it is advisable for all municipal councils to make provision for the privileges and immunities of council members in their own internal rules and orders. This is particularly important since the protection given in the Structures Act is made subject to a council’s rules and orders.\footnote{Cf the case of \textit{Herselman No v Botha} 1994 (1) SA 28 (A).}

It seems that the Act wants to protect a certain measure of autonomy for municipalities in respect of the privileges and immunities of their members. However, one must emphasise the constitutional provision that any municipal by-law that is in conflict with a national or provincial law is invalid. The autonomy is therefore relatively restricted. Only a limited measure of autonomy regarding privileges is given to municipalities within a national regulatory framework.

\textbf{15.4 Internal municipal functionaries and procedures}

In accordance with the new legal framework, all municipalities are obligated to define the specific role and area of responsibility of each political structure and each political office bearer of the municipality. This also includes the role and responsibilities of the municipal manager.\footnote{See the Systems Act s 53(1).} The respective roles and areas of responsibility must be

- defined in precise terms by way of separate terms of reference and must be in writing
- acknowledged and given effect to in the rules, procedures, instructions, policy statements and other written instruments of the specific municipality.\footnote{Refer to the Systems Act s 53(2)(a)-(b).}

The terms of reference mentioned above may also include the delegation of powers and duties to the relevant functionary(ies).

When the respective roles and areas of responsibility of each political structure, political office bearer or the municipal manager are being defined by the relevant
municipality, the municipality must determine five aspects: 148

• the relationship among those political structures, office bearers and the municipal manager and also the manner in which they must interact
• the appropriate lines of accountability and reporting procedures for the functionaries
• the mechanisms, processes and procedures for minimising cross-referrals and prevention of unnecessary overlapping of responsibilities between the functionaries
• the mechanisms, processes and procedures for resolving disputes between the functionaries inter se
• the mechanisms, processes and procedures to ensure interaction between the functionaries and other staff members of the municipality and between the councillors and the municipal manager and other staff members of the municipality.

It is further important to note that if a specific municipality has a decentralised regional administration in any part of its area, the municipality must determine mechanisms, processes and procedures for interaction between the regional management structures and

• the ward councillor or other councillors responsible for that part of the municipal area
• any sub-council or ward committee where applicable
• the local community in that area. 149

15.5 Code of conduct for councillors
Within the new legal system for local government, specific provision has been made for a code of conduct for political office bearers/councillors. The main aim of this code of conduct is to enhance the overall principles of accountability and responsiveness that are entrenched in the Constitution. 150 The inclusion of a specific code of conduct for councillors is not a new aspect, but has always been included in the legal structure of the third sphere of government. 151 A code of conduct for political

148 See the Systems Act s 53(5)(a)-(e).
149 The Systems Act s 53(6)(a)-(c).
150 The Constitution s 1 provides the basic values on which the new democratic state is founded.
151 See, eg, the LGTA of 1993 Sch 7.
members of a legislature is not only required on the lowest level of government in a
state but is also prescribed for the higher spheres of government.152

On local government level, the Systems Act determines that the code of conduct
that is contained in Schedule 1 of the Act applies to every member of a municipal
council. This code of conduct thus applies only to the political component of a mu-
nicipality, as a municipal council comprises elected representatives only.153 According
to the preamble of the code of conduct, councillors are elected to represent local
communities on municipal councils, to ensure that municipalities have structured
mechanisms of accountability to local communities and to meet the priority needs of
communities by providing effective, equitable and sustainable services. In the fulfil-
ment of their roles, councillors must be accountable to local communities and must
report back at least quarterly to constituencies on council matters, including the per-
formance of the municipality. In an effort to ensure that councillors fulfil their obliga-
tions and to support the achievement by a municipality of its objectives as set out in
the Constitution and section 19 of the Municipal Structures Act, a detailed code of
conduct has been established.154

15.5.1 General conduct of municipal councillors

According to the code of conduct for councillors, every councillor must:
• perform the functions of his/her office in good faith, honestly and in a transparent
manner
• act in the best interests of the municipality at all times and in such a way that the
credibility and integrity of the municipality are not compromised.

Conduct relating to aspects of good faith, honestly, transparency and best interests
are not defined, and it is submitted that an objective determination of all relevant
circumstances will be required in order to determine whether or not a councillor has
breached these requirements in specific circumstances.155

---

152 See, eg, the Constitution ss 96 and 136. Both the members of cabinet and deputy ministers
as well as the members of the executive council of a province must act in accordance with a code
of ethics that is prescribed by national legislation. According to internal house rules, both national
and provincial executive members act in a prescribed manner. See also the Executive Members
Ethics Act 82 of 1998.

153 Officials and the public are excluded from such code of conduct, and the code applies only to
municipal councillors.

154 Refer to the preamble of the code of conduct for councillors set out in the Systems Act Sch 1.

155 See the Systems Act Sch 1 Item 2.
15.5.2 Attendance at meetings
Every councillor must attend each meeting of the municipal council and of a committee of which that councillor is a member. Exceptions to this obligation will be accepted only when
- leave of absence is granted in terms of an applicable law or as may be determined by the rules and orders of the council or
- if the councillor is required in terms of this code to withdraw from the meeting.  
Provision is further made that a municipal council may impose on a councillor a fine as is determined by its standing rules and orders for
- not attending a meeting as is required or
- failing to remain in attendance at such a meeting.
If a councillor is absent from three or more consecutive meetings of the council or a committee meeting which he/she is required to attend, then he/she must be removed from office as a councillor.  
Any proceeding for the imposition of a fine or the removal of a councillor must be conducted in accordance with a uniform standing procedure, which procedure each municipal council must have in place for the purposes of this item. Such procedure must naturally comply with the rules of natural justice, which in turn form part of the constitutional right to just administrative action.

15.5.3 Disclosure of interests and personal gain
According to item 5 of the code of conduct, a councillor must
- disclose to the municipal council, or to any committee of which the councillor is a member, any direct or indirect personal or private business interest that that councillor, his or her spouse, partner or business associate may have in any matter before the council or the committee
- withdraw from the proceedings of the council or committee when that matter is considered, unless the council or the committee decides that the councillor’s direct or indirect interest is trivial or irrelevant.

---

156 Refer to the Systems Act Sch 1 Item 3.
157 It is evident that the Act is very strict and severe on this point. Councillors should be well advised to note that the Act is mandatory in this regard.
158 See the Systems Act Sch 1 Item 4 as well as the Constitution s 33.
159 It is important to note that the Act Item 1 of the code of conduct defines a “partner” as a person who permanently lives with another person in a manner as if married. This inclusion is to be welcomed, as a much wider disclosure of interests is required. In a country where corruption is the order of the day, strict and extensive measures of anti-corruption prevention are indeed needed.
It is furthermore legislated that a councillor who or whose spouse, partner, business associate or close family member acquired or stands to acquire any direct benefit from a contract concluded with the municipality must disclose full particulars of the benefit of which the councillors is aware.\textsuperscript{160} Such disclosure is to be done at the first meeting of the municipal council at which it is possible for the councillor to make such disclosure. Such disclosure is not required in instances where an interest or benefit has been acquired in common with other residents of the municipality, however.\textsuperscript{161}

A councillor is further prohibited from using his/her position or privileges as a councillor or from using confidential information obtained as a councillor for private gain or to improperly benefit another person. Furthermore, no councillor, except with the prior consent of the municipal council, may

\begin{itemize}
  \item be a party to or beneficiary under a contract for the provision of goods or services to the municipality or for the performance of any work other than the work as a councillor for the municipality
  \item obtain a financial interest in any business of the municipality and
  \item appear on behalf of any other person before the council or a committee for a fee or other consideration.
\end{itemize}

Prior consent of the municipal council can be vetoed by more than a quarter of the councillors of a particular council.\textsuperscript{162}

The code of conduct for councillors also requires that when a councillor is elected or appointed, he/she must declare to the municipal manager in writing and within 60 days of the date of such election or appointment the following financial interests which he/she holds:

\begin{itemize}
\end{itemize}

\textsuperscript{160} See the case of \textit{Mpakathi v Khotso Development CC and Others} 2003 (3) SA 429 (W). The essential question in the case was whether or not a councillor of a local authority may purchase property at a sale in execution where the local authority was the judgment creditor. According to the Local Government Ordinance 17 of 1939 (T) s 40, a councillor could not enter into a contract with the council in which he had any direct or indirect pecuniary interest unless prior approval had been obtained from the administrator. The court held that, in selling the property, a contract came into existence between the sheriff and the purchaser. The judgment creditor was not a party to the contract. The argument of the plaintiff that the contract should be declared void had to be dismissed. See paras E-F at 438.

\textsuperscript{161} See the Systems Act Sch 1 Item 5(3).

\textsuperscript{162} If more than one quarter of the councillors of a municipal council object to consent's being given to a councillor that has requested consent pertaining to an aspect where personal gain is involved, then such consent may be given to the councillor only with the approval of the MEC for local government in the specific province. See the Systems Act Sch 1 Item 6.
• shares and securities in any company
• membership of any close corporation
• interests in any trust
• directorships
• partnerships
• other financial interest in any business undertaking
• his/her employment and remuneration
• interest in property
• pension
• subsidies, grants and sponsorships by any organisation.

Apart from declaring the abovementioned interests, a councillor is also obligated to declare to the municipal manager any change in the nature or detail of his/her financial interests, in writing and on an annual basis. 163 Furthermore, a councillor must also declare all gifts received that are above a prescribed amount. 164

15.5.4 Undertaking of other paid work and the acceptance of rewards, gifts and favours

The code of conduct further determines that a full-time councillor may not undertake any other paid work except with the consent of the relevant municipal council. Such consent should not be withheld unreasonably. 165

No councillor may request, solicit or accept any reward, gift or favour for
• voting or not voting in a particular manner on any matter before the council or a

---

163 See the Systems Act Sch 1 Item 7(1) and (2). On close consideration of the various interests that must be declared, one can justifiably question whether such declaration is too extensive and whether it is indeed unnecessary. Keeping in mind the purpose of such declaration, it seems inevitable that after having been elected or appointed some councillors will be legally obligated to declare to the municipal manager certain personal or private interests that do not relate to his or her position as a councillor. To what extent these provisions may limit a councillor’s other rights, such as a right to personal privacy, is not absolutely certain and may well cause legal disputes in future. In an attempt to obviate some of these problems, the Systems Act determines that the municipal council must determine which of the financial interests mentioned above should be made public. Such determination must take into account the need for confidentiality of certain matters, as well as the importance of the public interest for disclosures.

164 The amount is not fixed by the Act but is prescribed by regulations. According to the Local Government: Municipal Systems Regulations as published under GNR 459 in GG 22328 of 25 May 2001, gifts received by a councillor must be declared where:
• the value of the gift exceeds R1 000, and
• the value of gifts received from a single source in any calendar year exceeds R1 000.

A declaration of gifts received by a councillor must also contain a description of such gift/gifts and must indicate the value and source of such gift/gifts.

165 See the Systems Act Sch 1 Item 8.
committee of the council
• persuading the council or any committee to exercise any power, function or duty in a certain regard
• making a representation to the council or any committee of the council
• disclosing privileged or confidential information.\(^{166}\)

15.5.5 The unauthorised disclosure of information, intervention in the administration of the municipality and aspects concerning council property

Without the permission of the municipal council or a committee, a councillor may not disclose any privileged or confidential information of the council or committee to any unauthorised person. For the purposes of this item, privileged or confidential information includes any information:
• determined by the municipal council or committee to be privileged or confidential
• discussed in closed session by the council or committee
• whose disclosure would violate a person’s right to privacy
• that is declared to be privileged, confidential or secret in terms of the law.\(^{167}\)

It is further also provided that, except if provided by law, no councillor may:\(^{168}\)
• interfere in the management or administration of any department of the council unless mandated by the council to do so
• give or purport to give any instruction to any employee of the council, except when authorised to do so
• obstruct or attempt to obstruct the implementation of any decision of the council or a committee by an employee of the municipality
• encourage or participate in any conduct which would cause or contribute to the mal-administration in the relevant council.

A councillor may also not use, take, acquire or benefit from any property or asset owned, controlled or managed by the municipality to which that councillor has no

\(^{166}\) See the Systems Act Sch 1 Item 9(a)-(d).
\(^{167}\) See the Systems Act Sch 1 Item 10(2)(a)-(d). It should be noted that according to Item 10(3) the prohibition of privileged or confidential information does not derogate from the right of any person to access to information in terms of national legislation. This item is really unnecessary, as it is obvious that such prohibitions must comply with the law of the state in general. Reference in this instance to national legislation is also incorrect and should rather refer to the protection given in terms of the provisions of the Constitution.
\(^{168}\) See the Systems Act Sch 1 Item 11.
right. Furthermore, no councillor may be in arrears to the municipality for rates and service charges for a period longer than three months.\textsuperscript{169}

15.5.6 Breaches of the code of conduct

According to item 13 of the code of conduct of councillors, if the chairperson of a municipal council, on reasonable suspicion, is of the opinion that a provision of the code has been breached, the chairperson must:

- authorise an investigation of the facts and circumstances of the alleged breach
- give the councillor concerned a reasonable opportunity to reply in writing regarding the alleged breach
- report back to a meeting of the municipal council after the requirements of the investigation and reply from the councillor have been complied with. Such report to the municipal council is open to the public, and the chairperson must report the outcome of the investigation to the MEC for local government in the province concerned.\textsuperscript{170}

Because of the serious consequences that can follow when the code has been breached, not only for the councillors of a municipal council but ultimately also for the principle of democracy, the chairperson of each municipal council must ensure that, when each councillor is taking office, he/she is given a copy of the code of conduct and also that a copy of the code is available in every room or place where the council meets.\textsuperscript{171}

It is further permitted for a municipal council to investigate and make a finding on any alleged breach of a provision of the code of conduct or to establish a special committee to investigate and make a finding on any alleged breach, and also to make appropriate recommendations to the relevant municipal council.\textsuperscript{172} If the council or special committee has found that a councillor has breached the code, the council may do any of the following:

- issue a formal warning to the councillor
- reprimand the councillor

\textsuperscript{169} Refer to the Systems Act Sch 1 Items 12 and 12A. Item 12A was inserted by Act 51 of 2002 s 45. In light of a councillor’s sufficient remuneration packages, there should be no acceptable reason why such a councillor is not up to date with his/her own municipal rates and taxes. Councillors have a duty to set an example in terms of punctual payment for services received.

\textsuperscript{170} See the Systems Act Item 13(1), (2) and (3).

\textsuperscript{171} See the Systems Act Item 13(4).

\textsuperscript{172} See the Systems Act Sch 1 Item 14(1)(a)-(b).
• request the MEC for local government in the province to suspend the councillor for a period
• fine the councillor or
• request the MEC to remove the councillor from office.  

Any councillor who has been warned, reprimanded or fined may appeal to the MEC in writing within 14 days of having been notified of the decision of the municipal council. The appeal should set out the reasons on which the appeal is based. If an appeal is lodged, a copy thereof must be provided to the council, which may in turn within 14 days of receipt of the appeal make any representation thereto to the MEC in writing.  

After having considered the appeal, the MEC may then confirm, vary or set aside the decision of the council and inform both parties of the outcome. The MEC may also appoint a person or a committee to investigate any alleged breach of the code and to make a recommendation on whether the councillor should be suspended or removed from office. Lastly, it is also provided that if the MEC is of the opinion that a councillor has breached a provision of the code and that such contravention warrants a suspension or removal, the MEC may
• suspend the councillor for a period and on conditions determined by the MEC or
• remove the councillor from office.

Any investigation or decision must be in accordance with the rules of natural justice and obviously also any other applicable laws. According to case law, nothing in item 13 or 14 permits an MEC to act *mero motu*, particularly in a case where the

---

173 Two aspects should be noted in this regard. First is that the municipal council must decide on an appropriate action against a councillor who has breached the code of conduct. The Act does not allow for the special committee to decide on an appropriate punishment. Secondly, it is only the MEC that can remove a councillor from office. The municipal council may only request such removal. See the Systems Act Sch 1 Item 14(2).

174 It should be of interest to note the decision in *Van der Merwe and others v Slabbert NO and Others* 1998 (3) SA 613 (N). In the case, which concerned allegations of breaches of the code of conduct for councillors promulgated under the LGTA, the court held that investigating bodies in code breach investigations do not necessarily need to apply the rules of natural justice during their investigations, depending on the circumstances. However, whenever a statute empowered a public official or body to do something or to give a decision which would affect an individual’s liberty, property or other existing rights, then the rules of natural justice come into play and the investigating body does not have an unfettered discretion to determine the procedure that should be followed. See at 624D-H.

175 The Systems Act Sch 1 Item 14(3) and (4). If the MEC appoints a one man or other committee to investigate a breach of the code of conduct, then the Commissions Act 8 of 1947 as amended, or where appropriate, applicable provincial legislation may be applied.

176 See the Systems Act Item 14(6)-(7).
municipal council has taken definite steps to investigate an alleged breach of the code of conduct. The MEC is obliged to await the outcome of the council’s own investigation and recommendation before he/she acts in terms of item 14(1) and (6). 177

15.5.7 Application of the code of conduct to traditional leaders
An important addition to the code of conduct is that most of the items also apply to a traditional leader who participates in or who has participated in the proceedings of a municipal council in terms of section 81 of the Municipal Structures Act. The code of conduct applies to traditional leaders in the same way as it applies to councillors. If a traditional leader has breached the code, the council may either issue a formal warning to him or request the MEC to suspend or cancel his right to participate in the proceedings of the council. It should be noted, however, that the suspension or cancellation of a traditional leader’s right to participate in the proceedings of a council does not affect that traditional leader’s right to address the council in terms of section 81(3) of the Municipal Structures Act. 178

15.6 The procedures regarding the election of municipal office-bearers
A specific procedure has been determined in Schedule 3 of Municipal Structures Act, which should be applied whenever a municipal council meets to elect a speaker, an executive mayor, a deputy executive mayor, a mayor or a deputy mayor. 179 In short, the procedure requires the presiding person at a meeting of the municipal council to call for the nomination of candidates. A nomination must be made on the form determined by the municipal manager and it must be signed by two members of the municipal council. All nominees must also indicate their acceptance of the relevant nomination by signing either the nomination form or any other form of written confirmation. 180

After the nominations have been called for, the person presiding at the meeting must announce the names of the persons who have been nominated as candidates. No debate on such nominations is permitted. If only one candidate is nominated, then the presiding person must declare that candidate elected. If there is more than one candidate, then a vote by secret ballot must be taken at the meeting. During

177 See Van Wyk v Uys No 2002 (5) SA 92 (C) at 99-100.
178 See the Systems Act Sch 1 Item 15(1)-(8).
179 See the Structures Act Sch 3 Item 1 as amended.
180 See the Structures Act Sch 3 Item 3. A nominee can thus accept his/her nomination through any form of written confirmation. Oral acceptance is not permitted, however.
such a vote each councillor present at the meeting may cast one vote, and the pre-
siding person must declare the candidate who has received a majority of the votes to
be elected.\footnote{See the Structures Act Sch 3 Items 4-6. Again, the Act seems to refer to a normal majority of votes that is needed to elect a nominee for a certain position. A normal majority does not refer to 50\% + 1 of the total number of councillors represented in the relevant municipal council.}

A specific elimination procedure is provided for if no candidate has received a ma-
jority of the votes. In such a case the candidate who has received the lowest number
of votes must be eliminated from the procedure and a further vote taken on the re-
mainding candidates in accordance with item 6 of the schedule. Such an elimination
procedure must be repeated until a candidate receives a majority of votes for the
position nominated.\footnote{If two or more candidates have each received the lowest number of votes during the taking of a vote, then a separate vote must be taken on those candidates alone, and should be repeated as often as may be necessary to determine which candidate is to be eliminated. See the Structures Act Sch 3 Item 7(2).}

If only two candidates are nominated or remain after an elimination procedure and
those two candidates receive the same number of votes during an election to decide
between them, then a further meeting must be held within seven days, at a time
determined by the presiding person. The same procedure mentioned above is to be
applied during the follow-up meeting as if it were the first meeting for the election of a
specific position. If at this further meeting only two candidates are nominated or
remain after an elimination procedure and the two candidates receive the same
number of votes, then the presiding person must determine by lot who of the two
candidates will hold the office for which the election has taken place.\footnote{The purpose of the first postponement is to give the councillors a chance to re-think their votes and to determine the issue afresh. If the same result is obtained, the presiding person must determine the outcome by lot. A determination by lot is generally understood to mean the two names will be put in a hat and the presiding person will at random select one name from the hat, which person will then be elected to hold office in the specific position. Determination by lot can also be conducted by flipping a coin.}

15.7 Conclusion

It is submitted that the new legal framework that has been enacted to regulate and
control the internal functioning and procedures of all municipal councils has estab-
lished a firm foundation for municipalities to conduct their affairs and fulfil their obli-
gations and functions properly. Similar to the position in a private company or
business, no municipality will be in a position to fulfil its overall constitutional duties
effectively and sufficiently without strict internal control and management. Local
governments are not private companies or business institutions per se, however, and their functioning is often complicated with policy considerations and political objectives. In this regard it is important for all municipalities that a balanced approach between political idealism and private realism is achieved. Again, strong emphasis should be placed on the main reasons for local government’s existence and their constitutional objectives. All internal structures and procedures must be directed at ensuring compliance with the predetermined constitutional duties and obligations. This writer is of the opinion that the new legal framework regarding the internal structures and functioning of municipal councils can indeed succeed in ensuring that municipal duties and obligations are met. Such success is dependant on the proper and unbiased enforcement of all the newly enacted legal rules, however.
Municipal services and service delivery and the basic functional activities of municipal governments

16.1 Introduction

In their capacity as the third and lowest sphere of government and the one that functions closest to local communities, municipal governments have often been described as comprising the sphere of government that is tasked mainly with the development and provision of services to communities. Some writers have even commented that if a municipality cannot or does not perform its service provision obligations, it should forfeit its right to exist.¹ This idealism is strongly entrenched in the new constitutional framework that has been devised for local government.²

Although all municipalities have been constitutionally tasked with providing sustainable and effective services, such a realisation is not as easy as it may seem. There are many different aspects that must integrate with one another before a municipality will be able to succeed in this mammoth task. One should therefore look not only at the different services that should be provided by local governments but also to the various obstacles and problems to their to fulfilling their mandate. Factors that influence services and service delivery change drastically from one municipal term to the next, and continuous and long term planning is of the order of the day.³

---

² According to the Constitution s 152(b), one of the main objectives of local government is to ensure the provision of services to communities in a sustainable manner. The provision of services is thus a cardinal function, if not the most important function, of every municipal government.
³ New demands on services and service provisions are especially relevant in many formerly underdeveloped areas and also in areas where drastic urbanisation is taking place. Without proper planning, future service delivery objectives will most definitely be jeopardised.
16.2 The new vision of local government service delivery

16.2.1 Assessing basic needs

It has been mentioned above that local government administrations have been undergoing radical changes under the new constitutional dispensation of South Africa. Unfortunately many of such changes have not been driven by clear and precise visions of the role and responsibilities that all municipalities should play. A practice that was introduced during the process of amalgamating and restructuring municipal administrations and which was subsequently proceeded with in the new local government system was to adopt and extent the structures and functioning of the former established municipal administrations without significant changes.\(^4\)

On the contrary, it must be said that many municipalities indeed used the amalgamation process to initiate processes of review of their administrative organisation. This is how many innovative approaches to especially strategic management procedures were introduced, for example. Such approaches focussed mainly on technical problems, however, and little attention was given to rethinking the basic principles on which the administrations were organised. For the transformation and new local government system to be successful, a process of administrative reorganisation is required. This is particularly essential if all municipalities are to achieve the new constitutional obligations.\(^5\) In order to enhance service delivery, almost all municipalities have wide-ranging options. Most prominent, however, is the need to assess and plan strategically for the most appropriate and effective forms of service delivery mechanisms within each particular municipal area. Municipal administrations must choose those delivery options that would ensure maximum benefit and efficiency.

16.2.2 Basic principles and approaches on service delivery

In order to achieve optimal service delivery, each municipal government should choose a delivery system that is best suited to the type of municipality concerned and after taking into account all the special needs of the local communities. When municipalities are deciding on the particular delivery options for their areas, they

---

\(^4\) In order to minimise administrative disruption, minimal changes were made to many municipality’s organisational structures. This aspect was, and still is, not absolutely favoured by the ruling government, as it perceives the old structures as ineffective and disruptive to the new local government vision. See the White Paper on Local Government (1998) at 111.

\(^5\) Again, emphasis should be placed on the fact that the central mandate of local government is to develop a service delivery capacity in order to meet the basic needs of all South African commu-
should be guided by certain basic principles. The principles can be summarised as follows:

- **Accessibility** All communities should have access to at least a minimum level of services. This is not a goal, but a constitutional obligation. The many imbalances that still exist regarding equal access to services should be addressed through the development of new infrastructure and the rehabilitation and upgrading of existing infrastructure.

- **Simplicity** Municipal services should not only be accessible, they should also be easy and convenient to use. In this regard it is of special importance that municipalities should aim to ensure that people with disabilities or that are illiterate should be able to access and use municipal services with ease.

- **Affordability** It is a given that many services remain unaffordable for many South African residents. In order to enhance quality of life, municipalities should strive to make services as affordable as possible. This is not an easy task, as many factors have an impact on the prizing of services.

- **Quality** Services should not be rendered below a certain determined quality. In this regard, services should be suitable for their purpose, should be timeously provided, should be safe and should be accessible on a continuous basis. Service users will not pay and support their municipal service providers promptly if services are sub-standard and of a poor quality. Not only the services themselves but also back up maintenance and support should comply with the minimum quality standard.

- **Accountability** The new South African state, which includes local governments, is founded on, inter alia, the values of a democratic government, which includes principles of accountability and responsiveness. Whenever a delivery system is adopted by a particular municipal government, therefore, it remains the responsi-
bility of that municipality to be accountable for all its activities, which includes the assurance of service provision of an acceptable quality.

- **Integration** All municipalities should adopt an integrated approach to planning and ensuring municipal service provision. The integration of municipal services requires specifically that each municipality take into account the economic and social impact of service provision in relation to overall municipal policy objectives such as poverty eradication and job creation.

- **Sustainability** The provision of services to local communities in a sustainable manner is also a constitutional imperative for all municipal governments. In light of this constitutional requirement, service provision is an ongoing process. However, ongoing service provision depends on municipal institutions that are properly managed both financially and administratively.

- **Value for money** Municipal services should account for value for money. Municipalities should strive to provide not only sustainable services but services that provide value for money for all services users. In this respect, value for money and affordability goes hand in hand.

- **Promotion of competitiveness** All municipalities should take cognisance of the fact that job generation and the competitive nature of local commerce and industry could be adversely affected by imposing higher rates and service charges on such industries in order to subsidise domestic users. Such practices could have a negative impact on local economic development, as many potential investors or businesses could be scared or lured away to other jurisdictions. In this regard, sufficient transparency is needed to ensure that all investors are aware of the costs of doing business in a particular local area.

- **Promotion of the new constitutional values** Lastly, it is not only a legal prerequisite for all municipalities to comply and adhere to the new constitutional values and requirements, it is also an essential recipe for all local governments to achieve optimal sufficiency and support. Municipal administrations must therefore fulfil and promote the democratic and other administrative values and principles that are enshrined in the Constitution.

---

8 See the Constitution s 1(d).

9 Refer to the Constitution s 152(1)(b).
After the abovementioned criteria have been taken into account, a municipality should be in a good position to determine which service delivery options would be best for its particular area of jurisdiction. In appropriate circumstances, a special mixture of different delivery options can be implemented. Apart from the delivery option or options, most municipalities can further enhance service delivery through the implementation of specific delivery mechanisms. Such mechanisms include the following:

- **Building on existing capacity** It is a known fact that municipal governments throughout South Africa have different levels of administrative capacity. Many municipalities have however a sound existing infrastructure and established municipal capacity. Without ignoring new initiatives, it is very important for all municipal governments to build on their already existing capacity and potential. Reinvention of the wheel so to speak will only result in poor service delivery and unnecessary expenditure. Not all existing capacities are however suitable for expansion. In many instances drastic reform measures should be introduced as a matter of urgency. Such measures could include the introduction of performance-based contracts for senior staff members, the development of new codes of conduct, the implementation of reform policies such as affirmative action programmes, training and empowering the skills of frontline workers to interact with the communities, the decentralisation of operational management responsibilities and, lastly, the development of new strategies through consultation and communication.

- **Corporatisation** In essence the term corporatisation refers to the separation of service delivery units from the specific municipal council. This in turn should enable a council to determine specific policy goals and to set service standards to which corporate units can be held responsible. Corporatisation also offers greater autonomy and flexibility to the management of the different service units which could allow for commercial management practices to be introduced.

- **Establishment of public-public partnerships** The establishment of public-public partnerships or so-called public joint ventures can allow for horizontal co-operation between municipalities. Such partnerships are often common in other countries.

---

11 Corporatisation can take a number of forms, from public institutions such as Water Boards or Town Planning Boards to joint ventures between municipalities. Corporatisation is of particular value in large municipal jurisdictions.
especially in areas such as joint purchasing, training initiatives and technical support.\footnote{12} Within the new local government scheme of South Africa, municipalities should begin to explore these innovative partnership agreements with other state institutions or parastatals such as the Post Office for the collection of municipal revenue. Obvious benefits can be derived from such partnerships, not only for the municipalities concerned, but also for the benefit of local residents.

- **Establishment of partnerships with community-based organisations and non-governmental organisations** Partnerships with community-based organisations (CBOs) and non-governmental organisations (NGOs) can be very effective in involving local communities and also to stimulate local economic development. Often such organisations have particular skills that could enhance and facilitate new development initiatives and serve as an effective intermediary in local initiatives. In the new area of local government development, municipalities should consider involving CBOs and NGOs in partnerships with other public or private institutions. Even so-called three-way-partnerships between a public, a private and a CBO/NGO can be very effective.\footnote{13}

- **Public-private partnerships** Municipalities should also explore the possibilities of entering into partnerships with local businesses. Apart from stimulating the local economy, such partnerships should also ensure effective services and less financial expenditure for the local authority.

- **Out sourcing/out contracting** For many years already, many municipalities have benefited from the practice to contract certain services out to specialist private companies. Such specialist companies can often provide such services more effectively than in-house municipal departments can. It is however important for municipalities that when services are contracted out the municipality should protect and ensure minimum standards, contract specifications and an overall control and monitoring capacity. The modern trend in local government seems to be that services are outsourced by way of tender procedures and not by subjective unilateral decision making, or even auction procedures. During a tender process, the lowest

\footnote{12} Refer to the White Paper on Local Government (1998) at 117.

\footnote{13} In such a partnership a municipality can, eg, provide funding for a project, a private contractor can provide skills and equipment, whilst a CBO can facilitate the recruitment and management of local labour and community support. The advantage of such a partnership is that skills are effectively transferred, employment is created and effective services are provided without exhausting municipal capacity.
bidder is not always the best contractor. Various factors such as the financial standing of the contractor, the inclusion of local labour and technical capacity and quality control should be taken into account. Municipalities must ensure that all legal requirements are adhered to in this regard. Contracting out should be most effective when municipalities are clear about the services they are seeking from a private contractor, and when they have the capacity to manage the tender process and monitor the rendering of the services to ensure that municipal objectives are met.

- **Leases and concessions** A further approach to service delivery is the conclusion of either lease or concession agreements. Such agreements are forms of public-private partnerships that are most common for services where large-scale capital investment is required. The agreements are characterised by an often long contractual period extending over many years, a contractor that is required to take charge of the assets and infrastructure associated with the service for the duration of the contract, which requires substantial investment from the contractor’s side. Because the contractor is taking on more risk, it normally demands the transfer of the responsibility for revenue collection in order to minimise financial losses. The long contract period is usually long enough to allow the contractor to recover its initial investment through the revenue that is generated from the provision of the services. In almost all instances the contractor will require ownership of the assets for the duration of the contract period. When the contract lapses, ownership and infrastructure is then transferred to the municipality.\(^\text{14}\) Lease and concession agreements can be concluded in various formats. There are so-called build-operate-transfer (BOT) agreements, where a contractor builds an asset, operates it for a period of time and then transfers it to a municipality. Then there is the build-own-operate-transfer (BOOT) agreement, which further gives ownership of

\(^{14}\) Although this form of service provision is not entirely new to government institutions, it has only recently started to take effect. A good example of such a partnership is the partnership between the department of correctional services and private institutions to build and manage new correctional facilities. The private companies have agreed and contracted with government to build new prisons, which they will then manage for a certain period in lieu of payment for such services. After the contract period has lapsed, the prison and other assets will fall back on the government. There are many areas in local government service provision, where such partnerships can be very effective. One such example is the possible upgrading and management of old power stations in municipal areas. Private companies can reinvest in such stations and then sell the electricity to the local municipality. After a certain period, the power station and new infrastructure will again be owned by the municipality, to utilise to the benefit of its local communities.
the assets or infrastructure to the contractor for the length of the contract period. Lastly, there is also a build-operate-train-transfer (BOTT) variation which specifically provides for training for municipal employees during the contract period, which will then operate and manage the facilities and services, after the contract period has come to an end. Apart from the obvious benefits of such partnerships, there are high financial risks if such partnerships are managed or structured poorly. To avoid such negative possibilities, national government has put forward certain regulatory requirements to ensure public accountability and consumer protection. Some of these requirements will be discussed elsewhere in this chapter.

- **Privatisation/transfer of ownership** The last procedure to enhance service delivery refers to the transfer of ownership from municipalities to private or community-based entities. The transfer of ownership in this respect particularly refers to the sale of municipal assets, together with the transfer of responsibilities for the management of such services. Such a process is more generally referred to as privatisation. Although privatisation should not easily be considered with reference to primary/core municipal services such as water, electricity and solid waste disposal, it certainly could have positive outcomes in respect of secondary services such as municipal maintenance, parks and recreation and even refuse removal services.\(^\text{15}\) All in all, the privatisation of non-core assets can boost municipal capacity and revenue in order for municipalities to focus on the delivery of strategic and core municipal services. Although there seems to be no clear consensus on which municipal services should be regarded as core or non-core services, national guidelines provide more clarity in this respect. It is, however, the final responsibility of each municipal council to make its own assessments in relation to what services are core services and what are not. In this regard, municipalities should be guided by the strategic policies put forward in each municipally integrated development plan.

\(^{15}\) With special emphasis on the central role that municipalities are constitutionally obligated to play in meeting the material, social and economic needs of communities, it is undesirable that ownership of core infrastructure and assets is removed from the municipal/public sphere.
16.2.3 *Some basic administrative capacities that will enhance municipal development*

In order to play and ensure a developmental role effectively and to improve performance in respect of service delivery, all municipalities will need to develop at least the following capacities:

- Municipalities will have to become more strategic in their orientation. They should be open and flexible to new or unforeseen demands.
- They will have to maximise integrated capacity, both inside and outside the municipal jurisdiction.\(^{16}\)
- They will have to become much more community orientated.

Municipal councils need to develop mechanisms to interact with community groups and to identify service needs and priorities. Without the capacity to strategise, integrate and interface with non-municipal groups, many local governments are unlikely to be sustainable in the future. The implementation of new strategies and policies requires a strong municipal leadership, with the necessary support and belief of the municipal council. Continuous communication between all role players and regular oversight and training should be provided.\(^{17}\)

Suffice it to say that the approaches to improving service delivery efficiency and quality, which build on existing capacity, are more likely to succeed if they are structured as a partnership between council, management, labour and the community. Although labour protects particular interests, such interests should not prevent effective service delivery to communities. In this respect the South African Local Government Bargaining Council (SALGBC) will play a critical role in achieving new service delivery standards and development objectives. The SALGBC will have to look specifically at new measures to ensure more flexibility in the retraining and redeployment of municipal staff, the introduction of a more customer- and performance-orientated service system and the improvement of accountability and commitment to delivery within municipal administrations. Finally, one should remember that it is

---

\(^{16}\) The vertical integration of national and provincial programmes with municipal administrative systems may be a particularly effective way for rural municipalities to build their administrative capacity.

\(^{17}\) It should be noted that the training of municipal councillors falls under SALGA, which in turn should ensure that an intensive councillor training programme is provided for after every election of new municipal councillors. See the White Paper on Local Government (1998) at 125.
ultimately the responsibility of national and provincial governments to monitor and oversee the effective performance by municipalities of their functions.  

16.3 The new legislative requirements regarding municipal services and service provision

16.3.1 The constitutional legal basis

According to the new constitutional framework, all municipalities are obligated to provide certain services and to achieve certain objectives. In this regard there is a strong relationship between the functions that municipalities should fulfil and the services and objectives that they should achieve and provide. It is interesting to note that the Constitution itself does not go into much detail regarding all the services that a modern municipal government should provide. The Constitution merely states that all municipalities must strive, within their financial and administrative capacities, to achieve the objectives of:

- a democratic and accountable government
- the provision of services in a sustainable manner
- social and economic development
- safe and healthy environments
- community involvement in local government matters.

The Constitution also mandates all municipalities to structure and manage their administrations, budgets and planning processes to give priority to the basic needs of their communities and to promote social and economic development. What the basic needs of communities are is not altogether certain. Some core/basic needs are universal, however, and should take centre stage in any municipal service provision planning. Such basic services would normally include water and electricity provision, as well as solid waste disposal and general municipal infrastructure. These services must be provided in an equitable and sustainable manner. The Constitution again does not provide more guidance regarding specific services that should be rendered.

---

18 See again the Constitution ss 154(1) and 155(6).
19 Refer again to the Constitution s 152(1)(a)-(e). It is self evident that without the necessary financial and administrative capacity the mentioned objectives will not be achieved. Various strategic programmes and initiatives should be implemented in order to enhance both financial and administrative capacities.
20 See the Constitution s 153(a)-(b).
21 In terms of s 155(4) of the Constitution, national legislation must take into account the need of municipalities to provide municipal services in an equitable and sustainable manner.
Apart from the fact that municipalities are obligated to provide certain core services to their residents, a municipality must be legally authorised to provide such a service or to impose fees or tariffs for such services. Without legal authorisation, a municipal government will not be entitled to render particular services or to impose fees for such services.\textsuperscript{22}

In an effort to further enhance the achievement and fulfilment of their obligations towards service provision, the Constitution requires provincial governments to establish municipalities in a manner that will promote the development of local government capacity in each province so as to enable municipalities to perform their functions and manage their own affairs.\textsuperscript{23} Only time will tell if the different types of municipality that have been established under provincial authorisation will indeed promote the development capacities as is required. On this point, it is also important to mention that both national and provincial governments, through their legislative and executive powers, should see to the effective performance by a municipality of its functions in relation to the matters listed in Schedules 4 and 5 of the Constitution.\textsuperscript{24} Furthermore, a municipality, in the effective performance of its functions, has the right to exercise any power concerning a matter that is reasonably necessary for or incidental to the performance of its normal functions.\textsuperscript{25} In this respect one should remember that it is the municipal council itself that makes decisions concerning the exercise of powers

\textsuperscript{22} See, eg, the case of \textit{Kajee v Stanger Borough Town Council} 1994 (3) SA 9 (A). In this case the appellant’s property was situated outside the municipal area and not connected to the respondent’s electricity system. The respondent’s main electricity cable, however, passed within 23 metres of appellant’s property; accordingly, the respondent alleged, the appellant was liable in terms of the Local Authorities Ordinance 25 of 1974 (N) s 266(1)(f), which provides that the town council can make by-laws prescribing, \textit{inter alia}, “an availability electricity charge in respect of properties … which are not connected to the council’s electricity scheme if such properties can reasonably be so connected”. These charges were purportedly fixed and levied in terms of two municipal notices promulgated by a resolution of the council. However, on appeal the respondent was unable to produce a by-law authorising the council to impose such charges, but referred instead to s 268 of the ordinance (as it existed prior to its amendment in 1985), which, after dealing with the procedure to be followed for the making of valid by-laws, provided in ss (4) that “notwithstanding anything in s 266 contained, the council shall impose fees and frame tariffs of charges only by resolution”. The court held that before the council could impose fees or frame tariffs if had to be properly empowered to do so. Because no valid by-law had been passed, the municipality had no power to prescribe or recover the particular tariff. See paras C-D at 14.

\textsuperscript{23} See the Constitution s 155(6)(b). This establishment took place during the 2000 local government elections and with the beginning of the final phase of the restructuring process.

\textsuperscript{24} See the Constitution s 155(7).

\textsuperscript{25} This aspect is confirmed in the Constitution s 156(5).
and the performance of all functions of a municipality and also employing the necessary personnel to perform its functions effectively.\textsuperscript{26}

In light of the abovementioned, it seems acceptable to argue that the constitutional drafters did not want to address extensively all the various legal aspects and specific services that municipalities in the new legal scheme have to comply with. Basically they left it open for parliament to address these issues in more detail and with more certainty, and created only a broad framework wherein such services had to be identified and sufficiently provided for. In this respect the Municipal Systems Act contains numerous legal requirements relating to municipal service provision and fulfilment.

\textbf{16.3.2 General provisions regarding municipal services according to national legislation}

\textbf{16.3.2.1 The general duty on municipalities in respect of municipal services and basic aspects concerning service tariffs}

In compliance with the basic constitutional provisions and requirements in respect of municipal service provision, the Local Government: Municipal Systems Act\textsuperscript{27} determines specific duties and requirements for all municipalities, which must be complied with. As a general duty, a (or all) municipality must give effect to the provisions of the Constitution and must:

- give priority to the basic needs of the local community
- promote the development of the local community
- ensure that all members of the local community have access to at least the minimum level of basic municipal services.\textsuperscript{28}

\textsuperscript{26} The Constitution S 160(1)(a) and (d).
\textsuperscript{27} 32 of 2000 as amended.
\textsuperscript{28} See the Systems Act s 73. According to s 1 of the Act, the term “basic municipal services” is defined to mean a municipal service that is necessary to ensure an acceptable and reasonable quality of life and that, if not provided, would endanger public health or safety or the environment. Although the definition provides some guidance, an exact determination of what should be regarded as a basic municipal service is very open ended and will have to be determined on a case-to-case basis and after consideration of all relevant circumstances. See the case of \textit{Manqele v Durban TMC 2002 (6) SA 423 (D)}. The Water Services Act 108 of 1997 s 2(a) sets out that one of the main objectives of the Act is to provide for “the right of access to basic water supply and the right to basic sanitation necessary to secure sufficient water and an environment not harmful to human health or well-being”. In terms of the Act s 3 everyone has “a right of access to basic water supply and basic sanitation”, and every water service institution must take reasonable measures to realise these rights. In terms of the definitions in the Act s 1, “basic water supply” means the “prescribed minimum standard of water supply services necessary for the reliable supply of a sufficient quantity and quality of water to households, including informal households, to support life and personal hygiene”, whilst “prescribe” itself means “prescribe by regulation”. In the absence of regulations defining the extent of the right of access to a basic water supply, the court has no guidance from the legislature continued on next page
Municipal services must be:
• equitable and accessible
• provided in a manner that is conducive to prudent, economic, efficient and effective use of available resources and the improvement of standards of quality over time
• financially sustainable
• environmentally sustainable
• regularly reviewed with a view to upgrading, extension and improvement.

The Act is unfortunately silent on ways or mechanisms whereby municipalities are to achieve and adhere to the mentioned requirements. It seems that the main initiatives in this regard should come from individual municipalities themselves. All municipal councils should therefore take full cognisance of the listed requirements and put policies and programmes in place in order that they do not fall foul of the broad and more specific legal obligations. It is also submitted, however, that national and provincial governments should do more to assist and support municipalities in comply-

or the executive to enable it to interpret the content of the right to basic water supply embodied in the Act s 3. The applicant approached a Local Division after the discontinuation by the respondent of the water supply to the premises she occupied together with four of her own children and three other children, as a result of non-payment of the applicant’s water account. The relief sought was predicated on the existence of the applicant’s “right” to a basic water supply as referred to in the Act s 3. The court held that, in the absence of prescription of the minimum standard of water supply services necessary to constitute a basic water supply, the interpretation that the applicant wanted the court to place on the Act s 3 required it to pronounce upon and enforce upon the respondent, a local authority, the quantity of water that the applicant was entitled to have access to, the quality of such water and acceptable parameters for “access” to such basic water supply. Those were policy matters which fell outside the purview of the court’s role and function and were inextricably linked to the availability of resources. See also Highveldridge Residents Concerned Party v Highveldridge TLC 2002 (6) SA 66 (T), where the court held inter alia that the attitude adopted by the respondents in their answering affidavits reflected a certain contempt for the plight of the people whose water supply had been cut off; a degree of unwillingness to co-operate that was unacceptable on the part of an organ of state.

29 See the Systems Act s 73(2)(a)-(e).

30 It is interesting to note that according to recent case law it was stated that there is no language anywhere in the Act which expressly requires one to confine the ordinary meaning of the wide expression “municipal services”, where it appears in the Act, to municipal services which are charged for or which are notionally capable of being charged for and which have identifiable users. It cannot be accepted that throughout the whole of the Act any reference to municipal services must be taken to be confined to services which are chargeable to individual users. See SAMWU v City of Cape Town 2004 (1) SA 548 (SCA) para 8 at 550.
ing with their general service delivery duties. This can be achieved through the en-
actment of more detailed legislative or even executive guidelines. 31

Apart from the basic duties and requirements on local governments in respect of
municipal services, the Systems Act further determines that all municipal councils
must adopt and implement a tariff policy on the levying of fees for municipal services
that are provided by the municipality itself or by way of service delivery agreements.
Such a tariff policy must then comply with the provisions of the Systems Act, the
MFMA, as well as with any other applicable legislation. 32 The Act then determines
that the mentioned tariff policy must reflect at least a certain minimum principles.
These minimum requirements are the following: 33

(a) users of municipal services should be treated equitably in the application of
tariffs;
(b) the amount individual users pay for services should generally be in proportion
to their use of that service;
(c) poor households must have access to at least basic services. This can be
achieved through tariffs that cover only operating and maintenance costs, by
introducing special tariffs or life line tariffs for low levels of use or consumption
or for basic levels of service, or by any other direct or indirect method of sub-
sidisation of tariffs;
(d) the tariff policy must reflect the costs reasonably associate with rendering the
service, including capital, operating, maintenance, administration and re-
placement costs, and also interest charges;
(e) tariffs must be set at levels that facilitate the financial sustainability of the ser-
vice, taking into account the subsidisation from sources other than the particu-
lar service concerned;
(f) provision may be made in appropriate circumstances for a surcharge on the
tariff for a particular service;

31 In this regard, emphasis should again be placed on the constitutional obligations placed on
national or provincial governments as set out in the Constitution ss 151(3) and (4), 154(1), 155(4),
(6)(b) and (7). Even if such provisions are viewed to be inadequate, then s 164 should be helpful,
which determines that any matter concerning local government that has not been dealt with in the
Constitution may be prescribed by national legislation or by provincial legislation within the frame-
work of national legislation.
32 See the Systems Act s 74(1) as substituted by Act 44 of 2003 s 10.
33 See the Systems Act s 74(2)(a)-(l).
(g) provision may be made for the promotion of local economic development through special tariffs for certain categories of commercial and industrial users;

(h) the policy must also encourage the economical, efficient and effective use of resources, the recycling of waste and other appropriate environmental objectives to be achieved;

(i) the policy should also fully disclose the extent of subsidisation of tariffs for poor households and other categories of users.34

Apart from the basic tariff policy principles mentioned above, special cognisance should be taken of the fact that a tariff policy may lawfully differentiate between various categories of service user, debtor, service provider, service, service standard, geographical area and other matter, as long as such differentiation does not amount to unfair discrimination.35

When the tariff policy has been finalised, a municipal council must adopt by-laws to give effect to the implementation and enforcement of such a tariff policy. Again, such by-laws may differentiate between different categories of user, debtor, service provider, service, service standard and geographical area as long as such differentiation does not amount to unfair discrimination.36

Apart from the tariff policy, municipalities are afforded a general power to levy and recover fees, charges and tariffs. Accordingly, the Systems Act determines that a municipality may

• levy and recover fees, charges or tariffs in respect of any function or service of the municipality

34 It is submitted that this provision should have the positive support of the tariff policy in general. Many South African citizens do accept that there are enormous gaps between average households and very poor households, which in turn requires special measures in order to provide basic life-supporting services to such households. However, when municipalities are not clear and transparent about their policies and reasons for special measures to support such poor households, many other service users can feel that they are not being treated equally and fairly, and thus they object and do not support such initiatives.

35 See the Systems Act s 74(3). This reasoning seems in line with the general principle of the rule of law which requires a legitimate governmental purpose to exist if people are treated differently as well as direct provisions set out in the Constitution. The Bill of Rights s 9 allows for the unequal treatment of people in certain circumstances. Such treatment would be constitutionally sanctioned and would not be unjustifiable and unreasonable in terms of the Constitution s 36. However, care must be taken not to exceed the constitutional provisions and thus allow for unconstitutional policies or conduct. When the provisions of the Constitution are breached, such conduct or actions would be invalid. Refer to the Constitution s 2.

36 See the Systems Act s 75.
• recover collection charges and interest on any outstanding amount.

The mentioned fees, charges and tariffs are levied by a municipality by resolution passed by the municipal council with a supporting vote of a majority of its members.\footnote{See the Systems Act s 75A(1) and (2). It is submitted that the section refers to an absolute majority of 50% + 1 of the total number of members of the relevant municipal council.} After such a resolution has been passed, the municipal manager must do the following without delay:

• Conspicuously display a copy of the resolution for a period of at least 30 days at the main administrative office of the municipality and at such other places within the municipality to which the public has access. Such other places may be determined by the municipal manager.

• Publish in a newspaper of general circulation in the municipal jurisdiction a notice stating that a resolution in respect of fees, charges or tariffs has been passed by the municipal council and that a copy thereof is available for public inspection during office hours at the main administrative office of the municipality and at other places specified in the notice. The notice must also indicate the date on which the determination will come into operation.

• Seek to convey the information of the notice to the local community by means of radio broadcasts covering the area of municipal jurisdiction.\footnote{Refer to the Systems Act s 75A(3)(c).} As soon as the notice of any fees, charges or tariffs has been published in a newspaper, the municipal manager must forthwith send a copy of the notice to the MEC for local government in the province concerned.\footnote{The Systems Act s 75A(4).}

\subsection*{16.3.2.2 National legislative requirements regarding the provisions of municipal services}

According to the new national legislative framework for local government, a municipality may provide a municipal service in its area or a part of its area. Such a service or services may be provided through an internal mechanism or external mechanism.

\textit{Internal mechanisms} include

• a department or other administrative unit within the municipal administration

• any business unit devised by the municipality, provided that such a unit operates within the municipality’s administration and under the control of the municipal council in accordance with its operational and performance criteria
On the other hand, an *external mechanism* refers to a service delivery agreement that has been entered into between a municipality and any of the following institutions:

- a municipal entity
- another municipality
- an organ of state, including a water services committee established in terms of the Water Services Act of 1997, a traditional authority or any other registered service provider registered or recognised in terms of national legislation
- a CBO or NGO that are legally competent to enter into such an agreement
- any other institution, entity or person legally competent to operate a business activity.

It is striking and rather unfortunate that the Act does not require the partners in an external service delivery agreement to be competent and able to provide the municipal service relevant to the contract. It is therefore left to a municipality itself to determine if a party to a service delivery agreement is indeed competent to provide a specific municipal service in the municipal area or a part thereof. Municipalities are therefore obligated to review or decide on an appropriate mechanism to provide a municipal service. In cases of a service provision which is provided through an internal mechanism, municipalities must review or decide on an appropriate service provision mechanism when:

- an existing municipal service is to be significantly upgraded, extended or improved
- a performance evaluation requires a review of the existing mechanism
- the municipality is restructured or re-organised in terms of the Municipal Structures Act.\(^{41}\)

When a municipal service is provided through an external mechanism, a municipality must review or decide on an appropriate mechanism to provide a particular service when:

- a performance evaluation requires a review of the particular service delivery agreement\(^{42}\)

---

\(^{40}\) See the Systems Act s 76(a)(i)-(iii).

\(^{41}\) See the Systems Act s 77(a)(i)-(iii).

\(^{42}\) In order to determine if such a performance evaluation is required, refer to the Systems Act ch 6.
the service delivery agreement is anticipated to expire or be terminated within the next 12 months or
an existing municipal service or part thereof is to be significantly upgraded, extended or improved and such an event is not addressed in the relevant service delivery agreement.43

A municipality must also review and decide on an appropriate mechanism in order to provide a municipal service when a review of such a service is required by an intervention in terms of section 139 of the Constitution. The same obligation is required when a new municipal service is to be provided or when the local community has requested such review or when a review of the municipalities IDP also requires a review of the delivery mechanisms regarding a service or services.44

Apart from the obligation placed on municipalities to review and decide on mechanisms to provide municipal services, certain criteria and processes for deciding on such mechanisms have been statutorily provided for. Accordingly, when a municipality has decided on a particular mechanism to provide a municipal service or to review any existing mechanism, it must first assess five particular criteria. These criteria are the following:45

- The direct and indirect costs and benefits associated with the project if the service is provided by the municipality through an internal mechanism. Part of this assessment must also include the expected effect the mechanism could have on the environment, on human health and well-being, as well as safety.
- The municipality’s capacity and potential future capacity to furnish the skills, expertise and resources that are necessary or will become necessary for the provision of the service through an internal mechanism.
- The extent to which the re-organisation of the municipality’s administration and the development of the human resource capacity within that administration could be utilised to provide a service through an internal mechanism.
- The likely impact the decision could have on aspects such as development, job creation and employment patterns in the municipality.
- The views of organised labour.

43 See the Systems Act s 77(b)(i)-(iii).
44 See the Systems Act s 77(c)-(f). The procedure for review on request by the local community is determined in terms of the Act ch 14.
45 See the Systems Act s 78(1)(a)(i)-(v).
It is important to note that all of the abovementioned aspects must be assessed. After thorough assessment has taken place a municipality may also take into account any developing trends that are generally applicable to the sustainable provision of municipal services. After the abovementioned criteria have been applied, a municipality may decide on an appropriate internal mechanism to provide the service or, before it takes a decision on an appropriate mechanism, explore the possibility of providing such a service through an external mechanism. If it decides to explore an external mechanism, the municipality must give notice to the local community of its intention to explore the provision of the service through an external mechanism and must also assess the various delivery options as are mentioned in section 76(b) of the Systems Act. When assessing such options, the municipality must take into account similar criteria, as would be the case under section 78(1)(a) of the Systems Act. The municipality must also conduct or commission a feasibility study which must be taken into account before a final decision is taken. The feasibility study must include the following:

- a clear identification of the municipal service for which the municipality intends to consider an external mechanism
- an indication of the number of years for which the provision of the service through an external mechanism might be considered
- the projected outputs which the provision of the service might be expected to produce
- an assessment as to the extent to which the provision of the service will provide value for money, address the needs of the poor, be affordable for the municipality and residents and impact of the transfer of appropriate technical, operational and financial risk
- the projected impact on the municipality's staff, assets and liabilities
- the projected impact on the municipality's integrated development plan

---

46 Refer to the Systems Act s 78(1)(b).
47 See the Systems Act s 78(2) and (3). The mentioned criteria are: (i) the direct and indirect costs and benefits associated with the project, including the expected effect of any service delivery mechanism on the environment and on human health, well-being and safety; (ii) the capacity and potential future capacity of prospective service providers to furnish the skills, expertise and resources necessary for the provision of the service; (iii) the views of the local community; (iv) the likely impact on development and employment patterns in the municipality; and (v) the view of organised labour.
48 See s 78(3)(c)(i)-(viii) of the Systems Act.
• the projected impact on the municipality’s budget including impacts on revenue, expenditure, borrowing, debt and tariffs
• any other matter that may be prescribed.

After having applied and assessed the mentioned criteria, a municipality must decide on an appropriate internal or external mechanism that would ultimately result in or achieve the best outcome.49

On the question of whether a municipality is obligated to assess or take into account the views of organised labour before making a decision to establish a (municipal police) service, the Supreme Court of Appeal stated that while provisions 16-21 of the Systems Act, which foster participation by the community in municipal decision-making processes, are expressed in relatively wide and general terms, the provisions of section 78 of the Act are not. Section 78 provisions are applicable only when a municipality has decided on a mechanism to provide or review a municipal service in terms of section 77. Section 78 provisions are not applicable to the anterior decision to provide or extend a municipal service. Sections 77 and 78 of the Act are concerned with the question of how things (services) are to be done and not whether they should be done. The purpose of sections 77 and 78 of the Act is to compel a municipality to consider how a particular service can be done and through which appropriate internal mechanism it can be done. Only after that has been done may the provision of a service through an external mechanism be considered. It is in considering these questions that section 78(1)(a)(v) and (3)(b)(v) oblige the municipality to assess and take into account the views of *inter alia* organised labour. Section 78 also postulates that a decision has already been made to provide or review a municipal service.50

Apart from the determining criteria discussed above, a further important obligation on municipalities is that, if a municipality has decided to provide a municipal service through an internal mechanism, it must allocate sufficient human, financial and other resources to the particular unit that might be necessary for the proper provision of

49 It is important to note that when a municipality is following the abovementioned requirements, it must comply with any applicable legislation that is relating to the appointment of a service provider other than the municipality itself and also any other additional requirements that may be prescribed by regulations. See the Systems Act ss 78(4)-(5).

50 Refer to *SAMWU v City of Cape Town* 2004 (1) SA 548 (SCA). The court held that the provisions of ss 77 and 78 do not have to be complied with before a decision to provide a new service or to upgrade or review an existing service is reached. Paras 11-14 at 551-552 and also at 555.
such service and must also transform the actual provision of that service in accordance with, and thus in compliance with, the provisions of the Systems Act.\(^{51}\) If a municipality decides to provide a service through a service delivery agreement in terms of section 76(b) of the Systems Act with:

- a municipal entity or another municipality, it may, subject to subsection (3) of the Act, negotiate and enter into such an agreement with the relevant municipal entity or municipality without applying part 3 of chapter 8 of the Systems Act which refers to service delivery agreements involving competitive bidding
- a national or provincial organ of state, it may enter into such an agreement with the relevant organ of state without applying the principles of competitive bidding
- any institution or entity, or any person, either juristic or natural, which was not mentioned above in either paragraphs (a) or (b), then it must apply part 3 referring to competitive bidding before entering into an agreement with such institution, entity or person.\(^{52}\)

It is further provided that before a municipality enters into a service delivery agreement with an external service provider it must establish a programme for community consultation and information dissemination regarding the appointment of the external service provider and the contents of the service delivery agreement. The contents of a service delivery agreement must be communicated to the local community through the media. In instances where a municipality decides to enter into a service delivery agreement with another municipality, that other municipality must conduct or commission a feasibility study and take it into account before the agreement is entered into.\(^{53}\)

The new legislative framework also establishes specific responsibilities of municipalities when they provide services through service delivery agreements with other

\(^{51}\) See the Systems Act s 79(a)-(b). In determining what would be sufficient resources, all relevant circumstances should be taken into account. Various factors can have an impact on such a determination. It is suggested that if a municipality makes an objective and informed determination, such a determination would hardly fall foul of the requirements of the Act.

\(^{52}\) See s 80(1)(a)-(b) of the Systems Act as substituted by Act 44 of 2003 s 12. Note that a ‘municipal entity’ means a private company, a service utility or a multi-jurisdictional service utility. A ‘multi-jurisdictional service utility’ again means a body established in terms of s 87 of the Systems Act. Refer to the definitions of the Act, s 1 as amended by Act 44 of 2003.

\(^{53}\) Read ss 80(3)(a)-(b) of the Systems Act. Note that the feasibility study must include an assessment on the impact on the budget and other assets, liabilities and staff expenditure, an assessment whether staff should be increased, an assessment on the ability of the other municipality to absorb any commitments, liabilities or employees involved, when the appointment ends and finally any other relevant information as may be prescribed.
external mechanisms. In such instances it is required that if a municipal service is provided through a service delivery agreement with an external mechanism the municipality remains responsible for ensuring that such service is provided to the local community in accordance with new legal standards. In order to oversee and ensure its obligations of final service provision, all municipalities must do the following:

• regulate the provision of the service in accordance with section 41 of the Systems Act, which sets certain core components for performance management
• monitor and assess the implementation of the service agreement and performance management of the particular service provider
• perform its functions and exercise its powers according to the Systems Act if the municipal service falls within a development priority or objective of the municipality’s IDP
• control the setting and adjustment of tariffs by the service provider for the service, within the council’s tariff policy
• general exercise its service authority to ensure uninterrupted delivery of service in the best interests of the local community.

Through its conclusion of a service delivery agreement, a municipality is legally authorised to do the following in order to ensure effective, sustainable and uninterrupted municipal services:

• It may assign to a service provider the responsibility for
  (a) developing and implementing detailed service delivery plans (SDP) within the framework of the municipality’s IDP
  (b) the operational planning, management and provision of the municipal service
  (c) the undertaking of social and economic development that is directly related to the provision of the service
  (d) customer management
  (e) managing its own accounting, financial management, budgeting, investment and borrowing activities within the framework of transparency, accountability,

54 Such provisions confirm the new constitutional obligations in terms of accountability and sustainable service provisions. Municipalities cannot contract their responsibilities away regarding service provision.
55 See the Systems Act s 81(1)(a)-(e).
56 Such evaluation of performance by a service provider must be done in terms of s 41 provisions.
57 See the Systems Act s 81(2)(a)-(e).
reporting and financial control determined by the municipality, all of which are subject to the MFMA.\textsuperscript{58}

(f) the collection of service fees for its own account from users of services, in accordance with the municipality’s tariff policy and credit control measures.\textsuperscript{59}

- It may pass on funds for the subsidisation of services to the poor to the service provider through a transparent system, which must be subject to performance monitoring and audit.
- It must ensure that the agreement provides for a dispute-resolution mechanism to settle disputes between the municipality and the service provider.
- It may transfer or second any staff members to the service provider, with the concurrence of the staff member concerned and in accordance with applicable labour legislation.
- It must ensure continuity of the service if the service provider is placed under judicial management, becomes insolvent, is liquidated or for any other reason is unable to continue performing its functions and obligations in terms of the particular service delivery agreement.
- It must, where applicable, take over the service, including all assets, when the service delivery agreement expires or is terminated.

The municipal council is also permitted to set, review or adjust the tariffs within its tariff policy. The service delivery agreement may further provide for the adjustment of tariffs by the service provider, within certain limits set by the municipal council.\textsuperscript{60} It is further possible for a service delivery agreement to be amended by agreement between the parties, except where an agreement has been concluded, following a competitive bidding process. Where a service agreement has been concluded following a competitive bidding process, an amendment can be made only after the local community has been given:

- reasonable notice of the intention to amend the agreement, including the reasons for the proposed amendment
- sufficient opportunity to make representations to the municipality.\textsuperscript{61}

\textsuperscript{58} See the Local Government: Municipal Finance Management Act 56 of 2003.
\textsuperscript{59} See also the Act ch 9 which deals with aspects concerning credit control and debt collection.
\textsuperscript{60} See the Systems Act s 81(3).
\textsuperscript{61} See the Systems Act s 81(4)(a)-(b).
It is important to note that no councillor or staff member may share in any profits or improperly receive any benefits from a service provider providing or proposing to provide any municipal service in terms of a service delivery agreement.  

16.3.2.3 Service delivery agreements that involve competitive bidding
The Systems Act further provides that if a municipality decides to provide a municipal service through a service delivery agreement with a person referred to in section 80(1)(b) of the Act, it is obliged to select such a service provider through a selection process which
- complies with chapter 11 of the MFMA
- allows all prospective service providers to have equal and simultaneous access to information relevant to the bidding process
- minimises the possibility of fraud and corruption
- makes the municipality accountable to the local community with regard to the progress of selecting a service provider and the reasons for any decision in this regard
- takes into account the need to promote the empowerment of small and emerging enterprises.

It is also provided for, but subject to the provisions of the Preferential Procurement Policy Framework Act, that a municipality may determine a preference for categories of service providers in order to advance the interests of persons disadvantaged by unfair discrimination, as long as such preference is exercised in a manner that does not compromise or limit the quality, coverage cost and developmental impact of the services. The selection of preferential service provider contenders must be fair, equitable, transparent, cost-effective and competitive. Such requirements may be

---

62 Such prohibition on receiving any profits or benefits is in line with new procedures to eradicate corruption and bribery. Apart from possible criminal prosecution, councillors and staff members that receive such profits or benefits will also contravene their respective codes of conduct and can also be held punishable under such codes.

63 See the Systems Act s 83(1)(a)-(e).

64 Act 5 of 2000, which aims at giving effect to the Constitution s 217(3) by providing a framework for the implementation of a procurement policy.

65 In other words, preferential service providers such as affirmative action appointments or black empowerment groups may be preferred, as long as certain minimum standards and obligations are not compromised.

66 SeeMetro Projects CC v Klerksdorp Local Municipality 2004 (1) SA 16 (SCA) where it was submitted that the Preferential Procurement Policy Framework Act requires organs of state to establish a procurement policy, and also makes it obligatory for organs of state to follow a tender procedure for the procurement of goods and services. If such requirements are not met, then the tender process, if any, was unlawful.
provided for in other applicable national legislation. Even in cases of the considera-
tion of a municipality to select a service provider, the selection process must also
apply with the criteria listed in section 78 of the Systems Act in addition to the prefer-
ences for certain categories referred to in this subsection.\(^{67}\)

It is also required that on the basis of the bidding documents, any addenda,
amendments or variations that were provided to all bidders after a prospective ser-
vice provider has been selected, the municipality must negotiate the final terms and
conditions of the service delivery agreement with the preferred service provider. If
the negotiations are successful, the municipality must then enter into the agreement
on such terms and conditions that were specified in the bidding documents, together
with additions thereto. It should be noted that modifications to the bidding process
must not materially affect the bid in any manner that would compromise the integrity
of the bidding process. If the terms and conditions of an agreement cannot be
agreed upon within a reasonable time, the municipality may negotiate a possible
agreement with the next-ranked prospective service provider.\(^{68}\) When a municipality
has entered into a service delivery agreement it must

- make copies of the agreement available at its offices for public inspection
- give notice in the media of the particulars of the service that will be provided in
terms of the agreement, the name of the selected service provider and the place
and period where copies of the agreement will be available for public inspection.\(^{69}\)

16.3.2.4 The legal requirements relating to internal municipal service
districts

It is generally understood that the provision of municipal services, according to the
new constitutional and other legal requirements, is not an easy task. Even more
difficult is the provision of services in large metropolitan or district municipal jurisdic-
tions. In an effort to lighten the burden on service delivery and in order to ensure
effective and sustainable service provision, the new legislative framework on local

\(^{67}\) See the Systems Act s 83(2) and (3).

\(^{68}\) The bidding process is therefore not to be repeated because the first preferred service pro-
vider did not accept the conditions of the agreement. The reference to a reasonable time for the
negotiations will depend on the circumstances of each case. The more urgent the service that
should be provided, the less time would be regarded as reasonable. It is, however, advisable for
municipalities to communicate in writing the circumstances and urgency of each case and to put the
preferred bidder on terms to either accept or withdraw from the bidding process.

\(^{69}\) Refer to the Systems Act s 84(1)-(3).
government allows for the establishment of so-called “internal municipal service districts”. In this regard and in accordance with its policy framework, a municipality is allowed to establish part of the municipality as an Internal Municipal Service District (IMSD) to facilitate the provision of a municipal service in that part of the municipality. Before an IMSD is established, the municipality must:

• consult the local community on the following matters:
  (a) the proposed boundaries of the service district
  (b) the proposed nature of the municipal service
  (c) the proposed method of financing the service
  (d) the proposed mechanism for provision of the service and

• obtain the consent of the majority of the members of the local community in the proposed IMSD that will be required to contribute to the provision of the municipal service.\(^{70}\)

Following on subsection 85(2), when a municipality establishes an IMSD, the municipality must determine the boundaries of the district, the mechanism to provide the service and establish a separate accounting system and other record-keeping systems in respect of the service. The municipality may also set a tariff or levy for the service, impose a special surcharge in the district for the service or increase the tariff in the district for the service. The municipality may further establish a committee comprising persons representing the community of the IMSD to act as a consultative or advisory forum regarding the management and other matters of the service.\(^{71}\) In areas where IMSDs are considered, a municipality must develop and adopt a policy framework for the establishment, regulation and management of such an IMSD. Such a policy framework must reflect at least the following aspects:

• the development needs and priorities of designated parts of the municipality which must be balanced against the needs and priorities of the municipality as a whole and

• the extent to which the establishment of one or more IMSDs will promote the local economic development of the municipality as a whole, will contribute to enhancing the social, economic and spatial integration of the municipality and which may not

\(^{70}\) See the Systems Act s 85(1) and (2).

\(^{71}\) See the Systems Act s 85(3)(a)-(e). Note that the committee proposed in s 3(e) should be established on the basis of gender representivity.
entrench or contribute to further disparities in service provision in the municipal jurisdiction.\textsuperscript{72}

According to wide-ranging amendments to the Systems Act during 2003, various new issues have been incorporated under section 86 of the Act. Section 86A provides now for the following:

The Minister may for purposes of municipal services, make regulations or issue guidelines in accordance with section 120 of the Act, in order to provide for or regulate the following matters:

- The preparation, adoption and implementation of a municipal tariff policy
- the subsidisation of tariffs for poor households through cross-subsidisation within and between services, equitable share allocations to municipalities and national and provincial grants to municipalities
- limits on tariff increases
- criteria to be taken into account by municipalities when imposing surcharges on tariffs for services and determining the duration thereof
- incentives and penalties to encourage the economical, efficient and effective use of resources when providing services; the recycling of waste and other environmental objectives
- criteria to be taken into account by municipalities when assessing options for the provision of a municipal service
- measures against malpractice in selecting and appointing service providers, including measures against the stripping of municipal assets
- mechanisms and procedures for the co-ordination and integration of sectoral requirements in terms of legislation and the manner in which municipalities must comply with these
- standard draft service delivery agreements
- the minimum content and management of service delivery agreements
- additional matters that must be included in a feasibility study in terms of section 78(3)(c) of the Act, which may include the strategic and operational costs and benefits of an external mechanism in terms of the municipality’s strategic objectives, an assessment of the municipality’s capacity to effectively monitor the provi-

\textsuperscript{72} Refer to the Systems Act s 86(1) and (2).
sion of the municipal service through an external mechanism and to enforce the
service delivery agreement
• performance guarantees by service providers and
• any other matter that would facilitate the effective and efficient provision of mu-
nicipal services or the application of the provisions of the Act.73

The Minister may make regulations and issue guidelines relating to fiscal matter only
after consulting with the Minister of Finance and any other Cabinet member whose
portfolio is affected by such regulations and guidelines. When making regulations or
issuing guidelines, the Minister must take into account the capacity of municipalities
to comply with such regulations and guidelines and differentiate between different
kinds of municipality according to their respective capacities.74

The Act specifically determines that there are the following kinds of municipal en-
ty:
• a private company established by one or more municipalities in terms of Part 2 of
  the Act or in which one or more municipalities have acquired or hold an interest
  according to Part 2 of the Act
• a service utility established by a municipality in terms of Part 3 of the Act and
• a multi-jurisdictional service utility established by two or more municipalities in
terms of Part 4.75

It is specifically provided that no municipality may establish, or participate in the
establishment of, or acquire or hold an interest in, a corporate body, including a trust,
except where such corporate body is a private company, service utility or multi-
jurisdictional service utility referred to above or a fund for the benefit of its employees
in terms of a law regulating pensions or medical aid schemes. However, such re-
quirements do not apply to the acquisition by a municipality for investment purposes
of securities in a company listed on the Johannesburg Securities Exchange in accor-
dance with the investment framework envisaged in section 13 of the Municipal Fi-
nance Management Act.76

It is further provided that a municipality may, subject to subsection 86C (2), estab-
lish or participate in the establishment of a private company in accordance with the

73 See s 86A(1)(a)-(m) of the Systems Act.
74 Refer to ss 86A(2)-(3) of the Systems Act.
75 Read s 86B(a)-(c) of the Systems Act.
76 See ss 86B(2)-(3) of the Systems Act.
Companies Act,\textsuperscript{77} or acquire or hold an interest in a private company in accordance with the Companies Act. In this regard it is further permitted that:

- A municipality may in terms of subsection 86C(1)(a) or (b) either acquire or hold full ownership of a private company or acquire or hold a lesser interest in a private company.
- A municipality may acquire or hold such a lesser interest in a private company only if all the other interests are held by (i) another municipality or municipalities, (ii) a national or provincial organ of state or organs of state or (iii) any combination of institutions refer-red to in (i) and (ii).
- A municipality may, despite paragraph (b), acquire or hold an interest in a private company in which an investor other than another municipality or a national or pro-
vincial organ of state has an interest, but only if effective control in the private company vests in that municipality, another municipality, or that municipality and another municipality collectively.\textsuperscript{78}

It is also important to note that a private company referred to in section 86C(1) is a municipal entity if a municipality, or two or more municipalities collectively, have effective control of that private company or is a public entity to which the Public Fi-
inance Management Act applies, if ownership control in the company is held by a national or provincial organ of state.\textsuperscript{79} A private company which is a municipal entity must further restrict its activities to the purpose for which it is used by its parent mu-
nicipality in terms of section 86E(1)(a) of the Systems Act and it has no competence to perform any activity which falls outside the functions and powers of its parent municipality contemplated by section 8 of the Act.\textsuperscript{80}

Municipalities may further establish a private company or acquire an interest in such a company only for the purpose of utilising the company as a mechanism to assist it in the performance of any of its functions or powers or if the municipality can demonstrate that there is a need to perform that function or power in accordance with business practices in order to achieve the strategic objectives of the municipality

\textsuperscript{77} 61 of 1973.
\textsuperscript{78} Refer to ss 86C(1)-(3) of the Systems Act. Note that if a municipality establishes a private company or acquires or holds an interest in such a company, it must comply with the Companies Act and any other law regulating companies. If any conflict however arises between the Companies Act or other law and a provision of the Systems Act, then the Systems Act prevails.
\textsuperscript{79} See Act 1 of 1999 read together with s 86D(1) of the Systems Act.
\textsuperscript{80} Read ss 86D(1)-(2) of the Systems Act.
more effectively and that the company would benefit the local community. It is also imperative that all other conditions that may be prescribed have been complied with. It should be noted however that if a municipality establishes a private company or acquires an interest in such a company for the purpose of using that company as a mechanism to provide a municipal service, then the provisions of Chapter 8 of the Systems Act are applicable.  

According to the new amendments, if two or more municipalities intend to establish a private company or to acquire interests in the same private company, each of those municipalities must:

- comply with section 86E of the Systems Act
- consider and reach agreement on proposals for shared control of the company and
- consider cash flow projections of the company’s proposed operations for at least three financial years.

A municipality may further transfer ownership or otherwise dispose of a wholly owned private company, subject to the Municipal Finance Management Act, or an interest in a private company subject to section 14 of the Municipal Finance Management Act and only if that transfer or disposal would not result in an infringement of section 86C(2) of the Systems Act by another municipality which holds an interest in the company.

In respect of the establishment of a service utility, it is now statutorily permitted for a municipality to pass a by-law establishing such a service utility. A by-law establishing a service utility must: state the purpose for which the service utility is established, confer the powers and impose the duties on the service utility which are necessary for the attainment of such purpose and provide for the following aspects:

- a board of directors to manage the service utility
- the number of directors to be appointed
- the appointment of directors, the filling of vacancies and the replacement and recall of directors by the parent municipality
- the terms and conditions of appointment of directors

---

81 Ss 86E(1)-(2) of the Systems Act.
82 See s 86F of the Systems Act.
83 Read s 86G of the Systems Act.
• the appointment of a chairperson
• the operating procedures of the board of directors
• the delegation of powers and duties to the board of directors
• any other matter necessary for the proper functioning of the board of directors
• the acquisition of infrastructure, goods, services, supplies or equipment by the service utility, or the transfer of infrastructure, goods, services, supplies or equipment to the service utility
• the appointment of staff by the service utility or the transfer or secondment of staff to the service utility in accordance with applicable labour legislation
• the terms and conditions on which any acquisition, transfer, appointment or secondment is made
• the governance of the service utility and
• any other matter necessary for the proper functioning of the service utility.

The by-law may also determine budgetary and funding arrangements for its implementation. No by-law may confer on a service utility any functions or powers falling outside the competence of the parent municipality contemplated by section 8 of the Systems Act.\textsuperscript{84} It should also be noted that a service utility is a juristic person and a municipal entity under the sole control of the municipality which established it. All service utilities must restrict their activities to the purpose for which they were established and have no competence to perform any activity which falls outside their functions or powers as are determined in terms of the by-law of the municipality.\textsuperscript{85}

Apart from establishing IMSDs, municipalities may also establish so-called Multi-jurisdictional Municipal Service Utilities (MMSUs).\textsuperscript{86} In this regard it is provided that two or more municipalities, by written agreement, may establish a multi-jurisdictional service utility to perform any function or power envisaged by section 8 of the Systems Act, in their municipal areas or in any designated parts of their municipal areas. The Minister may, in the national interest and in consultation with the Cabinet member responsible for the functional area in question, request two or more municipalities to establish a multi-jurisdictional service utility to conform to the requirements of national legislation applicable to the provision of a specific municipal service. The

\textsuperscript{84} Read ss 86H(1)-(4) of the Systems Act.
\textsuperscript{85} See s 86I(1)-(2) of the Systems Act.
\textsuperscript{86} See s 87 of the Systems Act as substituted by s 19 of Act 4 of 2003.
municipalities that receive such a request must within two months decide whether to accede to the request, and convey their decision to the Minister. An agreement establishing a multi-jurisdictional service utility must describe the rights, obligations and responsibilities of the parent municipalities, and must:

- determine the boundaries of the area for which the multi-jurisdictional service utility is established
- identify the municipal service or other function to be provided in terms of the agreement
- determine budgetary and funding arrangements for implementation of the agreement
- provide for a board of directors for the multi-jurisdictional service utility, the appointment of directors by the respective parent municipalities, the filling of vacancies and the replacement and recall of directors, the number of directors appointed by each parent municipality, the terms and conditions of appointment of directors, the appointment of a chairperson, the operating procedures of the board of directors, the delegation of powers and duties to the board of directors and any other matter relating to the proper functioning of the board of directors
- provide for the acquisition of infrastructure, goods, services, supplies or equipment by the multi-jurisdictional service utility or the transfer of infrastructure, goods, services, supplies or equipment to the multi-jurisdictional service utility; the appointment of staff by the multi-jurisdictional service utility or the transfer or secondment of staff to the multi-jurisdictional service utility in accordance with applicable labour legislation and the terms and conditions on which any acquisition, transfer, appointment or secondment is made

- provide for the governing of the multi-jurisdictional service utility, compulsory written reports regarding the activities and performance of the multi-jurisdictional ser-

---

See s 88 as amended by s 20 of Act 44 of 2003.
vice utility to a parent municipality, information that may be requested from the multi-jurisdictional service utility by a parent municipality, the amendment of the agreement and any other matter necessary for the proper functioning of the multi-jurisdictional service utility.  

A multi-jurisdictional service utility is further accountable to the parent municipality(ies) and must comply with the Municipal Finance Management Act. Parent municipalities are again entitled to receive such regular written reports from the multi-jurisdictional service utility with respect to its activities and performance, as may be set out in the agreement establishing the multi-jurisdictional service utility. They may also request the multi-jurisdictional service utility to furnish them with such information regarding its activities as the parent municipality(ies) may reasonably require. Parent municipalities may also appoint a nominee to inspect, at any time during normal business hours, the books, records, operations and facilities of the multi-jurisdictional service utility and those of its contractors relating to the performance of the function or power for which the multi-jurisdictional service utility is established.

Multi-jurisdictional service utilities terminate automatically, when there is only one remaining parent municipality or by written agreement among all of the parent municipalities or upon the termination date or the fulfilment of any condition for termination contained in the agreement establishing the multi-jurisdictional service utility.

The parent municipality(ies) of a municipal entity have specific duties towards such a municipal entity and must:

- exercise any shareholder, statutory, contractual or other rights and powers it may have in respect of the municipal entity to ensure that both the municipality and the municipal entity comply with this Act, the Municipal Finance Management Act and any other applicable legislation and that the municipal entity is managed responsibly and transparently and meets its statutory, contractual and other obligations
- allow the board of directors and chief executive officer of the municipal entity to fulfil their responsibilities and

---

88 See s 90 of the Systems Act as substituted by s 22 of Act 44 of 2003. A (MMSU) is a juristic person and falls under the control/shared control of the parent municipalities. All (MMSU) must restrict their actions to the object of their establishment and they have no other competencies outside the functions set out in their establishment agreement.

89 Read s 92 as substituted by s 24 of Act 44 of 2003.

90 S 92 as substituted.
establish and maintain clear channels of communication between the municipality and the municipal entity.\textsuperscript{91}

In instances where a parent municipality, which has sole control of a municipal entity, or effective control in the case of a municipal entity which is a private company, the parent municipality must ensure that annual performance objectives and indicators for the municipal entity are established by agreement with the municipal entity and included in the municipal entity’s multi-year business plan in accordance with section 87 (5) (d) of the Municipal Finance Management Act. The parent municipality is further obligated to monitor and annually review, as part of the municipal entity’s annual budget process, the performance of the municipal entity against the agreed performance objectives and indicators and may liquidate and disestablish the municipal entity if the performance of the municipal entity is unsatisfactory, if the municipality does not impose a financial recovery plan in terms of the Municipal Finance Management Act and the municipal entity continues to experience serious or persistent financial problems or if the municipality has terminated the service delivery agreement or other agreement it had with the municipal entity.\textsuperscript{92} Parent municipalities that have shared control of a municipal entity must enter into a mutual agreement determining and regulating the following:

- their mutual relationships in relation to the municipal entity
- the exercise of any shareholder, contractual or other rights and powers they may have in respect of the municipal entity
- the exercise of their powers and functions in terms of the Systems Act and the Municipal Finance Management Act with respect to the municipal entity
- measures to ensure that annual performance objectives and indicators for the municipal entity are established by agreement with the municipal entity and included in the municipal entity’s multi-year business plan in accordance with section 87 (5) (d) of the Municipal Finance Management Act
- the monitoring and annual review, as part of the municipal entity’s annual budget process as set out in section 87 of the Municipal Finance Management Act, of the performance of the municipal entity against the established performance objectives and indicators

\textsuperscript{91} Refer to s 93A as inserted by s 26 of Act 44 of 2003.

\textsuperscript{92} See s 93B of the Systems Act.
• the payment of any monies by the municipalities to the municipal entity or by the municipal entity to the municipalities
• procedures for the resolution of disputes between those municipalities
• procedures governing conditions for and consequences of withdrawal from the municipal entity by a municipality
• procedures for terminating the appointment and utilisation of the municipal entity as a mechanism for the performance of a municipal function
• the disestablishment of the municipal entity, the division, transfer or liquidation of its assets and the determination of the responsibility for its liabilities and
• any other matter that may be prescribed.

Parent municipalities may further liquidate and disestablish the municipal entity if the performance of the municipal entity is unsatisfactory, if the municipality does not impose a financial recovery plan in terms of the Municipal Finance Management Act and the municipal entity continues to experience serious or persistent financial problems, or if the municipality has terminated the service delivery agreement or other agreement it had with the municipal entity.\textsuperscript{93}

In respect of municipal representatives, it is now determined that the council of a parent municipality must designate a councillor or an official of the parent municipality, or both, as the representative or representatives of the parent municipality. The functions of such representative(s) are to represent the parent municipality as a non-participating observer at meetings of the board of directors of the municipal entity concerned and to attend shareholder meetings and exercise the parent municipality’s rights and responsibilities as a shareholder, together with such other councillors or officials that the council may designate as representatives. It is further important to note that the official lines of communication between a municipal entity and the parent municipality exist between the chairperson of the board of directors of the municipal entity and the mayor or executive mayor, as the case may be, of the parent municipality. The mayor or executive mayor, as the case may be, of a parent municipality may at any time call or convene any meeting of shareholders or other general meeting comprising the board of directors of the municipal entity concerned and the representatives of the parent municipality, in order for the board of directors to give

\textsuperscript{93} Read s 93C as inserted by s 26 of Act 44 of 2003.
account for actions taken by it. The council of a parent municipality may also determine the reporting responsibilities of a municipal representative. A municipal representative is strictly obligated to represent the parent municipality faithfully at shareholder meetings, without consideration of personal interest or gain, and must keep the council informed of how voting rights were exercised and of all relevant actions taken on behalf of the municipality by the representative. A municipal representative must further act in accordance with the instructions of the council and may be reimbursed for expenses in connection with his or her duties as a municipal representative. The municipal representative may not receive any additional compensation or salary for such duties, however.\textsuperscript{94}

It is also provided that the board of directors of a municipal entity must have the requisite range of expertise to effectively manage and guide the activities of the municipal entity. The board must consist also of at least a third non-executive directors and must have a non-executive chairperson. Before nominating or appointing a director, it is the responsibility of the parent municipality of a municipal entity to establish a process through which applications for nomination or appointment are widely solicited, to compile a list of all applicants and any prescribed particulars concerning applicants and to ensure that the municipal council makes the appointment or nomination from such list.\textsuperscript{95} A person is not eligible to be a director of a municipal entity if he or she:

- holds office as a councillor of any municipality
- is a member of the National Assembly or a provincial legislature
- is a permanent delegate to the National Council of Provinces
- is an official of the parent municipality of that municipal entity
- was convicted of any offence and sentenced to imprisonment without the option of a fine, and a period of five years since completion of the sentence has not lapsed
- has been declared by a court to be of unsound mind or
- is an unrehabilitated insolvent.

If a director of a municipal entity during that person’s term of office becomes disqualified on a ground mentioned above, then such a person ceases to be a director from

\textsuperscript{94} See s 93D of the Systems Act as amended.
\textsuperscript{95} See s 93E of the Systems Act.
the date of becoming disqualified.\textsuperscript{96} The parent municipality of a municipal entity is further authorised to remove or recall a director appointed or nominated by that municipality. Such removal or recall is permitted only when the performance of the director is unsatisfactory; when the director, either through illness or for any other reason is unable to perform the functions of office effectively or if the director, whilst holding office, is convicted of fraud or theft or any offence involving fraudulent conduct or has failed to comply with or breached any legislation regulating the conduct of directors, including any applicable code of conduct.\textsuperscript{97}

The board of directors of a municipal entity has also been afforded specific duties and responsibilities. As such, the board must provide effective, transparent, accountable and coherent corporate governance and conduct effective oversight of the affairs of the municipal entity. It must also ensure that it and the municipal entity comply with all applicable legislation and agreements and communicate openly and promptly with the parent municipality of the municipal entity. In general, the board must deal in good faith with the parent municipality of the municipal entity. A director of a municipal entity is further obligated to disclose to the board of directors and to the representative of the parent municipality any direct or indirect personal or business interest that the director or his or her spouse or partner may have in any matter before the board, and must withdraw from the proceedings of the board when that matter is considered, unless the board decides that the director’s direct or indirect interest in the matter is trivial or irrelevant. Directors must at all times act in accordance with the Code of Conduct for directors referred to in section 93L of the Systems Act, which is referred below.\textsuperscript{98} In respect of meetings of the board of directors it is provided that such meetings must be open to the municipal representatives referred to in section 93D of the Systems Act. Municipal representatives have non-participating observer status in a meeting of the board of directors of a municipal entity.\textsuperscript{99} It is also determined that the board of directors of a municipal entity must appoint a chief executive officer of the municipal entity. Such a chief executive officer

\textsuperscript{96} Refer to s 93F of the Systems Act.
\textsuperscript{97} Read s 93G of the Systems Act as inserted by s 26 of Act 44 of 2003.
\textsuperscript{98} See s 93H of the Systems Act.
\textsuperscript{99} Refer to s 93I of the Systems Act.
is accountable to the board of directors for the management of the municipal entity.\textsuperscript{100}

Municipal entities may not establish or participate in the establishment of a company or any other corporate body, including a trust, or acquire or hold an interest in a company or any other corporate body, including a trust. This prohibition does not apply, however, to the acquisition by a municipal entity of securities in a company listed on the Johannesburg Securities Exchange for investment purposes, subject to any applicable provisions of the Municipal Finance Management Act or a fund for the benefit of employees of a municipal entity in terms of a law regulating pensions or medical aid schemes.\textsuperscript{101}

Mention was made earlier in this chapter that the Systems Act now provides for a specific Code of Conduct for directors and members of staff of a municipal entity. In this regard, it is provided that the Code of Conduct for councillors contained in Schedule 1 of the Act also applies, with the necessary changes, to directors of a municipal entity. In the application of item 14 of Schedule 1 of the Act to directors of a municipal entity, that item must be regarded as providing that:

- the board of directors of a municipal entity may investigate and make a finding on any alleged breach of a provision of this Code by a director or establish a special committee to investigate and make a finding on any alleged breach of a provision of this Code by a director or make appropriate recommendations to the board of directors
- if the board of directors or special committee finds that a director has breached a provision of this Code, the board of directors may issue a formal warning to the director, reprimand the director, fine the director or recommend to the parent municipality that the director be removed or recalled
- the board of directors of a municipal entity must inform a parent municipality of that entity of any action taken against a director in terms of the Code of Conduct.

The Code of Conduct for municipal staff members contained in Schedule 2 of the Systems Act applies, with the necessary changes, to the members of staff of a municipal entity. For purposes of this provision, any reference in Schedule 1 or 2 of the Act to a ‘councillor’, ‘MEC for local government in the province’, ‘municipal council’,

\textsuperscript{100} S 93J of the Systems Act.
\textsuperscript{101} Read s 93K of the Systems Act.
‘municipality’ and ‘rules and orders’ must, unless inconsistent with the context or otherwise clearly inappropriate, be construed as a reference to a director of a municipal entity, parent municipality, board of directors, municipal entity and procedural rules, respectively.\(^{102}\)

### 16.4 An overview of services that are generally provided by local governments

#### 16.4.1 General factors that impact on municipal services

It has been explained in the introductory chapters of this work that the provision of municipal services is arguably the most important reason for the existence and creation of local government structures. So important and fundamental is the provision of municipal services to local communities that it has been incorporated and entrenched within the new constitutional framework of South Africa. Before one investigates the basic services that municipalities should provide, it is important to look briefly at specific factors that have an impact on service provision and service levels, however. To a large extent these factors are determining factors in achieving a system of effective and sustainable service provision. The factors can be summarised as follows:

- **Financial resources** Finance is often regarded as the oil that keeps the engine of government running smoothly.\(^{103}\) Without financial resources there can be no effective and sustainable provision of municipal services. All municipalities should maximise their potential financial income and should utilise such resources sparsely and diligently. Municipal finances are generated mainly via two sources:
  - (a) the sharing in revenue that is raised nationally
  - (b) revenue that is generated locally through the collection of rates, taxes and surcharges on services.

- **Training and municipal planning** The restructuring of municipal governments since 1993 has had a somewhat negative impact on skilled municipal employees. Many municipalities have lost the services of highly skilled and experienced municipal personnel. Coupled with the reality of a new legal and administrative framework, all municipalities are in need of extensive training and education programmes to ensure services are provided in compliance with the new legal foundation. Local governments should not be short sighted in respect of the

---

\(^{102}\) Refer to s 93L of the Systems Act as inserted by s 26 of Act 44 of 2003.

\(^{103}\) See Craythorne (1997) 391.
importance of new training initiatives. The new local government systems must be supported by a comprehensive and continuous programme of training and skills development. Without proper attention to such aspects, sustainable service provision might be an unattainable ideal. Equally important to training is the principle of municipal planning. Planning in general is an inseparable part of the processes of public administration and accordingly requires specific consideration.\footnote{See Craythorne (1997) 400-402. The writer refers to certain definitions of the term “planning”, which in essence means that objectives need to be clarified, whereafter specific actions should be implemented to achieve the desired goals. Planning involves not only the financial inputs necessary but also who the various role players should be.} In basic terms, municipal planning means looking ahead by anticipating and making arrangements for dealing with future problems by projecting trends. One such trend is, for example, the migration of people. Migration of people from mostly rural areas to more developed areas such as towns or cities is a universal phenomenon. People migrate from one place to another in the hope of obtaining work and achieving a better quality of life. The most important consideration in municipal planning in terms of accommodating migration trends is to anticipate future demand for basic municipal services such as water, sanitation, refuse removal and primary health care facilities and means. Often migration patterns are difficult to anticipate, because many informal settlements are established almost anywhere. In light of such sudden municipal demands, municipal planning is a \textit{sine qua non} for a successful local government system. Planning thus has its roots in the past, but with a view to deciding the future in the present.\footnote{See Craythorne (1997) 402.}

• \textbf{Accountability, effective decision making and local democratic governance} The new constitutional dispensation of South Africa, which includes local governments, is founded \textit{inter alia} on the values of a democratic, accountable, responsive and open government.\footnote{See the Constitution s 1(d).} All municipal governments must therefore structure and manage their affairs in compliance with such values. Municipalities must take decisive steps to eradicate all forms of maladministration and corruption and must align themselves with the new supreme values in the state. Without a concerted effort to establish a new, clean and accountable local governance, there is little
chance that the newly established local government structures will secure and fulfill their obligations towards effective and sustainable service delivery.\textsuperscript{107}

- \textit{Public participation and social and economic development} Public participation within all spheres of government is a constitutional prerequisite. This is of particular importance since the former local government dispensation excluded many people from its processes and decision-making procedures. Without proper participation of all the role players in local communities, the new local government dispensation is stillborn from the outset. In general, participation leads to information, which in turn ensures support. It is further a well-known fact that people generally support and participate in processes in which they have a direct or even an indirect stake. Communities need to realise that local governments are there mainly to provide services and to manage and control the local area to the benefit of all that are living or working there. As a counterweight, municipalities must assure and provide their services so as to ensure social and economic development which in turn will ensure a better future for all residents. The importance of this objective has been given constitutional protection.\textsuperscript{108}

\textbf{16.4.2 Municipal services to be provided under the Constitution}

\textbf{16.4.2.1 Distinguish between functions and services}

Before one looks at the different services a municipality is required to provide, it is of value to distinguish between the terms functions and services. As defined by Craythorne,\textsuperscript{109} a municipal function is something that is linked to the nature of governance. A government must govern, and in order to govern it must perform certain functions, such as making laws, levying taxes, employing personnel and allocating resources. On the other hand, a service is something that is provided by one person or institution to another person or groups of persons. In this regard, a service is something that is to be rendered to others.\textsuperscript{110}

\textsuperscript{107} The more money is lost or wasted because of maladministration and corruption, the fewer resources are available to provide much-needed services and infrastructure to service hungry local communities.

\textsuperscript{108} See the Constitution s 152.

\textsuperscript{110} The main objective of municipalities, not only historically, but also according to the Constitution, is to provide effective and sustainable services to their respective communities. In order to provide such services, a municipality must also perform certain functions. The provision of services is therefore dependent on the ability to perform certain functions.
16.4.2.2 Specific municipal services

It is interesting to note that within the new constitutional dispensation no direct or specific mention is made with regard to the specific services that municipalities should ordinarily render to their communities. On the contrary, the new legal framework refers to the powers, functions, objects and duties of municipalities. A closer evaluation of such powers, functions, objects and duties the terms seem to indicate reveals, albeit indirectly, certain services that should be rendered. However, it is submitted that it is not altogether certain whether certain powers, functions or duties also require municipalities specifically to render services regarding such matters.  

In summary, municipalities have executive and legislative powers with regard to the matters listed in Part B of Schedule 4 and 5 of the Constitution, as well as with regard to those matters that have been assigned to them in terms of national or provincial legislation. Apart from the functional areas mentioned above, all municipalities have to strive, within their financial and administrative capacities, to achieve the objects set out in section 152(1)(a)-(e) of the Constitution. Seen in context, the areas or matters mentioned in Part B of Schedules 4 and 5 indicate the type of service that local government should provide for. These seem to be areas that neither the national nor the provincial government would be able to provide without unnecessary bureaucratic growth. Before the different services are discussed briefly, it must be remembered that, according to item 2 of Schedule 6 of the Constitution, much old order legislation, for example old provincial ordinances, are still in force, and many of them require extra services or functions to be rendered.

Upon a close evaluation of the different municipal services that should be rendered, two broad categories of such service are recognisable. Some services are  

111 The Constitution Sch 4 Part B and Sch 5 Part B identify the functional areas of municipal executive authority and also indirectly municipal legislative authority. Only a few of these functional areas refer to a service or services that are to be rendered. Sch 4 Part B refers only to fire fighting services, municipal health services and water and sanitation services. Sch 5 Part B does not refer to any services that should be provided. In this regard it is somewhat uncertain if the other functional areas also refer to a service that should be rendered regarding such areas or if they are only to be regulated through executive and legislative actions.  

112 See the Constitution s 156(1)(a)-(b). Again reference should be made to the obligation on the two higher spheres of government to assign to municipalities those matters listed in Schs 4 and 5 Part A, which necessarily relates to local government. See the Constitution s 156(4)(a)-(b).  

113 See the Constitution s 152(2).  

114 Only if such old-order laws are contrary to the Constitution or have been repealed would they be of no further force. See, eg, also the matters listed in the LGTA Schs 2 and 2A. The LGTA has been revoked, however, and is no longer applicable.
regarded as support services, while others are classified as operational services. Support services refer broadly to those services that are vital for the efficient and effective operation of the overall municipal machine and differ from one municipality to another, according to size and capacity. Operational services again refer to those services that are generally considered to be services that a municipality should render to its local community. The different services in each category can be summarised briefly as follows:

(a) General municipal support services

• Legal services All municipalities need legal advice and support in order to ensure that they operate within the Constitution and the law in general. Basically all the different branches of the law are applicable and relevant to municipal operations and activities. There are hardly any legal aspects, apart from aspects such as international relations, that are not applicable within some municipal situation. In order to deal with the many legal aspects, municipalities appoint either their own legal staff or make use of various private legal advisors.

• Financial services Internal financial advice services are indispensable for all municipalities. Without such advice, municipalities will not be able to plan and realise their other responsibilities according to the new constitutional requirements. The importance of financial services therefore speaks for itself.

• Personnel services As a legal person, no municipality can act without natural persons that act on behalf of the municipality. This municipal corps or administration is thus vital to any local government. All in all personnel services refers to the recruitment, selection, appointment, placement, promotion and disciplinary procedures relating to the members of staff of a particular municipal government.

• Secretarial services These services refer mainly to the overall administration of a municipality. All internal procedural aspects are handled mostly through such services which include internal correspondence and also the finalisation of council agendas and the keeping of council minutes.

• Repair and maintenance services Municipalities need a very large infrastructure to operate effectively. This infrastructure requires various movable assets, which assets should be maintained and repaired from time to time. Basically all munici

---

115 See again the Constitution ss 152(2) and 153.
palities therefore provide for internal repair and maintenance services.

- **Information and technology services** In the 21st century, no government can operate effectively and sufficiently without the modern world’s new technological development. It is especially the computerised information services that have revolutionised all institutions. No local government can afford to be without such services.

- **Supply services** All municipalities must provide for a certain number of supplies that should be available for effective and smooth operations. Such services are a vital support service to municipal operations. Supplies include aspects such as stationery, furniture, and other supplies, to name but a few.

**(b) Municipal operational services:**

- **Air pollution** Municipalities similar to the two higher spheres of government are also responsible for environmental protection. Air pollution from car exhaust fumes or industrial smoke is an important environmental concern and should be addressed and controlled on a local level.\(^{117}\)

- **Building regulations** The control and oversight of building activities is generally regarded as one of the so-called “inspection services”. All municipalities should control and inspect compliance to building regulations and standards. This is a very important service to the public in general, as substandard building or dwellings can have life-threatening consequences. Although building regulations and standards are set nationally, it is their enforcement and control on a municipal level that ensures a safe and acceptable system.\(^{118}\)

- **Childcare facilities** The provision and control of childcare facilities is also a municipal matter. Neither national government nor the provincial governments are in an ideal position to address and control such a functional area. It is for municipalities themselves to determine local needs and expectations and to provide for them as may be required. Although childcare facilities and services have also been allocated to local governments, the specific role of such governments is not

---

\(^{116}\) See the Constitution Schs 4 and 5 Parts B.

\(^{117}\) Municipalities are constitutionally obliged to promote a safe and healthy environment. The Constitution s 152(d).

\(^{118}\) See the National Building Regulations and Building Standards Act 103 of 1977. Many municipalities also provide for their own town-planning schemes, which also require certain standards regarding building activities. Some municipal by-laws are also important in this regard.
clearly explained. Some commentators have already suggested that new legislative guidance is needed to rectify such a position.¹¹⁹

• *Electricity and gas reticulation* Arguably one of the most common and important services that are provided for by municipalities is electricity and/or gas reticulation. This is an example of a traditional service that has become indispensable within a modern society. The service does not necessarily relate to the generation of electricity or exploitation of gas, but rather to providing such commodities to local premises for utilisation.

In a similar way to water provision, electricity is normally rendered to local residents after such residents have concluded a service-provision agreement with their local municipality. When such services are received, residents are normally responsible for paying for such services.¹²⁰ Most municipalities are mere suppliers of electricity to local residents. In order to become a supplier, a municipality must become a licensee, as is intended in national legislation.¹²¹ Once a municipality has started to supply electricity to consumers, it is prohibited from disconnecting such supply if such a consumer has paid the full amount due in respect of the supply of electricity. This is the position regardless of whether the consumer owes any other amount to the municipality for other services or other causes of action.¹²² Generally a municipality is required to supply electricity to consumers. To supply means to make available rather than to actually deliver. Electricity is nor-

---
¹¹⁹ See Zaal and Matthais “Local Government and the Provision of Childcare Services: An Essential area for legislative reform” SALJ 119 (1) 138 et seq. The writers mention that the potential importance of the role of local authorities was recognised by the drafters of the 1996 Constitution: therefore its inclusion in Sch 4B. They finally reiterate that local government authorities have a constitutional obligation to provide services for children but that such an obligation has largely gone unrecognised, and needs urgent attention. They conclude by suggesting that the best way to redress this serious inadequacy is for the national legislature to promulgate additional legislation. At 153-154.

¹²⁰ See *Wellington Court Shareblock v Johannesburg City Council* 1995 (3) SA 827 (A). In the case the appel-lants, each of whom owned immovable property within the respondent’s municipal jurisdiction, concluded agreements with the respondent in terms of which the respondent was to supply the properties in question with electricity and water. In its particulars of claim in an action in a local division the respondent alleged that the appellants were liable to it for the payment of certain amounts in respect of such services. The appellants excepted to these particulars on the ground that the agreements were *ultra vires* the relevant by-laws and could accordingly not support a claim for payment. The local division assumed, for the sake of argument, that the agreements were indeed *ultra vires*, but held, on the authority of a long line of cases, that the appellant, having received benefits under the contract, was estopped from raising the *ultra vires* defence.

¹²¹ See the Electricity Act 41 of 1987.

¹²² See *Senekal Inwonersvereniging v Plaaslike Oorgangsraad* 1998 (3) SA 719 (O). The court held that the disconnection of the electricity supply of residents who had not paid all accounts in respect of services or rates in full could not be valid. At 727 paras H-I.
mally also supplied to consumers and not a property. There can thus be more than one consumer on a particular erf.\textsuperscript{123} Generation or exploitation is normally done nationally, although it is not entirely uncommon for certain municipalities to generate electricity for themselves.\textsuperscript{124} Generally municipalities are responsible for the establishment and maintenance of the electricity provision network and for providing support services thereto. Local authorities must note that they are not generally allowed to discontinue one service because of arrear rates for another. In the case of \textit{Hartzenberg v Nelson Mandela Metropolitan Municipality (Despatch admin unit)},\textsuperscript{125} the court held that although the applicants were in unlawful occupation of houses and were in arrears with payments for water supplies, the respondent municipality could not disconnect the electricity supply to the properties. The court held that neither the relevant Electricity Supply by-law nor the Local Government: Municipal Systems Act gave the respondent such authority. The respondent was thus not entitled to discontinue the electricity supply because of the arrears on the water accounts.\textsuperscript{126}

- \textit{Fire fighting services} The provision of fire fighting services is the first service that is specifically referred to in Part B of Schedule 4 of the Constitution. It is self-explanatory that this service is of cardinal importance to all residents of municipal areas. Every day local residents are at risk in respect of fires. In this respect, such services are often lifesaving. Municipalities should ensure that fire stations are ideally located within each particular municipal jurisdiction, in order to provide a rapid and effective service. The nature of the service at hand requires the quickest response possible. The personnel that provide the service must be properly trained and should be effectively equipped to handle any foreseeable situation. Emphasis should be placed not only on corrective fire-fighting services, but also on preventative initiatives. Such initiatives and responsibilities are especially important in high-risk areas such as informal settlements. Fire-fighting services are controlled mainly through national legislation.\textsuperscript{127} It should be noted that fire-

\textsuperscript{123} See \textit{Omter (Edms) Bpk v Welkom Stadsraad} 1999 (3) SA 787 (SCA).
\textsuperscript{124} See the Electricity Act 41 of 1987 and the Gas Act 48 of 2001 for more details.
\textsuperscript{125} 2003 (3) SA 633 (SE).
\textsuperscript{126} See at 638E-F.
\textsuperscript{127} See the Fire Brigade Services Act 99 of 1987.
fighting services are not free of charge and that fees could be recovered by the service provider.\textsuperscript{128}

- \textit{Local tourism} In an effort to attract national or even international investment, all municipalities should explore local investment opportunities. Tourism is one such opportunity that could be a significant enhancement in municipal financial income and one which should be explored thoroughly. Local tourism is something that cannot be done locally on an isolated basis, however; it needs to tie in with an overall national programme for the country as a whole.

- \textit{Municipal airports} In some municipal areas there might be a need to provide and or maintain a municipal airport. To this extent, such a service should be provided to fulfil local needs, depending on financial resources and overall strategic programmes. When such a service is indeed provided for, municipal governments should take note of the various responsibilities and possible liabilities that accompany the provision of such a service.

- \textit{Municipal planning} It has been stated several times in this work that all municipalities are obligated to provide and ensure proper municipal planning services. Such services refer mainly to various aspects of the management and control of land use or land use rights. There are many laws applicable in relation to municipal planning services, ranging from national laws such as the Physical Planning Act\textsuperscript{129} and the Development Facilitation Act\textsuperscript{130}, provincial laws and ordinances and also relevant local by-laws and town planning schemes.\textsuperscript{131}

- \textit{Municipal health services} All municipalities are involved in ensuring and providing certain minimum health services to their local communities. Such service provision is essential to everyday life, and municipalities are best suited to provide and en-

\textsuperscript{128} See, eg, \textit{Tuinroete Klein Karoo Distriksmunisipaliteit v Lategan} 2003 (2) SA 683 (C). The Fire Brigade Services Act 99 of 1987 (the Act) s 10 creates a statutory obligation to pay for fire brigade services, coupled with an effective debt-recovery mechanism. The Act s 10(1) authorises a controlling authority (which is a local authority in terms of the Act s 1) to determine the fees payable by a person on whose behalf fire-fighting services were rendered. The subsection creates a \textit{sui generis} cause of action. It does not exclude the recovery of compensation for the rendering of services on common-law grounds. The chief fire officer who wishes to recover compensation from a person on whose behalf fire-fighting services were rendered has a choice to institute action for compensation on a common-law cause of action or to recover the moneys as determined by the controlling authority.

\textsuperscript{129} 88 of 1967 and also the Physical Planning Act 125 of 1991.

\textsuperscript{130} 67 of 1995.

\textsuperscript{131} See, eg, the old Transvaal ordinance on town planning and towns, ordinance 15 of 1986 and the former Pretoria town-planning scheme 1974, which was enacted in accordance and on the authority of s 19 of the ordinance.
sure such services. Again, one should remember that such services interact with national and provincial programmes on health services.

- **Municipal public transport** Public transport is an indispensable service to the public at large. Depending on the size and density of a local area, municipalities should plan and make provision for public transport facilities. These services are very expensive and need to be justified according to local needs.

- **Municipal public works** Municipalities should also provide for certain municipal public works. Such works refer only to facilities or services that are required in respect of the needs of municipalities in the discharge of their responsibilities to administer functions specifically assigned to them under the Constitution or any other law. Most other public works services are to be provided by the higher spheres of government.

- **Municipal services relating to pontoons, ferries, jetties, piers and harbours** Depending on location and geographical features, some municipalities are required to provide, maintain and control certain services where water is applicable. Often such services are also regulated in terms of higher legislative provisions. In some instances municipal involvement is entirely excluded. The regulation of, for example, international and national shipping and matters related thereto are exempt from local government control.

- **Storm water management systems in built-up areas** As municipal jurisdictions are becoming more and more developed, the management, provision and maintenance of storm-water systems are becoming ever so troublesome. Urbanisation with complaisant modern infra-structure such as tarred roads and roofed buildings increasingly causes severe flooding in residential areas. Municipalities therefore need to plan and provide for sufficient infrastructure to handle and control such higher volumes of storm water.

- **Trading regulations** The modern 21st century city has undergone significant changes from its humble beginnings a few hundred years ago. Many changes in society, especially in some third world countries and economies, have led to new approaches regarding trading patterns in especially highly populated areas. In many towns and cities, residents have become accustomed to informal trading practices that are permitted throughout the municipal area. However, such trading habits can sometimes have a negative impact on long-established and more tradi-
tional business establishments, which in turn could negatively affect new job creation and sustainable enterprises.¹³²

- **Water and sanitation services** The provision of water, and more specifically drinking water, to local residents is generally accepted as one of the most basic of services that municipalities must render.¹³³ Without water and basic sanitation infrastructure and services, it is difficult to imagine how such settlements can sustain and survive. Accordingly, water and sanitation services are seen to tie in strongly with the developmental duties and objectives of municipalities that have been entrenched in the Constitution.¹³⁴

- **Beaches and amusement facilities** Coastal municipalities have an additional service to their communities, in that they must control and manage local beaches in their areas. Apart from beachfront management, all municipalities are to a greater or lesser degree responsible for the control and management of amusement facilities.

- **Billboards and the display of advertisements in public places** The advertising industry has become a very competitive and fast-growing business. Every municipal administration is therefore regularly confronted with new developments regarding advertisement initiatives. Because of factors such as traffic safety, environmental considerations and an overall aesthetic presentation of a particular area, proper management and control over billboards and the display of advertisements in public is necessary. Under the Constitution, special attention should be given to the regulation of billboards and the display of advertisements in public places. In light of the fact that the Bill of Rights protects the right to freedom of expression, which right also includes commercial free speech, municipalities must ensure that their policies and by-laws do not limit such a right unreasonable. For more on such aspects see *African Billboard Advertising v NSS Central Local*

¹³² Most informal or so-called “street trader” do not pay levies for being able to trade in certain areas and it is the responsibility of formal business owners to cross-subsidise for loss in municipal revenue. These practices not only create unequal trading standards but they often also pose environmental and safety hazards. The trading of goods and services within municipal areas should therefore be regulated and controlled, to the benefit of all parties concerned.

¹³³ See the Water Services Act 108 of 1997. See also *Manqele v Durban TMC* 2002 (6) SA 423 (D).

¹³⁴ Refer to the Constitution ss 152(d) and 153. Water is an essential life-sustaining commodity and is also indispensable to ensure a healthy environment. Municipal water and sanitation services are, however, limited to portable water supply systems and domestic wastewater and sewage dis-
In this case the applicant erected certain advertising signs on property in the Durban area which was owned by Spoornet. Acting in terms of its local building by-laws, the respondent objected to the presence of the signs on the basis that they had been erected either in contravention of its by-laws or without the requisite permission to do so, and it placed the applicant on terms to remove them. When the applicant failed to oblige, the respondent engaged the services of a contractor to remove them. The applicant demanded its property back. The court held that the removal of the billboards was unlawful and that the by-law in question had not intended that such signs be removed without a court order. The respondent was subsequently ordered to re-erect the signs.

- **Cemeteries, funeral parlours and crematoria** Providing for cemeteries, crematoria and funeral parlours has always been a function of local governments. Such services are important in the day-to-day living experiences of all communities and should thus be provided on a continuous basis.

- **Cleansing services** According to the Constitution, the provision of cleansing services is also regarded as a local government matter that falls within the functional areas of exclusive provincial legislative competence. What is included under such services is not clear. It is submitted that cleansing services are closely related to municipal health services, however, and that a strong link between the two types of services is self-evident.

- **Control of public nuisances** Municipalities are also responsible for controlling public places within their relevant municipal jurisdiction, and they must therefore also provide for control measures to ensure that public nuisances are addressed. Typical examples of public nuisances that should be controlled are matters that relate to noise control, zoning-scheme contraventions and aspects that have their origin in bad neighbour relations. Municipalities should ensure that community members live as far as possible in harmony with one another and that clear and effective mechanisms exist in order to address any negative or nuisance-like actions or activities that do arise.

---

poser systems. As is the case with many other services, water and sanitation services should link up with national and provincial programmes and initiatives.

135 2004 (3) SA 223 (N).
136 See pages 228-229.
• Control of undertakings that sell liquor to the public The selling of liquor to the public has always been a contentious and often difficult issue, as there are many negative consequences attached to such activities. Because of the enormous extent of the liquor industry and liquor consumption in our country, control over the liquor trade is something that must be exercised in all three spheres of government. Various national and provincial laws are directed at the liquor trade, and municipalities must also do their bit in order to complete and enhance the overall regulatory framework.\textsuperscript{137}

• Facilities for the accommodation, care and burial of animals The keeping of animals for farming or as pets is part of human life all over the world. To accommodate aspects relating to animals, especially within modern urbanised areas, certain services should be provided to address issues such as the accommodation, care and disposal of animals. Often the neglect of such services could lead to health risks or could even cause the outbreak of infectious diseases, which in turn could have enormous consequences, not only within a particular municipal area but even for the country as a whole.\textsuperscript{138}

• Fencing and fences Depending on local circumstances, issues relating to fencing and fences within a municipal area could also have important implications. Not only are fences and issues relating to fencing important for private and public safety reasons, they often also assist in preventing damage to property or even disputes relating to ownership of goods or animals. The control and services relating to fences are therefore often more important in rural or farming communities than in some urban developments.

• Licensing of dogs Mention was made of the fact that many people keep so-called “domestic animals” as pets on their properties. The control over such animals is much less of a problem in rural communities, as they are within modernised towns or cities. Arguably the most common domesticated pet and security measure is a dog. In light of the nature of such animals, certain minimum controls should be exercised, and thus municipalities are empowered to insist that dogs within their areas of jurisdiction be licensed.

\textsuperscript{137} Eg, see the Liquor Act 27 of 1989 as amended.
\textsuperscript{138} One should recall the attention that was given to the outbreak of mad cow disease and foot and mouth disease in Britain, eg, to see what devastation such diseases can create within a country.
- **Licensing and control of undertakings that sell food to the public** In an effort to ensure and enhance public health standards, municipalities should provide for measures that regulate the licensing and the control over undertakings that sell food to the public. There are various standards and requirements that must be enforced to ensure and promote a safe and healthy environment.\(^{139}\) Municipalities are often best suited to ensuring and enforcing such standards and requirements.

- **Local amenities** Municipalities should make a determination with regard to local needs in respect of possible amenities and should then provide, manage and control such amenities. The availability of resources and budget priorities would impact considerably on the variety and extent of local amenities provided. General amenities are municipal pools, picnic areas, caravan parks and even resorts.

- **Local sport facilities** South Africa is generally recognised as a sporting nation. Our climate and weather patterns allow for favourable outdoor sporting activities. Sport forms an important part of many people’s private lives and social interactions. Most people do not have the financial capacity to build and maintain their own private sporting facilities. Local governments are therefore tasked and best suited to provide, manage and maintain such facilities.

- **Markets** In large metropolitan areas, some municipalities also provide and manage market facilities. A market is a place where people trade in various items, but mostly in foodstuff. The existence of fresh produce markets or wholesale flower markets is well known in this respect.

- **Municipal abattoirs** In same instances, and depending on local circumstances, some municipalities are also required to provide and control municipal abattoirs. An abattoir is a place where animals are slaughtered and meat is prepared for public consumption. Strict hygiene and health requirements must be adhered to at all times.

- **Municipal parks and recreation** All municipalities should provide so-called “open spaces” or municipal parks where members of local communities can relax and

\(^{139}\) Note the case of *Amalgamated Beverage Industries Natal (Pty) Ltd v Durban City council* 1994 (3) SA 170 (A). The appellant, a bottler and distributor of soft drinks, was convicted in a magistrate’s court of contravening by-law 18(c) of the City of Durban Food By-Laws, which had been promulgated in terms of the Local Government Ordinance 21 of 1942 (N) s 197(1)(f). The conviction was based on an admission at the appellant’s trial that it had sold a bottle of carbonated mineral water which contained a bee to a supermarket in Durban. The magistrate found that by-law 18(c)
where children can meet and play. In modern urbanised areas, many residents in high-rise compartment blocks do not have gardens or play areas of their own. It is thus a responsibility of municipal governments to create and maintain such public recreational areas.

- **Municipal roads** Municipal infrastructure plays an important role in achieving social and economic development and ensuring that other essential services can also be rendered. In this regard, the proper control and maintenance of municipal roads are of paramount importance. The control and maintenance of municipal roads cannot be done on an isolated basis and must interact with national and provincial initiatives and schemes. Maintenance of municipal roads also includes the provision and maintenance of storm-water systems citywide.

- **Noise pollution** Within the new constitutional scheme, environmental issues are the responsibility of all three spheres of government. Various national and provincial laws are applicable in order to enhance the protection of environmental demands and requirements. Noise pollution, especially in urban areas, is an aspect that ties in with other environmental interests, and municipalities are best suited within their local jurisdictions to address and control such a matter.

- **Pounds** It is advisable for municipalities to provide for so-called “municipal pounds” where stray animals, illegally parked vehicles or other unauthorised goods can be stored and secured. Pounds vary accordingly to what is to be secured. Proper measures should be introduced to ensure that municipal councils do not incur civil liability for goods or property that have been impounded.

- **Public places** The provision and maintenance of public places is also an important local service that should be provided to local communities. The availability of finances will determine to what extent such places can be afforded.

- **Refuse removal, refuse dumps and solid waste disposal** It is an essential service for municipalities to provide for both domestic and industrial refuse or solid waste removal and dumping facilities. Such services are needed in every community and must be rendered and controlled effectively in order to prevent possible health risks. Because of environmental importance, services relevant to refuse removal,

imposed a strict liability. The court held that the contamination was foreseeable and that the appellant had been negligent in preventing foreign objects from passing into the consumable products.
dumps and solid waste disposal mechanisms must comply with legislative requirements from the higher spheres of government.

- **Street trading** Many municipal functions and services are interrelated with other services. The control and management of street trading is a good example. Street trading also ties in with general trading regulations and is directed at controlling and managing trading activities that are conducted next to municipal streets. Other functions such as traffic, parking and municipal roads are also relevant to trading services.

- **Street lighting** Apart from addressing the services relating to municipal roads and public transport, municipalities should also provide street lighting in certain areas. The provision of street lighting is particularly important for road safety and personal security. Not all municipal roads can be provided with lighting facilities, and municipalities should conduct investigations to determine which streets require lighting.

- **Traffic and parking** Traffic control and parking facilities are among the most common municipal services that have been rendered over the years. Such services must interrelate with other similar services such as municipal transport and municipal roads. Various national and provincial laws also exist regarding such matters and must be complied with in the fulfilment or rendering of such services. Traffic control is regarded as an area-bound service and should be managed through strict command and control procedures.

The abovementioned areas of municipal service provision have been entrenched within the new constitutional dispensation of South Africa and cannot be taken away unless the Constitution so permits. Apart from the areas mentioned in the Constitution, some older laws that are still in place and in effect also identify and confirm certain services or functions to be fulfilled by local governments. Some such services or functions are the following:

- **Civil protection services** All municipalities should plan and provide for emergency protection or even disaster management services. In this regard, all possible scenarios should be investigated and potential crisis areas or hazards should be identified. Common aspects that should be provided for are, for example, floods or

\[^{140}\] See the Constitution Sch 4 and 5 Part B.
other natural disasters, outbreaks of infectious diseases and possible human-made emergency situations such as terrorist attacks or arson incidents. The prevention and management of such incidents is very important and should not be neglected.\textsuperscript{141}

- **Housing** All spheres of government are involved in providing housing services in South Africa. Therefore, housing is one of the most needed commodities in our new state. Many people are living in extreme poverty and with no roof over their heads. Because of the special need of new houses, the national government has introduced various housing schemes.\textsuperscript{142} Broadly speaking, the provision of housing services includes aspects such as low-cost housing, modern township developments, retirement homes and facilities, as well as rental properties. Municipalities must interact with the programs of the two higher spheres of government and must also assess and evaluate local housing needs. It is submitted that without the provision of proper housing services there can be no real social and economic development. Housing is thus a high priority service in the new governmental systems in South Africa.

- **Licensing services** In many instances municipalities are tasked with certain licensing services that are to be performed within their areas of jurisdiction. Such services are often required by either national and provincial laws, which in turn mandate local authorities to act as a so-called “controlling” or “inspection” authorities. Examples of these services include business- and vehicle-licensing services, inspection of the premises of liquor-selling businesses and also building regulation fulfilments.

- **Civic centres, city halls and public libraries** Over the years, it has been customary for local authorities to provide and maintain civic centres and city halls. Such centres play an important role in building a local symbolic identity. City halls or civic centres provide a place for public gatherings, official and ceremonial functions and also cultural activities. It is obvious that such centres fulfil an important role in local community activities. Such services are very expensive, however, and careful pri-

\textsuperscript{141} In South Africa special attention must be given to frequent fires that occur within rural areas and also within informal settlements. As prevention is better than cure, local governments should not be unaware of the devastating effect such incidents could have on local communities.

\textsuperscript{142} See, eg, the Redistribution and Development Program, which specifically provides for the provision of housing developments.
oritisation should be done locally. Building town halls or city halls is very costly, but most towns or cities in South Africa already possess one, and these should be maintained and controlled.\(^{143}\) Providing a library service is not a specific function of municipalities, but many municipalities often provided such a service. A library service is directed at serving the local population through the provision of educational and recreational information. In light of modern electronic development, such centres should also provide internet and even e-mail facilities.

- **Law enforcement and municipal police services** It was explained above that municipalities have various law-enforcement obligations and services that must be rendered. Such services differ from building inspections, town planning scheme control, various health and safety measures and also road traffic law enforcement. Apart from providing such services, municipalities are also permitted to establish and maintain a municipal police service.\(^{144}\) It should be pointed out that local governments do not have an automatic right to establish a municipal police service.\(^{145}\) Specific requirements must be met before permission can be granted for the establishment of a municipal police service.

### 16.5 Conclusion

As is the case with many other aspects of the new local government dispensation, it is imperative that municipal services and service provision should comply and conform to the new constitutional vision and requirements. Municipal services must be equitable and accessible for all local residents and must enable all municipalities to achieve and fulfil their objectives and duties.

The basic municipal services are set out in Part B of Schedules 4 and 5 of the Constitution. Apart from such services, national or provincial governments may as-

---

\(^{143}\) City halls are often rich with local heritage and traditions.

\(^{144}\) According to the Constitution s 205(1), the national police services must be structured to function in the national, provincial and, where appropriate, local spheres of government. S 206(7) further states that national legislation must provide a framework for the establishment, powers, functions and control of municipal police services. For more detail, see the South African Police Service Act 68 of 1995.

\(^{145}\) In re Certification of the Constitution of the RSA, 1996 1996 (4) SA 744 (CC) the Constitutional Court held that whereas the interim Constitution required provision to be made for the establishment by a local government of a municipal or metropolitan police service whose functions would be restricted to crime prevention and the enforcement of municipal and metropolitan by-laws, there was no comparable provision in the new text. Local policing was a matter to be dealt with by an Act of parliament. See paras 395-401 at 888-890.
sign other matters to municipalities via legislation. One can thus conclude that municipal services are not absolutely defined or identified and can differ from one municipality to another as circumstances may require. Within the new local government legislative framework there seems to be rediscovery of the basic essential services that a municipality is supposed to render. This development has caused almost all local governments to focus mainly on the core services and to deregulate or even privatise many other secondary services.

The Constitution compels all municipalities to strive within their financial and administrative capacities to achieve the objectives and therefore the services that were identified above. Services should be provided and rendered to uplift and enhance the quality of life of all local people without a sacrifice in quality or sustainability. In many cases services should be decentralised or even privatised in order to allow local governments all over South Africa to focus and achieve their main constitutional service objectives.

---

146 See the Constitution s 156(1)(b). Subs (4) further enhances such assignment as national and provincial governments must assign to a municipality the administration of a matter listed in the Constitution Sch 4 or 5 Part A, which matter necessarily relates to local government.
17

Municipal personnel, labour relations and staffing matters

17.1 Introduction

It is an obvious observation that no municipality would be able to fulfil its obligations and duties without basic personnel administration and management. Not only are employees necessary, they have to be motivated, dedicated and properly trained. In light of their vast and diverse functions, municipalities need a mix of personnel that vary from general administrative officials, such as administrative clerks and office personnel, to highly qualified experts such as engineers, town planners, lawyers, accountants and personnel managers. Without the abovementioned personnel corps in place, no municipal government will be able to perform and fulfil its constitutional duties and obligations, and the Constitution specifically states that a municipal council may employ personnel that are necessary for the effective performance of its functions.\(^1\) All municipalities therefore have to evaluate and determine their specific personnel needs in order to perform their functions. It goes without saying that it is not only the appointment of personnel that is important in this regard; so is the management, control and performance measurement of such personnel.

According to the Constitution, municipalities have significant powers regarding personnel matters.\(^2\) One must be aware of the fact that other national or provincial legislation also impacts on personnel matters or even labour relations, however, and that municipalities may not act contrary to such laws.\(^3\) When municipal personnel, also often referred to as the municipal administration, is discussed, it is again important to remember the three components that together complete a local government. All

---

\(^1\) See the Constitution s 160(1)(c).

\(^2\) The Constitution s 156(5) states that a municipality has the right to exercise any power concerning a matter that is reasonable necessary for, or incidental to, the effective performance of its functions (own emphasis added). Since the appointment of personnel is essential for the effective performance of municipal functions, municipalities should be able to exercise strong powers in this respect.

\(^3\) See the Constitution s 156(3).
municipal governments consist of a combination of political functionaries, administrative personnel and a specific local community.\(^4\) Together the three components comprise a municipal government. The importance of a municipal personnel corps is thus self-evident. However, one should guard against possible confusion between municipal administrative personnel and office bearers representing political structures. Municipal personnel are not elected political representatives; they are employees in the normal sense of a municipal council.\(^5\)

17.2 The broad organisational structure and overall personnel administration of local governments

17.2.1 Basic organisational systems

In the past the organisational structure of a municipal government could be compared with a human body:

- A particular structure (the skeleton) exists to ensure effectiveness.
- Staff (the muscles) are needed to perform functions and ensure movement
- A decision-making body (the brain) is required, through which communication is achieved between the decision-making body and the staffing component, which must then perform the instruction given.\(^6\)

Broadly speaking, two types of organisational structure have been identified. There is the *mechanistic/closed type* of structure, in which duties are precisely defined and where a high value is placed on precision, specified job descriptions and strong loyalty to the organisation. Functional tasks are differentiated, and there is a hierarchical structure of command. The manager or head of the organisation is often deemed to be omniscient, as he or she possesses all important knowledge. Factors such as authority, coordination and efficiency are strongly emphasised. Job responsibilities are mainly routine, with most decisions and knowledge coming from the top.

Contrary to the closed organisational structure, one finds the *organic or open type* of organisational structure. Such a structure was developed and adopted to handle...

---

\(^4\) See ch 7 of the work and also the Systems Act s 2(b)(i) and (ii).

\(^5\) Again notice should be taken of the fact that it is a municipal council, as a legal entity that acts as an employer and that appoints or concludes services/employment contracts with potential employees. The position regarding political office bearers, as was discussed elsewhere, is quite different. Anyone who is appointed by or in the service of a municipality is normally not eligible to be a member of the political component of that municipal council. Refer to the Constitution s 58(1)(a) and (b).

unstable and continuously changing conditions. Many internal jobs have little formal
definition, and functions are not precisely demarcated. Responsibilities and tasks are
constantly redefined. In an organic structure the emphasis is on getting the job done,
and thus individual responsibilities are not precisely defined. It is also possible to
find institutions that incorporate a combination of the two types of organisational
structure.

From a municipal government point of view, municipalities exist to provide services
to their inhabitants. They must therefore have a structure within which staff can be
deployed and organised to ensure that the required services are indeed provided.
Craythorne mentions that in the South African local government of the past it was
usual to encounter two forms of organisational structure. One was identified as a
long, flat organisation with many departments. The other form was more of a py-
ramidal type, with fewer departments.

(A)

In more recent years, a new local government organisational structure, generally termed the business unit model, was developed. In such a model, the municipal organisation is divided into semi-autonomous business units. Especially from a concentration of skills and expertise point of view, the business unit model has definite advantages.

(B)

Specialised branches within departments

(C)

It is important to remember, however, that in a public-sector body, where control over policy and decision making is necessarily political, it is not possible to have a truly decentralised structure. Although many decisions should be delegated to strategic officials, ultimately the overall policy and political decisions must be made at municipal council level.
In the new local government dispensation, municipalities have been established and are constitutionally required to render effective, efficient and sustainable services. Depending on the services, this obligation often requires professional experts and technicians and a careful preplanning and evaluation of the organisational structure is thus essential. It is also generally accepted that the personnel of specialised services such as engineering, town planning, accounting and also legal services should not be lumped together, but should rather be placed within separate specialised units, which are then tasked with only that specialised service.9

17.2.2 Internal mechanisms to enhance organisational efficiency

No organisation can be efficient and effective without certain control measures’ being put in place. It is a fact of any organisational structure that not all members or staff can be expected to meet standards voluntarily. Measures of control in local governments arise from various sources, such as from the political leadership, internal leadership structures and even through public complaints and requests. The main objective of control within the public sector is to ensure accountability for everything the public authority does.10 Another form of external control over the public sector is via the law and judicial structures. Many legal rules have been developed to ensure that the public service is regulated within certain minimum standards. The judicial structures are also properly empowered to oversee public sector compliance with the law.11

Local governments should further also guard against the familiar concept of empire building in public structures. Empire building arises mostly from personal motivations such as ambition, a desire for status, a lust for power and also professional jealousy. Status-driven and power-orientated personnel see the organisation in which they work merely as a tool for achieving personal goals. Ineffective and unnecessary empires are commonly developed through a process of lengthening work outputs

9 See Craythorne (1997) 290. In many instances, professional personnel are controlled and supervised by their professional body (eg the South African Law Society for attorneys, and a minimum standard of professionalism is required which may not be reduced or limited by political intervention. A municipality can therefore not prescribe to a professional employee such as a civil engineer to design structures that would not comply with minimum safety requirements but would save the municipality lots of money. Minimum professional standards may never be compromised.

10 For more on this point see Cloete (1997) 184, and also Craythorne (1997) 297.

11 Within the new constitutional dispensation of South Africa, the importance of control and minimum standard setting within the public sector is strongly echoed in the Constitution ch 10, which sets basic values and principles to which the public administration must adhere. See the Constitution s 195 in particular.
and by creating the impression that a certain post has more responsibilities than it really has. This is then followed by requests for additional posts and the upgrading of the original post to a unit supervisor or leader.

One should not mistake genuine personnel enlargements with the concept of empire building, however. Many municipalities in South Africa are facing severe shortages of qualified and properly trained personnel. There are many internal departments that are functioning with only 50% or even less of the minimum staff that are required to perform the particular workload. This situation has become critical since the commencement of the final phase of the new local government restructuring. Many newly established municipalities have lost vast numbers of highly trained and experienced municipal personnel and do not have appropriate replacements on hand. This situation has resulted in many inexperienced personnel being appointed to often strategic positions or municipal councils being indecisive in appointing and filling urgently needed vacant posts.

Since the beginning of the restructuring of local governments, it has always been envisaged that the overall internal organisational structures of all municipalities should be reviewed and reorganised. This is a difficult and ongoing process, however, and many local governments are in need of professional assistance to achieve a genuinely effective and streamlined municipal corps. Most jobs will have to be reanalysed to ensure that they are suitably defined.

Another important aspect of a municipal organisation is municipal leadership. Every municipal structure must have a leader that is not only knowledgeable in terms of local government affairs but who is also followed and respected by the general personnel corps. Municipalities differ from many other organisations in that they have a number of leaders, such as the councillors, the municipal manager, heads of department and sub-units. Each official in charge of a unit is a leader, but at a different level.\(^{12}\)

No organisation can establish and maintain a successful organisational structure without a proper personnel administration in place. Personnel administration is a key activity in local government administrations and, if handled effectively, it will contribute significantly to the existence and maintenance of a healthy municipal organisa

tion. Even the smallest local authority must devote some of the time allocated to administrative duties to employment-related matters such as conditions of service and remuneration and recruitment/appointment procedures. Municipal councils should provide for at least the following regarding personnel management:

- a written service contract which explains the general conditions of service
- an employee file setting out the date of appointment, the position and basic remuneration package
- basic job description lists
- grievance and disciplinary procedures.

Every council should have a data base containing a record of all the posts and jobs in that council’s service. In planning and improving on the structure of a municipal organisation, posts should be ranked and grouped together in appropriate departments or sectors. It is also a good policy to review the staff establishment periodically in order to ensure that the administrative structure is still streamlined and effective.\(^\text{13}\) In recent years, many questions have been asked about the overall remuneration packages that are paid to municipal personnel. According to media reports, some municipal managers have even bigger remuneration packages than the president of the country. It follows, therefore, that an urgent investigation of how such remuneration rates are determined should be undertaken. Craythorne identifies methods that can be used to determine an acceptable remuneration rate for a particular post.\(^\text{14}\) The methods are:

- to compare a post with a similar post in the private sector
- to compare posts between different municipal councils
- to use a cost of living index
- to look at customary or trade rates in a particular area.

Apart from establishing an effective administrative personnel corps, municipalities should also ensure that proper manpower planning initiatives are put in place. According to Craythorne, personnel planning is concerned with identifying the personnel needs of a particular organisation. Proper planning is required to replace those staff mem-

\(^{13}\) It is of interest to note that the staff component of a municipality constitutes a large proportion of the costs of that council’s operating budget and that there has to be proper control over the number of posts permitted. Employee remuneration comprises a large part of a municipal budget, and it includes not only the basic salary packages but also issues such as housing subsidies, pension or provident scheme contributions, medical aid, life insurance, bonuses and long-service awards.

bers who leave the organisation by resigning, retiring, or for other reasons. Personnel planning is essential if municipalities are to fulfil their objectives and duties. Apart from personnel planning, municipal councils as employers should also spend considerable time on the motivation and development of their human resources. Often municipal employees work in unpleasant and highly stressful circumstances, and it is important for the managerial structures to ensure that employees are motivated. Without a motivated personnel corps the desired, and indeed required, results are not likely to be achieved. Various practical steps have been developed to motivate employees.16

One of the most important challenges facing the new local government dispensation is ensuring and building properly trained local government administrations. South Africa requires trained municipal employers in order to meet the needs of local populations. Without adequately trained personnel, many service standards will decline, and some municipal governments will not be able to fulfil and adhere to their new constitutional obligations. In an effort to enhance the training of municipal personnel, various initiatives have been introduced which, through proper application, could significantly boost training targets.17

17.3 New legislative provisions regarding municipal staff matters

17.3.1 The appointment and employment conditions of municipal managers

Under the new local government legislative framework, the head of the municipal administration is called the “municipal manager”. In his/her capacity as the head of the administration of a municipality, the municipal manager is tasked with a wide range of responsibilities and is also the final accountable official for many municipal affairs. Both the responsibilities and accountable duties are subject to the policy directions of the particular municipal council, however. It is generally accepted that

---

15 See Craythorne (1997) 317. In essence, personnel planning ensures that an organisation will have and continue to have a certain required number and quality of personnel that are able to perform the tasks of the organisation in order for it to be successful.

16 Some of these steps are: to ensure that the organisation has a shared objective or mission statement; to enhance aspects of team spirit or esprit de corps; by sharing responsibility and authority; by rewarding excellence; by allowing inputs from employees in relation to work procedures; through proper training initiatives; by clearly identifying expectations and tasks; by introducing regular performance appraisals and by treating employees as human beings. See Craythorne (1997) 322-323.

17 See Craythorne (1997) 323 et seq.

18 This office was formerly known as the Chief Executive Officer (CEO) during the transitional phases, and the Town or City Clerk under the old dispensation.

19 See the Systems Act s 55(1).
the municipal manager is the chief of a municipal administration and that he/she is also the chief agent of that municipality. This position has already been confirmed in a number of judicial decisions. In *Gcali NO v MEC for Housing & Local Government, EC*\(^{20}\) the court held that in authorising the institution of legal proceedings, a town clerk acted as an agent for the municipality. Furthermore, when the interests of the municipality so demanded, the town clerk had to act as a *negotiorum gestor* on behalf of the municipality and had no authority to institute legal action on behalf of the municipality without instructions to do so.\(^{21}\) In the case of *King William’s Town TLC v Border Alliance Taxi Association (Bata)*\(^{22}\) it was mentioned that the town clerk as chief executive officer was not merely the recipient of instructions, he/she was

- privy to the council’s deliberations, debates and decisions
- in as good a position as any other to give evidence of the collective mind of the council over years
- the proper person/functionary to testify to the reasons for council decisions.

Such evidence is admissible and relevant to show that the council applied its corporate mind to a particular issue.\(^{23}\) According to the new legal order, a municipal manager is responsible and accountable for the following:\(^{24}\)

- the formation and development of an economical, effective, efficient and accountable administration that is equipped to carry out the task of implementing the municipality’s IDP, to operate in accordance with the municipality’s performance management system and to be responsive to the needs of the local community in order to participate in the affairs of the municipality\(^{25}\)
- the management of the municipal administration in general
- the implementation of the municipality’s IDP as well as the monitoring of progress with the implementation of the plan
- the management of the provision of services to the local community in a sustainable and equitable manner

\(^{20}\) 1996 (4) SA 456 (TkS).
\(^{21}\) See paras E-H at 463.
\(^{22}\) 2002 (4) SA 152 (E).
\(^{23}\) See paras B-E at 156.
\(^{24}\) See the Systems Act s 55(1)(a)-(q).
\(^{25}\) It is therefore the municipal manager’s responsibility to ensure that a proper municipal administration is established and maintained in order for that municipality to fulfil its obligations and duties.
the appointment of staff other than the staff that are appointed by the municipal council itself\textsuperscript{26}

- the management, effective utilisation and training of staff
- the maintenance of discipline of staff
- the promotion of sound labour relations and compliance by the municipality with applicable labour legislation
- advising the political structures and political office bearers of the municipality
- managing the communications between the administration and political structures
- carrying out the decisions of the political structures
- overseeing the administration and implementation of the municipal by-laws and other legislation
- the exercise of any power or performance of any duties delegated by the municipal council or other body under a sub-delegation to the (office of the) municipal manager
- facilitating the participation by the local community in the affairs of the municipality
- developing and maintaining a system whereby community satisfaction with municipal services is assessed
- ensuring or overseeing the implementation of national and provincial legislation applicable to the municipality
- performing any other function that may be assigned by the municipal council to the municipal manager.

A further important responsibility of the municipal manager is to ensure and oversee the municipality’s financial and fiscal matters. The municipal manager is \textit{ex officio} and \textit{ex lege} the accounting officer of a municipality and as accounting officer he/she is responsible and accountable for

- all income and expenditure of the municipality
- all assets and the discharge of all liabilities of the municipality
- the proper and diligent compliance with the Municipal Finance Management Act.\textsuperscript{27}

In light of the aforementioned, it is clear that from an administrative point of view the municipal manager is the final responsible and accountable person in relation to the

\textsuperscript{26} See the Systems Act s 55(1)(e) read with s 56(a). Note that the appointment of staff is subject to various legislative requirements, including the Employment Equity Act 55 of 1998.

\textsuperscript{27} See the Systems Act s 55(2)(a)-(c) as amended by Act 44 of 2003. Refer also to ch 17 of this work.
general obligations and duties of a municipality. It goes without saying that the tasks and responsibilities of the municipal manager are enormous and that, unless he/she is assisted by a dedicated and effective municipal administration, it is difficult to imagine how all the responsibilities falling under such a post can properly be fulfilled.

In an effort to assist a municipal manager in the fulfilment of his/her responsibilities, the new legislative system developed for local government specifically envisages the appointment of managers that are directly accountable to the municipal manager. In this regard it is required that after consultation with the municipal manager a municipal council should appoint a manager (or managers) that are directly accountable to the municipal manager. The appointment of managers should enable a municipal manager to fulfil the diverse responsibilities vested in the position. 28 A person that is appointed as a manager must have the relevant skills and expertise to perform the duties that are associated with the post in question. For example, if a manager is appointed to manage municipal finance, that person must have the necessary skills and expertise to perform such duties. These are usually acquired through academic studies and practical experience. 29

The appointment of municipal managers and other managers accountable to the municipal managers is further regulated through various legislative provisions. In this respect, it is required that a municipal manager or other managers be appointed to such posts only in terms of written employment contracts with the municipality and subject to separate performance agreements that are concluded annually between the council and the incumbents. 30 The performance agreement must be concluded within a reasonable time after a person is appointed and thereafter within one month after the beginning of the municipality’s next financial year. When a performance agreement is concluded with a municipal manager, the agreement must be entered into with the municipality as represented by the mayor or executive mayor, and when

28 Note that it is the responsibility of the municipal council to appoint the managers under the municipal manager. Although prior consultation between the council and the municipal manager should take place, it is still the council’s decision whom to appoint as managers. Only consultation is required; not consensus or agreement. It would be unwise to appoint managers with whom the municipal manager is not satisfied or comfortable, however. A strong and united managerial team should be pursued. Although the Systems Act refers only to the appointment of a manager, it is submitted that the intention of the legislator was the appointment of one or more such managers. See the Systems Act s 56(a).

29 When managers or other personnel are appointed, the requirements of any applicable affirmative action policy should be considered. See the Systems Act s 56(b).

30 See the Systems Act s 57(1)(a)-(b).
entered into with other managers, as represented by the municipal manager. With regard to the performance agreement, it is required that such an agreement include:

- the performance objectives and targets that must be met, as well as the time frames within which targets must be met
- the standards and procedures for evaluating performance and intervals for evaluation
- the consequences of substandard performance.

Finally, it is required that the employment contract for a municipal manager be concluded for a fixed term of employment, which term may not exceed a period ending two years after the election of the next council of the municipality. The term may thus be no longer than seven years. The contract must also provide for a cancellation clause should there be non-compliance with the employment conditions. Although the term of the contract must be fixed, it is possible for the renewal of the employment relationship. The only statutory requirements in this regard are that although the renewal of the employment contract is permitted it can be done only by agreement between the relevant parties. In the last instance, the municipal manager’s employment contract must reflect the values and principles referred to in section 50 of the Systems Act, the code of conduct for municipal staff members as well as the management standards and practices that are contained in section 51 of the Systems Act. On this point it should be noted that the requirements relating to the em-

---

31 See the Systems Act s 57(2) and (3). The employment contract mentioned above must include details of duties, remuneration, benefits and other terms and conditions of the employment. All related employment particulars are subject to applicable labour legislation. It should be noted that under old-order laws, many of which are still applicable, issues such as medical aid schemes, pension schemes etc. were also addressed. Such aspects should be closely considered. See, eg, the case of Munimed v Premier, Gauteng and Others 1999 (4) SA 351 (T), where the court held that by establishing a medical aid scheme contrary to the provisions of s 79bis(1) of the Local Government Ordinance 17 of 1939 (T), the administrator had acted beyond the scope of his powers.

32 The performance objectives and targets must be practical, measurable and based on the key performance indicators set out in the municipality’s IDP. The provisions of the MFMA conferring responsibilities on the accounting officer of a municipality must be regarded as forming part of the performance agreement of a municipal manager. It should also be noted that bonuses based on performance may be awarded to a municipal manager or a manager directly accountable to the municipal manager after the end of the financial year and only after an evaluation of performance and approval of such evaluation by the municipal council. See ss 4A and 4B as inserted by Act 44 of 2003 s 8. Refer also to s 57(5) of the Systems Act.

33 The normal term of a municipal council is 5 years plus the maximum 2 years mentioned above.

34 Such conditions may also include the fulfillment or compliance with the relevant performance agreement conditions as were agreed upon. See the Systems Act s 57(6)(b).
ployment contract of a municipal manager may also be extended to the contract of any other manager that is directly accountable to the municipal manager.\textsuperscript{35}

An aspect that has become very controversial in recent times is the remuneration packages that are paid to municipal managers and other managers. It is reported that in some instances, particularly where metropolitan councils are involved, the municipal managers earn very high remuneration packages; in some cases these are even more than members of the national government. This situation seems somewhat distorted and is currently under investigation. One must remember, however, that a municipal manager is not a political functionary in a municipal government, but is part of the administrative component. A comparison between the salary of such a person and a political functionary is therefore not necessary. Salaries of municipal staff members, including a municipal manager, form part of the public administration and should be regulated under such principles. In principle, it is advisable for government to structure the remuneration of the public service in a uniform manner within all spheres of government and after all relevant considerations have been taken into account. With regard to the remuneration of municipal managers or other managers, the Systems Act required that on or before 31 October of each year a municipality had to publish in the media the salary scales and benefits of the municipal manager and other managers directly accountable to the municipal manager.\textsuperscript{36}

\textbf{17.3.2 Basic principles relating to local public administration and internal municipal organisation}

It was mentioned above that issues concerning the local public administration and internal municipal organisational structures are also regulated within the framework of national legislation and that compliance to such requirements must also form part of the conditions of employment of a municipal manager. With reference to the values and principles of local public administration, the new legislative framework states that the local public administration is governed by the democratic values and principles embodied in section 195(1) of the Constitution. Furthermore, in the administra-

\textsuperscript{35} See the Systems Act s 57(7). Note that the Act ss 50 and 51 deals with the basic values and principles relevant to local public administration and organisational requirements of municipal administrations respectively. Such requirements are discussed below.

\textsuperscript{36} There seems to be no legislative regulation in relation to what such salaries or benefits should be. It is thus up to especially national government to regulate such issues via uniform legislative provisions. Note that s 58 was repealed by Act 44 of 2003 s 9.
tion of its affairs a municipality must strive to achieve the objectives of local government and the general duties of municipalities.37

Apart from the general principles that regulate public administration, all municipalities must establish and organise their administration, within their administrative and financial capacity, in a manner that would enable a municipality to achieve and comply with certain objectives/requirements. These objectives are the following:38

- to be responsive to the needs of the local community
- to facilitate a culture of public service and accountability amongst municipal staff
- to be performance orientated and focused on the objectives and duties of local government in general
- to ensure that political structures, political office bearers and managers and other staff members align their roles and responsibilities with the priorities and objectives set out in the municipality’s IDP
- to establish clear relationships and to facilitate co-operation, co-ordination and communication between political structures, office bearers and the administration and the local community
- to organise the political structures, office bearers and the administration in a flexible way in order to respond to changing priorities and circumstances
- to perform municipal functions through operationally effective and appropriate administrative units and mechanisms, including through departments and other functional or business units; such functions, when necessary, may also be performed on a decentralised basis
- to assign clear responsibilities for the management and co-ordination of the administrative units and mechanisms
- to hold the municipal manager accountable for the overall performance of the administration
- to maximise efficiency of communication and decision making within the administration
- to delegate responsibility to the most effective level within the administration
- to involve staff in management decisions as far as is practicable

37 See the Systems Act s 50(1) and (2). The values set out in s 195 will be discussed in a separate chapter dealing with the basic principles concerning the public administration.
38 See the Systems Act s 51(a)-(m).
• to provide an equitable, fair, open and non-discriminatory working environment.

Suffice it to say that the structuring and management of a municipal administration is quite a complex and extensive exercise. The internal arrangements are therefore likely to differ from one municipality to another as circumstances may require or depending on the category of municipality in question. There seem to be no uniform models of how a municipal administration should be established. What is certain, however, is that municipalities must establish and organise their administrations to ensure compliance with the set criteria, and the way in which the administration is structured and organised may vary from one municipality to another, as long as the minimum objectives are attained. Because of a possible conflict between municipal staff affairs and labour legislation in general, it is determined that in the event of any inconsistency between a provision in the Systems Act relating to municipal organisational matters, including the code of conduct for municipal staff members and any applicable labour legislation, such labour legislation should prevail.\(^{39}\) In this regard it should be obvious that all municipalities under the new local government dispensation must familiarise themselves with applicable labour laws and developments and must ensure compliance with such laws.\(^{40}\)

### 17.3.3 Municipal staff matters

According to the Systems Act, it is the responsibility of the municipal manager to

• approve a staff structure for the municipality
• provide a job description for each post
• attach to the posts the remuneration and service conditions as may be determined
• establish a process or mechanism to evaluate the staff establishment regularly and, if necessary, to review such establishment and the remuneration or conditions of service.\(^{41}\)

---

\(^{39}\) See the Systems Act s 52. In situations of conflict, provisions of the Labour Relations Act 66 of 1995, the Basic Conditions of Employment Act 75 of 1997 or other labour legislation will prevail over the aspects directed at the structuring and management of internal municipal administrations set out in the Systems Act or regulations made under the Act.

\(^{40}\) For examples of such labour disputes see the cases of *Uitenhage Municipality v Molloy* 1998 (2) SA 735 (SCA) and also *Ntshotsho v Umtata Municipality* 1998 (3) SA 102 (Tk). Even part-time employees of municipalities are protected under labour laws, and they cannot be dismissed contrary to their employment contracts and without proper cause.

\(^{41}\) These obligations do not apply to the employment contracts of managers directly accountable to the municipal manager. See the Systems Act s 66(1)-(2). The obligations on the municipal manager are subject to any applicable legislation and the policy framework that has been determined by the relevant municipal council. The protection given under any applicable legislation is to ensure
All municipalities are obligated to develop and adopt appropriate systems and procedures that are directed at achieving fair, efficient, effective and transparent personnel administrations. Such systems and procedures must comply with applicable laws and are also subject to any applicable collective agreements that are in effect. The systems and procedures should provide for the following aspects:\(^{42}\)

- the recruitment, selection and appointment of persons as staff members
- service conditions of staff
- supervision and management of staff
- monitoring, measuring and evaluating the performance of staff
- the promotion and demotion of staff
- the transfer of staff
- grievance and disciplinary procedures
- investigations of allegations of misconduct or complaints against staff
- the dismissal and retrenchment of staff
- any other matter prescribed by regulation.

It is the responsibility of the municipal manager to ensure that every staff member or relevant trade union has easy access to a copy of the staff systems and procedures. On the written request of a staff member, a copy or part of the relevant staff systems and procedures must be made available to that staff member. It is also the responsibility of the municipal manager to ensure that all staff members have been informed about the systems and procedures.\(^ {43}\)

Municipalities should also develop various capacity-building initiatives. All municipalities are obligated to develop their human resources capacities in order to perform their functions and to exercise their powers as is required by the Constitution and other applicable legislation. In this respect, the provisions of the Skills Development Act,\(^ {44}\) as well as the Skills Development Levies Act,\(^ {45}\) are of particular importance and must be complied with. Apart from any training levies required by law, a municipality may in addition provide in its budget for the development and training pro-

---

\(^{42}\) See the Systems Act s 67(1)(a)-(k).

\(^{43}\) Refer to the Systems Act s 67(4)(a)-(c). Special attention must be given to informing staff members who cannot read.

\(^{44}\) 97 of 1998.

\(^{45}\) 9 of 1999.
grammes of municipal personnel. If a municipality does not have the financial means to provide additional funds for training, it may apply to the Sector Education and Training Authority (SETA) for local government for such funds. The SETA was established in terms of the Skills Development Act to assist municipalities in training programmes.46

17.3.4 The code of conduct for municipal staff members

Similar to the position regarding political office bearers of municipalities, all municipal staff members must adhere to a particular code of conduct that is very similar to the code of conduct applicable to municipal councillors. The code of conduct is set out in Schedule 2 of the Systems Act, and it states the following:

- **General conduct** All staff members of municipalities must at all times:
  
  (a) execute loyally the lawful policies of the municipal council
  
  (b) perform the functions of office in good faith, diligently, honestly and in a transparent manner
  
  (c) act in such a way that the spirit, purport and objects of a municipal administration are promoted47
  
  (d) act in the best interest of the municipality and in such a way that the credibility and integrity of the municipality are not compromised
  
  (e) act impartially and treat all people, including other staff members, equally without favour or prejudice.48

- **Commitment to serving the public interest** In light of the fact that every municipal staff member is recognised as a public servant in a developmental local system, all staff members must:
  
  (a) implement the provisions of organisational systems as is set out in section 50(2), (b)
  
  (b) foster a culture of commitment to serving the public, together with a sense of responsibility for performance in terms of standards and targets
  
  (c) promote and implement the basic values and principles of the public administration

---

46 For more details see both the Skills Development Act and Skills Development Levies Act mentioned above. Refer also to the Systems Act s 68(1)-(3).
47 See the Systems Act s 50 for such objects.
48 Refer to the Systems Act Sch 2 Item 2.
(d) seek to implement the objectives of the municipal IDP and to achieve the performance targets set for each performance indicator 
(e) participate in the overall performance management system as well as the individual performance appraisal and reward system.

• **Personal gain** A staff member of a municipality may not use his/her position or privileges or confidential information for private gain or to improperly benefit another person. Personnel may also not take a decision on behalf of the municipality concerning a matter in which that staff member, his/her spouse, partner or business associate has a direct or indirect personal or private business interest. Furthermore, and unless a staff member has obtained prior consent from the council, no staff member may be a party to a contract for the provision of goods or services to the municipality or may not perform any other work for the municipality apart from the duties associated with his/her employment contract. Staff may also not obtain a financial interest in any business of the municipality or be engaged in any business, trade or profession, other than his/her work for the municipality.

• **Disclosure of benefits** Any direct benefit from a contract concluded between the municipality and a staff member or spouse, partner or business associate of such a staff member must be disclosed in writing and with full particulars. This disclosure does not apply to a benefit which a member of staff has acquired in common with all other residents of the municipality, however.

• **Unauthorised disclosure of information** Without permission, members of a municipal staff may not disclose to an unauthorised person any privileged or confidential information obtained. On this point, privileged or confidential information includes any information that
  (a) is determined as such by the municipal council or any of its structures or functionaries
  (b) is discussed in closed session by the council or a committee
  (c) would violate a person’s right to privacy

---

49 See the Systems Act Sch 2 Item 3.
50 According to the Act, a “partner” refers to a person who permanently lives with another person in a manner as if they are married.
51 See the Systems Act Sch 2 Item 4.
52 See the Systems Act Sch 2 Item 5.
(d) is declared to be privileged, confidential or secret in terms of the law.53

- **Unduly influence** A staff member of a municipality may not unduly influence or attempt to influence the council, a structure, functionary, or councillor with a view to obtaining any appointment, promotion, privilege, advantage or benefit, or for such a benefit or advantage for a friend, associate or family member. Furthermore, members of staff may not mislead or attempt to mislead the council, municipal structures or functionaries in their consideration of any matter. No member of staff may be involved in a business venture with a councillor unless prior written consent of the council has been obtained.54

- **Receiving gifts, favours or rewards** Municipal staff may not request, solicit or accept any reward, gift or favour in return for
  
  (a) persuading the council or any structure or functionary to exercise any power or perform any duty
  
  (b) making a representation to the council or any structure
  
  (c) disclosing any privileged or confidential information
  
  (d) doing or not doing anything within that staff member’s powers or duties.55

It seems from the wording of the item that an innocent gift received by a staff member for having done his/her work well or because he/she has “gone the extra mile” would not be in contravention of the code of conduct. Personnel should be very careful, however, and should not accept gifts from the public or immediately report such a gift or favour to their superiors or the speaker of the council. It is common practice for municipal staff to receive flowers, a box of chocolates, a bottle of wine or free tickets for a meal or sports happening as a gesture of appreciation from a member of the local community. The acceptance of such gifts should not be seen as a contravention of the code, but staff should be careful not to create a wrong impression. It is advisable for municipalities to establish a clear policy on such matters.

---

53 See the Systems Act Sch 2 Item 6. It should be noted that the prohibition to disclose information does not derogate from a person’s right to access to information, which is provided for in terms of national legislation. For more, see the Promotion of Access to Information Act 2 of 2000.

54 See the Systems Act Sch 2 Item 7.

55 All staff must report to either a superior official or to the speaker of the council without delay any offer which, if accepted, would constitute a breach of this subitem. Municipal staff are thus obligated to report any attempts from other persons or institutions to solicit a bribe or to try and buy favours. Refer to the Systems Act Sch 2 Item 8.
• **Council property, payment in arrears and staff participation in elections** No member of a municipal staff may use, take, acquire or benefit from any property or asset owned, controlled or managed by that municipality. Again it is submitted that the circumstances of each case will be indicative of whether or not there is a real contravention of this prohibition. Innocent usage, without real benefit to the staff member, should not be regarded as a breach of this item. 56

Similar to municipal councillors, no member of staff may be in arrears to the municipality for rates and services charges, for a period longer than three months. After this period, municipalities are permitted to deduct any outstanding amounts from staff members’ salaries. This stipulation is somewhat controversial, however. Although it is acceptable that staff members and councillors should set an example regarding payment for municipal rates and service charges, it is not clear why outstanding amounts may be deducted from staff members’ salaries but not from the salaries of councillors. 57 Furthermore, it seems unlawful to recover outstanding debts without an investigation regarding the merits of each case. 58 It is submitted that such automatic recovery of outstanding amounts should not be permitted, as it raises several legal and even constitutional issues. Municipalities should be obligated to follow the normal procedure applicable for the recovery of outstanding rates and services charges under the law in general.

A further and somewhat unclear provision in the code of conduct is that municipal staff are prohibited from participating in an election of the council of the municipality, other than in an official capacity or pursuant to any constitutional right. Staff members also have constitutional rights regarding the participation in municipal elections, and the purpose of this item is not clear. 59

---

56 Eg, if a staff member uses the internet and prints a report for a personal use, or if member uses stationery that belongs to the council, such events should not constitute a breach of the code. The well-known maxim of South African law, namely *de minimus non curat lex*, should be applicable in such instances. See the Act Sch 2 Item 9.

57 Cf Sch 2 Item 10 and Sch 1 Item 12A as inserted by Act 51 of 2002.

58 It is quite possible for a municipal staff member to be in a dispute with his/her local municipality and subsequent employer regarding the correctness of a municipal account. To allow a council to deduct any amounts it deems outstanding from the salary of the staff member would not only negatively prejudice such a staff member, but would probably also not pass the test under the Bill of Rights s 36. A staff member should be able to argue that he/she is being treated unequally and that normal recourse under the law has been restricted.

59 See the Systems Act Sch 2 Item 11. See also the Constitution s 19, which refers to the political rights of every adult citizen.
• **Sexual harassment** Following on other legislative prohibitions, no staff member of a municipality may embark on any action amounting to sexual harassment. The purpose of this item is self-evident, and breaches will depend on the circumstances of each case.60

Finally, the code of conduct obligates all staff members to report such possible breach without delay to a superior officer or to the speaker of the council whenever staff members have reasonable grounds to believe that there has been a breach of this code. Any breach or breaches of the code must be dealt with in terms of the relevant disciplinary procedures that are in force within the relevant municipality.61 It is the responsibility of the municipal manager to ensure that a copy of the code of conduct or any amendments thereof have been provided to every member of the staff, if applicable. The municipal manager must also ensure that the purpose, content and consequences of the code have been explained to staff members who cannot read and furthermore to communicate to the local community the sections of the code that affect the public.62

### 17.3.5 Miscellaneous aspects relevant to municipal staff members and the organisational structure of a municipal administration

In order to address any shortcomings in the new legislative framework enacted to regulate the internal organisational structures of municipalities as well as related staff matters, the Systems Act allows the minister responsible for local government to make regulations or to issue guidelines covering a vast array of matters. In relation to the making of regulations, the Systems Act confirms that the following matters may be extended by regulations:63

- the procedure to be followed in appealing against decisions taken in terms of delegated powers and the disposal of such appeals
- the suspension of decision on appeal

---

60 See the Systems Act Sch 2 Item 12.
61 It is thus safe to conclude that a *prima facie* breach of the code does not (allow or) permit a municipality to act against such a staff member other than according to the normal disciplinary processes. A breach of the code thus creates a ground or grounds for further disciplinary action and does not allow immediate termination of the employment relationship between the parties. See the Systems Act Sch 2 Items 13 and 14 as amended. Note that a breach of the code is not only a ground for dismissal or other disciplinary steps, but that such steps may include a suspension without pay for no longer than three months; a demotion; a transfer to another post; a reduction in salary, allowances or benefits or an appropriate fine. See item 14A as added by Act 44 of 2003 s 29.
62 See the Systems Act s 70(1) and (2).
63 See the Act s 72(1)(a)(i)-(vi).
• the setting of uniform standards for municipal staff establishments, municipal staff systems and any other matters concerning municipal personnel administration
• capacity building within municipal administrations
• training of staff, including in-house-training subject to national legislation64
• any other matter that may facilitate the application of the chapter and requirements regarding local public administration and human resources.

On the other hand, it is also provided that the minister may issue guidelines to provide for the following matters:

• the establishment of job evaluation systems
• the regulation of remuneration and other conditions of service of staff members of municipalities
• the measuring and evaluation of staff performance
• the development of remuneration grading and incentive frameworks for staff members
• corrective steps in cases of substandard performance by staff members
• any other matter that may facilitate the implementation by a municipality of an efficient and effective system of personnel administration.

When making regulations or issuing guidelines, the minister must take into account the capacity of municipalities to comply with such matters and differentiate between the different kinds of municipality, according to their capacities. Issues regarding local public administration and human resources which place a financial or administrative burden on municipalities may be phased in by the minister. Such phasing in is done by notice in the Government Gazette.66 Finally, it is also important to note that apart from relevant labour legislation that must be adhered to, municipalities are also obliged to comply with any collective agreements that have been concluded by organised local government within its mandate on behalf of local government in the specific bargaining council that has been established for municipalities.67

17.4 Conclusion

It can be concluded that municipalities, in similar fashion to all other private or public entities, need an effective and efficient personnel corps in order to fulfil their vast array

64 See again the Skills Development Act and Skills Development Levies Act.
65 See the Systems Act s 72(1)(b)(i)-(vi).
66 See the Systems Act s 72(2)-(4).
67 See the Systems Act s 71.
of municipal services and obligations. There is no doubt therefore that municipalities must make every possible effort to maintain, control, educate, train and motivate their respective administrative functionaries. In the past, local governments too often neglected their personnel obligations and political ambitions overshadowed people-related interests.

Under the new local government dispensation a rejuvenated effort has been launched to protect and enhance municipal labour- and staff-related matters. Local government does not operate in an exclusive environment, however, and therefore must adhere to standard labour laws and practices. In light of the specific tasks and obligations of all local governments, it is very important for all municipal administrations to organise and structure their respective administrations in such a manner that optimal efficiency is obtained. Bureaucratic institutions should be avoided and regular evaluation of the organisational structure must be undertaken.

Various new initiatives have been incorporated into the new legal framework to ensure more professional and skilled local government administrations. Such initiatives include inter alia the introduction of key performance indicators to measure overall performance, fixed term service contracts for senior personnel and a comprehensive code of conduct for all administrative staff. A municipal manager as head and chief of the municipal administration has been legally entrenched and is finally tasked with overall personnel accountability. All municipal managers should have strong leadership and human relations qualities, and municipal councils must ensure that properly trained and suitably experienced candidates are appointed to such positions. The influence of the municipal manager is of fundamental importance to the overall success of a particular local government.

With due regard to the various constitutional requirements, such as the principles of the public administration and financial management, read together with the new criteria on municipal administrative management, it is submitted that local governments should be able to perform and fulfil their legal functions and obligations. There seems to be a stronger realisation that without effective and efficient municipal administrations most, if not all, local governments will not be able to succeed in their roles as the third branch of the overall governmental structure of a new and truly democratic state.
Issues relating to municipal finance and municipal fiscal management

18.1 Introduction

The overall reform and transformation of the new local government dispensation has not only affected the composition and internal functioning of all local governments in South Africa, it has also significantly impacted on municipal financial affairs. It is clear that municipalities need adequate financial resources to achieve their new constitutional objectives. From the outset it is important to note not only that municipal income sources should be protected, but also sound expenditure policies and financial control mechanisms must be implemented.¹ In light of the new constitutional dispensation, all governmental expenditure and financial management practices must adhere to the basic values of accountability and transparency.²

Strict control over municipal financial matters is thus a sine quo non for a successful and effective local government sphere.

Against this background, a new legal framework has been developed to manage and control the financial affairs of all municipalities. At the centre of the new framework is the Constitution, which specifically requires that all local governments must be developmentally orientated and that they aim at meeting the basic needs of their respective communities in their budgeting and administrations.³ Furthermore, municipalities must also strive to achieve various constitutional objectives, which spe-

¹ No local government will be able to fulfil its overall constitutional objectives and duties without effective and strict monetary control. See also Cloete (1997) 108.
² These values are the basic foundations upon which the new governmental structure, including the new local government dispensation, is based. Refer also to the Constitution s 1.
³ See the Constitution ss 152 and 153 respectively.
specifically include the provision of basic services to local residents in a sustainable manner.  

In order for the new framework of municipal finance to be effective, the White Paper on local government has identified three aspects which the new financial framework had to incorporate:

- The new system had to be developmentally orientated and had to address the root causes of current financial problems.
- A balance had to be achieved between programmes for poverty eradication combined with strategies of growth and job creation.
- All local governments had to be empowered to fulfil their overall constitutional mandates.

It is further imperative that the new framework recognises and accommodates the difference between the three categories of municipality. In this respect it is important to take cognisance of the fact that urban and rural municipalities have very different financial circumstances and capacities. In light of the abovementioned factors, the Department of Constitutional Development and Local Government has embarked on a programme to establish and enact various legislative provisions in order to establish a broad financial framework for local governments. Although it is hoped that the new legal framework will be effective in order to secure the responsibilities that local governments must meet, the department has encountered many delays in finalising the proposed legal framework.

18.2 The new legislative framework for municipal financial management

Within the new constitutional dispensation of South Africa, all local governments are specifically entrenched as being part of the government of the Republic, and their existence and functioning are thus constitutionally controlled and regulated. This is also the position regarding the principles of municipal finance. The Constitution pro-

---

4 In this regard it is submitted that sustainable services refer to services that can be continued on a day-to-day basis. Apart from sustainability, services should also be affordable to all members of local communities which in turn often require some form of local cross-subsidisation within a matrix of affordability, efficiency and constitutional effectiveness. See Craythorne (1997) 342.

6 See the three categories of municipality set out in the Constitution s 155. Against the backdrop of a combination of various factors, such as the system of segregation, poor administration and inadequate control measures, many local governments, especially in rural areas, do not have adequate tax bases to fund and sustain basic service delivery.

7 It took nearly five years to finalise the new Local Government: Municipal Property Rates Act, and the Local Government: Municipal Finance Management Act.
vides the basic foundation and directives which have to be observed and complied with by all spheres of government, including municipalities. In relation to municipal finance, the Constitution incorporates various directives, and accordingly the new restructured system of municipal finance needs to be founded on the supreme constitutional foundation. Apart from such constitutional provisions, both national and provincial legislatures are authorised to enact further legal rules in order to complete the new envisaged system. Each of the new legislative sources is discussed below.

18.2.1 The broad constitutional foundation relevant to municipal finance

According to the Constitution, all municipalities are obligated to structure and manage their administrations, budgeting and planning processes in such a way as to give priority to the basic needs of their respective communities and also to promote the social and economic development of such communities. In order to achieve these constitutional duties, all municipalities are obligated to participating in national and provincial development programmes. 8 A further important constitutional requirement that impacts on municipal financial affairs is the fact that neither national government nor provincial governments may compromise or impede a municipality’s ability or right to exercise its powers or perform its functions. Both higher spheres of government must support and strengthen the capacity of municipalities to manage their own affairs and to exercise and perform their powers and functions. 9 It is clear from the constitutional text that the two higher spheres of government have a significant responsibility to ensure that municipalities are capacitated and able to perform their powers and functions. Apart from the provisions mentioned above, the chapter on local government in the Constitution contains no requirements regarding the system of municipal finance. However, the broad requirements relating to municipal finance are set out in chapter 13 of the Constitution, which deals with the financial affairs of all three spheres of government. In this regard, the Constitution deals with the following:

- **National revenue fund** The Constitution determines that a national revenue fund be established and that all money which is received by the national government

---

8 Refer to the Constitution s 153. This section must be read together with s 152, which confirms the various objects that municipalities must strive to achieve, depending on their financial and administrative capacities.

9 See the Constitution s 151(4) read with s 154(1).
be paid into such national revenue fund. Only money that is reasonably excluded by an Act of parliament may be deposited in another fund(s).\footnote{See the Constitution s 213(1)-(3).}

- \textit{Equitable shares and allocations of revenue} According to the Constitution, an Act of parliament must provide for \textit{inter alia}, the equitable division of revenue that has been raised nationally among the national, provincial and local spheres of government and also for any other allocations of revenue to provinces. The Act must also provide for any other allocations to the provinces or \textit{local government or municipalities} from the national government’s share of that revenue and any conditions on which those allocations may be made.\footnote{Refer to the Constitution s 214(1)(a)-(b). In compliance with s 214(1)(a) national parliament has enacted the Division of Revenue Act 7 of 2003. The Act specifically provides for the equitable division of revenue between the three spheres of government.} The Act of parliament that regulates the equitable share and allocation of revenue raised nationally may be enacted only be after the provincial governments, Organised Local Government (OLG) and the Financial and Fiscal Commission (FFC) have been consulted, and after any recommendations of the commission have been considered. Furthermore, the Act must take various factors into account, such as \textit{inter alia}:

\begin{itemize}
\item (a) the need to ensure that the provinces and municipalities are able to provide basic services and perform the functions allocated to them
\item (b) the fiscal capacity and efficiency of the provinces and municipalities
\item (c) the developmental and other needs of provinces and municipalities
\item (d) the various obligations of the provinces and municipalities that have been allocated to them in terms of national legislation.\footnote{For more details see the Constitution s 214(2)(a)-(j). The use of the terms “local governments” and “municipalities” in s 214 is somewhat unclear and unnecessary, as both terms are synonymous with one another.}
\end{itemize}

In essence, the Constitution addresses intergovernmental fiscal relations in two broad respects. On one hand the Constitution entitles the local sphere of government to an equitable share of revenue raised nationally. Such sharing of national revenue is generally referred to as “intergovernmental transfers” (IGTs). Apart from the entitlement to share in revenue, the Constitution specifically entrenches oversight and regulation of the financial affairs of municipalities in the national government.\footnote{This oversight and control is protected in various sections of the Constitution. For more details, refer to the Constitution ss 100, 139, 155(7), 229 and 230A. Many other sections regarding continued on next page}
• National, provincial and municipal budgets  The new constitutional dispensation envisages an overall financial system for all spheres of government that is transparent, effective and accountable and regards it as obligatory. All national, provincial and municipal budgets and budgetary processes must promote transparency, accountability and the effective financial management of the economy, debt and the public sector.\textsuperscript{14} Again, the Constitution itself requires national legislation to further complete and regulate such financial processes. The national legislation must prescribe the form of the budgets in all three spheres of government, and all budgets must show the sources of revenue and the way in which proposed expenditure will comply with national legislative requirements.\textsuperscript{15} The Constitution further determines that each budget in each sphere of government, including all municipal budgets, must contain specific information. For example, each budget must contain estimates of revenue and expenditure, proposals for financing any anticipated deficit and an indication of intentions regarding borrowing and also other forms of public liability that will increase public debt.\textsuperscript{16}

• Treasury control and procurement  The Constitution also requires national legislation to establish a national treasury and to prescribe measures to ensure both transparency and expenditure control in each sphere of government. Such measures are to be achieved by introducing generally recognised accounting practices, by uniform expenditure classifications and through uniform treasury norms and standards. It is the responsibility of the national treasury to enforce compliance with the measures that have been mentioned above. If an organ of state commits a serious or persistent material breach of the mentioned measures, then the national treasury may stop the transfer of funds to that organ or organs.\textsuperscript{17} It is evident that the Constitution, as with other issues, vests the final oversight and control with the national sphere of government, within which sphere the national treasury operates. This is also the case concerning municipal treasury control.

\textsuperscript{14} See the Constitution s 215(1).
\textsuperscript{15} Refer to the Constitution s 215(2)(a)-(c).
\textsuperscript{16} See the Constitution s 215(3)(a)-(c).
\textsuperscript{17} See the Constitution s 216(1) and (2).
Requirements regarding aspects of procurement These are also constitutionally entrenched. When an organ of state in any sphere or any other institution so identified in national legislation contracts for goods or services, it must do so in accordance with a system which is fair, equitable, transparent, competitive and also cost effective. Procurement procedures or policies may further provide for categories of preference in the allocation of contracts and also for the protection or advancement of persons or categories of persons that have been disadvantaged by unfair discrimination.\(^\text{18}\) National legislation must again prescribe a framework within which the procurement policy is to be implemented.\(^\text{19}\)

In accordance with the abovementioned constitutional imperative set out in section 217 of the Constitution, national parliament has enacted the Preferential Procurement Policy Framework Act (PPPFA).\(^\text{20}\) The main aim of the Act is to give effect to section 217(3) of the Constitution by providing a framework for the implementation of the procurement policy contemplated in section 217(2). The PPPFA determines that organs of state, including municipalities, must determine their preferential procurement policies and also implement them within the following framework:\(^\text{21}\)

(a) A preference points system must be followed.

(b) For contracts with a rand value above a prescribed amount, a maximum of 10 points may be allocated for specific goals as contemplated in paragraph (d), provided that the lowest acceptable tender scores 90 points for price. For contracts with a rand value equal to or below a prescribed amount, a maximum of 20 points may be allocated for specific goals, provided that the lowest acceptable tender scores 80 points for price.\(^\text{22}\)

---

\(^{18}\) This preferential treatment is a good example of so-called “affirmative action” initiatives. It is submitted that although such initiatives are constitutionally permitted, the relevant institutions do not have a carte blanche freedom over the contract requirements with outside institutions. Such appointments or awarding of contracts must also comply with other constitutional requirements. See, eg, the provisions of s 9 (equality) and s 33 (fair administration action) set out in the Bill of Rights.

\(^{19}\) See the Constitution s 217(1)-(3).

\(^{20}\) 5 of 2000.

\(^{21}\) See the PPPFA s 2(1)(a)-(g).

\(^{22}\) “Prescribed” in this sense means prescribed by regulation by the Minister of Finance. See the PPPFA ss 1 and 5 respectively. Read also with the Act s 2(1)(d). Note also that an “acceptable tender” means any tender which in all respects complies with the specifications and conditions of tender set out in the tender document.
(c) Any other acceptable tenders which are higher in price must score fewer points, on a pro rata basis. Points are calculated on their tender prices in relation to the lowest acceptable tender, in accordance with a prescribed formula.

(d) The specific goals may include the contracting with persons or categories of persons that have been historically disadvantaged by unfair discrimination on the basis of race, gender or disability and the implementing of the programmes of the Reconstruction and Development Programme.\(^{23}\)

(e) Any specific goal for which a point may be awarded must be clearly specified in the invitation to submit a tender.\(^{24}\)

(f) The contract must be awarded to the tenderer who scores the highest points, unless objective criteria in addition to those contemplated in paragraphs (d) and (e) justify the award to another tenderer.

(g) Any contract awarded on account of false information by a tenderer to secure preference may be cancelled at the sole discretion of the organ of state without prejudice to any other remedies the organ of state may have in terms of the law.

On request, however, the Minister of Finance may exempt an organ of state from any or all of the provisions of the Act. Such exemption is permitted only if it is in the interests of national security, if the likely tenderers are international suppliers or if it is in the public interest to grant exemption.\(^{25}\) Any procurement processes implemented under a preferential procurement policy, where the invitation to tender was advertised before the commencement of the PPPFA, must be finalised as if the Act had not come into operation. Furthermore, the minister may make regulations regarding any matter that may be necessary or expedient in order to achieve the objectives of the Act.\(^{26}\) With reference to the tender processes of municipalities, the supreme court of appeal in Metro Projects CC and Another v Klerksdorp Local Municipality and Others\(^{27}\) held that any tender process must be fair, equitable and cost effective. As an organ of state in the local government sphere, a municipality, in awarding a tender, is obliged to comply with section...
10G(5)(a) of the Local Government Transition Act,\textsuperscript{28} read with section 217(1) of the Constitution. These provisions mandate it to do so in accordance with a system that is fair, equitable, transparent, competitive and cost-effective. The PPPFA requires organs of State to establish a procurement policy, and also makes it obligatory for the first respondent, as an organ of state in the local sphere, to follow a tender procedure for the procurement of goods and services.

There is also another reason why the tender procedure of a local authority must be fair. Invitations by organs of state to tender and the awarding of tenders where it is done in the exercise of public power is an administrative process. Section 3(2)(a) of the Promotion of Administrative Justice Act\textsuperscript{29} requires the process to be lawful, procedurally fair and justifiable. Fairness must be decided on the circumstances of each case. In given circumstances it may be fair to ask a tenderer to explain an ambiguity in its tender; it may be fair to allow a tenderer to correct an obvious mistake and, particularly in a complex tender, it may be fair to ask for clarification or details required for its proper evaluation. Whatever is done may not cause the process to lose the attribute of fairness or, in the local government sphere, the attributes of transparency, competitiveness and cost-effectiveness.\textsuperscript{30}

- **Government guarantees** Governments, including municipalities, may guarantee a loan or loans only if the guarantee complies with the conditions set out in national legislation.\textsuperscript{31} In order to ensure accountability and transparency, the Constitution demands that every government publish a report each year on the guarantees it has granted. This is an important requirement, since a government guarantee is a legally binding instrument whereby such government has financially bound itself to the extent of that guarantee.

- **The remuneration of persons that are holding public office** In the former system for local government in South Africa, the remuneration of municipal office bearers had a significant impact on municipal finance. According to the Act on the remuneration of town clerks,\textsuperscript{32} the town clerk was the highest paid official of a municipality, and his or her salary scale was the sealing of all salaries for a particular

\textsuperscript{28} 209 of 1993.
\textsuperscript{29} 3 of 2000.
\textsuperscript{30} See pages 20-21.
\textsuperscript{31} See the Constitution s 218. The national legislation referred to in this section may be enacted only after any recommendations of the Financial and Fiscal Commission have been considered.
\textsuperscript{32} 115 of 1984.
municipality. Municipalities were further divided into categories, rated from 1 to 14, 1 being the smallest municipality and 14 the biggest. The top salary, that of the town clerk, was determined according to the specific category. Town clerks of category 14 municipalities earned much more than their counterparts in smaller local government structures. Under the new dispensation, the Constitution requires that an Act of parliament establish a framework for determining the upper limits of salaries, allowances or benefits of inter alia municipal councils of the different categories of municipality. In order to make recommendations concerning the salaries, allowances and benefits mentioned above, the Constitution obligates national parliament to enact national legislation, which must then establish an independent commission to undertake such tasks. The provisions of such a national law may be implemented only by government institutions, including municipalities, after the consideration of any recommendations of the independent commission.

• The establishment of the Financial and Fiscal Commission Under the new financial framework, the Constitution confirms that there is a Financial and Fiscal Commission (FFC) for the Republic of South Africa which makes recommendations on government fiscal matters to parliament, provincial legislatures or other authorities. The commission is independent and subject only to the Constitution and the law. It must also be impartial and must perform its functions in terms of an Act of parliament. The commission consists out of a chairperson and a deputy chairperson, one person nominated by the executive councils of each of the nine provinces, two persons nominated by organised local government and nine other

---

33 See the Constitution s 219(1)(b). It is interesting to note that only the upper limit of salaries, allowances or benefits of members of provincial legislatures, MECs and members of municipal councils must be established in terms of national legislation. See the Constitution s 219(1)(a). The Constitution does not require the national Act to prescribe only the upper limits of salaries or benefits of members of the NA or NCoP, cabinet, deputy ministers, traditional leaders or members of councils of traditional leaders. The Act must establish the specific salaries or benefits that are applicable. This position seems to indicate that a similar system as was used under the Act for the remuneration of town clerks is proposed for local government.

34 Refer to the Constitution s 219(2) and (4). In compliance with this requirement, parliament has enacted the Independent Commission for the Remuneration of Public Office-bearers Act 92 of 1997.

35 See the Constitution s 220. Furthermore, the Financial and Fiscal Commission Act 99 of 1997 has been enacted to give effect to the constitutional requirements that relates to the FFC.
persons.\textsuperscript{36} Finally the FFC is obligated to report regularly, both to parliament and to the provincial legislatures.\textsuperscript{37}

- \textit{Provincial revenue funds and national sources of provincial and local government funding} Apart from the national revenue fund, the Constitution also determines that there should be a provincial revenue fund for each of the provinces into which all money received by a provincial government must be paid.\textsuperscript{38} Money may be withdrawn from a provincial revenue fund only in terms of an appropriation allowed by a provincial Act. More importantly is the provision that revenue allocated through a province to local governments in terms of section 214(1) of the Constitution is a direct charge against that province’s revenue fund.\textsuperscript{39} It is furthermore determined that local government and each province is entitled to:

- (a) an equitable share of revenue raised nationally to enable it to provide basic services and to perform the functions allocated to it
- (b) receive other allocations from national government revenue, either conditionally or unconditionally.\textsuperscript{40}

An important provision in this regard is that the Constitution protects additional revenue raised by provinces or municipalities. Such additional revenue may not be deducted from their share of revenue raised nationally or from any other allocations made to them. If a municipality is thus entitled to a specific share of revenue, but it has also earned additional revenue, by whatever means, such revenue may not be deducted from its original share amount. The intention of the constitutional

\textsuperscript{36} There should thus be in total 22 members of the commission. Members must also have appropriate expertise, which would include financial and public affairs expertise. See the Constitution s 221.

\textsuperscript{37} Refer to the Constitution s 222.

\textsuperscript{38} Exceptions may be provided for through an Act of parliament.

\textsuperscript{39} Refer to the Constitution s 226. The Constitution further states that national legislation may determine a framework within which revenue allocated through a province to local government in that province, must be paid to municipalities in the province. In this regard the Intergovernmental Fiscal Relations Act 97 of 1997 has been enacted. The purposes of the act are to promote cooperation between the spheres of government relating to fiscal and budgetary matters, and to ensure equitable sharing and the allocation of revenue.

\textsuperscript{40} See the Constitution s 227(1)(a)-(b). It is of interest to note that in the case of \textit{In re: Certification of the Constitution of the RSA 1996, 1996 (4) SA 744 (CC)} the Constitutional Court held that the absence in the new text of the Constitution of a provision equivalent to the interim Constitution s 158(b), which provided that [the] financial allocations by the national government to local government shall ordinarily be made through the provincial government of the province in which the local government is situated was not a material diminution in the powers of provincial governments. S 158(b) established [only] the possibility, not the certainty, that provincial government could be utilised as a conduit through which funds raised nationally could be allocated to local government.

\textit{continued on next page}
drafters seems to be to promote and encourage provinces and municipalities to implement initiatives, so as to earn additional income. If such income were to be deducted from a municipality’s share in income then there would be no motivation or purpose for it to secure additional revenue. By protecting additional revenue, municipalities are encouraged to devise new initiatives in order to raise more money for themselves and to thus be more able to fulfil and perform their functions and duties. As a counter protection, the Constitution also determines that there is no obligation on the national government to compensate provinces or municipalities that do not raise revenue commensurate with their fiscal capacity and tax base. It is submitted that although national government is under no obligation to compensate the two lower spheres of government for their own ineffectiveness to raise revenue which they should have raised, national government, being the highest sphere of government, is still constitutionally obligated to intervene and oversee the fulfilment of the duties and functions of the lower spheres.

• Municipal fiscal powers and functions

The chapter on finance in the Constitution specifically determines certain fiscal powers and functions for municipalities. In this regard municipalities may impose:

(a) rates on property and surcharges on fees for services provided by or on behalf of the municipality

(b) other taxes, levies and duties appropriate to local government or the specific category concerned if so authorised by national legislation.

Such a section did not purport to create provincial powers in respect of such revenue. See para 430 at 897.

41 See the Constitution s 227(2).

42 See the Constitution ss 100, 139 and 154 respectively. Refer also to the case of Member of the Executive Council for Local Government, Mpumalanga v IMATU and Others 2002 (1) SA 76 (SCA). The court stated that the Constitution ss 139 and 154 do not impose on a provincial government the constitutional duty towards a local authority to provide it with funds to enable it to pay its debts. See paras 8-10 at 79.

43 Refer to the Constitution s 229(a)-(b). National legislation must therefore determine such other taxes or levies before local governments may impose them. See also Gerber and others v Member of the Executive Council for Development, Planning and Local Government, Gauteng and Another 2003 (2) SA 344 (SCA). The case concerned an appeal regarding the legality of land rates imposed on owners of agricultural land. The local authority argued that it was entitled to impose a flat rate under the provisions of the Ordinance for the Transvaal Board for the Development of Peri-Urban Areas 20 of 1943 (T). The court held that the original powers granted to municipalities in terms of the Constitution s 229(1)(a) were to impose a property rate. “Rate” referred to rate on property in relation to size or value of property. S 229 did not depart from such a meaning. The LGTA s 10G(6) stated in pre-emptory terms that if not feasible to value or measure a property, rates could be determined as prescribed. Data of the properties was provided. The court held that there was no correlation between the size of the property and the rate imposed, thus the rate imposed

continued on next page
It is, however, specifically determined that no municipality may impose income tax, value-added tax, general sales tax or customs duty. Such taxes may be imposed only by the national government; not even by provincial governments.\textsuperscript{44}

Municipalities clearly have the authority to impose rates on property and surcharges on fees for services and other taxes, levies or duties. However, such power or authority may not be exercised in a way that materially and unreasonably prejudices national economic policies, economic activities across municipal boundaries or the national mobility of goods, services, capital or labour. National legislation is again envisaged to regulate such powers of municipalities.\textsuperscript{45} When two municipalities have the same fiscal powers and functions in an area, an appropriate division of such powers and functions must be made in terms of national legislation. The division may be made only after at least the following criteria have been taken into account:\textsuperscript{46}

(a) the need to comply with sound principles of taxation
(b) the powers and functions performed by each municipality
(c) the fiscal capacity of each municipality
(d) the effectiveness and efficiency of raising taxes, levies and duties
(e) equity.

There is no prohibition on the sharing of revenue raised between municipalities that have fiscal powers in the same area. It is important that division of powers and the sharing of revenue between municipalities in the same area should be carefully considered and monitored. National legislation as well as the involve-

\textsuperscript{44} See the Constitution s 228(1), which determines that provincial legislatures may impose taxes, levies and duties other than income tax, value-added tax, general sales tax, rates on property or customs duties. See the Constitution s 228(1)(a) read with s 229(1)(a).

\textsuperscript{45} See the Constitution s 229(2).

\textsuperscript{46} Refer to the Constitution s 229(3)(a)-(e).
ment of the FFC should play a vital role in creating an effective and equitable system of sharing revenue.\textsuperscript{47}

- **Municipal loans** The Constitution determines that a municipal council may, in accordance with national legislation:
  
  (a) raise loans for capital or current expenditure for the municipality
  (b) bind itself and a future council in the exercise of its legislative and executive authority in order to secure loans or investments for the municipality.

  It must be noted, however, that loans for current expenditure may be raised only when it is necessary for bridging purposes during a fiscal year.\textsuperscript{48} The national legislation that authorises municipal loans may be enacted only after recommendations of the FFC have been considered.

  It is clear from sections 229 and 230A of the Constitution that the Constitution grants municipalities considerable taxation and borrowing powers, but subject such powers to national legislative control and regulation. Municipal taxation powers are further also limited, in that they may not unreasonably prejudice national economic policies and activities. Finally, the prohibition that borrowings may not fund budget deficits effectively outlaws deficit budgeting on local government level. It is quite evident that the new constitutional framework specifically demands that local authorities adhere to specific constitutional directives when dealing with financial matters. These basic directives may be expanded upon by parliament through the enactment of new national legislation.

18.2.2 The new basic policy objectives

In order to meet the new supreme objectives as set out in the Constitution, a new system of municipal finance had to be created. Such reconstruction had to conform

\textsuperscript{47} The sharing of revenue between municipalities in the same area is applicable only between category B and C municipalities, and national legislation must regulate the position. Such national legislation may be enacted only after organised local government and the FFC have been consulted and any of their recommendations have been considered, however. See the Constitution s 229(5). See also Robertson & Another v City of Cape Town and Another 2004 (5) SA 412 (CPD), where the court held that bilateral consultation had to take place between the FFC and the Minister or Parliament regarding the provisions of the Structures Act as amended, before such provisions could be enacted. Refer to para 109-110 at 446-448.

\textsuperscript{48} The importance of municipal loans should not be underestimated, and such loans could have a significant impact on the fulfilment of the powers and functions of future councils. Because of this important impact, only the municipal council may conclude loans and may not delegate such authority. See the Constitution s 160(2)(d) read together with s 230A.
to a number of basic policy principles. According to the White Paper on local government, the principles for the new system can *inter alia* be summarised as follows:49

- **Revenue adequacy and certainty**  All municipalities need to have access to adequate revenue sources to fulfil their powers and functions. Such sources should then be fully exploited in order for municipalities to meet their developmental objectives. In order to ensure compliance with their objectives, municipalities will need certainty regarding their revenue so as to allow them to plan realistically for the future.

- **Sustainability**  Financial sustainability requires municipalities to ensure that their budgets are balanced. Income should cover expenditure adequately. In order to achieve sustainability, services should be provided at affordable levels, and municipalities must recover the costs of service delivery. Bail-outs for overspending on budgets or improper financial management will not be provided by higher spheres. In this regard, it is the responsibility of the political leadership to ensure that realistic budgets are set.

- **Effective and efficient use of resources:** Generally speaking, municipal resources are scarce and should be used in the best possible way to ensure maximum benefit for local communities. All communities should ensure through participation that their elected municipal council adheres to this important principle.

- **Accountability, transparency and good governance**  Municipalities should be held responsible and accountable to local taxpayers for the use of public funds. Expenditure decisions must be explained in detail. The overall fiscal system should be designed to encourage accountability and should be open to public scrutiny. Community participation in the budgeting processes should be encouraged, and people should understand why decisions or priorities were taken. In general, the accounting procedures should allow for minimal opportunities for corruption and malpractice.

- **Equity and redistribution**  Citizens must be treated equitably and within the ambit of the law. This treatment is also relevant to the provision of services. Municipalities themselves should also be treated equitably by the higher spheres of government regarding intergovernmental transfers. In order to ensure equity, municipalities are allowed to cross-subsidise between high and low-income con-

sumers. The extent of cross-subsidisation is a local choice and needs to be exercised very carefully within the overall framework of a municipality’s integrated development plan.

- **Adhering to national policies** Municipalities form an important part of the public sector in South Africa. Many actions or decisions of local governments can substantially affect national policy. Municipalities thus need to operate and fulfil the obligations within the national macro-economic framework of the state.

### 18.2.3 Financial matters under the Local Government Transition Act

Under the provisions of the LGTA, every municipality had to adhere to certain principles in respect of the management of its financial affairs. In this regard municipalities had to:

- conduct their affairs in an effective, economical and efficient manner with a view to optimising the use of their resources in addressing the needs of the community
- conduct their financial affairs in an accountable and transparent manner
- prepare a financial plan in accordance with the IDP
- structure and manage their administration, budgeting and planning processes to give priority to the basic needs of their communities, to promote social and economic development and to support the implementation of national and provincial development programmes
- manage their financial resources so as to meet and sustain their objectives
- regularly monitor and assess their performance against their IDP
- annually report to and receive comments from their community regarding the objectives set out in their IDPs.

According to the LGTA, the chief executive officer (CEO) was responsible for keeping accounting records that reflected the transactions and financial state of affairs of a municipality. All money received had to be deposited in a banking account in the name of the municipality. Every municipality was also obligated to establish and maintain a system of internal financial control. Furthermore, all municipal financial years were to end on 30 June of each year, and all accounts had to be audited by the Auditor-General. The report of the Auditor- General had to be submitted to the council, and notice of such referral to the council had to be given in a newspaper.

---

50 See LGTA s 10G(1)(a)-(g).
51 See the LGTA s 10G(2)(c)-(d).
circulating in the area. The council meeting on the report had to be open to the public, and the CEO had to be present to answer possible questions in his/her capacity as accounting officer.52

On the point of accountability, the LGTA stated that if a person who is or was in the employ of a municipality caused a loss or damage for the municipality because he/she:

• failed to collect money owing to the municipality for which collection he/she was responsible
• was responsible for an irregular payment of money or payment not supported by a proper voucher
• was responsible for fruitless expenditure due to an omission
• was responsible for the destruction or damage to council property or
• was responsible, due to an omission, for a claim against the municipality, the CEO or the council, who had to determine the amount of such loss or damage, had to take disciplinary action where possible and had to recover the loss or damage in appropriate cases.

Any fraudulent and corrupt actions by employees had to be reported to the SANPS.53 According to the Act, an expenditure was unauthorised if payment was made:

• by the CEO without provision having been made therefore by any budget or if payment resulted in the total amount of the approved annual operating or capital expenditure budget was exceeded
• if the CEO was unable to produce to the Auditor General (AG) or MEC or council authority for the payment as was required by law or where the CEO made a payment inconsistent with a provision by any law.

Any unauthorised expenditure had to be disallowed until approved by the responsible authority. Any unauthorised expenditure had to be recovered from the CEO if he/she was unwilling to recover such from either the beneficiary or person responsible for the expenditure. An interesting provision on this point was that in instances where unauthorised expenditure has been effected on a written instruction of a councillor or as a result of a council resolution in favour of which a councillor voted,

---

52 Refer to the LGTA s 10G(e)(i)-(iii).
53 See the LGTA s 10G(2)(f)-(i).
unless it was recorded that the councillor voted against such resolution, the expenditure had to be recovered from the councillor(s) concerned.\textsuperscript{54}

The LGTA also provided for strong oversight procedures regarding the financial management of municipalities. If the MEC was of the opinion that the finances of a municipality were or became unsound, he/she could instruct the council to take certain steps specified in writing.\textsuperscript{55}

In respect of municipal budgets, the LGTA stated that a municipality had to compile and approve annually a budget with a two-thirds majority of all members of its council. The budget had to provide for operating income and expenditure and for capital expenditure which had to reflect the sources of finance, future capital charges, operating and maintenance costs as well as the consequential influence thereof on levies, rates and services charges. All municipalities had to ensure that they did not budget for a year-end deficit on their operating accounts and that their budgets were in accordance with their IDPs. Expenditure could be incurred only in accordance with the approved budget. Any decision to incur expenditure had to be taken by a majority of votes cast in council. It was also possible for the Minister of Finance to determine maximum expenditure limits for municipal budgets.\textsuperscript{56} If a budget did not comply with the maximum expenditure limits, it had to be referred back to the council for reconsideration and amendment. In some cases, certain exceptions were allowed.

A further important provision in the LGTA was that municipalities had to award contracts for goods and services in accordance with a system which had to be fair, equitable, transparent, competitive and cost-effective. Preference could be given to persons previously disadvantaged by unfair discrimination. In cases of emergency, municipalities could dispense with the calling of tenders or if such option was allowed by law. Properties had to be valued and a single valuation roll for all properties had to be compiled, which had to be open to the public. Councils could levy and recover property rates, and metropolitan councils had to determine a common rating system.

\textsuperscript{54} Refer to the LGTA s 10G(2)(k)-(l).
\textsuperscript{55} See the LGTA s 10G(2)(m)(i)-(iii). The term “unsound” also included any failure to claim or collect income, to control expenditure or to compile and approve an operating budget. If a municipality did not comply to the instructions of the MEC, the MEC could take such steps as he/she deemed necessary to restore the finances to a sound footing.
\textsuperscript{56} See the LGTA s 10G(3)-(4). A municipal budget had to be submitted to the minister of Finance within 14 days of its adoption. The minister could delegate this monitoring power to the MEC.
Municipalities could also levy and recover levies, fees, taxes and tariffs, also known as charges. A municipality could also
• differentiate between different categories of user or property on such grounds as it deemed reasonable
• in respect of charges, amend or withdraw previous determinations
• recover any charges, including interest on any outstanding amount.\(^{57}\)

Municipalities could also obtain money and raise loans for capital expenditure. The Minister of Finance could determine reasonable conditions and criteria regarding loans, however. Loans for bridging finance, which included bank overdrafts, could be raised by a municipality during a financial year only in order to finance current expenditure in anticipation of the receipt of revenue in that year. Municipalities could not raise loans denominated in a foreign currency and were not permitted to incur any other liability or risk payable in a foreign currency without approval by the minister of Finance. Any money borrowed by a municipality was a financial obligation of the municipality and was chargeable and payable from the revenues and assets of that municipality.\(^{58}\)

In respect of investment policies, a municipality could make investment in various instruments with the concurrence of the minister of Finance. Such instruments included *inter alia*
• deposits with registered banks
• securities issued by the national government
• municipal stock
• long-term securities offered by insurance companies.\(^{59}\)

With the concurrence of the Minister of Finance, the minister of Local Government could determine other investment instruments. Full details of any investments had to be published. Finally, municipalities had to ensure that the acquisition, disposal, utilisation, control and maintenance of its assets were carried out in an economic, efficient and effective manner.\(^{60}\)

---

\(^{57}\) See the LGTAs 10G(7)(a)-(b). Decisions regarding charges had to be passed on to the MEC and to the public, who could lodge objections.

\(^{58}\) See the LGTAs 10G(8).

\(^{59}\) See the LGTAs 10G(9)(a)(i)-(ix).

\(^{60}\) Refer to the LGTAs 10G(10)-(12). No claim of any creditor of any municipality could attach or be paid out of the national revenue fund or be paid by the national or any provincial government, unless this was specifically authorised by such government.
18.3 Legislative control mechanisms over municipal finance matters

18.3.1 Parliamentary control

In compliance with the new constitutional demands and in order to secure sound and sustainable management of the financial affairs of municipalities and other institutions in the local sphere of government and furthermore to establish treasury norms and standards for the local sphere of government, the national parliament has enacted the Local Government: Municipal Finance Management Act (MFMA). 61 The object of the MFMA is to be achieved by establishing norms and standards and other requirements for the following issues: 62

(a) ensuring transparency, accountability and appropriate lines of responsibility in the financial and fiscal affairs of municipalities and municipal entities;
(b) the management of revenues, expenditures, assets, liabilities and the handling of municipal financial dealings;
(c) budgetary and financial processes and the co-ordination of those processes with the processes of organs of state in other spheres of government;
(d) borrowing;
(e) the handling of financial problems in municipalities;
(f) supply chain management; and
(g) other financial matters.

18.3.1.1 The broad requirements of the Local Government: Municipal Finance Management Act

(a) Application and aspects of supervision over local government financial management

The MFMA applies to
• all municipalities
• all municipal entities 63
• national and provincial organs of state to the extent of their financial dealings with municipalities. 64

In the event of any inconsistency between a provision of the MFMA and any other legislation in force when the MFMA took effect and which regulates any aspect of the

---

61 56 of 2003, hereafter referred to as the MFMA. See also the long title of the MFMA.
62 See the MFMA s 2(a)-(g).
63 A municipal entity is defined in terms of the Municipal Systems Act s 1.
64 The MFMA s 3(1)(a)-(c).
fiscal and financial affairs of municipalities or municipal entities, the provision of the MFMA prevails.\textsuperscript{65} Draft national legislation directly or indirectly amending the MFMA or providing for the enactment of subordinate legislation that may conflict with the Act may be introduced in Parliament only after the Minister of Finance and the Financial and Fiscal Commission have been consulted in writing on the contents of the draft legislation, and after they have responded in writing.\textsuperscript{66}

The MFMA further determines general functions of the National Treasury and provincial treasuries. The National Treasury must:

- fulfil its responsibilities in terms of Chapter 13 of the Constitution and the Act
- promote the object of the Act as stated in section 2
  - (a) within the framework of co-operative government set out in chapter 3 of the Constitution and
  - (b) when coordinating intergovernmental financial and fiscal relations in terms of the Intergovernmental Fiscal Relations Act, the annual Division of Revenue Act and the Public Finance Management Act\textsuperscript{67} and
- enforce compliance with the measures established in terms of section 216(1) of the Constitution, including those established in terms of the MFMA.\textsuperscript{68}

To the extent necessary to comply with the general functions mentioned above, the National Treasury may:

(a) monitor the budgets of municipalities to establish whether they:
  - (i) are consistent with the national government's fiscal and macro-economic policy; and
  - (ii) comply with chapter 4;
(b) promote good budget and fiscal management by municipalities, and for this purpose monitor the implementation of municipal budgets, including their expenditure, revenue collection and borrowing;
(c) monitor and assess compliance by municipalities and municipal entities with—
  - (i) the act; and
  - (ii) any applicable standards of generally recognised accounting practice and uniform expenditure and revenue classification systems;

\textsuperscript{65} The MFMA s 3(2).
\textsuperscript{66} See the MFMA s 4.
\textsuperscript{67} The Act provided for under the Constitution s 214(1) and also Act 97 of 1997 respectively.
\textsuperscript{68} See the MFMA s 5(1)(a)-(c).
(d) investigate any system of financial management and internal control in any municipality or municipal entity and recommend improvements;
(e) take appropriate steps if a municipality or municipal entity commits a breach of the act, including the stopping of funds to a municipality in terms of section 216(2) of the Constitution if the municipality, or a municipal entity under the sole or shared control of that municipality, commits a serious or persistent material breach of any measures referred to in that section; and
(f) take any other appropriate steps necessary to perform its functions effectively.69

In turn, a provincial treasury must in accordance with a prescribed framework
• fulfil its responsibilities in terms of the Act
• promote the object of the Act as stated in section 2 within the framework of cooperative government set out in chapter 3 of the Constitution and
• assist the National Treasury in enforcing compliance with the measures established in terms of section 216(1) of the Constitution, including those established in terms of the Act.70

To the extent necessary to comply with the abovementioned requirements, a provincial treasury:

(a) must monitor –
   (i) compliance with the act by municipalities and municipal entities in the province;
   (ii) the preparation by municipalities in the province of their budgets;
   (iii) the monthly outcome of those budgets; and
   (iv) the submission of reports by municipalities in the province as required in terms of the act;
(b) may assist municipalities in the province in the preparation of their budgets;
(c) may exercise any powers and must perform any duties delegated to it by the National Treasury in terms of the act; and
(d) may take appropriate steps if a municipality or municipal entity in the province commits a breach of the act.71

---

69 See the MFMA s 5(2)(a)-(f).
70 See the MFMA s 5(3)(a)-(c).
71 The MFMA s 5(4)(a)-(d).
It should be noted that the functions assigned to the National Treasury or a Provincial Treasury in terms of the MFMA are additional to those assigned to the National Treasury or a Provincial Treasury in terms of the Public Finance Management Act.\(^72\) The Minister of Finance, as the head of the National Treasury, takes all decisions of the National Treasury in terms of the Act, except those decisions taken as a result of a delegation in terms of section 6(1). Similarly, the MEC for finance in a province, as the head of the provincial treasury, takes all decisions of the provincial treasury in terms of the Act, except those decisions taken as a result of a delegation in terms of section 6(4). A provincial treasury must submit all information submitted to it in terms of the MFMA to the National Treasury on a quarterly basis, or when so requested.\(^73\)

According to the MFMA, both the National Treasury and provincial treasuries are authorised to delegate their powers. On a national level the minister may delegate any of the powers or duties assigned to the National Treasury in terms of the MFMA to

- the Director-General of the National Treasury or
- the MEC responsible for a provincial department, as the minister and the MEC may agree.\(^74\)

It should be noted, however, that the minister may not delegate the National Treasury's power to stop funds to a municipality in terms of section 5(2)(e).\(^75\) A delegation authorised under section 6(1) is restricted as follows:

(a) must be in writing;

(b) is subject to any limitations or conditions which the minister may impose;

(c) may, subject to any such limitations or conditions, authorise –

(i) the Director-General of the National Treasury to sub-delegate a delegated power or duty to a staff member of the National Treasury; and

(ii) the MEC responsible for the relevant provincial department to sub-delegate a delegated power or duty to a staff member of that department; and

(d) does not divest the National Treasury of the responsibility concerning the

\(^{72}\) 1 of 1999.

\(^{73}\) See the MFMA s 5(5)-(8).

\(^{74}\) Refer to the MFMA s 6(1)(a)-(b).

\(^{75}\) The MFMA s 6(2).
exercise of the delegated power or the performance of the delegated duty.\textsuperscript{76}

The MEC for finance in a province may also delegate any of the powers or duties assigned to a provincial treasury in terms of the Act to the head of the relevant provincial department of which the provincial treasury forms part. Such delegation is subjected to the same conditions as are required on national level.\textsuperscript{77} Both the minister or MEC for finance in a province may confirm, vary or revoke any decision taken in consequence of a delegation or sub-delegation, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.\textsuperscript{78}

(b) Aspects relating to municipal revenue

Under the new legislative framework, every municipality must open and maintain at least one bank account in the name of the municipality. All money received by a municipality must be paid into its bank account or accounts, and this must be done promptly and in accordance with the MFMA and any requirements that may be prescribed. A municipality may not open a bank account:

- abroad
- with an institution not registered as a bank in terms of the Banks Act\textsuperscript{79} or
- otherwise than in the name of the municipality.\textsuperscript{80}

Money may be withdrawn from a municipal bank account only in terms of the procedure set out in section 11(1) of the MFMA.

It is further required for each municipality to have a primary bank account. If a municipality has only one bank account, that account is its primary bank account. If it has more than one bank account, it must designate one of those bank accounts as its primary bank account.\textsuperscript{81} Specific moneys must be paid into a municipality's primary bank account. Such moneys include:

\textsuperscript{76} See the MFMA s 6(3)(a)-(d).
\textsuperscript{77} Read the MFMA ss 6(3) and 6(5) together.
\textsuperscript{78} The MFMA s 6(6).
\textsuperscript{79} 94 of 1990.
\textsuperscript{80} See the MFMA s 7(1)-(2).
\textsuperscript{81} The MFMA s 8(1)(a)-(b).
• all allocations to the municipality, including those made to the municipality for
  transmission to a municipal entity or other external mechanism assisting the mu-
  nicipality in the performance of its functions82
• all income received by the municipality on its investments
• all income received by the municipality in connection with its interest in any mu-
  nicipal entity, including dividends
• all money collected by a municipal entity or other external mechanism on behalf of
  the municipality and
• any other moneys as may be prescribed.83
The accounting officer of a municipality must submit to the National Treasury, the
relevant provincial treasury and the Auditor-General, in writing, the name of the bank
where the primary bank account of the municipality is held and the type and number
of the account. If a municipality wants to change its primary bank account, it may do
so only after the accounting officer has informed the National Treasury and the Audi-
tor-General, in writing, at least 30 days before effecting the change.84
Each accounting officer of a municipality must submit to the relevant provincial
treasury and the Auditor-General, in writing, the following information:
• within 90 days after the municipality has opened a new bank account, the name of
  the bank where the account has been opened, and the type and number of the
  account and
• annually before the start of a financial year, the name of each bank where the
  municipality holds a bank account, and the type and number of each account.85
It is the responsibility of the accounting officer of a municipality to
• administer all the municipality's bank accounts

82 “Allocation” in relation to a municipality means: (a) a municipality’s share of the local govern-
  ment’s equitable share referred to in the Constitution s 214(a); (b) an allocation of money to a mu-
  nicipality in terms of the Constitution s 214(1)(c); (c) an allocation of money to a municipality in
  terms of a provincial budget; or (d) any other allocation of money to a municipality by an organ of
  state, including by another municipality, otherwise than in compliance with a commercial or other
  business transaction. See the MFMA s 1 definitions.
83 Refer to the MFMA s 8(2)(a)-(e). A municipality must take all reasonable steps to ensure that
  all moneys referred to above are paid into its primary bank account. Furthermore, no organ of state
  in the national, provincial or local sphere of government may transfer an allocation of money re-
  ferred to above to a municipality, except through the municipality’s primary bank account. All alloca-
  tions due by an organ of state to a municipal entity must be made through the parent municipality,
  or if there is more than one parent municipality, any of those parent municipalities as may be
  agreed between the parent municipalities.
84 Refer to the MFMA s 8(5).
85 See the MFMA s 9(a)-(b).
• account to the municipal council for the municipality's bank accounts
• enforce compliance with the requirements of the MFMA.

The accounting officer may delegate the duties referred to above to the municipality's chief financial officer only.86

Only the accounting officer or the chief financial officer of a municipality or any other senior financial official acting on the written authority of the accounting officer may withdraw money or authorise the withdrawal of money from any of the municipality's bank accounts, and may do so only:

(a) to defray expenditure appropriated in terms of an approved budget;87
(b) to defray expenditure authorised in terms of section 26(4) of the MFMA;
(c) to defray unforeseeable and unavoidable expenditure authorised in terms of section 29(1) of the MFMA;
(d) in the case of a bank account opened in terms of section 12 of the MFMA, to make payments from the account in accordance with subsection (4) of that section;
(e) to pay over to a person or organ of state money received by the municipality on behalf of that person or organ of state, including –
   (i) money collected by the municipality on behalf of that person or organ of state by agreement; or
   (ii) any insurance or other payments received by the municipality for that person or organ of state;
(f) to refund money incorrectly paid into a bank account;
(g) to refund guarantees, sureties and security deposits;
(h) for cash management and investment purposes in accordance with section 13 of the MFMA;
(i) to defray increased expenditure in terms of section 31 of the act; or
(j) for such other purposes as may be prescribed.88

Any authorisation to a senior financial official to withdraw money or to authorise the withdrawal of money from a bank account must be in accordance with a framework

86 See the MFMA s 10(1)-(2).
87 An “approved budget” means an annual budget (a) approved by a municipal council or (b) approved by a provincial or the national executive following an intervention in terms of the Constitution s 139 and includes such an annual budget as revised by an adjustments budget in terms of the MFMA s 28. See s 1 definitions.
88 See the MFMA s 11(a)-(j).
as may be prescribed. The accounting officer may not authorise any official other than the chief financial officer to withdraw money or to authorise the withdrawal of money from the municipality's primary bank account if the municipality has a primary bank account which is separate from its other bank accounts.99

Within 30 days after the end of each quarter, it is the responsibility of the accounting officer to table in the municipal council a consolidated report of all withdrawals made in terms of subsection 11(1)(b) to (j) of the Act during that quarter and to submit a copy of the report to the relevant provincial treasury and the Auditor-General.90

No political structure or office-bearer of a municipality may set up a relief fund, charitable fund, trust or other fund of whatever description, except in the name of the municipality. Only the municipal manager may be the accounting officer of any such fund. A municipality may open a separate bank account in the name of the municipality for the purpose of a relief fund, charitable fund, trust or other fund, however. All money received by the municipality for the purpose of such a fund must be paid into a bank account of the municipality or into a separate bank account if one has been opened. Money in a separate account may be withdrawn from the account without appropriation in terms of an approved budget, but only by or on the written authority of the accounting officer acting in accordance with decisions of the municipal council and also only for the purposes for which the fund was established or the money in the fund was donated.91

The MFMA further provides that the minister, acting in concurrence with the Cabinet member responsible for local government, may prescribe a framework within which municipalities must conduct their cash management and investments and invest money not immediately required. Each municipality must establish an appropriate and effective cash management and investment policy in accordance with any framework that may be prescribed.92 A bank where a municipality holds a bank account at the end of a financial year, or held a bank account at any time during a financial year, must:

---

99 Note that money may be withdrawn from a bank account in terms of s 11(1)(b) to (j) without appropriation in terms of an approved budget. See the MFMA s 11(3).
90 Refer to the MFMA ss 11(4)(a)-(b). A “quarter” is defined under the MFMA as any of the following periods in a financial year: (a) 1 July to 30 September, (b) 1 October to 31 December, (c) 1 January to 31 March, or (d) 1 April to 30 June. See s 1 definitions.
91 See the MFMA s 12(1)-(4).
92 See the MFMA s 13(1)-(2).
• within 30 days after the end of that financial year notify the Auditor-General, in
writing, of such bank account, including
(a) the type and number of the account and
(b) the opening and closing balances of that bank account in that financial year
and
• promptly disclose information regarding the account when so requested by the
National Treasury or the Auditor-General.
A bank, insurance company or other financial institution which at the end of a finan-
cial year holds, or at any time during a financial year held, an investment for a mu-
icipality, must also
• within 30 days after the end of that financial year, notify the Auditor-General, in
writing, of that investment, including the opening and closing balances of that in-
vestment in that financial year and
• promptly disclose information regarding the investment when so requested by the
National Treasury or the Auditor-General.93
Under the new legislative dispensation a municipality may not transfer ownership as
a result of a sale or other transaction or otherwise permanently dispose of a capital
asset needed to provide the minimum level of basic municipal services.94 A munici-
pality may transfer ownership or otherwise dispose of a capital asset other than one
mentioned above, but only after the municipal council in a meeting open to the pub-
lic:
• has decided on reasonable grounds that the asset is not needed to provide the
minimum level of basic municipal services and
• has considered the fair market value of the asset and the economic and commu-
nity value to be received in exchange for the asset.95
After a decision by a municipal council that a specific capital asset is not needed to
provide the minimum level of basic municipal services, such decision may not be
reversed by the municipality after that asset has been sold, transferred or otherwise
disposed of. A municipal council may delegate to the accounting officer of the mu-

93 Refer to the MFMA s 13(3)-(4).
94 A “basic municipal service” means a municipal service that is necessary to ensure an accept-
able and reasonable quality of life and which, if not provided, would endanger public health or
safety or the environment. See the MFMA s 1 definitions.
95 See the MFMA s 14(1)-(2).
municipality its power to make the determinations referred to in subsection (2) (a) and (b) of the MFMA in respect of movable capital assets below a value determined by the council. Any transfer of ownership of a capital asset in terms of subsection (2) or (4) must be fair, equitable, transparent, competitive and consistent with the supply chain management policy which the municipality must have and maintain in terms of section 111 of the MFMA.96

(c) Aspects relating to municipal budgets
A municipality may, except where otherwise provided in the MFMA, incur expenditure or appropriate funds only:
• in terms of an approved budget and
• within the limits of the amounts appropriated for the different votes in an approved budget.97

For each financial year, the council of a municipality must approve an annual budget for the municipality before the start of that financial year.98 In order for a municipality to approve an annual budget, the mayor of the municipality must table the annual budget at a council meeting at least 90 days before the start of the budget year.99

According to the MFMA, an annual budget of a municipality must be a schedule in the prescribed format and must incorporate the following:

(a) setting out realistically anticipated revenue for the budget year from each revenue source;
(b) appropriating expenditure for the budget year under the different votes of the municipality;
(c) setting out indicative revenue per revenue source and projected expenditure by vote for the two financial years following the budget year;
(d) setting out –
   (i) estimated revenue and expenditure by vote for the current year; and

96 These requirements do not apply to the transfer of a capital asset to another municipality or to a municipal entity or to a national or provincial organ of state in circumstances and in respect of categories of assets approved by the National Treasury, provided that such transfers are in accordance with a prescribed framework. See the MFMA s 14(4)-(6).
97 See the MFMA s 15(a)-(b).
98 “Financial year” means a year ending on 30 June of a particular year. See the MFMA s 1 definitions.
99 Refer to the MFMA s 16(1)-(2). It should be noted that the approval of an annual budget does not preclude the appropriation of money for capital expenditure for a period exceeding three financial years, provided that a separate appropriation is made for each of those financial years. The

continued on next page
(ii) actual revenue and expenditure by vote for the financial year preceding the current year; and

(e) a statement containing any other information required by section 215(3) of the Constitution or as may be prescribed.100

An annual budget must generally be divided into a capital and an operating budget in accordance with international best practice, as may be prescribed. When an annual budget is tabled, it must be accompanied by the following documents:

(a) Draft resolutions –
   (i) approving the budget of the municipality;
   (ii) imposing any municipal tax and setting any municipal tariffs as may be required for the budget year; and
   (iii) approving any other matter that may be prescribed;

(b) measurable performance objectives for revenue from each source and for each vote in the budget, taking into account the municipality's integrated development plan;

(c) a projection of cash flow for the budget year by revenue source, broken down per month;

(d) any proposed amendments to the municipality's integrated development plan following the annual review of the integrated development plan in terms of section 34 of the Municipal Systems Act;

(e) any proposed amendments to the budget-related policies of the municipality;

(f) particulars of the municipality's investments;

(g) any prescribed budget information on municipal entities under the sole or shared control of the municipality;

(h) particulars of all proposed new municipal entities which the municipality intends to establish or in which the municipality intends to participate;

(i) particulars of any proposed service delivery agreements, including material amendments to existing service delivery agreements;

(j) particulars of any proposed allocations or grants by the municipality to –
   (i) other municipalities;

---

MFMA s 16(3). A budget year seems to be the year from 1 July of a year until 30 June of the next year.

100 See the MFMA s 17(1)(a)-(e).
(ii) any municipal entities and other external mechanisms assisting the munici-

pality in the exercise of its functions or powers;

(iii) any other organs of state;

(iv) any organisations or bodies referred to in section 67 (1);

(k) the proposed cost to the municipality for the budget year of the salary, allow-

ances and benefits of –

(i) each political office-bearer of the municipality;¹⁰¹

(ii) councilors of the municipality; and

(iii) the municipal manager, the chief financial officer, each senior manager of

the municipality and any other official of the municipality having a remu-

neration package greater than or equal to that of a senior manager;

(l) the proposed cost for the budget year to a municipal entity under the sole or

shared control of the municipality of the salary, allowances and benefits of-

(i) each member of the entity's board of directors; and

(ii) the chief executive officer and each senior manager of the entity; and

(m) any other supporting documentation as may be prescribed.¹⁰²

It is further required that an annual budget may be funded only from

• realistically anticipated revenues to be collected

• cash-backed accumulated funds from previous years' surpluses not committed for

  other purposes

• borrowed funds, but only for the capital budget referred to in section 17(2).

All revenue projections in the budget must be realistic, taking into account the pro-

jected revenue for the current year based on collection levels to date and also the

actual revenue collected in previous financial years.¹⁰³ Under the new financial dis-

pensation a municipality may spend money on a capital project only if:

¹⁰¹ Note that a political office-bearer in relation to a municipality means (a) the speaker, executive

mayor, deputy executive mayor, mayor, deputy mayor or a member of the executive or mayoral

committee of a municipality elected, designated or appointed in terms of a specific provision of the

Municipal Structures Act or (b) a councillor referred to in the MFMA s 57(1). See s 1.

¹⁰² See the MFMA s 17(3)(a)-(m). Note that according to the definitions set out in the MFMA,

"shared control" means the rights and powers a municipality has over a municipally entity which is

(a) a private company in which effective control as defined in the Municipal Systems Act s 1 is

vested in that municipality and one or more other municipalities collectively or (b) a multi-

jurisdictional service utility in which that municipality participates, and "sole control" means the

rights and powers a municipality has over a municipal entity which is (a) a private company in which

effective control as defined in the Municipal Systems Act s 1 is vested in that municipality alone or

(b) a service utility established by the municipality.

¹⁰³ Refer to the MFMA s 18(1)-(2).
(a) the money for the project, excluding the cost of feasibility studies conducted by or on behalf of the municipality, has been appropriated in the capital budget referred to in section 17(2);
(b) the project, including the total cost, has been approved by the council;
(c) section 33 has been complied with, to the extent that that section may be applicable to the project; and
(d) the sources of funding have been considered, are available and have not been committed for other purposes.\(^\text{104}\)

Before approving a capital project the council of a municipality must consider various issues. Such issues include:

(a) the projected cost covering all financial years until the project is operational; and
(b) the future operational costs and revenue on the project, including municipal tax and tariff implications.\(^\text{105}\)

The MFMA specifically provides that the minister, acting with the concurrence of the Cabinet member responsible for local government, must prescribe the form of the annual budget of municipalities and may prescribe matters such as:

- the form of resolutions and supporting documentation relating to the annual budget
- the number of years preceding and following the budget year for which revenue and expenditure history or projections must be shown in the supporting documentation
- inflation projections to be used with regard to the budget
- uniform norms and standards concerning the setting of municipal tariffs, financial risks and other matters where a municipality uses a municipal entity or other external mechanism for the performance of a municipal service or other function
- uniform norms and standards concerning the budgets of municipal entities or
- any other uniform norms and standards aimed at promoting transparency and expenditure control.\(^\text{106}\)

\(^{104}\) Read the MFMA s 19(1)(a)-(d).

\(^{105}\) See the MFMA s 19(2)(a)-(b). A municipal council may approve capital projects below a prescribed valued, however. Such approval may be done either individually or as part of a consolidated capital programme. S 19(3).

\(^{106}\) See the MFMA s 20(1)(b)(i)-(vi). See also the Municipal Investment Regulations and the Municipal Public-Private Partnership Regulations published under the MFMA.
The minister may further take appropriate steps to ensure that a municipality in the exercise of its fiscal powers as is set out in section 229 of the Constitution does not materially and unreasonably prejudice:

- national economic policies, particularly those on inflation, administered pricing and equity
- economic activities across municipal boundaries and
- the national mobility of goods, services, capital or labour.  

With regard to the budget preparation processes, the MFMA determines that the mayor of a municipality must:

(a) co-ordinate the processes for preparing the annual budget and for reviewing the municipality’s integrated development plan and budget-related policies to ensure that the tabled budget and any revisions of the integrated development plan and budget-related policies are mutually consistent and credible;  

(b) at least 10 months before the start of the budget year, table in the municipal council a time schedule outlining key deadlines for –

(i) the preparation, tabling and approval of the annual budget;

(ii) the annual review of –

(aa) the integrated development plan in terms of section 34 of the Municipal Systems Act; and

(bb) the budget-related policies;

(iii) the tabling and adoption of any amendments to the integrated development plan and the budget-related policies; and

(iv) any consultative processes forming part of the processes referred to in subparagraphs (i), (ii) and (iii).  

When preparing the annual budget, the mayor of a municipality must also:

(a) take into account the municipality’s integrated development plan;

---

107 The MFMA s 20(2)(a)-(c).
108 A budget-related policy means a municipal policy affecting or affected by the annual budget of the municipality, including (a) the tariffs policy which the municipality must adopt in terms of section 74 of the Municipal Systems Act, (b) the rates policy which the municipality must adopt in terms of legislation regulating municipal property rates or (c) the credit control and debt collection policy which the municipality must adopt in terms of s 96 of the Municipal Systems Act. Refer to the MFMA s 1.
109 Read the MFMA s 21(1)(a)-(b).
(b) take all reasonable steps to ensure that the municipality revises the integrated
development plan in terms of section 34 of the Municipal Systems Act, taking
into account realistic revenue and expenditure projections for future years;
(c) take into account the national budget, the relevant provincial budget, the na-
tional government's fiscal and macro-economic policy, the annual Division of
Revenue Act and any agreements reached in the Budget Forum;
(d) consult –
   (i) the relevant district municipality and all other local municipalities within the
   area of the district municipality, if the municipality is a local municipality;
   (ii) all local municipalities within its area, if the municipality is a district munici-
   pality;
   (iii) the relevant provincial treasury, and when requested, the National Treas-
       ury; and
   (iv) any national or provincial organs of state, as may be prescribed; and
(e) provide, on request, any information relating to the budget –
   (i) to the National Treasury;\textsuperscript{110} and
   (ii) subject to any limitations that may be prescribed, to –
      (aa) the national departments responsible for water, sanitation, electricity
      and any other service as may be prescribed;
      (bb) any other national and provincial organ of states, as may be pre-
      scribed; and
      (cc) another municipality affected by the budget.\textsuperscript{111}

Immediately after an annual budget is tabled in a municipal council, the accounting
officer of the municipality must:

(a) in accordance with chapter 4 of the Municipal Systems Act –
   (i) make public the annual budget and the documents referred to in section
       17(3); and
   (ii) invite the local community to submit representations in connection with the
       budget; and
(b) submit the annual budget –

\textsuperscript{110} Note that reference to the National Treasury means the National Treasury established by the
Public Finance Management Act s 5. See the MFMA s 1.
\textsuperscript{111} See the MFMA s 21(2)(a)-(e).
(i) in both printed and electronic formats to the National Treasury and the relevant provincial treasury; and
(ii) in either format to any prescribed national or provincial organs of state and to other municipalities affected by the budget.\textsuperscript{112}

In an effort to further accountability and public participation, the MFMA requires that when the annual budget has been tabled, the municipal council must consider any views of:

• the local community and
• the National Treasury, the relevant provincial treasury and any provincial or national organs of state or municipalities which made submissions on the budget.

After considering all budget submissions, the council must give the mayor an opportunity:

• to respond to the submissions and
• if necessary, to revise the budget and table amendments for consideration by the council.\textsuperscript{113}

The National Treasury may issue guidelines on the manner in which municipal councils should process their annual budgets, including guidelines on the formation of a committee of the council to consider the budget and to hold public hearings. No guidelines issued in terms the MFMA are binding on a municipal council unless adopted by the council.\textsuperscript{114}

At least 30 days before the start of their budget years, all municipal councils must consider approval of the annual budget. An annual budget:

(a) must be approved before the start of the budget year;
(b) is approved by the adoption by the council of a resolution; and
(c) must be approved together with the adoption of resolutions as may be necessary –

(i) imposing any municipal tax for the budget year;
(ii) setting any municipal tariffs for the budget year;
(iii) approving measurable performance objectives for revenue from each source and for each vote in the budget;

\textsuperscript{112}The MFMA s 22(a)-(b).
\textsuperscript{113}The MFMA s 23(2)(a)-(b).
\textsuperscript{114}Read the MFMA s 23(3)-(4).
(iv) approving any changes to the municipality's integrated development plan; and

(v) approving any changes to the municipality's budget-related policies.\textsuperscript{115}

The accounting officer of a municipality must submit the approved annual budget to the National Treasury and the relevant provincial treasury. If a municipal council fails to approve an annual budget, including revenue-raising measures necessary to give effect to the budget, the council must reconsider the budget and again vote on the budget or on an amended version thereof. This must be done within seven days of the council meeting that failed to approve the budget. The process provided for must be repeated until a budget is approved, including revenue-raising measures necessary to give effect to the budget. If a municipality has not approved an annual budget, including revenue-raising measures necessary to give effect to the budget, by the first day of the budget year, the mayor must immediately comply with section 55 of the MFMA.\textsuperscript{116}

If by the start of the budget year a municipal council has not approved an annual budget or any revenue-raising measures necessary to give effect to the budget, the provincial executive of the relevant province must intervene in the municipality in terms of section 139(4) of the Constitution by taking any appropriate steps to ensure that the budget or those revenue-raising measures are approved, including dissolving the council and

- appointing an administrator until a newly elected council has been declared elected
- continued functioning of the municipality.\textsuperscript{117}

When approving a temporary budget for a municipality, the provincial executive is not bound by any provision relating to the budget process applicable to a municipality in terms of the MFMA or other legislation. Such a budget must, after the intervention has ended, be replaced by a budget approved by the newly elected council, provided that the provisions of the Chapter relating to annual budgets in the MFMA are substantially complied with and are in line with any revised time frames approved by the MEC for finance in the province. Until a new budget for the municipality is

\textsuperscript{115} Read the MFMA s 24(1)-(3).

\textsuperscript{116} Read the MFMA s 25(1)-(3). According to s 55, the mayor must send a report to the MEC.

\textsuperscript{117} See the Municipal Structures Act s 26(1)(a)-(b), read together with ss 34(3) and (4) and 35. The Structures Act applies when a provincial executive dissolves a municipal council.
approved, with the approval of the MEC for finance in the province, funds for the requirements of the municipality may be withdrawn from the municipality's bank accounts in accordance with certain provisions. Such funds may:

- be used only to defray current and capital expenditure in connection with votes for which funds were appropriated in the approved budget for the previous financial year
- may not:
  - during any month, exceed eight per cent of the total amount appropriated in that approved budget for current expenditure, which percentage must be scaled down proportionately if revenue flows are not at least at the same level as the previous financial year
  - exceed the amount actually available.118

Upon becoming aware of any impending non-compliance by the municipality of any provisions of the MFMA or any other legislation pertaining to the tabling or approval of an annual budget or compulsory consultation processes, the mayor of a municipality must inform the MEC for finance in the province, in writing, of such impending non-compliance in an effort to ensure effective control and accountability. If the impending non-compliance pertains to a time provision, except section 16(1), the MEC for finance may, on application by the mayor and on good cause shown, extend any time limit or deadline contained in that provision, provided that no such extension may compromise compliance with section 16(1). An MEC for finance must

- exercise the power contained in the MFMA in accordance with a prescribed framework
- promptly notify the National Treasury, in writing, of any extensions given, together with the name of the municipality concerned and the reasons for the extensions.119

Upon becoming aware of any actual non-compliance by the municipality of any required provisions, the mayor of a municipality must also inform the council, the MEC for finance and the National Treasury, in writing, of

- such non-compliance

118 The funds provided for above are not additional to funds appropriated for the budget year, and any funds so withdrawn must be regarded as forming part of the funds appropriated in a subsequently approved annual budget for the budget year. See the MFMA s 26(3)-(6).
119 See the MFMA s 27(1)-(2).
• any remedial or corrective measures the municipality intends to implement to avoid a recurrence.\textsuperscript{120}

It should again be noted that the provincial executive may intervene in terms of section 139 of the Constitution if a municipality cannot or does not comply with the provisions of this chapter, including a provision relating to process.

A municipality may revise an approved annual budget through an adjustments budget. In this regard an adjustments budget:

(a) must adjust the revenue and expenditure estimates downwards if there is material under-collection of revenue during the current year;\textsuperscript{121}

(b) may appropriate additional revenues that have become available over and above those anticipated in the annual budget, but only to revise or accelerate spending programmes already budgeted for;

(c) may, within a prescribed framework, authorise unforeseeable and unavoidable expenditure recommended by the mayor of the municipality;

(d) may authorise the utilisation of projected savings in one vote towards spending under another vote;

(e) may authorise the spending of funds that were unspent at the end of the past financial year where the under-spending could not reasonably have been foreseen at the time to include projected roll-overs when the annual budget for the current year was approved by the council;

(f) may correct any errors in the annual budget; and

(g) may provide for any other expenditure within a prescribed framework.\textsuperscript{122}

Only the mayor may table an adjustments budget in the municipal council. When an adjustments budget is tabled, it must be accompanied by:

(a) an explanation how the adjustments budget affects the annual budget;

(b) a motivation of any material changes to the annual budget;

(c) an explanation of the impact of any increased spending on the annual budget and the annual budgets for the next two financial years; and

\textsuperscript{120} The MFMA s 27(3)-(4). It should be noted that the non-compliance by a municipality with a provision of the chapter relating to the budget process or a provision in any legislation relating to the approval of a budget-related policy does not affect the validity of an annual or adjustments budget.

\textsuperscript{121} A current year refers to the financial year which has already commenced, but not yet ended.

\textsuperscript{122} The MFMA s 28(1)-(3). An adjustments budget must be in a prescribed form.
(d) any other supporting documentation that may be prescribed.\textsuperscript{123}

It is important to note that municipal tax and tariffs may not be increased during a financial year, except when required in terms of a financial recovery plan.\textsuperscript{124} The mayor of a municipality may in emergency or other exceptional circumstances authorise unforeseeable and unavoidable expenditure for which no provision was made in an approved budget. Any such expenditure:

(a) must be in accordance with any framework that may be prescribed;
(b) may not exceed a prescribed percentage of the approved annual budget;
(c) must be reported by the mayor to the municipal council at its next meeting;

and

(d) must be appropriated in an adjustments budget.\textsuperscript{125}

The appropriation of funds in an annual or adjustments budget lapses to the extent that those funds are unspent at the end of the financial year to which the budget relates, except in the case of an appropriation for expenditure made for a period longer than that financial year in terms of section 16(3).\textsuperscript{126} It is further also determined that when funds for a capital programme are appropriated in terms of section 16(3) for more than one financial year, expenditure for that programme during a financial year may exceed the amount of that year's appropriation for that programme, provided that:

(a) the increase does not exceed 20 per cent of that year's appropriation for the programme;
(b) the increase is funded within the following year's appropriation for that programme;
(c) the municipal manager certifies that –
   (i) actual revenue for the financial year is expected to exceed budgeted revenue; and
   (ii) sufficient funds are available for the increase without incurring further

\textsuperscript{123} Read the MFMA s 28(5)(a)-(d).
\textsuperscript{124} See the MFMA s 28(6)-(7). Ss 22(b), 23(3) and 24(3) apply in respect of an adjustments budget. “Municipal tax” means property rates or other taxes, levies or duties that a municipality may impose. “Municipal tariff” refers to a tariff for services which a municipality may set for the provision of a service to the local community and includes a surcharge on such tariff. See the MFMA s 1.
\textsuperscript{125} Read the MFMA s 29(1)-(3). If such adjustments budget is not passed within 60 days after the expenditure was incurred, the expenditure is unauthorised and s 32 applies.
\textsuperscript{126} See the MFMA s 30.
borrowing beyond the annual budget limit;
(d) prior written approval is obtained from the mayor for the increase; and
(e) the documents referred to in paragraphs (c) and (d) are submitted to the relevant provincial treasury and the Auditor-General.\textsuperscript{127}

Without limiting liability in terms of the common law or other legislation, the MFMA specifically provides for personal accountability and liability over both political office bearers and officials of a municipality that work with financial matters. The MFMA states that:

- a political office-bearer of a municipality is liable for unauthorised expenditure if that office-bearer knowingly or after having been advised by the accounting officer of the municipality that the expenditure is likely to result in unauthorised expenditure, instructed an official of the municipality to incur the expenditure\textsuperscript{128}
- the accounting officer is liable for unauthorised expenditure deliberately or negligently incurred by the accounting officer, subject to subsection (3) of the MFMA
- any political office-bearer or official of a municipality who deliberately or negligently committed, made or authorised an irregular expenditure\textsuperscript{129} is liable for that expenditure or

\textsuperscript{127} The MFMA s 31(a)-(e).
\textsuperscript{128} Note that “unauthorised expenditure” means any expenditure incurred by a municipality otherwise than in accordance with s 15 or 11(3) and includes (a) overspending of the total amount appropriated in the municipality’s approved budget, (b) overspending of the total amount appropriated for a vote in the approved budget, (c) expenditure from a vote unrelated to the department or functional area covered by the vote, (d) expenditure of money appropriated for a specific purpose, otherwise than for the specific purpose, (e) spending of an allocation referred to in para (b), (c) or (d) of the definition of “allocation” otherwise than in accordance with any conditions of the allocation, or (f) a grant by the municipality otherwise than in accordance with this Act. “Overspending” is further defined thus: (a) in relation to the budget of a municipality, it means causing the operational or capital expenditure incurred by the municipality during a financial year to exceed the total amount appropriated in that year’s budget for its operational or capital expenditure, as the case may be, (b) in relation to a vote, it means causing expenditure under the vote to exceed the amount appropriated for that vote or (c) in relation to expenditure under s 26, it means causing expenditure under the section to exceed the limits allowed in ss (5) of that section. See the MFMA s 1.
\textsuperscript{129} “Irregular expenditure” means (a) expenditure incurred by a municipality or municipal entity in contravention of, or not in accordance with, a requirement of this Act, and which has not been condoned in terms of s 170, (b) expenditure incurred by a municipality or municipal entity in contravention of, or not in accordance with, a requirement of the Municipal Systems Act and which has not been condoned in terms of that Act, (c) expenditure incurred by a municipality in contravention of, or not in accordance with, a requirement of the Public Office-Bearers Act 20 of 1998 or (d) expenditure incurred by a municipality or municipal entity in contravention of, or not in accordance with, a requirement of the supply chain management policy of the municipality or entity or any of the municipality’s by-laws giving effect to such policy and not condoned in terms of such policy or by-law. Irregular expenditure excludes expenditure by a municipality which falls within the definition of “unauthorised expenditure”. See the MFMA s 1.
any political office-bearer or official of a municipality who deliberately or negligently made or authorised a fruitless and wasteful expenditure is liable for that expenditure.\textsuperscript{130}

A municipality must recover unauthorised, irregular or fruitless and wasteful expenditure from the person liable for that expenditure unless the expenditure

(a) in the case of unauthorised expenditure, is –

(i) authorised in an adjustments budget; or

(ii) certified by the municipal council, after investigation by a council committee, as irrecoverable and written off by the council; and

(b) in the case of irregular or fruitless and wasteful expenditure, is, after investigation by a council committee, certified by the council as irrecoverable and written off by the council.

If the accounting officer becomes aware that the council, the mayor or the executive committee of the municipality, as the case may be, has taken a decision which, if implemented, is likely to result in unauthorised, irregular or fruitless and wasteful expenditure, the accounting officer is not liable for any ensuing unauthorised, irregular or fruitless and wasteful expenditure provided that the accounting officer has informed the council, the mayor or the executive committee, in writing, that the expenditure is likely to be unauthorised, irregular or fruitless and a wasteful expenditure.\textsuperscript{131} The accounting officer must further promptly inform the mayor, the MEC for local government in the province and the Auditor-General, in writing, of:

(a) any unauthorised, irregular or fruitless and wasteful expenditure incurred by the municipality;

(b) whether any person is responsible or under investigation for such unauthorised, irregular or fruitless and wasteful expenditure; and

(c) the steps that have been taken –

(i) to recover or rectify such expenditure; and

(ii) to prevent a recurrence of such expenditure.\textsuperscript{132}

\textsuperscript{130} The MFMA s 32(1)(a)-(d). “Fruitless and wasteful expenditure” means expenditure that was made in vain and would have been avoided had reasonable care been exercised. See the MFMA s 1.

\textsuperscript{131} See the MFMA s 32(2)-(3).

\textsuperscript{132} The MFMA s 32(4)(a)-(c).
It should be noted that the writing off of any unauthorised, irregular or fruitless and wasteful expenditure as irrecoverable is no excuse in criminal or disciplinary proceedings against a person charged with the commission of an offence or a breach of the MFMA relating to such unauthorised, irregular or fruitless and wasteful expenditure. The accounting officer is further obligated to report to the South African Police Service all cases of alleged

- irregular expenditure that constitutes a criminal offence
- theft and fraud that occurred in the municipality.

The council of a municipality must take all *reasonable steps* to ensure that all cases of irregular expenditure, theft or fraud are reported to the South African Police Service if

- the charge is against the accounting officer or
- the accounting officer fails to report such matters.\(^{133}\)

Under the new financial requirements, a municipality may enter into a contract which will impose financial obligations on the municipality beyond a financial year, but if the contract will impose financial obligations on the municipality beyond the three years covered in the annual budget for that financial year, it may do so only if:

(a) the municipal manager, at least 60 days before the meeting of the municipal council at which the contract is to be approved –

(i) has, in accordance with section 21A of the Municipal Systems Act:

(aa) made public the draft contract and an information statement summarising the municipality's obligations in terms of the proposed contract; and

(bb) invited the local community and other interested persons to submit to the municipality comments or representations in respect of the proposed contract; and

(ii) has solicited the views and recommendations of:

(aa) the National Treasury and the relevant provincial treasury;

(bb) the national department responsible for local government; and

(cc) if the contract involves the provision of water, sanitation, electricity, or any other service as may be prescribed, the responsible national de

---

\(^{133}\) The MFMA s 32(5)-(8). The minister, acting with the concurrence of the cabinet member responsible for local government, may regulate the application of these provisions by regulation. Read also the MFMA s 168.
(b) the municipal council has taken into account:
   (i) the municipality's projected financial obligations in terms of the proposed contract for each financial year covered by the contract;
   (ii) the impact of those financial obligations on the municipality's future municipal tariffs and revenue;
   (iii) any comments or representations on the proposed contract received from the local community and other interested persons; and
   (iv) any written views and recommendations on the proposed contract by the National Treasury, the relevant provincial treasury, the national department responsible for local government and any national department referred to in paragraph (a) (ii) (cc); and
(c) the municipal council has adopted a resolution in which:
   (i) it determines that the municipality will secure a significant capital investment or will derive a significant financial economic or financial benefit from the contract;
   (ii) it approves the entire contract exactly as it is to be executed; and
   (iii) it authorises the municipal manager to sign the contract on behalf of the municipality.134

The process set out in subsection 33(1) of the MFMA does not apply to:
(a) contracts for long-term debt regulated in terms of section 46(3) of the MFMA;
(b) employment contracts; or
(c) contracts:
   (i) for categories of goods as may be prescribed; or
   (ii) in terms of which the financial obligation on the municipality is below:
      (aa) a prescribed value; or
      (bb) a prescribed percentage of the municipality's approved budget for the year in which the contract is concluded.135

All contracts referred to above and all other contracts that impose a financial obligation on a municipality:
• must be made available in their entirety to the municipal council and

---

134 Refer to the MFMA s 33(1)(a)-(c).
135 See the MFMA s 33(2).
• may not be withheld from public scrutiny, except as provided for in terms of the Promotion of Access to Information Act.  

(d) Aspects concerning municipal financial co-operative government

It is a constitutional prerequisite that the national and provincial governments must by agreement assist municipalities in building their capacities for efficient, effective and transparent financial management. The national and provincial governments must support the efforts of municipalities to identify and resolve their financial problems. When performing its monitoring function in terms of section 155(6) of the Constitution, a provincial government:

(a) must share with a municipality the results of its monitoring to the extent that those results may assist the municipality in improving its financial management;

(b) must, upon detecting any emerging or impending financial problems in a municipality, alert the municipality to those problems; and

(c) may assist the municipality to avert or resolve financial problems.  

In an effort to promote co-operative government on a local government level, both national and provincial departments and public entities must:

(a) in their fiscal and financial relations with the local sphere of government, promote co-operative government in accordance with chapter 3 of the Constitution;

(b) promptly meet their financial commitments towards municipalities;

(c) provide timely information and assistance to municipalities to enable municipalities:
   (i) to plan properly, including in developing and revising their integrated development plans; and
   (ii) to prepare their budgets in accordance with the processes set out in chapter 4 of this Act; and

(d) comply with the Public Finance Management Act, the annual Division of Revenue Act and the Intergovernmental Fiscal Relations Act,  

---

136 See Act 2 of 2000 read together with the MFMA s 33(3)-(4).
137 See the MFMA s 34(1)-(4). Non-compliance with this section or any other provision of this Act by the national or a provincial government does not affect the responsibility of a municipality, its political structures, political office-bearers and officials to comply with this Act.
that those acts regulate intergovernmental relations with the local sphere of
government.\textsuperscript{139}

In order to provide predictability and certainty about the sources and levels of inter-
governmental funding for municipalities, the accounting officer of a national or pro-
vincial department and the accounting authority of a national or provincial public
entity responsible for the transfer of any proposed allocations to a municipality must,
by no later than 20 January of each year notify the National Treasury or the relevant
provincial treasury, as may be appropriate, of all proposed allocations, and the pro-
jected amounts of those allocations, to be transferred to each municipality during
each of the next three financial years. The minister or the MEC responsible for fi-
nance in a province must, to the extent possible when tabling the national annual
budget in the National Assembly or the provincial annual budget in the provincial
legislature, make public particulars of any allocations due to each municipality in
terms of that budget, including the amount to be transferred to the municipality dur-
ing each of the next three financial years.\textsuperscript{140}

Municipalities are themselves also required to promote co-operative government.
In doing so, municipalities are obligated to:

• promote co-operative government in accordance with chapter 3 of the Constitution
  and the Intergovernmental Fiscal Relations Act in their fiscal and financial rela-
tions with the national and provincial spheres of government and other municipali-
ties

• provide budgetary and other financial information to relevant municipalities and
  national and provincial organs of state

• promptly meet all financial commitments towards other municipalities or national
  and provincial organs of state.

In order to enable municipalities to include allocations from other municipalities in
their budgets and to plan effectively for the spending of such allocations, the ac-
counting officer of a municipality responsible for the transfer of any allocation to
another municipality must notify the receiving municipality of the projected amount of
any allocation proposed to be transferred to that municipality during each of the next

\textsuperscript{139} Read the MFMA s 35(a)-(d).
\textsuperscript{140} Refer to the MFMA s 36(1)-(2).
three financial years, by no later than 120 days before the start of its budget year.\textsuperscript{141}
In certain instances the transfer of funds to municipalities may be stopped. In this regard the MFMA determines that the National Treasury may stop:

- the transfer of funds due to a municipality as its share of the local government’s equitable share referred to in section 214(1)(a) of the Constitution, but only if the municipality commits a serious or persistent breach of the measures established in terms of section 216(1) of the Constitution or
- the transfer of funds due to a municipality as an allocation referred to in section 214(1)(c) of the Constitution, but only if the municipality or the municipal entity for which the funds are destined
  (a) commits a serious or persistent breach of the measures established in terms of section 216(1) of the Constitution or
  (b) breaches or fails to comply with any conditions subject to which the allocation is made.

Before the National Treasury stops the transfer of funds to a municipality, it must:

- give the municipality an opportunity to submit written representations with regard to the proposed stopping of the funds;
- inform the MEC for local government in the province; and
- consult the Cabinet member responsible for the national department making the transfer.\textsuperscript{142}

If the stopping of funds affects the provision of basic municipal services in the municipality, the provincial executive must monitor the continuation of those services. Section 139 of the Constitution applies if the municipality cannot or does not fulfil its obligations with regard to the provision of those services. When considering whether to stop the transfer of funds to a municipality, the National Treasury must take into account all relevant facts, including:

- the municipality’s compliance with the requirements of this act, in particular those relating to:
  (i) annual financial statements, including the submission to the Auditor-General of its annual financial statements; and

\textsuperscript{141} See the MFMA s 37(1)-(2).
\textsuperscript{142} See the MFMA s 38(1)-(2).
(ii) budgets, including the submission of information on the budget and implementation of the budget to the National Treasury and the relevant provincial treasury; and

(b) the municipality's co-operation with other municipalities on fiscal and financial matters, in the case of district and local municipalities.¹⁴³

A decision by the National Treasury to stop the transfer to a municipality of funds

• lapses after the expiry of 120 days
• may be enforced immediately, but will lapse retrospectively unless Parliament approves it following a process substantially the same as that established in terms of section 75 of the Constitution.

Such a procedure should be prescribed by the joint rules and orders of Parliament. This process must be completed within 30 days of the decision by the National Treasury to stop the transfer of the funds.¹⁴⁴

Parliament may further renew a decision to stop the transfer of funds for no more than 120 days at a time, following the process established in terms of subsection 39(1)(b) of the MFMA. Before Parliament approves or renews a decision to stop the transfer of funds to a municipality, the Auditor-General must report to Parliament, if requested to do so by Parliament, and the municipality must be given an opportunity to answer the allegations against it and to state its case before a committee.¹⁴⁵ If the transfer of funds to a municipality has been stopped in terms of section 38(1)(b) for the rest of the relevant financial year, then the accounting officer of the national or provincial department responsible for the transfer must reflect such stopping of funds, together with reasons, in the annual financial statements of the department.¹⁴⁶

The National Treasury is further obligated to monitor:

• the pricing structure of organs of state for the supply of electricity, water or any other bulk resources that may be prescribed, to municipalities and municipal entities for the provision of municipal services and
• payments made by municipalities and municipal entities for such bulk resources.¹⁴⁷

¹⁴³ Read the MFMA s 38(3)-(4).
¹⁴⁴ The MFMA s 39(1)(a)-(b).
¹⁴⁵ Read the MFMA s 39(2)-(3).
¹⁴⁶ The MFMA s 40.
¹⁴⁷ Refer to the MFMA s 41(1).
Each organ of state providing such bulk resources to a municipality must within 15 days after the end of each month furnish the National Treasury with a written statement setting out, for each municipality or for each municipal entity providing municipal services on behalf of such municipalities, the following information:

- the amount to be paid by the municipality or municipal entity for such bulk resources for that month, and for the financial year up to the end of that month
- the arrears owing and the age profile of such arrears and
- any actions taken by that organ of state to recover arrears.\footnote{148}

In relation to price increases of bulk resources for the provision of municipal services, it is stated that if a national or provincial organ of state which supplies water, electricity or any other bulk resource as may be prescribed to a municipality or municipal entity for the provision of a municipal service intends to increase the price of such resource for the municipality or municipal entity, it must first submit the proposed amendment to its pricing structure to its executive authority within the meaning of the Public Finance Management Act and secondly to any regulatory agency for approval, if national legislation requires such approval.\footnote{149} At least 40 days before making a submission, the organ of state referred to above must request the National Treasury and organised local government to provide written comments on the proposed amendment. Any submission must also be accompanied by:

- a motivation of the reasons for the proposed amendment
- an explanation of how the amendment takes account of
  
  (a) the national government's inflation targets and other macroeconomic policy objectives
  
  (b) steps taken by the organ of state to improve its competitiveness or efficiency in order to reduce costs
  
  (c) any objectives or targets as outlined in any corporate or other governance plan applicable to that organ of state
- any written comments received from the National Treasury, organised local government or any municipalities and
- an explanation of how such comments have been taken into account.\footnote{150}

\footnote{148}{See the MFMA s 41(1)-(2).}
\footnote{149}{See the MFMA s 42(1)(a)-(b).}
\footnote{150}{Read the MFMA s 42(3)(a)-(d).}
The executive authority of the organ of state must table the amendment and the documents referred to above either in Parliament or the relevant provincial legislature, as may be appropriate. Unless approved otherwise by the Minister, an amendment to a pricing structure which is tabled in Parliament or the relevant provincial legislature on or before 15 March in any year does not take effect for the affected municipalities or municipal entities before 1 July in that year or after 15 March in any year, does not take effect for the affected municipalities or municipal entities before 1 July the next year.  

If a national or provincial organ of state in terms of a power contained in any national or provincial legislation determines the upper limits of a municipal tax or tariff, such determination takes effect for municipalities on a date specified in the determination. Unless the minister approves otherwise on good grounds, the date specified in a determination referred to above may:

(a) if the determination was promulgated on or before 15 March in a year, not be a date before 1 July in that year; or

(b) if the determination was promulgated after 15 March in a year, not be a date before 1 July in the next year.  

If a municipality has in accordance with section 33 or 46(3) of the MFMA entered into a contract which provides for an annual or other periodic escalation of payments to be made by the municipality under the contract, no determination in terms of a power referred to in subsection 43(1) of the MFMA regarding the upper limits of a municipal tax or tariff applies to that municipality insofar as such upper limits would impair the municipality's ability to meet the escalation of its payments under the contract.

Whenever a dispute of a financial nature arises between organs of state, the parties concerned must as promptly as possible take all reasonable steps that may be necessary to resolve the matter out of court. If the National Treasury is not a party to the dispute, the parties must report the matter to the National Treasury and may request the National Treasury to mediate between the parties or to designate a per-

---

151 See the MFMA s 42(5)(a)-(b).
152 See the MFMA s 43(1)-(2).
son to mediate between them. If the National Treasury accedes to a request, it may
determine the mediation process.  

(e) Aspects concerning municipal debt

A municipality may incur short-term debt only in accordance with and subject to the
provisions of the MFMA and only when necessary to bridge shortfalls within a finan-
cial year during which the debt is incurred. Such debt may be incurred only in expect-
tation of specific and realistic anticipated income to be received within that financial
year or capital needs within a financial year, to be repaid from specific funds to be
received from enforceable allocations or long-term debt commitments. Furthermore, a municipality may incur short-term debt only if a resolution of the municipal
council, signed by the mayor, has approved the debt agreement and the accounting
officer has signed the agreement or other document which creates or acknowledges
the debt. For the purpose of obtaining a resolution to incur short term debt, a munici-
pal council may:

(a) approve a short-term debt transaction individually; or
(b) approve an agreement with a lender for a short-term credit facility to be ac-
cessed as and when required, including a line of credit or bank overdraft facil-
ity, provided that—

(i) the credit limit must be specified in the resolution of the council;

(ii) the terms of the agreement, including the credit limit, may be changed only

by a resolution of the council; and

(iii) if the council approves a credit facility that is limited to emergency use, the

accounting officer must notify the council in writing as soon as practical of
the amount, duration and cost of any debt incurred in terms of such a
credit facility, as well as options for repaying such debt.

A municipality must pay off short-term debt within the financial year and may not
renew or refinance short-term debt, whether its own debt or that of any other entity,
where such renewal or refinancing will have the effect of extending the short-term
debt into a new financial year. No lender may wilfully extend credit to a municipality

---

153 See the MFMA s 44(1)-(4). These provisions apply only if at least one of the organs of state is
a municipality or municipal entity. Refer again to the principles of co-operative government set out
in the Constitution s 41.

154 Read the MFMA s 45(1)(a)-(b). “Short-term debt” means debt payable over a period not
exceeding one year. See the MFMA s 1.

155 See the MFMA s 45(2)-(3).
for the purpose of renewing or refinancing short-term debt that must be paid off. If a lender wilfully extends credit to a municipality in contravention of the abovementioned provision, then the municipality is not bound to repay the loan or interest on the loan.\textsuperscript{156}

With reference to long-term debt,\textsuperscript{157} a municipality may incur such debt only in accordance with and subject to any applicable provisions of the MFMA, including section 19. Such debt may be incurred only for the purpose of:

(a) capital expenditure on property, plant or equipment to be used for the purpose of achieving the objects of local government as set out in section 152 of the Constitution, including costs referred to in subsection 46(4); or

(b) re-financing existing long-term debt subject to subsection 46(5). A municipality may incur long-term debt only if a resolution of the municipal council, signed by the mayor, has approved the debt agreement and the accounting officer has signed the agreement or other document which creates or acknowledges the debt.\textsuperscript{158}

Furthermore, a municipality may incur long-term debt only if the accounting officer of the municipality:

(a) has, in accordance with section 21A of the Municipal Systems Act:

(i) at least 21 days prior to the meeting of the council at which approval for the debt is to be considered, made public an information statement setting out particulars of the proposed debt, including the amount of the proposed debt, the purposes for which the debt is to be incurred and particulars of any security to be provided; and

(ii) invited the public, the National Treasury and the relevant provincial treasury to submit written comments or representations to the council in respect of the proposed debt; and

\textsuperscript{156} See the MFMA s 45(4)-(6). It should be noted that the non-repayment of a loan to a lender does not apply if the lender (a) relied in good faith on written representations of the municipality regarding purpose of the borrowing, and (b) did not know and had no reason to believe that the borrowing was for the purpose of renewing or refinancing short-term debt. A “lender” in relation to a municipality, means a person who provides debt finance to a municipality. Refer to s 1 definitions.

\textsuperscript{157} “Long-term debt” means debt repayable over a period exceeding one year. See the MFMA s 1.

\textsuperscript{158} See the MFMA s 46(1)-(2). Note that debt means (a) a monetary liability or obligation created by a financing agreement, note, debenture, bond or overdraft, or by the issuance of municipal debt instruments or (b) a contingent liability such as that created by guaranteeing a monetary liability or obligation of another. See the MFMA s 1.
(b) has submitted a copy of the information statement to the municipal council at least 21 days prior to the meeting of the council, together with particulars of-

(i) the essential repayment terms, including the anticipated debt repayment schedule; and

(ii) the anticipated total cost in connection with such debt over the repayment period.\textsuperscript{159}

Capital expenditure contemplated in subsection 46(1)(a) may include:

- financing costs, including
  - (a) capitalised interest for a reasonable initial period
  - (b) costs associated with security arrangements in accordance with section 48 of the MFMA
  - (c) discounts and fees in connection with the financing
  - (d) fees for legal, financial, advisory, trustee, credit rating and other services directly connected to the financing and
  - (e) costs connected to the sale or placement of debt, and costs for printing and publication directly connected to the financing
- costs of professional services directly related to the capital expenditure and
- such other costs as may be prescribed.\textsuperscript{160}

Municipalities are further allowed to borrow money for the purpose of re-financing existing long-term debt, provided that:

- the existing long-term debt was lawfully incurred
- the re-financing does not extend the term of the debt beyond the useful life of the property, plant or equipment for which the money was originally borrowed
- the net present value of projected future payments (including principal and interest payments) after re-financing is less than the net present value of projected future payments before re-financing and
- the discount rate used in projecting net present value referred to above, and any assumptions in connection with the calculations, must be reasonable and in accordance with criteria set out in a framework that may be prescribed.\textsuperscript{161}

\textsuperscript{159} Read the MFMA s 46(2).
\textsuperscript{160} Read the MFMA s 46(3)-(4).
\textsuperscript{161} Note that a municipality’s long-term debt must be consistent with its capital budget referred to in s 17(2). Read the MFMA s 46(5)-(6).
Both short-term and long-term debt may be incurred only if the debt is denominated in Rand and is not indexed to, or affected by, fluctuations in the value of the Rand against any foreign currency and section 48(3) of the MFMA has been complied with, if security is to be provided by the municipality. With reference to security of debt, the MFMA provides that a municipality may, by resolution of its council, provide security for:

- (a) any of its debt obligations;
- (b) any debt obligations of a municipal entity under its sole control; or
- (c) contractual obligations of the municipality undertaken in connection with capital expenditure by other persons on property, plant or equipment to be used by the municipality or such other person for the purpose of achieving the objects of local government in terms of section 152 of the Constitution. 162

A municipality may provide any appropriate security, including by:

- (a) giving a lien on, or pledging, mortgaging, ceding or otherwise hypothecating, an asset or right, or giving any other form of collateral;
- (b) undertaking to effect payment directly from money or sources that may become available and to authorise the lender or investor direct access to such sources to ensure payment of the secured debt or the performance of the secured obligations, but this form of security may not affect compliance with section 8(2) of the MFMA;
- (c) undertaking to deposit funds with the lender, investor or third party as security;
- (d) agreeing to specific payment mechanisms or procedures to ensure exclusive or dedicated payment to lenders or investors, including revenue intercepts, payments into dedicated accounts or other payment mechanisms or procedures;
- (e) ceding as security any category of revenue or rights to future revenue;
- (f) undertaking to have disputes resolved through mediation, arbitration or other dispute resolution mechanisms;
- (g) undertaking to retain revenues or specific municipal tariffs or other charges, fees or funds at a particular level or at a level sufficient to meet its financial obligations;

162 Refer to the MFMA ss 47 and 48(1)(a)-(c).
(h) undertaking to make provision in its budgets for the payment of its financial obligations, including capital and interest;
(i) agreeing to restrictions on debt that the municipality may incur in future until the secured debt is settled or the secured obligations are met; and
(j) agreeing to such other arrangements as the municipality may consider necessary and prudent.¹⁶³

A council resolution authorising the provision of security must determine whether the asset or right with respect to which the security is provided is necessary for providing the minimum level of basic municipal services and, if so, must indicate the manner in which the availability of the asset or right for the provision of that minimum level of basic municipal services will be protected. If the resolution has determined that the asset or right is necessary for providing the minimum level of basic municipal services, neither the party to whom the municipal security is provided nor any successor or assignee of such party may deal with the asset or right in a manner that would preclude or impede the continuation of that minimum level of basic municipal services in the event of a default by the municipality.¹⁶⁴

When interacting with a prospective lender or when preparing documentation for consideration by a prospective investor, any person involved in the borrowing of money by a municipality must disclose all information in that person's possession or within that person's knowledge that may be material to the decision of that prospective lender or investor and take reasonable care to ensure the accuracy of any information disclosed. Any lender or investor may rely on written representations of the municipality signed by the accounting officer, if the lender or investor did not know and had no reason to believe that those representations were false or misleading.¹⁶⁵

With reference to municipal guarantees, a municipality may not issue any guarantee for any commitment or debt of any organ of state or person, except on the following conditions:
(a) The guarantee must be within limits specified in the municipality's approved budget;
(b) a municipality may guarantee the debt of a municipal entity under its sole

¹⁶³ See the MFMA s 48(2)(a)-(j).
¹⁶⁴ See the MFMA s 48(3)-(4) and also s 48(5) of the Act.
¹⁶⁵ The MFMA s 49(1)-(2).
control only if the guarantee is authorised by the council in the same manner and subject to the same conditions applicable to a municipality in terms of this chapter if it incurs debt;

(c) a municipality may guarantee the debt of a municipal entity under its shared control or of any other person, but only with the approval of the National Treasury, and then only if (i) the municipality creates, and maintains for the duration of the guarantee, a cash-backed reserve equal to its total potential financial exposure as a result of such guarantee; or (ii) the municipality purchases and maintains in effect for the duration of the guarantee, a policy of insurance issued by a registered insurer, which covers the full amount of the municipality's potential financial exposure as a result of such guarantee.166

(f) Responsibilities of mayors under the MFMA

Under the new financial legislative framework, the mayor of a municipality must provide general political guidance over the fiscal and financial affairs of the municipality. In providing such general political guidance, the mayor may monitor and, to the extent provided in the MFMA, oversee the exercise of responsibilities assigned in terms of the Act to the accounting officer and the chief financial officer, but may not interfere in the exercise of those responsibilities. The mayor must take all reasonable steps to ensure that the municipality performs its constitutional and statutory functions within the limits of the municipality's approved budget and must, within 30 days of the end of each quarter, submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality. Finally, all mayors must exercise the other powers and perform the other duties assigned to them in terms of the MFMA or delegated by the council to them.167

With regard to the budget processes and other related matters the mayor must do the following:

(a) provide general political guidance over the budget process and the priorities that must guide the preparation of a budget;

(b) co-ordinate the annual revision of the integrated development plan in terms of section 34 of the Municipal Systems Act and the preparation of the annual

166 Read the MFMA s 50(a)-(c). Note that neither the national nor a provincial government may guarantee the debt of a municipality or municipal entity except to the extent that the Public Finance Management Act ch 8 provides for such guarantees. See the MFMA s 51.

167 See the MFMA s 52(a)-(e).
budget, and determine how the integrated development plan is to be taken into account or revised for the purposes of the budget; and

(c) take all reasonable steps to ensure:

(i) that the municipality approves its annual budget before the start of the budget year;

(ii) that the municipality’s service delivery and budget implementation plan is approved by the mayor within 28 days after the approval of the budget; and

(iii) that the annual performance agreements as required in terms of section 57(1)(b) of the Municipal Systems Act for the municipal manager and all senior managers:

(aa) comply with this act in order to promote sound financial management;

(bb) are linked to the measurable performance objectives approved with the budget and to the service delivery and budget implementation plan; and

(cc) are concluded in accordance with section 57(2) of the Municipal Systems Act.  

The mayor must further promptly report to the municipal council and the MEC for finance in the province any delay in the tabling of an annual budget, the approval of the service delivery and budget implementation plan or the signing of the annual performance agreements. He/she must also ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators for each quarter, as set out in the service delivery and budget implementation plan, are made public no later than 14 days after the approval of the service delivery and budget implementation plan and that the performance agreements of the municipal manager, senior managers and any other categories of officials as may be prescribed are made public no later than 14 days after the approval of the municipality’s service delivery and budget implementation plan. Copies of such performance agreements must be submitted to the council and the MEC for local government in the province.  

On receipt of a statement or report submitted by the accounting officer of the municipality in terms of sections 71 or 72 of the MFMA, the mayor must:

---

168 See the MFMA s 53(1)(a)-(c).
169 The MFMA s 53(2)-(3).
(a) consider the statement or report;
(b) check whether the municipality's approved budget is implemented in accordance with the service delivery and budget implementation plan;
(c) consider and, if necessary, make any revisions to the service delivery and budget implementation plan, provided that revisions to the service delivery targets and performance indicators in the plan may only be made with the approval of the council following approval of an adjustments budget;
(d) issue any appropriate instructions to the accounting officer to ensure:
   (i) that the budget is implemented in accordance with the service delivery and budget implementation plan; and
   (ii) that spending of funds and revenue collection proceed in accordance with the budget;
(e) identify any financial problems facing the municipality, including any emerging or impending financial problems; and
(f) in the case of a section 72 report, submit the report to the council by 31 January of each year.\textsuperscript{170}

If the municipality faces any serious financial problems, the mayor must

- promptly respond to and initiate any remedial or corrective steps proposed by the accounting officer to deal with such problems, which may include
  (a) steps to reduce spending when revenue is anticipated to be less than projected in the municipality's approved budget;
  (b) the tabling of an adjustments budget
  (c) steps in terms of chapter 13 of the MFMA
- alert the council and the MEC for local government in the province to those problems.

The mayor must ensure that any revisions of the service delivery and budget implementation plan are made public promptly.\textsuperscript{171}

If a municipality has not approved an annual budget by the first day of the budget year or if the municipality encounters a serious financial problem referred to in section 136 of the MFMA, then the mayor of the municipality

\textsuperscript{170} See the MFMA s 54(1)(a)-(f).
\textsuperscript{171} See the MFMA s 54(2)-(3).
• must immediately report the matter to the MEC for local government in the province
• may recommend to the MEC an appropriate provincial intervention in terms of section 139 of the Constitution.\textsuperscript{172}

It is further provided that the mayor of a municipality which has sole or shared control over a municipal entity must guide the municipality in exercising its rights and powers over the municipal entity in a way:
• that would reasonably ensure that the municipal entity complies with this act and at all times remains accountable to the municipality and
• that would not impede the entity from performing its operational responsibilities.

In guiding the municipality in the exercise of its rights and powers over a municipal entity, the mayor may monitor the operational functions of the entity, but may not interfere in the performance of those functions.\textsuperscript{173} The council of a municipality which does not have a mayor must designate a councillor to exercise the powers and duties assigned by the MFMA to a mayor. In the case of a municipality which does not have a mayor, a reference in the MFMA to the mayor of a municipality must be construed as a reference to a councillor designated by the council of the municipality to bear the specific responsibilities.\textsuperscript{174} In the case of a municipality which has an executive committee, the powers and functions assigned by the MFMA to a mayor must be exercised by the mayor in consultation with the executive committee.\textsuperscript{175}

The powers and duties assigned in terms of the MFMA to the mayor of a municipality may be delegated by:
• the executive mayor in terms of section 60(1) of that Act to another member of the municipality's mayoral committee in the case of a municipality which has an executive mayor referred to in section 55 of the Municipal Structures Act
• the council of the municipality to another member of the executive committee in the case of a municipality which has an executive committee referred to in section 43 of the Structures Act or

\textsuperscript{172} Read the MFMA s 55.
\textsuperscript{173} Refer to the MFMA s 56(1)-(2).
\textsuperscript{174} The MFMA s 57(1)-(2).
\textsuperscript{175} The MFMA s 58. It is submitted that “in consultation with” means that the executive committee must be consulted on the matter and that the parties have followed a specified decision-making process. See also Rautenbach and Malherbe (1999) 214-216.
the council to any other councillor in the case of a municipality which has designated a councilor in terms of section 57(1) of the MFMA.\textsuperscript{176} Any delegation mentioned above:  
- must be in writing;  
- is subject to any limitations or conditions that the executive mayor or council, as the case may be, may impose; and  
- does not divest the mayor of the responsibility concerning the exercise of the delegated power or the performance of the delegated duty.

Finally, the mayor may confirm, vary or revoke any decision taken in consequence of a delegation in terms of this section, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.\textsuperscript{177}

(g) General responsibilities of municipal officials

According to the MFMA, the municipal manager of a municipality is the accounting officer of the municipality for the purposes of the Act and, as accounting officer, must exercise the functions and powers assigned to an accounting officer in terms of the Act and provide guidance and advice on compliance with the Act to  
- the political structures, political office-bearers and officials of the municipality\textsuperscript{178}  
- any municipal entity under the sole or shared control of the municipality.\textsuperscript{179}

The accounting officer of a municipality is obligated to comply with certain fiduciary responsibilities. In this regard the officer must:  
- act with fidelity, honesty, integrity and in the best interests of the municipality in managing its financial affairs  
- disclose to the municipal council and the mayor all material facts which are available to the accounting officer or reasonably discoverable and which in any way might influence the decisions or actions of the council or the mayor and  
- seek, within the sphere of influence of the accounting officer, to prevent any

\textsuperscript{176} See the MFMA s 59(1)(a)-(c).  
\textsuperscript{177} Read the MFMA s 59(2)-(3).  
\textsuperscript{178} An official in relation to a municipality or municipal entity means (a) an employee of a municipality or municipal entity, (b) a person seconded to a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity or (c) a person contracted by a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity otherwise than as an employee. See the MFMA s 1. Political structures again refer to (a) the council of a municipality or (b) any committee or other collective structure of a municipality elected, designated or appointed in terms of a specific provision of the Municipal Structures Act.  
\textsuperscript{179} The MFMA s 60.
An accounting officer may not act in a way that is inconsistent with the duties assigned to accounting officers of municipalities in terms of the MFMA or use the position or privileges of, or confidential information obtained as, accounting officer for personal gain or to improperly benefit another person. The accounting officer of a municipality is further also responsible for managing the financial administration of the municipality and must, for this purpose, take all reasonable steps to ensure that:

- the resources of the municipality are used effectively, efficiently and economically
- full and proper records of the financial affairs of the municipality are kept in accordance with any prescribed norms and standards
- the municipality has and maintains effective, efficient and transparent systems:
  (a) of financial and risk management and internal control and
  (b) of internal audit operating in accordance with any prescribed norms and standards
- unauthorised, irregular or fruitless and wasteful expenditure and other losses are prevented
- disciplinary or, when appropriate, criminal proceedings are instituted against any official of the municipality who has allegedly committed an act of financial misconduct or an offence in terms of chapter 15 of the MFMA and
- the municipality has and implements:
  (a) a tariff policy referred to in section 74 of the Municipal Systems Act
  (b) a rates policy as may be required in terms of any applicable national legislation
  (c) a credit control and debt collection policy referred to in section 96(b) of the Municipal Systems Act and
  (d) a supply chain management policy in accordance with chapter 11 of the MFMA.

The accounting officer is responsible for and must account for all bank accounts of the municipality, including any bank account opened for:

- any relief fund, charitable fund, trust or other fund set up by the municipality in terms of section 12 of the MFMA or

---

180 Refer to the MFMA s 61(1).
181 See the MFMA s 61(2)(a)-(b).
• a purpose referred to in section 48(2)(d) of the Act.\textsuperscript{182}

In respect of asset and liability management the accounting officer of a municipality is responsible for the management of the assets of the municipality, including the safeguarding and the maintenance of those assets and the liabilities of the municipality. The accounting officer must for the purposes of these responsibilities take all reasonable steps to ensure that the municipality has and maintains a management, accounting and information system that accounts for the assets and liabilities of the municipality; that the municipality's assets and liabilities are valued in accordance with standards of generally recognised accounting practice and that the municipality has and maintains a system of internal control of assets and liabilities, including an asset and liabilities register, as may be prescribed.\textsuperscript{183}

The accounting officer of a municipality is responsible also for the management of the revenue of the municipality. For the purposes of revenue management, the accounting officer must take all reasonable steps to ensure the following:

(a) that the municipality has effective revenue collection systems consistent with section 95 of the Municipal Systems Act and the municipality's credit control and debt collection policy;

(b) that revenue due to the municipality is calculated on a monthly basis;

(c) that accounts for municipal tax and charges for municipal services are prepared on a monthly basis, or less often as may be prescribed where monthly accounts are uneconomical;

(d) that all money received is promptly deposited in accordance with this act into the municipality's primary and other bank accounts;

(e) that the municipality has and maintains a management, accounting and information system which:

(i) recognises revenue when it is earned;

(ii) accounts for debtors; and

(iii) accounts for receipts of revenue;

(f) that the municipality has and maintains a system of internal control in respect of debtors and revenue, as may be prescribed;

\textsuperscript{182} See the MFMA s 62(1)-(2).

\textsuperscript{183} Read the MFMA s 63(1)-(2).
(g) that the municipality charges interest on arrears, except where the council has
granted exemptions in accordance with its budget-related policies and within a
prescribed framework; and

(h) that all revenue received by the municipality, including revenue received by
any collecting agent on its behalf, is reconciled at least on a weekly basis.\textsuperscript{184}

The accounting officer must immediately inform the National Treasury of any pay-
ments due by an organ of state to the municipality in respect of municipal tax or for
municipal services, if such payments are regularly in arrears for periods of more than
30 days. The accounting officer must also take all reasonable steps to ensure that
any funds collected by the municipality on behalf of another organ of state is trans-
ferred to that organ of state on at least a weekly basis and that such funds are not
used for purposes of the municipality.\textsuperscript{185}

The accounting officer of a municipality is also responsible for the management of
the expenditure of the municipality. The accounting officer must for such purposes
take all reasonable steps to ensure:

(a) that the municipality has and maintains an effective system of expenditure
control, including procedures for the approval, authorisation, withdrawal and
payment of funds;

(b) that the municipality has and maintains a management, accounting and informa-
tion system which:

(i) recognises expenditure when it is incurred;

(ii) accounts for creditors of the municipality;\textsuperscript{186} and

(iii) accounts for payments made by the municipality;

(c) that the municipality has and maintains a system of internal control in respect
of creditors and payments;

(d) that payments by the municipality are made:

(i) directly to the person to whom it is due unless agreed otherwise for rea-
sons as may be prescribed; and

\textsuperscript{184} See the MFMA s 64(1)(a)-(h).
\textsuperscript{185} The MFMA s 64(3)-(4).
\textsuperscript{186} In relation to a municipality, “creditor” means a person to whom money is owing by the mu-
nicipality. See the MFMA s 1.
(ii) either electronically or by way of non-transferable cheques, provided that
cash payments and payments by way of cash cheques may be made for
exceptional reasons only, and only up to a prescribed limit;
(e) that all money owing by the municipality be paid within 30 days of receiving
the relevant invoice or statement, unless prescribed otherwise for certain
categories of expenditure;
(f) that the municipality complies with its tax, levy, duty, pension, medical aid,
audit fees and other statutory commitments;
(g) that any dispute concerning payments due by the municipality to another or-
gan of state is disposed of in terms of legislation regulating disputes between
organs of state;
(h) that the municipality's available working capital is managed effectively and
economically in terms of the prescribed cash management and investment
framework;
(i) that the municipality's supply chain management policy referred to in section
111 of the MFMA is implemented in a way that is fair, equitable, transparent,
competitive and cost-effective; and
(j) that all financial accounts of the municipality are closed at the end of each
month and reconciled with its records.187

In a format and for periods as may be prescribed, the accounting officer of a munici-
pality must report to the council on all expenditure incurred by the municipality on
staff salaries, wages, allowances and benefits, and in a manner that discloses such
expenditure per type of expenditure, namely:
• salaries and wages
• contributions for pensions and medical aid
• travel, motor car, accommodation, subsistence and other allowances
• housing benefits and allowances
• overtime payments
• loans and advances and
• any other type of benefit or allowance related to staff.188

187 See the MFMA s 65(1)-(2).
188 The MFMA s 66(a)-(g).
Before transferring funds of the municipality to an organisation or body outside any sphere of government otherwise than in compliance with a commercial or other business transaction, the accounting officer must be satisfied that the organisation or body:

(a) has the capacity and has agreed:

(i) to comply with any agreement with the municipality;

(ii) for the period of the agreement to comply with all reporting, financial management and auditing requirements as may be stipulated in the agreement;

(iii) to report at least monthly to the accounting officer on actual expenditure against such transfer; and

(iv) to submit its audited financial statements for its financial year to the accounting officer promptly;

(b) implements effective, efficient and transparent financial management and internal control systems to guard against fraud, theft and financial mismanagement; and

(c) has in respect of previous similar transfers complied with all the requirements of this section.\(^{189}\)

The accounting officer of a municipality must assist the mayor in performing the budgetary functions assigned to the mayor and provide the mayor with the administrative support, resources and information necessary for the performance of those functions.\(^{190}\) The accounting officer is further responsible for implementing the municipality's approved budget, including taking all reasonable steps to ensure that the spending of funds is in accordance with the budget and is reduced as necessary when revenue is anticipated to be less than projected in the budget or in the service

---

\(^{189}\) See the MFMA s 67(1)(a)-(c). If there has been a failure by an organisation or body to comply with the requirements of ss 67(1) in respect of a previous transfer, the municipality may, despite s 67(1)(c) make a further transfer to that organisation or body, provided that s 67(1)(a) and (b) is complied with and the relevant provincial treasury has approved the transfer. Through contractual and other appropriate mechanisms, the accounting officer must enforce compliance with s 67(1). Furthermore, s 67(1)(a) does not apply to an organisation or body serving the poor or used by government as an agency to serve the poor, provided that the transfer does not exceed a prescribed limit and that the accounting officer: (i) takes all reasonable steps to ensure that the targeted beneficiaries receive the benefit of the transferred funds and (ii) certifies to the Auditor-General that compliance by that organisation or body with ss 67(1)(a) is uneconomical or unreasonable. Read also the MFMA s 67(2)-(4).

\(^{190}\) The MFMA s 68.
delivery and budget implementation plan and that revenue and expenditure are properly monitored. When necessary, the accounting officer must prepare an adjustments budget and submit it to the mayor for consideration and tabling in the municipal council. No later than 14 days after the approval of an annual budget, the accounting officer must submit to the mayor a draft service delivery and budget implementation plan for the budget year and drafts of the annual performance agreements as required in terms of section 57(1)(b) of the Municipal Systems Act for the municipal manager and all senior managers.  

In respect of impending shortfalls, overspending and overdrafts, the accounting officer of a municipality must report in writing to the municipal council any

- impending shortfalls in budgeted revenue
- overspending of the municipality's budget
- steps taken to prevent or rectify such shortfalls or overspending.

If the balance in a municipality's bank account or the consolidated balance in the municipality's bank accounts if the municipality has more than one bank account, shows a net overdrawn position for a period exceeding a prescribed period, then the accounting officer of the municipality must promptly notify the National Treasury in the prescribed format of

- the amount by which the account or accounts are overdrawn
- the reasons for the overdrawn account or accounts
- the steps taken or to be taken to correct the matter.  

The accounting officer of a municipality is further obligated to submit, by no later than 10 working days after the end of each month, to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget, which statement should reflect the following particulars for that month and for the financial year up to the end of that month:

(a) Actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure, per vote;
(d) actual capital expenditure, per vote;

---

191 See the MFMA s 69(1)-(3).
192 See the MFMA s 70(1)-(3). When determining the net overdrawn position, the accounting officer must exclude any amounts reserved or pledged for any specific purpose or encumbered in any other way.
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on (i) its share of the local government equitable share; and (ii) allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of:
(i) any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote;
(ii) any material variances from the service delivery and budget implementation plan; and
(iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the municipality's approved budget.193

The statement mentioned above must include a projection of the relevant municipality's revenue and expenditure for the rest of the financial year and any revisions from initial projections and the prescribed information relating to the state of the budget of each municipal entity as provided to the municipality in terms of section 87(10) of the MFMA. The amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the municipality's approved budget.194

The accounting officer of a municipality which has received an allocation referred to in subsection 71(1)(e) of the MFMA during any particular month must submit, by no later than 10 working days after the end of that month, that part of the statement reflecting the particulars referred to in subsection 71(1)(e) and (f) to the national or provincial organ of state or municipality which transferred the allocation. By no later than 22 working days after the end of each month, the provincial treasury must submit to the National Treasury a consolidated statement in the prescribed format on the state of the municipalities' budgets, per municipality and per municipal entity. Within 30 days after the end of each quarter, the provincial treasury must also make public as may be prescribed, a consolidated statement in the prescribed format on the state of municipalities' budgets per municipality and per municipal entity. The MEC for

193 The MFMA S 71(1)(a)-(g).
194 See the MFMA s 71(2)(a)-(b). Note that the statement to the provincial treasury must be in the format of a signed document and in electronic format.
finance must submit such consolidated statement to the provincial legislature no later than 45 days after the end of each quarter.195

By 25 January of each year all accounting officers of municipalities must
• assess the performance of the municipality during the first half of the financial year, taking into account
  (a) the monthly statements referred to in section 71 of the MFMA for the first half of the financial year
  (b) the municipality's service delivery performance during the first half of the financial year, and the service delivery targets and performance indicators set in the service delivery and budget implementation plan
  (c) the past year's annual report, and progress on resolving problems identified in the annual report
  (d) the performance of every municipal entity under the sole or shared control of the municipality, taking into account reports in terms of section 88 of the MFMA from any such entities
• submit a report on such assessment to
  (a) the mayor of the municipality
  (b) the National Treasury
  (c) the relevant provincial treasury.196
As part of the review process, the accounting officer must make recommendations as to whether an adjustments budget is necessary and recommend revised projections for revenue and expenditure to the extent that this may be necessary.197

The accounting officer of a municipality is obligated to inform the provincial treasury in writing of any failure by the council of the municipality to adopt or implement a budget-related policy or a supply chain management policy referred to in section 111 of the MFMA or any non-compliance by a political structure or office-bearer of the municipality with any such policy.198 Apart from such obligations, the accounting officer of a municipality must also submit to the National Treasury, the provincial treasury, the department for local government in the province or the Auditor-General

195 Read the MFMA s 71(5)-(7).
196 Refer to the MFMA s 72(1)(a)-(b). The statement referred to in s 71(1) for the sixth month of a financial year may be incorporated into the report referred to in subs (1)(b) of this section.
197 The MFMA s 72(2)-(3).
198 See the MFMA s 73(a)-(b).
such information, returns, documents, explanations and motivations as may be pre-
scribed or as may be required. If the accounting officer of a municipality is unable to
comply with any of the responsibilities in terms of this Act, he or she must report the
inability promptly, together with reasons, to the mayor and the provincial treasury.\footnote{199}

In order to facilitate accountability, openness and public participation, the MFMA
requires that various aspects of information should be placed on each municipal
website. In this regard, the accounting officer of a municipality must place on the
website referred to in section 21A of the Municipal Systems Act the following docu-
ments of the municipality:

(a) the annual and adjustments budgets and all budget-related documents;
(b) all budget-related policies;
(c) the annual report;
(d) all performance agreements required in terms of section 57(1)(b) of the Mu-
   nicipal Systems Act;
(e) all service delivery agreements;
(f) all long-term borrowing contracts;
(g) all supply chain management contracts above a prescribed value;
(h) an information statement containing a list of assets over a prescribed value
   that have been disposed of in terms of section 14(2) or (4) during the previous
   quarter;
(i) contracts to which subsection (1) of section 33 apply, subject to subsection (3)
   of that section;
(j) public-private partnership agreements referred to in section 120;
(k) all quarterly reports tabled in the council in terms of section 52(d); and
(l) any other documents that must be placed on the website in terms of this act or
   any other applicable legislation, or as may be prescribed.\footnote{200}

All accounting officers are afforded special protection under the MFMA. In this regard
the Act determines that any action taken by a political structure or office-bearer of a
municipality against the accounting officer of the municipality solely because of that

\footnote{199} Read the MFMA s 74(1)-(2).
\footnote{200} See the MFMA s 75(1)(a)-(e). A document referred to in ss 75(1) must be placed on the
   website not later than five days after its tabling in the council or on the date on which it must be
   made public, whichever occurs first.
accounting officer's compliance with a provision of this Act is an unfair labour prac-
tice for the purposes of the Labour Relations Act.201

The MFMA further determines that the top management of a municipality's admini-
stration consists of:

- the accounting officer
- the chief financial officer
- all senior managers who are responsible for managing the respective votes of the
  municipality and to whom powers and duties for this purpose have been delegated
  and
- any other senior officials designated by the accounting officer.202

Each senior manager of a municipality and each official of a municipality exercising
financial management responsibilities must take all reasonable steps within their
respective areas of responsibility to ensure:

(a) that the system of financial management and internal control established for
    the municipality is carried out diligently;
(b) that the financial and other resources of the municipality are utilised effec-
    tively, efficiently, economically and transparently;
(c) that any unauthorised, irregular or fruitless and wasteful expenditure and any
    other losses are prevented;
(d) that all revenue due to the municipality is collected;
(e) that the assets and liabilities of the municipality are managed effectively and
    that assets are safeguarded and maintained to the extent necessary;
(f) that all information required by the accounting officer for compliance with the
    provisions of this act is timeously submitted to the accounting officer; and
(g) that the provisions of this act, to the extent applicable to that senior manager
    or official, including any delegations, are complied with.203

The accounting officer of a municipality must, for the proper application of the MFMA
in the municipality's administration, develop an appropriate system of delegation that

201 See the MFMA s 76 read together with Act 66 of 1995.
202 The MFMA s 77(1)(a)-(d). The top management must assist the accounting officer in manag-
ing and co-ordinating the financial administration of the municipality. It should be remembered that
the municipal manager is also the accounting officer of a municipality and thus part of top manage-
ment.
203 Note that a senior manager or such official must perform the functions referred to in s 78(1)
subject to the directions of the accounting officer of the municipality. See also the MFMA s 78(1)-(2).
will both maximise administrative and operational efficiency and provide adequate checks and balances in the municipality's financial administration. In accordance with that system, such officer may further delegate to a member of the municipality's top management or any other official of the municipality

- any of the powers or duties assigned to an accounting officer in terms of the MFMA
- any powers or duties reasonably necessary to assist the accounting officer in complying with a duty which requires the accounting officer to take reasonable or appropriate steps to ensure the achievement of the aims of a specific provision of the MFMA.

An accounting officer must regularly review delegations issued and, if necessary, amend or withdraw any of those delegations.\(^\text{204}\) A delegation in terms of subsection 79(1) of the MFMA:

- must be in writing
- is subject to such limitations and conditions as the accounting officer may impose in a specific case
- may either be to a specific individual or to the holder of a specific post in the municipality
- may, in the case of a delegation to a member of the municipality's top management, authorise that member to sub-delegate the delegated power or duty to an official or the holder of a specific post in that member’s area of responsibility and
- does not divest the accounting officer of the responsibility concerning the exercise of the delegated power or the performance of the delegated duty.\(^\text{205}\)

(h) Aspects relating to municipal budget and treasury offices

Under the MFMA every municipality must have a budget and treasury office. A budget and treasury office consists of a chief financial officer designated by the accounting officer of the municipality, officials of the municipality allocated by the ac-

\(^{204}\) Note that the accounting officer may not delegate to any political structure or political office-bearer of the municipality any of the powers or duties assigned to accounting officers in terms of the MFMA. Read also the MFMA s 79(1)-(2).

\(^{205}\) See the MFMA s 79(3)(a)-(e). The accounting officer may confirm, vary or revoke any decision taken in consequence of a delegation or sub-delegation in terms of this section, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.
counting officer to the chief financial officer and any other persons contracted by the municipality for the work of the office.\textsuperscript{206}

Within a treasury office, the chief financial officer of a municipality:

- is administratively in charge of the budget and treasury office
- must advise the accounting officer on the exercise of powers and duties assigned to the accounting officer in terms of the MFMA
- must assist the accounting officer in the administration of the municipality's bank accounts and in the preparation and implementation of the municipality's budget
- must advise senior managers and other senior officials in the exercise of powers and duties assigned to them in terms of section 78 or delegated to them in terms of section 79 of the MFMA and
- must perform such budgeting, accounting, analysis, financial reporting, cash management, debt management, supply chain management, financial management, review and other duties as may be delegated by the accounting officer to the chief financial officer.\textsuperscript{207}

The chief financial officer of a municipality may sub-delegate any of the duties referred to in section 81(1)(b), (d) and (e) of the MFMA:

- to an official in the budget and treasury office
- to the holder of a specific post in that office or
- with the concurrence of the accounting officer to
  - (a) any other official of the municipality or
  - (b) any person contracted by the municipality for the work of the office.\textsuperscript{208}

If the chief financial officer sub-delegates any duties to a person who is not an employee of the municipality, the chief financial officer must be satisfied that effective systems and procedures are in place to ensure control and accountability. A sub-delegation in terms of subsection (1):

- must be in writing
- is subject to such limitations or conditions as the chief financial officer may impose and

\textsuperscript{206} The MFMA s 80(1)-(2).
\textsuperscript{207} See the MFMA s 81(1)(a)-(e). Note that the chief financial officer of a municipality is accountable to the accounting officer for the performance of the duties referred to in the Act s 81(1).
\textsuperscript{208} The MFMA s 82(1)(a)-(c).
does not divest the chief financial officer of the responsibility concerning the delegated duty.\textsuperscript{209}

In order to fulfill the vast array of duties and responsibilities, the MFMA sets specific competency levels for financial officials. In this regard the accounting officer, senior managers, the chief financial officer and other financial officials of a municipality must meet the prescribed financial management competency levels. A municipality must provide resources or opportunities for the training of officials referred to above to meet the prescribed competency levels. Both the National Treasury or a provincial treasury may assist municipalities in the training of officials referred to in subsection 83(1) of the MFMA.\textsuperscript{210}

(i) Aspects concerning municipal entities

When considering the establishment of, or participation in, a municipal entity, a municipality must first

- determine precisely the function or service that such entity would perform on behalf of the municipality and
- make an assessment of the impact of the shifting of that function or service to the entity on the municipality’s staff, assets and liabilities, including an assessment of:
  (i) the number of staff of the municipality to be transferred to the entity;
  (ii) the number of staff of the municipality that would become redundant because of the shifting of that function or service;
  (iii) the cost to the municipality of any staff retrenchments or the retention of redundant staff;
  (iv) any assets of the municipality to be transferred to the entity;
  (v) any assets of the municipality that would become obsolete because of the shifting of that function or service;
  (vi) any liabilities of the municipality to be ceded to the entity; and
  (vii) any debt of the municipality attributed to that function or service which the municipality would retain.\textsuperscript{211}

A municipality may establish or participate in a municipal entity only if:

---

\textsuperscript{209} Read the MFMA s 82(2)-(3). Note also that the chief financial officer may confirm, vary or revoke any decision taken in consequence of a sub-delegation, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.

\textsuperscript{210} See the MFMA s 83(1)-(3).

\textsuperscript{211} The MFMA s 84(1)(a)-(b).
(a) the municipal manager, at least 90 days before the meeting of the municipal
council at which the proposed establishment of the entity, or the municipality's
proposed participation in the entity, is to be approved –

(i) has, in accordance with section 21A of the Municipal Systems Act:

(aa) made public an information statement setting out the municipality's
plans for the municipal entity together with the assessment which the
municipality must conduct in terms of subsection (1); and

(bb) invited the local community, organised labour and other interested per-
sons to submit to the municipality comments or representations in re-
spect of the matter; and

(ii) has solicited the views and recommendations of –

(aa) the National Treasury and the relevant provincial treasury;

(bb) the national and provincial departments responsible for local govern-
ment; and

(cc) the MEC for local government in the province; and

(b) the municipal council has taken into account –

(i) the assessment referred to in subsection (1);

(ii) any comments or representations on the matter received from the local
community, organised labour and other interested persons;

(iii) any written views and recommendations on the matter received from the
National Treasury, the relevant provincial treasury, the national depart-
ment responsible for local government or the MEC for local government in
the province.212

A municipal entity must open and maintain at least one bank account in the name of
the entity. All money received by a municipal entity must be paid into its bank ac-
count or accounts, and this must be done promptly and in accordance with any re-
quirements that may be prescribed. A municipal entity may not open a bank account:
• abroad
• with an institution not registered as a bank in terms of the Banks Act213
• otherwise than in the name of the entity and

212 The MFMA s 84(2)(a)-(b). For the purposes of this section, “establish” includes the acquisition
of an interest in a private company that would render that private company a municipal entity.
213 94 of 1990.
Money may be withdrawn from a municipal entity's bank account only in accordance with requirements that may be prescribed. The accounting officer of a municipal entity:

- must administer all the entity's bank accounts
- is accountable to the board of directors of the entity for the entity's bank accounts and
- must enforce any requirements that may be prescribed.\textsuperscript{214}

The accounting officer of a municipal entity must submit to the entity's parent municipality, in writing and within 90 days after the entity has opened a new bank account, the name of the bank where the account has been opened and the type and number of the account, and annually before the start of a financial year, the name of each bank where the entity holds a bank account and the type and number of each account. The accounting officer of the municipal entity's parent municipality, or if there is more than one parent municipality, any one of the accounting officers of those municipalities as may be agreed between them must, upon receipt of the information referred to above, submit that information to the Auditor-General, the National Treasury and the relevant provincial treasury, in writing.\textsuperscript{215}

In respect of budgets, it is required that for each financial year the board of directors of a municipal entity must submit a proposed budget for the entity to its parent municipality not later than 150 days before the start of the entity's financial year or earlier if requested by the parent municipality. The parent municipality must consider the proposed budget of the entity and assess the entity's priorities and objectives. If the parent municipality makes any recommendations on the proposed budget, the board of directors of the entity must consider those recommendations and, if necessary, submit a revised budget to the parent municipality not later than 100 days before the start of the financial year. The mayor of the parent municipality must table the proposed budget of the municipal entity in the council when the annual budget of the municipality for the relevant year is tabled. The board of directors of a municipal entity must approve the budget of the municipal entity not later than 30 days before

\textsuperscript{214} See the MFMA s 85(1)-(5).
\textsuperscript{215} Read the MFMA s 86(1)-(2).
the start of the financial year, taking into account any hearings or recommendations of the council of the parent municipality.216

The budget of a municipal entity must conform to the following requirements. It must:

(a) be balanced;
(b) be consistent with any service delivery agreement or other agreement between the entity and the entity's parent municipality;
(c) be within any limits determined by the entity's parent municipality, including any limits on tariffs, revenue, expenditure and borrowing;
(d) include a multi-year business plan for the entity that –
   (i) sets key financial and non-financial performance objectives and measurement criteria as agreed with the parent municipality;
   (ii) is consistent with the budget and integrated development plan of the entity's parent municipality;
   (iii) is consistent with any service delivery agreement or other agreement between the entity and the entity's parent municipality; and
   (iv) reflects actual and potential liabilities and commitments, including particulars of any proposed borrowing of money during the period to which the plan relates; and
(e) otherwise comply with the requirements of section 17(1) and (2) of the MFMA to the extent that such requirements can reasonably be applied to the entity.217

With the approval of the mayor, the board of directors of a municipal entity may revise the budget of the municipal entity, but only for the following reasons:

• to adjust the revenue and expenditure estimates downwards if there is material under-collection of revenue during the current year
• to authorise expenditure of any additional allocations to the municipal entity from its parent municipality
• to authorise, within a prescribed framework, any unforeseeable and unavoidable expenditure approved by the mayor of the parent municipality
• to authorise any other expenditure within a prescribed framework.218

216 Refer to the MFMA s 87(1)-(4).
217 See the MFMA s 87(5)(a)-(e).
Any projected allocation to a municipal entity from its parent municipality must be provided for in the annual budget of the parent municipality and, to the extent not so provided, the entity's budget must be adjusted. A municipal entity may incur expenditure only in accordance with its approved budget or an adjustments budget. The mayor must table the budget or adjusted budget and any adjustments budget of a municipal entity as approved by its board of directors, at the next council meeting of the municipality. A municipal entity's approved budget or adjusted budget must be made public in substantially the same way as the budget of a municipality must be made public. The accounting officer of a municipal entity must by no later than seven working days after the end of each month submit to the accounting officer of the parent municipality a statement in the prescribed format on the state of the entity's budget reflecting the following particulars for that month and for the financial year up to the end of that month:

(a) actual revenue, per revenue source;
(b) actual borrowings;
(c) actual expenditure;
(d) actual capital expenditure;
(e) the amount of any allocations received;
(f) actual expenditure on those allocations, excluding expenditure on allocations exempted by the annual Division of Revenue Act from compliance with this paragraph; and
(g) when necessary, an explanation of –
   (i) any material variances from the entity's projected revenue by source, and from the entity's expenditure projections;
   (ii) any material variances from the service delivery agreement and the business plan; and
   (iii) any remedial or corrective steps taken or to be taken to ensure that projected revenue and expenditure remain within the entity's approved budget.\(^{219}\)

The statement mentioned above must include a projection of revenue and expenditure for the rest of the financial year and any revisions from initial projections.

\(^{218}\) The MFMA s 87(6)(a)-(d).
\(^{219}\) See the MFMA s 87(7)-(11).
Amounts reflected in the statement must in each case be compared with the corresponding amounts budgeted for in the entity's approved budget. Finally, the statement to the accounting officer of the municipality must be in the format of a signed document and in electronic format.220

The accounting officer of a municipal entity must by 20 January of each year
• assess the performance of the entity during the first half of the financial year, taking into account the monthly statements referred to in section 87 of the MFMA for the first half of the financial year and the targets set in the service delivery, business plan or other agreement with the entity's parent municipality and the entity's annual report for the past year, and progress on resolving problems identified in the annual report
• submit a report on such assessment to
  (a) the board of directors of the entity
  (b) the parent municipality of the entity.221

The parent municipality of a municipal entity must determine the upper limits of the salary, allowances and other benefits of the chief executive officer and senior managers of the entity and monitor and ensure that the municipal entity reports to the council on all expenditure incurred by that municipal entity on directors and staff remuneration matters and in a manner that discloses such expenditure per type of expenditure. This should include:
• salaries and wages
• contributions for pensions and medical aid
• travel, motor car, accommodation, subsistence and other allowances
• housing benefits and allowances
• overtime payments
• loans and advances
• any other type of benefit or allowance related to directors and staff.222

A municipal entity may not transfer ownership as a result of a sale or other transaction or otherwise dispose of a capital asset needed to provide the minimum level of basic municipal services. Municipal entities may transfer ownership or otherwise

---

220 Read the MFMA s 87(12)-(14).
221 See the MFMA s 88(1)-(2). A report referred to above must be made public.
222 Read the MFMA s 89(a)-(b).
dispose of a capital asset other than an asset contemplated in subsection 90(1) of the MFMA, but only after the council of its parent municipality, in a meeting open to the public has decided on reasonable grounds that the asset is not needed to provide the minimum level of basic municipal services and has considered the fair market value of the asset and the economic and community value to be received in exchange for the asset. A decision by a municipal council that a specific capital asset is not needed to provide the minimum level of basic municipal services may not be reversed by the municipality or municipal entity after that asset has been sold, transferred or otherwise disposed of. Furthermore, a municipal council may delegate to the accounting officer of a municipal entity its power to make the determinations referred to in subsection 90(2)(a) and (b) in respect of movable capital assets of the entity below a value determined by the council. Any transfer of ownership of a capital asset in terms of subsection 90(2) or (4) of the MFMA must be fair, equitable, transparent and competitive and consistent with the supply chain management policy which the municipal entity must have and maintain in terms of section 111 of the MFMA. 

The financial year of a municipal entity must be the same as that of municipalities and the Auditor-General must audit and report on the accounts, financial statements and financial management of each municipal entity. The chief executive officer of a municipal entity is the accounting officer of the entity. The accounting officer of a municipal entity has various fiduciary duties. He or she must:

(a) exercise utmost care to ensure reasonable protection of the assets and records of the entity;
(b) act with fidelity, honesty, integrity and in the best interest of the entity in managing the financial affairs of the entity;
(c) disclose to the entity’s parent municipality and the entity’s board of directors all material facts, including those reasonably discoverable, which in any way may influence the decisions or actions of the parent municipality or the board of directors; and

Note that s 90 does not apply to the transfer of a capital asset to a municipality or another municipal entity or to a national or provincial organ of state in circumstances and in respect of categories of assets approved by the National Treasury, provided that such transfers are in accordance with a prescribed framework. See the MFMA s 90(1)-(6).

Refer to the MFMA ss 91 and 92.
(d) seek, within the sphere of influence of that accounting officer, to prevent any prejudice to the financial interests of the parent municipality or the municipal entity.\textsuperscript{225} The accounting officer may not act in a way that is inconsistent with the responsibilities assigned to accounting officers of municipal entities in terms of this act or use the position or privileges of, or confidential information obtained as accounting officer, for personal gain or to improperly benefit another person.\textsuperscript{226}

The accounting officer of a municipal entity is responsible for managing the financial administration of the entity and must for this purpose take all reasonable steps to ensure:

(a) that the resources of the entity are used effectively, efficiently, economically and transparently;
(b) that full and proper records of the financial affairs of the entity are kept;
(c) that the entity has and maintains effective, efficient and transparent systems-
   (i) of financial and risk management and internal control; and
   (ii) of internal audit complying with and operating in accordance with any prescribed norms and standards;
(d) that irregular and fruitless and wasteful expenditure and other losses are prevented;
(e) that expenditure is in accordance with the operational policies of the entity; and
(f) that disciplinary or, when appropriate, criminal proceedings, are instituted against any official of the entity who has allegedly committed an act of financial misconduct or an offence in terms of chapter 15 of the MFMA.\textsuperscript{227}

The accounting officer of a municipal entity is responsible for the management of the assets of the entity, including the safeguarding and maintenance of those assets and the liabilities of the entity. For the purposes of subsection 96(1) of the MFMA, the accounting officer must take all reasonable steps to ensure that the entity has and maintains a management, accounting and information system that accounts for proper assets and liabilities of the management systems of the municipal entity and

\textsuperscript{225} See the MFMA s 94(1)(a)-(d).
\textsuperscript{226} The MFMA s 94(2)(a)-(b).
\textsuperscript{227} Read the MFMA s 95(a)-(f).
a system of internal control of assets and liabilities, including an asset and liabilities
register, as may be prescribed. 228 Furthermore, the accounting officer of a municipal
entity must take all reasonable steps to ensure:

(a) that the entity has and implements effective revenue collection systems to give
effect to its budget;

(b) that all revenue due to the entity is collected;

(c) that any funds collected by the entity on behalf of a municipality-
   (i) are transferred to that municipality strictly in accordance with the agreement
       between the entity the municipality; and
   (ii) are not used for the purposes of the entity;

(d) that the municipal entity has effective revenue collection systems consistent
   with those of the parent municipality;

(e) that revenue due to the entity is calculated on a monthly basis;

(f) that accounts for service charges are prepared on a monthly basis, or less
   often as may be prescribed where monthly accounts are uneconomical;

(g) that all money received is promptly deposited in accordance with this act into
   the municipal entity's bank accounts;

(h) that the municipal entity has and maintains a management, accounting and
   information system which:
   (i) recognises revenue when it is earned;
   (ii) accounts for debtors; and
   (iii) accounts for receipts of revenue;

(i) that the municipal entity has and maintains a system of internal control in
   respect of debtors and revenue, as may be prescribed; and

(j) that all revenue received by the municipal entity, including revenue received
   by any collecting agent on its behalf, is reconciled at least on a weekly ba-
   sis. 229

Monthly reconciliation of revenue and accounts is also required. The accounting
officer of a municipal entity must take all reasonable steps to ensure that all revenue
received by the entity, including revenue received by any collecting agency on its

228 See the MFMA s 96(1)-(2).
229 See the MFMA s 97(2)(a)-(j). The accounting officer must immediately inform the parent
municipality of any payments due by an organ of state to the entity in respect of service charges, if
such payments are regularly in arrears for periods of more than 30 days.
behalf, is reconciled on a monthly or more regular basis, and all accounts of the entity are reconciled each month.230

Each accounting officer of a municipal entity is responsible for the management of the expenditure of the entity. Such an officer must for the purpose of subsection 99(1) of the MFMA take all reasonable steps to ensure:

(a) that the entity has and maintains an effective system of expenditure control including procedures for the approval, authorisation, withdrawal and payment of funds;

(b) that all money owing by the entity is paid within 30 days of receiving the relevant invoice or statement unless prescribed otherwise for certain categories of expenditure;

(c) that the entity has and maintains a management, accounting and information system which:
   (i) recognises expenditure when it is incurred;
   (ii) accounts for creditors of the entity; and
   (iii) accounts for payments made by the entity;

(d) that the entity has and maintains a system of internal control in respect of creditors and payments;

(e) that payments by the entity are made –
   (i) directly to the person to whom it is due unless agreed otherwise only for reasons as may be prescribed; and
   (ii) either electronically or by way of non-transferable cheques, provided that cash payments and payments by way of cash cheques may be made for exceptional reasons only, and only up to a prescribed limit;

(f) that the entity complies with its tax, duty, pension, medical aid, audit fees and other statutory commitments;

(g) that the entity's available working capital is managed effectively and economically in terms of any prescribed cash management and investment framework; and

(h) that the entity has and implements a supply chain management policy in accordance with section 111 of the MFMA in a way that is fair, equitable, trans

230 The MFMA s 98(a)-(b).
parent and cost-effective.\textsuperscript{231}

The accounting officer of a municipal entity is also responsible for implementing the entity's budget, including taking effective and appropriate steps to ensure that

- the spending of funds is in accordance with the budget
- revenue and expenditure are properly monitored
- spending is reduced as necessary when revenue is anticipated to be less than projected in the budget.\textsuperscript{232}

It is furthermore required that the accounting officer of a municipal entity must report, in writing, to the board of directors of the entity, at its next meeting, and to the accounting officer of the entity’s parent municipality any financial problems of the entity, including:

(a) any impending or actual-
   (i) under collection of revenue due;
   (ii) shortfalls in budgeted revenue;
   (iii) overspending of the entity's budget;
   (iv) delay in the entity's payments to any creditors; or
   (v) overdraft in any bank account of the entity for a period exceeding 21 days; and

(b) any steps taken to rectify such financial problems.\textsuperscript{233}

On discovery of any irregular expenditure or any fruitless and wasteful expenditure, the board of directors of a municipal entity must promptly report, in writing, to the mayor and municipal manager of the entity's parent municipality and the Auditor-General

- particulars of the expenditure
- any steps that have been taken
  (a) to recover the expenditure
  (b) to prevent a recurrence of the expenditure.

The board of directors of a municipal entity must promptly report to the South African Police Service any irregular expenditure that may constitute a criminal offence and

\textsuperscript{231} Read the MFMA s 99(2)(a)-(h).
\textsuperscript{232} The MFMA s 100(a)-(c).
\textsuperscript{233} The accounting officer of the municipality must table a report referred to in s 101(1) in the municipal council at its next meeting. See the MFMA s 101(1)-(2).
other losses suffered by the municipal entity which resulted from suspected criminal conduct.\textsuperscript{234}

The accounting officer of a municipal entity must promptly report to the speaker of the council of the entity’s parent municipality any interference by a councillor outside that councillor’s assigned duties in the financial affairs of the municipal entity or the responsibilities of the board of directors of the municipal entity.\textsuperscript{235} Except where otherwise provided in the MFMA, the accounting officer of a municipal entity is responsible for the submission by the entity of all reports, returns, notices and other information to the entity’s parent municipality as may be required by the Act and must submit to the accounting officer of the entity’s parent municipality, the National Treasury, the relevant provincial treasury, the department of local government in the province or the Auditor-General such information, returns, documents, explanations and motivations as may be prescribed or as may be required.\textsuperscript{236}

Each official of a municipal entity exercising financial management responsibilities must take all reasonable steps within that official’s area of responsibility to ensure that:

(a) the system of financial management and internal control established for the entity is carried out diligently;
(b) the financial and other resources of the entity are utilised effectively, efficiently, economically and transparently;
(c) any irregular expenditure, fruitless and wasteful expenditure and other losses are prevented;
(d) all revenue due to the entity is collected;
(e) the provisions of this Act to the extent applicable to that official, including any delegations in terms of section 106 of the MFMA, are complied with; and
(f) the assets and liabilities of the entity are managed effectively, and that assets are safeguarded and maintained to the extent necessary.\textsuperscript{237}

\textsuperscript{234} The MFMA s 102(1)-(2).
\textsuperscript{235} The MFMA s 103.
\textsuperscript{236} If the accounting officer of a municipal entity is unable to comply with any of the responsibilities in terms of the MFMA, he or she must report the inability to the council of the entity’s parent municipality promptly, together with reasons. See the MFMA s 104(1)-(2).
\textsuperscript{237} An official of a municipal entity must perform the functions referred to above, subject to the directions of the accounting officer of the entity. Refer to the MFMA s 105(1)-(2).
In respect of the delegation of authority, it is provided that the accounting officer of a municipal entity may delegate to an official of that entity:

- any of the powers or duties assigned or delegated to the accounting officer in terms of the MFMA or
- any powers or duties reasonably necessary to assist the accounting officer in complying with a duty which requires the accounting officer to take reasonable or appropriate steps to ensure the achievement of the aims of a specific provision of the MFMA.

The accounting officer must also regularly review delegations issued and, if necessary, amend or withdraw any of those delegations. A delegation must be in writing, is subject to any limitations and conditions the accounting officer may impose, may be either to a specific individual or to the holder of a specific post in the municipal entity and does not divest the accounting officer of the responsibility concerning the exercise of the delegated power or the performance of the delegated duty.\(^\text{238}\) The accounting officer, senior managers, any chief financial officer and all other financial officials of a municipal entity must meet the prescribed financial management competency levels.\(^\text{239}\)

A municipal entity may borrow money, but only in accordance with the entity's multi-year business plan and the provisions of chapter 6 of the MFMA to the extent that those provisions can be applied to a municipal entity. In applying chapter 6 to a municipal entity, a reference in that chapter to a municipality, a municipal council or an accounting officer must be read as referring to a municipal entity, the board of directors of a municipal entity or the accounting officer of a municipal entity, respectively.\(^\text{240}\) If a municipal entity experiences serious or persistent financial problems and the board of directors of the entity fails to act effectively, the parent municipality must either

- take appropriate steps in terms of its rights and powers over that entity, including its rights and powers in terms of any relevant service delivery or other agreement

---

\(^{238}\) See the MFMA s 106(1)-(2). Note that an accounting officer may confirm, vary or revoke any decision taken by an official in consequence of a delegation, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.

\(^{239}\) The MFMA s 107.

\(^{240}\) See the MFMA s 108(1)-(2).
• impose a financial recovery plan, which must meet the same criteria set out in section 142 of the MFMA for a municipal financial recovery plan or
• liquidate and disestablish the entity.\textsuperscript{241}

(j) Issues relating to goods and services

Each municipality and each municipal entity must have and implement a supply chain management policy which gives effect to the provisions of this part. The supply chain management policy of a municipality or municipal entity must be fair, equitable, transparent, competitive and cost effective and comply with a prescribed regulatory framework for municipal supply chain management, which must cover at least the following:

(a) The range of supply chain management processes that municipalities and municipal entities may use, including tenders, quotations, auctions and other types of competitive bidding;
(b) when a municipality or municipal entity may or must use a particular type of process;
(c) procedures and mechanisms for each type of process;
(d) procedures and mechanisms for more flexible processes where the value of a contract is below a prescribed amount;
(e) open and transparent pre-qualification processes for tenders or other bids;
(f) competitive bidding processes in which only pre-qualified persons may participate;
(g) bid documentation, advertising of and invitations for contracts;
(h) procedures and mechanisms for:
   (i) the opening, registering and recording of bids in the presence of interested persons;
   (ii) the evaluation of bids to ensure best value for money;
   (iii) negotiating the final terms of contracts; and
   (iv) the approval of bids;
(i) screening processes and security clearances for prospective contractors on tenders or other bids above a prescribed value;

\textsuperscript{241} Read the MFMA s 109(a)-(c).
(j) compulsory disclosure of any conflicts of interests prospective contractors may have in specific tenders and the exclusion of such prospective contractors from those tenders or bids;

(k) participation in the supply chain management system of persons who are not officials of the municipality or municipal entity, subject to section 117 of the MFMA;

(l) the barring of persons from participating in tendering or other bidding processes, including persons:
   (i) who were convicted for fraud or corruption during the past five years;
   (ii) who wilfully neglected, reneged on or failed to comply with a government contract during the past five years; or
   (iii) whose tax matters are not cleared by South African Revenue Service;

(m) measures for:
   (i) combating fraud, corruption, favouritism and unfair and irregular practices in municipal supply chain management; and
   (ii) promoting ethics of officials and other role players involved in municipal supply chain management;

(n) the invalidation of recommendations or decisions that were unlawfully or improperly made, taken or influenced, including recommendations or decisions that were made, taken or in any way influenced by –
   (i) councillors in contravention of item 5 or 6 of the Code of Conduct for Councillors set out in Schedule 1 to the Municipal Systems Act; or
   (ii) municipal officials in contravention of item 4 or 5 of the Code of Conduct for Municipal Staff Members set out in Schedule 2 to that act;

(o) the procurement of goods and services by municipalities or municipal entities through contracts procured by other organs of state;

(p) contract management and dispute settling procedures; and

(q) the delegation of municipal supply chain management powers and duties, including to officials.242

With respect to unsolicited bids, a municipality or municipal entity is not obliged to consider an unsolicited bid received outside its normal bidding process. If a munici-

---

242 See the MFMA ss 111-112. Note that the regulatory framework for municipal supply chain management must be fair, equitable, transparent, competitive and cost effective.
pality or municipal entity decides to consider an unsolicited bid received outside a normal bidding process, it may do so only in accordance with a prescribed framework. Such a framework must strictly regulate and limit the power of municipalities and municipal entities to approve unsolicited bids received outside their normal tendering or other bidding processes.\textsuperscript{243}

In respect of the approval of tenders, it is stated that if a tender other than the one recommended in the normal course of implementing the supply chain management policy of a municipality or municipal entity is approved, the accounting officer of the municipality or municipal entity must, in writing, notify the Auditor-General, the relevant provincial treasury and the National Treasury and, in the case of a municipal entity, also the parent municipality of the reasons for deviating from such recommendation.\textsuperscript{244}

The accounting officer of a municipality or municipal entity must implement the supply chain management policy of the municipality or municipal entity and must take all reasonable steps to ensure that proper mechanisms and separation of duties in the supply chain management system are in place to minimise the likelihood of fraud, corruption, favouritism and unfair and irregular practices. No person may impede the accounting officer in fulfilling this responsibility.\textsuperscript{245}

A contract or agreement procured through the supply chain management system of a municipality or municipal entity must

- be in writing
- stipulate the terms and conditions of the contract or agreement, which must include provisions providing for:
  - (a) the termination of the contract or agreement in the case of non- or under-performance
  - (b) dispute resolution mechanisms to settle disputes between the parties
  - (c) a periodic review of the contract or agreement once every three years in the case of a contract or agreement for longer than three years and
  - (d) any other matters that may be prescribed.

The accounting officer of a municipality or municipal entity must also:

\textsuperscript{243} Read the MFMA s 113(1)-(3).
\textsuperscript{244} S 114(1) does not apply if a different tender was approved in order to rectify an irregularity.
\textsuperscript{245} See the MFMA s 114(1)-(2).
\textsuperscript{246} The MFMA s 115(1)-(2).
• take all reasonable steps to ensure that a contract or agreement procured through the supply chain management policy of the municipality or municipal entity is properly enforced
• monitor the performance of the contractor under the contract or agreement on a monthly basis
• establish capacity in the administration of the municipality or municipal entity:
  (a) to assist the accounting officer in carrying out the above duties and
  (b) to oversee the day-to-day management of the contract or agreement and
• report regularly to the council of the municipality or the board of directors of the entity, as may be appropriate, on the management of the contract or agreement and the performance of the contractor.246

A contract or agreement procured through the supply chain management policy of the municipality or municipal entity may be amended by the parties, but only after
(a) the reasons for the proposed amendment have been tabled in the council of the municipality or, in the case of a municipal entity, in the council of its parent municipality; and
(b) the local community:
  (i) has been given reasonable notice of the intention to amend the contract or agreement; and
  (ii) has been invited to submit representations to the municipality or municipal entity.247

According to the MFMA, no councillor of any municipality may be a member of a municipal bid committee or any other committee evaluating or approving tenders, quotations, contracts or other bids, nor attend any such meeting as an observer. No person may further interfere with the supply chain management system of a municipality or municipal entity or amend or tamper with any tenders, quotations, contracts or bids after their submission.248

The accounting officer and all other officials of a municipality or municipal entity involved in the implementation of the supply chain management policy of the municipality or municipal entity must meet the prescribed competency levels. A municipality

246 The MFMA s 116(2).
247 See the MFMA s 116(1)-(3).
248 Read the MFMA ss 117 and 118.
and a municipal entity must for the purposes of subsection 119(1) of the MFMA pro-
vide resources or opportunities for the training of officials referred to in that subsec-
tion to meet the prescribed competency levels. The National Treasury or a provincial
treasury may assist municipalities and municipal entities in the training of officials.249

A municipality may enter into a public-private partnership agreement, but only if the
municipality can demonstrate that the agreement will:
• provide value for money to the municipality
• be affordable for the municipality and
• transfer appropriate technical, operational and financial risk to the private party.
A public-private partnership agreement must comply with any prescribed regulatory
framework for public-private partnerships. If the public-private partnership involves
the provision of a municipal service, chapter 8 of the Municipal Systems Act must
also be complied with. Before a public-private partnership is concluded, the munici-
pality must conduct a feasibility study that:
(a) explains the strategic and operational benefits of the public-private partnership
for the municipality in terms of its objectives;
(b) describes in specific terms:
(i) the nature of the private party's role in the public-private partnership;
(ii) the extent to which this role, both legally and by nature, can be performed
by a private party; and
(iii) how the proposed agreement will:
(aa) provide value for money to the municipality;
(bb) be affordable for the municipality;
(cc) transfer appropriate technical, operational and financial risks to the
private party; and
(dd) impact on the municipality's revenue flows and its current and future
budgets;
(c) takes into account all relevant information; and
(d) explains the capacity of the municipality to effectively monitor, manage and
enforce the agreement.250

249 Refer to the MFMA s 119(1)-(3).
250 The MFMA s 120(1)-(4).
National government may assist municipalities in carrying out and assessing the feasibility studies referred to above. When a feasibility study has been completed, the accounting officer of the municipality must:

(a) submit the report on the feasibility study together with all other relevant documents to the council for a decision, in principle, on whether the municipality should continue with the proposed public-private partnership;

(b) at least 60 days prior to the meeting of the council at which the matter is to be considered, in accordance with section 21A of the Municipal Systems Act-

(i) make public particulars of the proposed public-private partnership, including the report on the feasibility study; and

(ii) invite the local community and other interested persons to submit to the municipality comments or representations in respect of the proposed public-private partnership; and

(c) solicit the views and recommendations of-

(i) the National Treasury;

(ii) the national department responsible for local government;

(iii) if the public-private partnership involves the provision of water, sanitation, electricity or any other service as may be prescribed, the responsible national department; and

(iv) any other national or provincial organ of state as may be prescribed.²⁵¹

(k) Requirements regarding financial reporting and auditing

For each financial year, every municipality and every municipal entity must prepare an annual report in accordance with the MFMA. Within nine months after the end of a financial year the council of a municipality must deal with the annual report of the municipality and of any municipal entity under the municipality’s sole or shared control in accordance with section 129 of the Act. The purpose of an annual report is:

• to provide a record of the activities of the municipality or municipal entity during the financial year to which the report relates

• to provide a report on performance against the budget of the municipality or municipal entity for that financial year and

²⁵¹ Note that the MFMA ss 110-119 apply to the procurement of public-private partnership agreements. S 33 also applies if the agreement will have multi-year budgetary implications for the municipality within the meaning of that section. Read also s 110 with reference to the application of the MFMA ss 110-119.
• to promote accountability to the local community for the decisions made throughout the year by the municipality or municipal entity.252

The annual report of a municipality must include the following information:

(a) the annual financial statements of the municipality,253 and in addition, if section 122(2) of the MFMA applies, consolidated annual financial statements, as submitted to the Auditor-General for audit in terms of section 126(1) of the act;

(b) the Auditor-General's audit report in terms of section 126(3) on those financial statements;

(c) the annual performance report of the municipality prepared by the municipality in terms of section 46 of the Municipal Systems Act;

(d) the Auditor-General's audit report in terms of section 45(b) of the Municipal Systems Act;

(e) an assessment by the municipality's accounting officer of any arrears on municipal taxes and service charges;

(f) an assessment by the municipality's accounting officer of the municipality's performance against the measurable performance objectives referred to in section 17(3)(b) of the MFMA for revenue collection from each revenue source and for each vote in the municipality's approved budget for the relevant financial year;

(g) particulars of any corrective action taken or to be taken in response to issues raised in the audit reports referred to in paragraphs (b) and (d);

(h) any explanations that may be necessary to clarify issues in connection with the financial statements;

(i) any information as determined by the municipality;

(j) any recommendations of the municipality's audit committee; and

(k) any other information as may be prescribed.254

The annual report of a municipal entity must include:

(a) the annual financial statements of the entity, as submitted to the Auditor-General for audit in terms of section 126(2);

252 Read the MFMA s 121(1)-(2).
253 Such financial statements include statements consisting of at least (a) a statement of financial position, (b) a statement of financial performance, (c) a cash-flow statement, (d) any other statements that may be prescribed and (d) any notes to these statements. See the MFMA s 1.
254 The MFMA s 121(3)(a)-(k).
(b) the Auditor-General's audit report in terms of section 126(3) on those financial statements;
(c) an assessment by the entity's accounting officer of any arrears on municipal taxes and service charges;
(d) an assessment by the entity's accounting officer of the entity's performance against any measurable performance objectives set in terms the service delivery agreement or other agreement between the entity and its parent municipality;
(e) particulars of any corrective action taken or to be taken in response to issues raised in the audit report referred to in paragraph (b);
(f) any information as determined by the entity or its parent municipality;
(g) any recommendations of the audit committee of the entity or of its parent municipality; and
(h) any other information as may be prescribed. 255

For each financial year, every municipality and every municipal entity must prepare annual financial statements which fairly present the state of affairs of the municipality or entity, its performance against its budget, its management of revenue, expenditure, assets and liabilities, its business activities, its financial results and its financial position as at the end of the financial year and disclose the information required in terms of sections 123, 124 and 125 of the MFMA. A municipality which has sole control of a municipal entity or which has effective control of a municipal entity which is a private company within the meaning of the Municipal Systems Act must, in addition to complying with subsection 122(1) of the MFMA, prepare consolidated annual financial statements incorporating the annual financial statements of the municipality and of such entity. Such consolidated annual financial statements must comply with any requirements as may be prescribed. Both annual financial statements and consolidated annual financial statements must be prepared in accordance with generally recognised accounting practice prescribed in terms of section 91(1)(b) of the Public Finance Management Act. 256

The annual financial statements of a municipality must disclose information on

255 The MFMA s 121(4)(a)-(h).
256 See the MFMA s 122(1)-(3). “Standards of generally recognised accounting practice” refers to an accounting practice complying with standards applicable to municipalities or municipal entities and issued in terms of the Public Finance Management Act ch 11.
any allocations received by the municipality from
(a) an organ of state in the national or provincial sphere of government or
(b) a municipal entity or another municipality

any allocations made by the municipality to
(a) a municipal entity or another municipality or
(b) any other organ of state

how any allocations were spent, per vote, excluding allocations received by the
municipality as its portion of the equitable share or where prescribed otherwise
because of the nature of the allocation

whether the municipality has complied with the conditions of
(a) any allocations made to the municipality in terms of section 214(1)(c) of the
    Constitution and
(b) any allocations made to the municipality other than by national organs of state

the reasons for any non-compliance with the two conditions referred to directly
above and

whether funds destined for the municipality in terms of the annual Division of
Revenue Act were delayed or withheld, and the reasons advanced to the munici-
pality for such delay or withholding.

The annual financial statements of a municipal entity must also disclose informa-
tion on:
• any allocations received by the entity from any municipality or other organ of state
• any allocations made by the entity to a municipality or other organ of state and
• any other information as may be prescribed.257

The notes to the annual financial statements of a municipality must include particu-
lars of
• the salaries, allowances and benefits of political office-bearers and councillors of
  the municipality, whether financial or in kind, including a statement by the account-
ing officer whether or not those salaries, allowances and benefits are within the
upper limits of the framework envisaged in section 219 of the Constitution
• any arrears owed by individual councillors to the municipality, or a municipal entity
  under its sole or shared control, for rates or services and which at any time during

257 Read the MFMA s 123(1)-(2).
the relevant financial year were outstanding for more than 90 days, including the names of those councillors and

• the salaries, allowances and benefits of the municipal manager, the chief financial officer, every senior manager and such categories of other officials as may be prescribed.

The notes to the annual financial statements of a municipal entity must include particulars of the salaries, allowances and benefits of

• the members of the board of directors of the entity and

• the chief executive officer of the entity, every senior manager and such categories of other officials as may be prescribed. 258

The notes to the financial statements of a municipality must include:

• a list of all municipal entities under the sole or shared control of the municipality during the financial year and as at the last day of the financial year.

• the total amount of contributions to organised local government for the financial year, and the amount of any contributions outstanding as at the end of the financial year; and

• the total amounts paid in audit fees, taxes, levies, duties and pension and medical aid contributions, and whether any amounts were outstanding as at the end of the financial year. 259

The notes to the annual financial statements of a municipality or municipal entity must disclose the following information:

(a) In respect of each bank account held by the municipality or entity during the relevant financial year:

(i) the name of the bank where the account is or was held, and the type of account; and

(ii) year opening and year end balances in each of these bank accounts;

(b) a summary of all investments of the municipality or entity as at the end of the financial year; 260

258 See the MFMA s 124(1)-(2).
259 The MFMA s 125(1).
260 Investment in relation to funds of a municipality means (a) the placing on deposit of funds of a municipality with a financial institution or (b) the acquisition of assets with funds of a municipality not immediately required, with the primary aim of preserving those funds. See the MFMA s 1.
(c) particulars of any contingent liabilities of the municipality or entity as at the end of the financial year;

(d) particulars of:

(i) any material losses and any material irregular or fruitless and wasteful expenditures, including in the case of a municipality, any material unauthorised expenditure, that occurred during the financial year, and whether these are recoverable;

(ii) any criminal or disciplinary steps taken as a result of such losses or such unauthorised, irregular or fruitless and wasteful expenditures; and

(iii) any material losses recovered or written off;

(e) particulars of non-compliance with this act; and

(f) any other matters that may be prescribed. 261

It is further determined that the accounting officer of a municipality must prepare the annual financial statements of the municipality and, within two months after the end of the financial year to which those statements relate, submit the statements to the Auditor-General for auditing and in addition, in the case of a municipality referred to in section 122(2) of the MFMA, must prepare consolidated annual financial statements in terms of that section and submit the statements to the Auditor-General for auditing within three months after the end of the financial year to which those statements relate. 262

It is the responsibility of the accounting officer of a municipal entity to prepare the annual financial statements of the entity and submit the statements to

• the parent municipality of the entity

• the Auditor-General

for auditing within two months after the end of the financial year to which those statements relate. The Auditor-General must audit those financial statements and submit an audit report on those statements to the accounting officer of the municipality or entity within three months of receipt of the statements. If the Auditor-General is unable to complete an audit within three months of receiving the financial statements from an accounting officer, the Auditor-General must promptly submit a report outlining the reasons for the delay to the relevant municipality or municipal entity and to

---

261 See the MFMA s 125(1)-(2).
262 The MFMA s 126(1)(a)-(b).
the relevant provincial legislature and Parliament. Once the Auditor-General has submitted an audit report to the accounting officer, no person other than the Auditor-General may alter the audit report or the financial statements to which the audit report relates.\textsuperscript{263}

According to the MFMA, within six months after the end of a financial year or on such earlier date as may be agreed between the entity and its parent municipality, the accounting officer of a municipal entity must submit the entity's annual report for that financial year to the municipal manager of the entity's parent municipality. Within seven months after the end of a financial year the mayor of a municipality must table in the municipal council the annual report of the municipality and of any municipal entity under the municipality's sole or shared control. If, for whatever reason, the mayor is unable to table in the council the annual report of the municipality or the annual report of any municipal entity under the municipality's sole or shared control within seven months after the end of the financial year to which the report relates, the mayor must promptly submit to the council a written explanation referred to in section 133(1)(a) of the MFMA, setting out the reasons for the delay, together with any components of the annual report listed in section 121(3) or (4) of the Act that are ready, and also submit to the council the outstanding annual report or the outstanding components of the annual report as soon as possible.\textsuperscript{264}

The Auditor-General may submit the financial statements and audit report of a municipality directly to the municipal council, the National Treasury, the relevant provincial treasury, the MEC responsible for local government in the province and any prescribed organ of state, if the mayor fails to comply with subsection 127(2) or (3) of the MFMA or directly to the parent municipality, the National Treasury, the relevant provincial treasury, the MEC responsible for local government in the province and any prescribed organ of state, if the accounting officer of the entity fails to comply with subsection 127(1). In accordance with section 21A of the Municipal Systems Act, the accounting officer of the municipality must make public the annual report and invite the local community to submit representations in connection with the annual report immediately after an annual report is tabled in the council. He or she must also submit the annual report to the Auditor-General, the relevant provincial

\textsuperscript{263} Read the MFMA s 126(2)-(5).
\textsuperscript{264} Refer to the MFMA s 127(1)-(3).
treasury and the provincial department responsible for local government in the province.\textsuperscript{265}

It is the responsibility of the accounting officer of a parent municipality to monitor whether the accounting officer of any municipal entity under the sole or shared control of the municipality has complied with sections 121(1) and 126(2) of the MFMA, to establish the reasons for any non-compliance and to promptly report any non-compliance, together with the reasons for such non-compliance, to the council of the parent municipality, the relevant provincial treasury and the Auditor-General.\textsuperscript{266}

The council of a municipality must consider the annual report of the municipality and any municipal entity under the municipality's sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council's comments on the annual report, which must include a statement whether the council:
- has approved the annual report with or without reservations
- has rejected the annual report or
- has referred the annual report back for revision of those components that can be revised.

The accounting officer must also attend council and council committee meetings where the annual report is discussed, for the purpose of responding to questions concerning the report and submit copies of the minutes of those meetings to the Auditor-General, the relevant provincial treasury and the provincial department responsible for local government in the province.\textsuperscript{267}

Furthermore and in accordance with section 21A of the Municipal Systems Act, the accounting officer must make public an oversight report referred to above within seven days of its adoption. The National Treasury may issue guidelines on the manner in which municipal councils should consider annual reports and conduct public hearings and the functioning and composition of any public accounts or oversight committees established by the council to assist it to consider an annual report. No

\begin{footnotesize}
\begin{itemize}
\item S 127(5), with the necessary modifications as the context may require, is also applicable if only components of the annual report are tabled in terms of s 127(3). See the MFMA s 127(4)-(6).
\item Read the MFMA s 128(a)-(c).
\item The MFMA s 129(1)-(2).
\end{itemize}
\end{footnotesize}
The meetings of a municipal council at which an annual report is to be discussed or at which decisions concerning an annual report are to be taken must be open to the public and any organs of state, and a reasonable time must be allowed for the discussion of any written submissions received from the local community or organs of state on the annual report and for members of the local community or any organs of state to address the council. Representatives of the Auditor-General are entitled to attend and to speak at any council meeting referred to above.269

All municipalities must address any issues raised by the Auditor-General in an audit report. The mayor of a municipality must ensure compliance by the municipality with this requirement. The MEC for local government in the province must also assess all annual financial statements of municipalities in the province, the audit reports on such statements and any responses of municipalities to such audit reports and determine whether municipalities have adequately addressed any issues raised by the Auditor-General in audit reports and within 60 days must report to the provincial legislature any omission by a municipality to address those issues adequately.270

Various documents must also be submitted to provincial legislatures. Such documents include:

- the annual report of each municipality and each municipal entity in the province or, if only components of an annual report were tabled in terms of section 127(3) of the MFMA, those components and
- all oversight reports on those annual reports adopted in terms of section 129(1) of the MFMA.

The accounting officer of a municipality must submit the documents to the provincial legislature within seven days after the municipal council has adopted the relevant oversight report. The MEC for local government in a province must monitor whether municipalities in the province comply with these requirements. A provincial legisla-

268 Read the MFMA s 129(3)-(4). S 129 with the necessary modifications as the context may require, is also applicable if only components of the annual report were tabled in terms of the Act s 127(3).

269 Again s 130, with the necessary modifications as the context may require, is also applicable if only components of the annual report were tabled in terms of s 127(3). See also the MFMA s 130(1)-(3).

270 Read the MFMA s 131(1)-(2).
ture may in turn deal with the documents in accordance with its constitutional powers.\textsuperscript{271}

If the accounting officer of a municipality or municipal entity fails to submit financial statements to the Auditor-General in accordance with section 126 (1) or (2) of the MFMA, or if the mayor fails to table the annual report of the municipality or a municipal entity in the council in accordance with section 127(2) of the Act, then the mayor must promptly table in the council a written explanation setting out the reasons for the failure. Furthermore, the Auditor-General, in the case of any failure to submit financial statements for auditing, must promptly

- inform the speaker of the council, the National Treasury and the MEC for local government and the MEC for finance in the province of such failure and
- issue a special report on the failure to the relevant provincial legislature.

The municipal council then

- must request the speaker or any other councillor to investigate the reasons for the failure and report to the council
- must take appropriate steps to ensure that the financial statements are submitted to the Auditor-General or that the annual report, including the financial statements and the audit report on those statements, is tabled in the council, as the case may be
- may order that disciplinary steps be taken against the accounting officer or other person responsible for the failure.\textsuperscript{272}

The provincial executive may also intervene in the municipality in terms of section 139 of the Constitution. Even the National Treasury and also the provincial treasury may take appropriate steps against the municipality in terms of section 5 of the MFMA.

The Auditor-General must submit to Parliament and the provincial legislatures by no later than 31 October of each year the names of any municipalities or municipal entities which have failed to submit their financial statements to the Auditor-General in terms of section 126 of the MFMA and at quarterly intervals thereafter, the names

\textsuperscript{271} See the MFMA s 132(1)-(5). The National Treasury may issue guidelines on the manner in which provincial legislatures should consider the annual reports of municipalities. No guidelines issued in terms of this subsection are binding on a provincial legislature unless adopted by the legislature.

\textsuperscript{272} See the MFMA s 133(1)(a)-(c).
of any municipalities or municipal entities whose financial statements are still out-
standing at the end of each interval.\textsuperscript{273} As part of the report referred to in section 48 
of the Municipal Systems Act, it is also mandatory for the cabinet member responsible 
for local government to report annually to parliament on actions taken by MECs 
for local government to address issues raised by the Auditor-General in audit reports 
on financial statements of municipalities and municipal entities.\textsuperscript{274}

\textbf{(I) Resolution of financial problems}

The primary responsibility to avoid, identify and resolve financial problems in a mu-
nicipality rests with the municipality itself. A municipality must meet its financial 
commitsments. If a municipality encounters a serious financial problem or anticipates 
problems in meeting its financial commitments, it must immediately seek solutions to 
the problem, notify the MEC for local government in the province and the MEC for 
finance in the province and notify organised local government.\textsuperscript{275} Apart from the 
municipality itself, if the MEC for local government in a province becomes aware that 
there is a serious financial problem in a municipality, the MEC must promptly
\begin{itemize}
\item consult the mayor of the municipality to determine the facts 
\item assess the seriousness of the situation and the municipality's response to the 
situation 
\item determine whether the situation justifies or requires an intervention in terms of 
\hspace{1cm} section 139 of the Constitution.
\end{itemize}

If the financial problem has been caused by or has resulted in a failure by the mu-
nicipality to comply with an executive obligation in terms of legislation or the Consti-
tution, and the conditions for an intervention in terms of section 139(1) of the 
Constitution are met, the provincial executive must promptly decide whether or not to 
intervene in the municipality. If the provincial executive decides to intervene, section 
137 of the MFMA applies. In cases where the municipality has failed to approve a 
budget or any revenue-raising measures necessary to give effect to the budget, as a 
result of which the conditions for an intervention in terms of section 139 (4) of the 
Constitution are met, the provincial executive must intervene in the municipality in 
accordance with section 26 of the MFMA. Finally, if the municipality, as a result of a

\textsuperscript{273} The MFMA s 133(2)(a)-(b). 
\textsuperscript{274} Read the MFMA s 134. 
\textsuperscript{275} See the MFMA s 135(1)-(3).
crisis in its financial affairs, is in serious or persistent material breach of its obligations to provide basic services or to meet its financial commitments or admits that it is unable to meet its obligations or financial commitments, as a result of which the conditions for an intervention in terms of section 139(5) of the Constitution are met, the provincial executive must intervene in the municipality in accordance with section 139 of the MFMA.  

If the conditions for a provincial intervention in a municipality in terms of section 139(1) of the Constitution are met and the provincial executive decides in terms of section 136(2) of the MFMA to intervene in the municipality, the provincial executive may take any appropriate steps referred to in section 139 (1) of the Constitution, including:

(a) assessing the seriousness of the financial problem in the municipality;
(b) seeking solutions to resolve the financial problem in a way that would be sustainable and would build the municipality's capacity to manage its own financial affairs;
(c) determining whether the financial problem, singly or in combination with other problems, is sufficiently serious or sustained that the municipality would benefit from a financial recovery plan and, if so, requesting any suitably qualified person:
   (i) to prepare an appropriate financial recovery plan for the municipality;
   (ii) to recommend appropriate changes to the municipality's budget and revenue-raising measures that will give effect to the recovery plan; and
   (iii) to submit the recovery plan and any recommendations referred to in sub-paragraphs (i) and (ii) to the MEC for local government in the province within a period determined by the MEC; and
(d) consulting the mayor of the municipality to obtain the municipality's cooperation in resolving the financial problem, and if applicable, implementing the financial recovery plan.  

---

276 See the MFMA s 136(1)-(4).
277 Note that the MEC must submit any assessment in terms of ss 137(1)(a), any determination in terms of ss (1)(c) and a copy of any request in terms of ss (1)(c) to the municipality and the Cabinet member responsible for local government. This obligation does not apply to a provincial intervention which is unrelated to a financial problem in a municipality. See the MFMA s 137(1)-(3).
When determining for the purposes of section 137 of the MFMA the seriousness of a financial problem, all relevant facts must be considered, and the following factors, singly or in combination, may indicate a serious financial problem:

(a) The municipality has failed to make payments as and when due;
(b) the municipality has defaulted on financial obligations for financial reasons;
(c) the actual current expenditure of the municipality has exceeded the sum of its actual current revenue plus available surpluses for at least two consecutive financial years;
(d) the municipality had an operating deficit in excess of five per cent of revenue in the most recent financial year for which financial information is available;
(e) the municipality is more than 60 days late in submitting its annual financial statements to the Auditor-General in accordance with section 126 of the MFMA;
(f) the Auditor-General has withheld an opinion or issued a disclaimer due to inadequacies in the financial statements or records of the municipality, or has issued an opinion which identifies a serious financial problem in the municipality;
(g) any of the above conditions exists in a municipal entity under the municipality's sole control, or in a municipal entity for whose debts the municipality may be responsible, and the municipality has failed to intervene effectively; or
(h) any other material condition exists which indicates that the municipality, or a municipal entity under the municipality's sole control, is likely to be unable for financial reasons to meet its obligations.278

The MFMA also provides for mandatory intervention by provincial governments into the affairs of a municipality. If a municipality, as a result of a crisis in its financial affairs, is in serious or persistent material breach of its obligations to provide basic services or to meet its financial commitments, or admits that it is unable to meet its obligations or financial commitments, the provincial executive must promptly:

(a) request the Municipal Financial Recovery Service-
   (i) to determine the reasons for the crisis in its financial affairs;
   (ii) to assess the municipality's financial state;

278 Read the MFMA s 138(a)-(h).
(iii) to prepare an appropriate recovery plan for the municipality;
(iv) to recommend appropriate changes to the municipality's budget and revenue-raising measures that will give effect to the recovery plan; and
(v) to submit to the MEC for finance in the province:
   (aa) the determination and assessment referred to in subparagraphs (i) and (ii) as a matter of urgency; and
   (bb) the recovery plan and recommendations referred to in subparagraphs (iii) and (iv) within a period, not to exceed 90 days, determined by the MEC for finance; and
(b) consult the mayor of the municipality to obtain the municipality's co-operation in implementing the recovery plan, including the approval of a budget and legislative measures giving effect to the recovery plan.279

The MEC for finance in the province must submit a copy of any request in terms of subsection 139(1)(a) of the MFMA and of any determination and assessment received in terms of subsection 139(1)(a)(v)(aa) of the Act to the municipality, the Cabinet member responsible for local government and the Minister of Finance. A mandatory intervention supersedes any discretionary provincial intervention, provided that any financial recovery plan prepared for the discretionary intervention must continue until replaced by a recovery plan for the mandatory intervention.280

The new financial dispensation also provides certain criteria for determining the seriousness or persistent material breach of financial commitments. When determining whether the conditions for a mandatory intervention referred to in section 139 of the MFMA are met, all relevant facts must be considered. The following factors, singly or in combination, may indicate that a municipality is in serious material breach of its obligations to meet its financial commitments:

(a) The municipality has failed to make any payment to a lender or investor as and when due;
(b) the municipality has failed to meet a contractual obligation which provides security in terms of section 48 of the MFMA;
(c) the municipality has failed to make any other payment as and when due, which individually or in the aggregate is more than an amount as may be pre-

279 See the MFMA s 139(1)(a)-(b).
280 See the MFMA s 139(2)-(3).
scribed or, if none is prescribed, more than two per cent of the municipality's budgeted operating expenditure; or
(d) the municipality's failure to meet its financial commitments has impacted, or is likely to impact, on the availability or price of credit to other municipalities.\textsuperscript{281}

Any recurring or continuous failure by a municipality to meet its financial commitments which substantially impairs the municipality's ability to procure goods, services or credit on usual commercial terms, may indicate that the municipality is in persistent material breach of its obligations to meet its financial commitments.\textsuperscript{282}

In respect of the preparation of a financial recovery plan, the MFMA determines that any suitably qualified person may, on request by the provincial executive, prepare a financial recovery plan for a discretionary provincial intervention referred to in section 137 of the MFMA. Only the Municipal Financial Recovery Service may prepare a financial recovery plan for a mandatory provincial intervention referred to in section 139 of the MFMA. When preparing a financial recovery plan, the person referred to in subsection 141(1) of the Act or the Municipal Financial Recovery Service must:

(a) consult:
   (i) the relevant municipality;
   (ii) the municipality's principal suppliers and creditors, to the extent they can reasonably be contacted;
   (iii) the MEC for finance and the MEC for local government in the province; and
   (iv) organised labour;

(b) take into account:
   (i) any financial recovery plan that has previously been prepared for the municipality; and
   (ii) any proposed financial recovery plan, or proposals for a financial recovery plan, that may be advanced by the municipality or any creditor of the municipality; and

(c) at least 14 days before finalising the plan:
   (i) submit the plan for comment to:

\textsuperscript{281} The MFMA s 140(1)-(2).
\textsuperscript{282} Note that s 140(2) and (3) do not apply to disputed obligations to which there are pending legal actions between the municipality and the creditor, provided that such actions are not instituted to avoid an intervention or obligations explicitly waived by the creditor.
(aa) the municipality;
(bb) the MEC for finance and the MEC for local government in the province;
(cc) organised local government in the province;
(dd) organised labour; and
(ee) any supplier or creditor of the municipality, on request; and

(ii) publish a notice in a newspaper of general circulation in the municipality:

(aa) stating the place, including any website address, where copies of the plan will be available to the public free of charge or at a reasonable price; and

(bb) inviting the local community to submit written comments in respect of the plan.\(^{283}\)

The person charged with preparing the financial recovery plan or the Municipal Financial Recovery Service must

• consider any comments received
• finalise the financial recovery plan and
• submit the final plan to the MEC for finance in the province for approval in terms of section 143 of the MFMA.\(^{284}\)

A financial recovery plan must be aimed at securing the municipality's ability to meet its obligations to provide basic services or its financial commitments, and such a plan, whether for a mandatory or discretionary intervention, must:

• identify the financial problems of the municipality
• be designed to place the municipality in a sound and sustainable financial condition as soon as possible
• state the principal strategic objectives of the plan, and ways and means for achieving those objectives
• set out a specific strategy for addressing the municipality's financial problems, including a strategy for reducing unnecessary expenditure and increasing the collection of revenue, as may be necessary
• identify the human and financial resources needed to assist in resolving financial problems, and where those resources are proposed to come from

---

\(^{283}\) The MFMA s 141(1)-(3).

\(^{284}\) Read the MFMA s 141(4)(a)-(c).
• describe the anticipated time frame for financial recovery, and milestones to be achieved and
• identify what actions are necessary for the implementation of the plan, distinguishing between actions to be taken by the municipality and actions to be taken by other parties.285

The plan may also:
• provide for the liquidation of specific assets, excluding those needed for the provision of the minimum level of basic municipal services
• provide for debt restructuring or debt relief in accordance with the MFMA
• provide for special measures to prevent unauthorised, irregular and fruitless and wasteful expenditures and other losses and
• identify any actual and potential revenue sources.286

In addition, a financial recovery plan
• for a mandatory intervention must
  (a) set spending limits and revenue targets
  (b) provide budget parameters which bind the municipality for a specified period or until stated conditions have been met and
  (c) identify specific revenue-raising measures that are necessary for financial recovery, including the rate at which any municipal tax and tariffs must be set to achieve financial recovery and
• for a discretionary intervention may suggest, for adoption by the municipality,
  (a) spending limits and revenue targets
  (b) budget parameters for a specified period or until stated conditions have been met and (c) specific revenue-raising measures that are necessary for financial recovery.287

On receipt of a financial recovery plan pursuant to a discretionary intervention, the MEC for local government in the province may approve the recovery plan with or without amendments, as the MEC considers appropriate. On receipt of a financial recovery plan pursuant to a mandatory intervention, the MEC for finance must verify that the process set out in section 141 of the MFMA has been followed and that the

---

285 See the MFMA s 142(1)(a)(i)-(vii).
286 The MFMA s 142(1)(b)(i)-(iv).
287 Read the MFMA s 142(2)(a)-(b).
criteria contained in section 142 of the Act are met and if so approve the recovery plan or if not direct what defects must be rectified. The responsible MEC must submit an approved recovery plan to the municipality, the Minister and the Cabinet member responsible for local government, the Auditor-General and organised local government in the province.288

The MEC for local government or the MEC for finance in the province may at any time, but subject to section 141(1) and (2) of the MFMA, request any suitably qualified person or the Municipal Financial Recovery Service to prepare an amended financial recovery plan in accordance with the directions of the MEC. Section 141 of the Act, read with such changes as the context may require, apply to the amendment of a financial recovery plan in terms of this section. No amendment of a recovery plan may impede the implementation of any court order made or agreement reached in terms of the plan before the amendment.289

If a financial recovery plan was prepared in a discretionary provincial intervention, the municipality must implement the approved recovery plan and report monthly to the MEC for local government in the province on the implementation of the plan, in such manner as the plan may determine. The financial recovery plan binds the municipality in the exercise of its executive authority, but only to the extent to resolve the financial problems of the municipality. If the municipality cannot or does not implement the approved recovery plan, the provincial executive may in terms of section 139(1) or (4) of the Constitution take further appropriate steps to ensure implementation of the plan.290 If the recovery plan was prepared in a mandatory provincial intervention referred to in section 139 of the MFMA
• the municipality must implement the approved recovery plan
• all revenue, expenditure and budget decisions must be taken within the framework of, and subject to the limitations of, the recovery plan and
• the municipality must report monthly to the MEC for finance in the province on the implementation of the plan in such manner as the plan may determine.

The financial recovery plan binds the municipality in the exercise of both its legislative and executive authority, including the approval of a budget and legislative meas-

---

288 See the MFMA s 143(1)-(3).
289 See the MFMA s 144(1)-(3).
290 Note that the Municipal Structures Act ss 34(3) and (4) and 35 apply if a provincial executive dissolves a municipal council in terms of s (3). See also the MFMA s 145(1)-(4).
ures giving effect to the budget, but only to the extent necessary to achieve the objectives of the recovery plan. The provincial executive must in terms of section 139(5)(b) of the Constitution either

• dissolve the council of the municipality, if the municipality cannot or does not approve legislative measures, including a budget or any revenue-raising measures necessary to give effect to the recovery plan within the time frames specified in the plan and

(a) appoint an administrator until a newly elected council has been declared elected and

(b) approve a temporary budget and revenue-raising measures, and other measures to give effect to the recovery plan and to provide for the continued functioning of the municipality.

• assume responsibility for the implementation of the recovery plan to the extent that the municipality cannot or does not take executive measures to give effect to the recovery plan.291

At least every three months the MEC for local government or the MEC for finance in a province must review any discretionary provincial intervention referred to in section 137 or any mandatory provincial intervention referred to in section 139 of the MFMA, including progress with resolving the municipality's financial problems and its financial recovery and the effectiveness of any financial recovery plan. He/she must also submit progress reports and a final report on the intervention to the municipality, the Minister, the Cabinet member responsible for local government, the provincial legislature and organised local government in the province.292 A discretionary intervention must end if it is terminated in terms of section 139(2)(b) of the Constitution or when the municipality is able and willing to fulfil the executive obligation in terms of legislation or the Constitution that gave rise to the intervention and the financial problem that has been caused by or has caused the failure by the municipality to comply with that obligation is resolved.293 A mandatory intervention must end when the crisis in the municipality's financial affairs has been resolved and the municipality's ability to

291 See the MFMA s 146(1)-(4). The Municipal Structures Act ss 34(3) and (4) and 35 apply when a provincial executive dissolves a municipal council in terms of the Constitution s 139(5)(b)(i).

292 The MEC for local government or the MEC for finance may request the person who prepared the recovery plan, or the Municipal Financial Recovery Service, to assist the MEC in complying with s 147(1). See the MFMA s 147(1)-(2).

293 The MFMA s 148(1)(a)-(b).
meet its obligations to provide basic services or its financial commitments is secured. 294

When a provincial intervention ends, the MEC for local government or the MEC for finance in the province must notify:

(a) the municipality;
(b) the Minister, in the case of a mandatory intervention;
(c) the Cabinet member responsible for local government;
(d) any creditors having pending litigation against the municipality;
(e) the provincial legislature; and
(f) organised local government in the province. 295

In respect of national interventions, the MFMA determines that if the conditions for a provincial intervention in a municipality in terms of section 139(4) or (5) of the Constitution are met and the provincial executive cannot or does not adequately exercise the powers or perform the functions referred to in that section, then the national executive must consult the relevant provincial executive and act or intervene in terms of that section in the stead of the provincial executive. If the national executive intervenes in a municipality in terms of subsection 150(1) of the MFMA, then:

(a) the national executive assumes for the purposes of the intervention the functions and powers of a provincial executive in terms of this chapter;
(b) the Minister assumes for the purposes of the intervention the functions and powers of an MEC for finance in terms of this chapter; and
(c) a reference in this chapter:
   (i) to a provincial executive must be read as a reference to the national executive;
   (ii) to an MEC for finance must be read as a reference to the Minister; and
   (iii) to a provincial intervention must be read as a reference to a national intervention. 296

---

294 See the MFMA s 148(2)(a)-(b).
295 Read the MFMA s 148(3)(a)-(f). Note that if a provincial executive intervenes in a municipality in terms of the Constitution s 139, the provincial executive and its representatives have access to such information, records and documents of the municipality or of any municipal entity under the sole or shared control of the municipality as may be necessary for the intervention, including for identifying or resolving the financial problem of the municipality. Refer also to the MFMA s 149.
296 See the MFMA s 150(1)-(2).
Apart from the possibility of national interventions, the MFMA also protects the rights of third parties. The MFMA determines that, except as expressly provided for in the Act, nothing in the Act limits or affects:

- the rights of any creditor or other person having a claim against a municipality
- any person’s access to ordinary legal process in accordance with the common law and relevant legislation or
- the rights of a municipality or municipal entity, or of the parties to a contract with a municipality or municipal entity, to alternative dispute resolution mechanisms, notice procedures and other remedies, processes or procedures.²⁹⁷

Furthermore, if a municipality is unable to meet its financial commitments, it may apply to the High Court for an order to stay, for a period not exceeding 90 days, all legal proceedings, including the execution of legal process, by persons claiming money from the municipality or a municipal entity under the sole control of the municipality. Notice of such an application must be given to:

- the MEC for local government and the MEC for finance in the province
- the Minister
- the Cabinet member responsible for local government
- organised local government and
- to the extent that they can reasonably be contacted, all persons to whom the municipality or the municipal entity owes an amount in excess of a prescribed amount, or if no amount is prescribed, in excess of R100 000.²⁹⁸

A municipality may also apply to the High Court for an order:

- to stay, for a period not exceeding 90 days at a time, all legal proceedings, including the execution of legal process, by persons claiming money from the municipality
- to suspend the municipality’s financial obligations to creditors, or any portion of those obligations, until the municipality can meet those obligations or
- to terminate the municipality’s financial obligations to creditors, and to settle claims in accordance with a distribution scheme referred to in section 155.²⁹⁹

²⁹⁷ The MFMA ss 151(a)-(c).
²⁹⁸ Note that an application in terms of s 152(1) may for the purposes of the Constitution s 139(5) be regarded as an admission by the municipality that it is unable to meet its financial commitments. See the MFMA s 152(1)-(3).
²⁹⁹ The MFMA s 153(1)(a)-(c).
The court may make an order in terms of subsection 153(1) of the MFMA only if
• the provincial executive has intervened in terms of section 139 and a financial
  recovery plan to restore the municipality to financial health has been approved for
  the municipality
• the financial recovery plan is likely to fail without the protection of such an order
• section 154 of the MFMA has been complied with, in the case of an application
  for an order referred to in subsection 153(1)(b) and
• section 155(1) has been complied with, in the case of an application for an order
  referred to in subsection 153(1)(c).300
Notice of an application in terms of subsection 153(1) must be given to
• all creditors to whom the municipality owes an amount in excess of a prescribed
  amount, or if no amount is prescribed, in excess of R100 000, in sofar as those
  creditors can reasonably be contacted
• the MEC for finance and the MEC for local government in the province
• the Minister
• the Cabinet member responsible for local government and
• organised labour.301
Before issuing an order in terms of section 153(1)(b) of the MFMA for the suspension
of a municipality's financial obligations to creditors, the court must be satisfied that
• the municipality cannot currently meet its financial obligations to creditors and
• all assets not reasonably necessary to sustain effective administration or to pro-
  vide the minimum level of basic municipal services have been or are to be liqui-
  dated in accordance with the approved financial recovery plan for the benefit of
  meeting creditors' claims.302
Before issuing an order for the termination of a municipality's financial obligations to
creditors in terms of section 153(1)(c) of the MFMA, the court must be satisfied that
• the municipality cannot meet its financial obligations to its creditors and is not
  likely to be able to do so in the foreseeable future
• all assets not reasonably necessary to sustain effective administration or to pro-
  vide the minimum level of basic municipal services have been liquidated in acce-
dance with the approved financial recovery plan for the benefit of meeting creditors' claims and

- all employees have been discharged except those affordable in terms of reasonably projected revenues as set out in the approved financial recovery plan.

If the court issues an order referred to subsection 155(1) of the Act, the MEC for finance in the province must appoint a trustee to prepare a distribution scheme for the proportional settlement of all legitimate claims against the municipality as at the date of the order. Those claims must be settled against the amount realised from the liquidation of assets referred to in subsection 155(1)(b) of the Act.303

A distribution scheme must

- determine the amount available for distribution
- list all creditors with claims which qualify for the purposes of the distribution scheme, indicating which of those are secured and the manner in which they are secured and
- provide for the distribution of the amount available amongst creditors in the following order of preference:
  (i) First preference must be given to the rights of secured creditors as to the assets with which they are secured in terms of section 48, provided the security in question was given in good faith and at least six months before the mandatory provincial intervention in terms of section 139 began;
  (ii) thereafter the preferences provided for in the Insolvency Act,304 read with the necessary changes as the context may require, must be applied; and
  (iii) thereafter non-preferent claims must be settled in proportion to the amount of the different claims.305

The Minister, acting with the concurrence of the Cabinet member responsible for local government, must by regulation in terms of section 168 of the MFMA provide for an equitable process for the recognition of claims against a municipality for the purposes of sharing in a distribution scheme, provided that rejection of any claim does not prevent a creditor from proving the claim in a court and provide for public

303 See the MFMA s 155(1)-(2).
304 24 of 1936.
305 Note that a distribution scheme may not be implemented unless approved by the court. See the MFMA s 155(3)-(4).
access to a distribution scheme. The MFMA also establishes a so-called Municipal Financial Recovery Service (MFRS). According to section 157 of the Act a Municipal Financial Recovery Service is established as an institution within the public service. The Municipal Financial Recovery Service forms part of, and functions within, the National Treasury. The Municipal Financial Recovery Service:

- must perform the duties and may exercise the powers assigned to the Service in terms of this Act
- may, on request by the MEC for finance in a province, prepare a financial recovery plan for a municipality or, with the approval of the Director-General of the National Treasury, instruct any suitably qualified person to prepare the plan in accordance with the directions of the Service
- may, on request by the MEC for finance in the province, monitor the implementation of any financial recovery plans that it has prepared, and may recommend such amendments and revisions as are appropriate
- may, on request by any municipality that is experiencing financial problems, and in co-ordination with any other provincial or national efforts, assist the municipality to identify the causes of, and potential solutions for, these financial problems
- may, with the approval of the Director-General of the National Treasury, obtain the services of any financial expert to perform any specific work for the Service; and
- may collect information on municipal financial problems and on best practices in resolving such problems.

It is the responsibility of the Minister of Finance to appoint a person as the Head of the MFRS, subject to subsection 159(2) of the MFMA and legislation governing the public service. A person appointed as the Head of the Service holds office in the National Treasury on terms and conditions set out in a written employment contract, which must include terms and conditions setting performance standards. The Head of the Service is responsible for the performance by the Service of its functions and the exercise of its powers and takes all decisions of the Service in the performance of its functions and the exercise of its powers, except those decisions of the

309 The MFMA s 159(1)-(2).
Service taken in consequence of a delegation in terms of section 162 of the Act.\textsuperscript{310} The staff of the Municipal Financial Recovery Service consists of the Head of the Service, persons in the service of or contracted by the National Treasury and designated by the Director-General of the National Treasury for the work of the Service and persons seconded from an organ of state or organisation to the Service by agreement between the Director-General and that organ of state or organisation.\textsuperscript{311} Finally, the Head of the Service may delegate any of the powers or duties of the Service to a member of the staff of the Service. Such a delegation must be in writing, is subject to the limitations or conditions which the Head of the Service may impose and does not divest the Head of the Service of the responsibility concerning the exercise of the delegated power or the performance of the delegated duty. The Head of the Service may confirm, vary or revoke any decision taken in consequence of a delegation in terms of subsection 162(1), provided that no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.\textsuperscript{312}

(m) General treasury matters, financial misconduct and miscellaneous provisions

No municipality or municipal entity may incur a liability or risk payable in a foreign currency. Subsection 163(1) does not apply to debt regulated in terms of section 47 of the MFMA or to the procurement of goods or services denominated in a foreign currency but the Rand value of which is determined at the time of procurement or, where this is not possible and risk is low, at the time of payment.\textsuperscript{313} Furthermore, no municipality or municipal entity may:

- conduct any commercial activities
  (a) otherwise than in the exercise of the powers and functions assigned to it in terms of the Constitution or national or provincial legislation
  (b) outside the borders of the Republic
- provide a municipal service in an area outside its jurisdiction except with the approval of the council of the municipality having jurisdiction in that area or

\textsuperscript{310} Note that the Head of the Service performs the functions of office subject to the directions of the Director-General of the National Treasury. Read the MFMA s 160(1)-(2).
\textsuperscript{311} Refer to the MFMA s 161(a)-(c).
\textsuperscript{312} Read the MFMA s 162(1)-(3).
\textsuperscript{313} The MFMA s 163(1)-(2).
• make loans to
  (a) councillors or officials of the municipality;
  (b) directors or officials of the entity or
  (c) members of the public.\textsuperscript{314}

Each municipality and each municipal entity must have an internal audit unit, subject to subsection 165(3) of the MFMA. The internal audit unit of a municipality or municipal entity must:
• prepare a risk-based audit plan and an internal audit program for each financial year
• advise the accounting officer and report to the audit committee on the implementation of the internal audit plan and matters relating to internal audit, internal controls, accounting procedures and practices, risk and risk management, performance management, loss control and compliance with the MFMA, the annual Division of Revenue Act and any other applicable legislation and
• perform such other duties as may be assigned to it by the accounting officer.\textsuperscript{315}

Apart from an internal audit unit, each municipality and each municipal entity must have an audit committee, subject to subsection 166(6) of the MFMA. An audit committee is an independent advisory body which must:
• advise the municipal council, the political office-bearers, the accounting officer and the management staff of the municipality or the board of directors, the accounting officer and the management staff of the municipal entity on matters relating to:
  (a) internal financial control and internal audits
  (b) risk management
  (c) accounting policies
  (d) the adequacy, reliability and accuracy of financial reporting and information
  (e) performance management
  (f) effective governance

\textsuperscript{314} Note that if on the date on which this section takes effect a municipality or municipal entity is engaged in any activity prohibited by s 164(1)(a) or (b) and which is otherwise lawful, the municipality or entity must take all reasonable steps to rectify its position and to comply with that subsection as soon as may be reasonable in the circumstances. See the MFMA s 164(1)-(2).

\textsuperscript{315} The internal audit function may be outsourced if the municipality or municipal entity requires assistance to develop its internal capacity and the council of the municipality or the board of directors of the entity has determined that this is feasible or cost-effective. Read the MFMA s 165(1)-(3).
(g) compliance with this Act, the annual Division of Revenue Act and any other applicable legislation
(h) performance evaluation and
(i) any other issues referred to it by the municipality or municipal entity
• review the annual financial statements to provide the council of the municipality or, in the case of a municipal entity, the council of the parent municipality and the board of directors of the entity, with an authoritative and credible view of the financial position of the municipality or municipal entity, its efficiency and effectiveness and its overall level of compliance with this Act, the annual Division of Revenue Act and any other applicable legislation
• respond to the council on any issues raised by the Auditor-General in the audit report
• carry out such investigations into the financial affairs of the municipality or municipal entity as the council of the municipality, or in the case of a municipal entity, the council of the parent municipality or the board of directors of the entity may request and
• perform such other functions as may be prescribed.316

In performing its functions, an audit committee has access to the financial records and other relevant information of the municipality or municipal entity and must liaise with the internal audit unit of the municipality and the person designated by the Auditor-General to audit the financial statements of the municipality or municipal entity. An audit committee must also consist of at least three persons with appropriate experience, of whom the majority may not be in the employ of the municipality or municipal entity and meet as often as is required to perform its functions, but at least four times a year.317

A municipality may remunerate its political office-bearers and members of its political structures, but only within the framework of the Public Office-Bearers Act.318

316 The MFMA s 166(1)-(2).
317 Note that the members of an audit committee must be appointed by the council of the municipality or, in the case of a municipal entity, by the council of the parent municipality. One of the members who is not in the employ of the municipality or municipal entity must be appointed as the chairperson of the committee. No councillor may be a member of an audit committee. Furthermore, a single audit committee may be established for a district municipality and the local municipalities within that district municipality and a municipality and municipal entities under its sole control. See the MFMA s 166(3)-(6).
318 20 of 1998.
setting the upper limits of the salaries, allowances and benefits for those political office-bearers and members and in accordance with section 219(4) of the Constitution. Any remuneration paid or given in cash or in kind to a person as a political office-bearer or as a member of a political structure of a municipality otherwise than in accordance with subsection 167(1) of the MFMA, including any bonus, bursary, loan, advance or other benefit, is an irregular expenditure, and the municipality must, and has the right to, recover that remuneration from the political office-bearer or member and may not write off any expenditure incurred by the municipality in paying or giving that remuneration.319

Relating to treasury regulations and guidelines, the MFMA determines that the Minister of Finance, acting with the concurrence of the Cabinet member responsible for local government, may make regulations or guidelines applicable to municipalities and municipal entities, regarding:

(a) any matter that may be prescribed in terms of this act;
(b) financial management and internal control;
(c) a framework for regulating the exercise of municipal fiscal and tariff-fixing powers;
(d) a framework regulating the financial commitments of municipalities and municipal entities in terms of public-private partnership agreements;
(e) the establishment by municipalities of, and control over-
   (i) municipal entities; and
   (ii) business units contemplated in section 76(a)(ii) of the Municipal Systems Act;
(f) the safe-guarding of the financial affairs of municipalities and of municipal entities when assets, liabilities or staff are transferred from or to a municipality or a municipal entity;
(g) the alienation, letting or disposal of assets by municipalities or municipal entities;
(h) internal audit units and their functioning;

319 See the MFMA s 167(1)-(3). The MEC for local government in a province must report to the provincial legislature any transgressions of ss 167(1) and any non-compliance with the MFMA ss 17(3)(k)(i) and (ii) and 124(1)(a).
(i) the information to be disclosed when municipalities or municipal entities issue or incur debt and the manner in which such information must be disclosed, including by way of a prospectus or other document;

(j) the circumstances under which further or specific disclosures are required after money has been borrowed by a municipality or municipal entity;

(k) the circumstances under which documentation or information pertaining to municipal debt must be lodged or registered;

(l) the establishment of a registry for the registration of documentation and information pertaining to municipal borrowing;

(m) the settlement of claims against a municipality following an order of court in terms of section 153;

(n) the information that must be placed on the websites of municipalities;

(o) a framework regulating investments by municipal entities; and

(p) any other matter that may facilitate the enforcement and administration of this act.320

A regulation or guideline may:

• differentiate between different

  (a) kinds of municipality, which may, for the purposes of this section, be defined either in relation to categories, types or budgetary size of municipalities or in any other manner

  (b) categories of municipal entity

  (c) categories of accounting officer or

  (d) categories of official or

• may be limited in its application to a particular:

  (a) kind of municipality, which may, for the purposes of this section, be defined either in relation to a category, type or budgetary size of municipality or in any other manner

  (b) category of municipal entity

  (c) category of accounting officer or

  (d) category of official.321

320 the MFMA s 168(1)(a)-(p).
321 The MFMA s 168(2)(a)-(b). No guidelines issued in terms of ss (1) are binding on a municipality unless adopted by its council or a municipal entity unless adopted by the council of the entity's parent municipality. The MFMA s 168(3)(a)-(b).
Before regulations in terms of section 168 of the MFMA are promulgated, the Minister must consult organised local government on the substance of those regulations and publish the draft regulations in the Government Gazette for public comment. Regulations made must be submitted to Parliament for parliamentary scrutiny at least 30 days before their promulgation. The National Treasury may on good grounds approve a departure from a treasury regulation or from any condition imposed in terms of the Act. Non-compliance with a regulation or with a condition imposed by the National Treasury in terms of the Act may, on good grounds shown, be condoned by the Treasury.

The MFMA also provides for aspects regarding the financial misconduct by municipal officials and entities. The Act thus provides that the accounting officer of a municipality commits an Act of financial misconduct if that accounting officer deliberately or negligently:

(a) contravenes a provision of the act;
(b) fails to comply with a duty imposed by a provision of the act on the accounting officer of a municipality;
(c) makes or permits, or instructs another official of the municipality to make, an unauthorised, irregular or fruitless and wasteful expenditure; or
(d) provides incorrect or misleading information in any document which in terms of a requirement of the act must be (i) submitted to the mayor or the council of the municipality, or to the Auditor-General, the National Treasury or other organ of state; or (ii) made public.

Furthermore, the chief financial officer of a municipality commits an act of financial misconduct if that officer deliberately or negligently:

(a) fails to carry out a duty delegated to that officer in terms of section 79 or 81(1)(e) of the MFMA;
(b) contravenes or fails to comply with a condition of any delegation of a power or duty in terms of section 79 or 81(1)(e) of the MFMA;
(c) makes or permits, or instructs another official of the municipality to make, an unauthorised, irregular or fruitless and wasteful expenditure; or

---

322 Read the MFMA s 169(1)-(2).
323 The MFMA s 170(1)-(2).
324 See the MFMA s 171(1)(a)-(d).
(d) provides incorrect or misleading information to the accounting officer for the purposes of a document referred to in subsection 171(1)(d) of the MFMA.\(^{325}\)

A senior manager or other official of a municipality exercising financial management responsibilities and to whom a power or duty was delegated in terms of section 79 of the MFMA commits an act of financial misconduct if that senior manager or official deliberately or negligently:

- fails to carry out the delegated duty
- contravenes or fails to comply with a condition of the delegated power or duty
- makes an unauthorised, irregular or fruitless and wasteful expenditure or
- provides incorrect or misleading information to the accounting officer for the purposes of a document referred to in subsection 171(1)(d) of the Act.

A municipality must investigate allegations of financial misconduct against the accounting officer, the chief financial officer, a senior manager or other official of the municipality unless those allegations are frivolous, vexatious, speculative or obviously unfounded. If the investigation warrants such a step, a municipality must institute disciplinary proceedings against the accounting officer, chief financial officer or that senior manager or other official in accordance with systems and procedures referred to in section 67 of the Municipal Systems Act, read with Schedule 2 of that Act.\(^{326}\)

In respect of offences, it is determined that the accounting officer of a municipality is guilty of an offence if that accounting officer:

- deliberately or in a grossly negligent way:
  - (a) contravenes or fails to comply with a provision of section 61(2)(b), 62(1), 63(2)(a) or (c), 64(2)(a) or (d) or 65(2)(a), (b), (c), (d), (f) or (i) of the MFMA
  - (b) fails to take reasonable steps to implement the municipality's supply chain management policy referred to in section 111
  - (c) fails to take all reasonable steps to prevent unauthorised, irregular or fruitless and wasteful expenditure or
  - (d) fails to take all reasonable steps to prevent corruptive practices:
    (i) in the management of the municipality's assets or receipt of money or

\(^{325}\) Read the MFMA s 171(2)(a)-(d).
\(^{326}\) See the MFMA s 171(3)-(4). Similar requirements have been laid down regarding financial misconduct by officials of municipal entities. See the MFMA s 172(1)-(4).
(ii) in the implementation of the municipality's supply chain management policy
• deliberately misleads or withholds information from the Auditor-General on any bank accounts of the municipality or on money received or spent by the municipality or
• deliberately provides false or misleading information in any document which in terms of a requirement of this Act must be:
  (a) submitted to the Auditor-General, the National Treasury or any other organ of state or
  (b) made public.327
A senior manager or other official of a municipality or municipal entity exercising financial management responsibilities and to whom a power or duty was delegated in terms of section 79 or 106 of the MFMA is guilty of an offence if that senior manager or official deliberately or in a grossly negligent way contravenes or fails to comply with a condition of the delegation. A councillor of a municipality is guilty of an offence if that councillor:
  (a) deliberately influences or attempts to influence the accounting officer, the chief financial officer, a senior manager or any other official of the municipality to contravene a provision of the act or to refrain from complying with a requirement of the act;
  (b) interferes in the financial management responsibilities or functions assigned in terms of the act to the accounting officer of the municipality or delegated to the chief financial officer of the municipality in terms of the act;
  (c) interferes in the financial management responsibilities or functions assigned in terms of the act to the accounting officer of a municipal entity under the sole or shared control of the municipality; or
  (d) interferes in the management or operational activities of a municipal entity under the sole or shared control of the municipality.328
A councillor, an official of a municipality or municipal entity, a member of the board of directors of a municipal entity or any other person is guilty of an offence if that per

---

327 See the MFMA s 173(1)(a)-(c). Similar offences are created for the accounting officer of a municipal entity. See the MFMA s 173(2)(a)-(c).
328 See the MFMA s 173(2).
son deliberately or in a grossly negligent way:
• impedes an accounting officer from complying with a provision of the Act
• gives incorrect, untrue or misleading information material to an investment decision relating to borrowing by a municipality or municipal entity
• makes a withdrawal in contravention of section 11 of the MFMA
• fails to comply with section 49 of the Act
• contravenes a provision of section 115(2), 118 or 126(5) of the Act or
• provides false or misleading information for the purposes of any document which must in terms of a requirement of the Act be:
  (a) submitted to the council, mayor or accounting officer of a municipality or to the Auditor-General or the National Treasury or
  (b) made public.329
A person is liable on conviction of an offence in terms of section 173 of the MFMA to imprisonment for a period not exceeding five years or to an appropriate fine determined in terms of applicable legislation.330

The Minister, acting with the concurrence of the Cabinet member responsible for local government, may make regulations prescribing:
(a) the manner, form and circumstances in which allegations and disciplinary and criminal charges of financial misconduct must be reported to the National Treasury, the MEC for local government in the province and the Auditor-General, including (i) particulars of the alleged financial misconduct; and (ii) steps taken in connection with such financial misconduct;
(b) matters relating to internal investigations by municipalities and municipal entities of allegations of financial misconduct;
(c) the circumstances in which the National Treasury or the MEC for local government in the province may direct that disciplinary steps be taken or criminal charges be laid against a person for financial misconduct;
(d) criteria for the composition and functioning of a disciplinary board which hears a charge of financial misconduct;

329 Refer to the MFMA s 173(3)-(5).
330 The MFMA s 174.
(e) the circumstances in which the findings of a disciplinary board and any sanctions imposed by the board must be reported to the National Treasury, the MEC for local government in the province and the Auditor-General; and
(f) any other matters to the extent necessary to enforce the provisions of the act.

A regulation in terms of subsection (1) may:

• differentiate between different:
  (a) kinds of municipality, which may, for the purposes of this section, be defined either in relation to categories, types or budgetary size of municipalities or in any other manner
  (b) categories of municipal entity
  (c) categories of accounting officer or
  (d) categories of other official or

• be limited in its application to a particular:
  (a) kind of municipality, which may, for the purposes of this section, be defined either in relation to a category, type or budgetary size of municipality or in any other manner
  (b) category of municipal entity
  (c) category of accounting officer or
  (d) category of other official. \(^{331}\)

No municipality or any of its political structures, political office-bearers or officials, no municipal entity or its board of directors or any of its directors or officials and no other organ of state or person exercising a power or performing a function in terms of the MFMA is liable in respect of any loss or damage resulting from the exercise of that power or the performance of that function in good faith. Without limiting liability in terms of the common law or other legislation, a municipality may recover from a political office-bearer or official of the municipality, and a municipal entity may recover from a director or official of the entity, any loss or damage suffered by it because of the deliberate or negligent unlawful actions of that political office-bearer or official when performing a function of office. \(^{332}\) Various cases concerning the recovery of damages caused by municipal office bearers or political representatives have

\(^{331}\) Read the MFMA s 175(a)-(b).
\(^{332}\) Refer to the MFMA s 176(1)-(2).
already been decided. On this point, the new legal system has significantly increased and enhanced the accountability of municipal politicians and officials.\(^{333}\)

The Minister may by notice in the *Gazette*:

- delay the implementation of a provision of the Act for a transitional period not exceeding five years from the date when this section takes effect or
- where practicalities impede the strict application of a specific provision of the Act, exempt any municipality or municipal entity from, or in respect of, such provision for a period and on conditions determined in the notice. A delay or exemption in terms of subsection (1) may:

  (a) apply to:

    (i) municipalities generally; or
    (ii) municipal entities generally; or

  (b) be limited in its application to a particular-

    (i) municipality;
    (ii) kind of municipality, which may, for the purposes of this section, be defined either in relation to a category, type or budgetary size of municipality or in any other manner;
    (iii) municipal entity; or
    (iv) category of municipal entities.\(^{334}\)

To facilitate the restructuring of the electricity industry as authorised by the Cabinet member responsible for such restructuring, the Minister, acting with the concurrence of the Cabinet member responsible for local government and after consultation with organised local government, may, by notice in the *Gazette*, exempt any municipality or municipal entity from any specific provision of the MFMA for a period of not more than four years and on conditions determined in the notice, provided that such ex-

\(^{333}\) See, eg, the case of *Moodley v Umzinto North Town Board* 1998 (2) SA 188 (SCA). In this case the town treasurer made certain investments on behalf of the Town Board. A claim for damages was instituted against him for the recovery of R300 000, which was lost as a result of an investment in a company which was subsequently liquidated. In his defence, the treasurer argued that his liability was exempted by virtue of the Local Authorities Ordinance 25 of 1974 (N) s 99, which stated that an official of a council, acting under the direction of the council and in the scope of his authority, could not be held liable for losses incurred. The court found that the treasurer exceeded his authority, however, and thus rendered himself vulnerable. He could not rescue himself by simply stating that he had acted within the course of his employment. See paras G-I at 194.

\(^{334}\) The MFMA s 177(1)-(2).
emption may not be understood as obligating any municipality to transfer any staff, assets or liabilities.335

(n) Transitional provisions and the amendment of other legislation
The MFMA specifically determines that anything done in terms of a provision repealed by section 179(1) of the Act, which can be done in terms of a provision of the Act, must be regarded as having been done in terms of the Act. Within three months of the date on which this section takes effect, all municipalities must submit to the National Treasury a list of:

• all corporate entities in which the municipality or a municipal entity under its sole or shared control has an interest, specifying:
   (a) the name and address of the corporate entity
   (b) the purpose, extent and other particulars of the interest
   (c) if such corporate entity is a municipal entity, whether the entity is under the sole or shared control of the municipality and
   (d) such other information as may be required by the National Treasury

• all public-private partnerships to which the municipality is a party, with a value of more than one million Rands in total or per annum, specifying:
   (a) the name and physical address of the private party participating in the public-private partnership
   (b) the purpose and other particulars of the public-private partnership and
   (c) such other information as may be required by the National Treasury and

• all other types of contract of the municipality for a period beyond 1 January 2007 and with a value of more than one million Rands in total or per annum.336

According to the new financial system for local government in South Africa and subject to the provisions of the supreme Constitution, parliament is confirmed as the highest legislature as far as public finance in general is concerned. In this regard, parliament will and has already enacted various pieces of legislation which affect the financial affairs of all three spheres of government. Some of these legislative enact-

335 See the MFMA s 177(3).
336 See the MFMA s 178(1)-(2). Note that the legislation referred to in the second column of the schedule to the MFMA is hereby amended or repealed to the extent indicated in the third column of the schedule. Despite the repeal of s 10G of the LGTA 209 of 1993 by s 179(1) of this section, the provisions contained in ss (6), (6A) and (7) of s 10G remain in force until the legislation envisaged in the Constitution s 229(2)(b) is enacted. The repeal of the Municipal Accountants Act 21 of 1988 takes effect on a date determined by the Minister by notice in the Gazette.
ments were put in place before the new constitutional dispensation commenced, and others have recently been finalised by parliament.\textsuperscript{337} Many Acts passed by parliament before the new Constitution took effect still affect the financial affairs of local governments today. In many instances, such Acts still compel municipalities to undertake specific functions, with or without financial assistance.\textsuperscript{338}

18.3.2 Provincial control over municipal financial matters

Before the former provincial councils were abolished in July 1986, all of them passed various ordinances which, \textit{inter alia}, contained important provisions regarding the financial management and financial affairs of local authorities within their territories.\textsuperscript{339} Many of these ordinances have not yet been repealed or replaced and, in accordance with the Constitution, they still remain in force and effect. It is submitted that all legislatures, especially parliament, should take cognisance of the laws that are still in place and should ensure that no duplication or lacunas in the law occur when new laws are promulgated.

18.3.3 Financial control by local authorities

Apart from the control over municipal finance by the two higher spheres of government, each local government has also been afforded significant powers and duties concerning the management and control of its own financial affairs. Arguably the most important local control mechanism is the passing and implementation of municipal by-laws on financial matters. The existence and scope of such by-laws must be passed in each specific case and must be in compliance with the general legal requirements relevant and applicable to the lawful enactment of municipal legislative authority.

18.4 General comments on the principles relating to municipal fiscal management

In view of all the activities and functions of municipalities, it is submitted that municipal fiscal management is a vast and complicated exercise. There are many aspects

\textsuperscript{337} Reference should again be made to the Constitution Sch 6 Item 2, which provides that all legislation which was in force when the new Constitution became effective will continue to be in force until amended or if such legislation is inconsistent with the Constitution.

\textsuperscript{338} See, eg, the Health Act 63 of 1977, which compels local authorities to perform specific health services. Refer also to the Compensation for Occupational Injuries and Diseases Act 130 of 1993.

\textsuperscript{339} See Cloete (1997) 116. The most important ordinances are the Local Authorities Ordinance, 1974 (O 25 of 1974) applicable in the former province of Natal; Local Government Ordinance, 1939 (O 17 of 1939) applicable in the former Transvaal province; Local Government Ordinance, 1962 (O continued on next page
in relation to financial management that must be fulfilled, and the overall financial system consists of a number of distinct and important activities. Some of such activities are summarised briefly below.

18.4.1 Municipal budgeting

One of the most important financial activities of each municipal government is the annual preparation of a municipal budget. Before the commencement of the new local government dispensation, the preparation and handling of all municipal budgets were controlled by various provincial ordinances. Although such ordinances are still applicable in the new dispensation, they are subject to the new constitutional requirements and demands of new order national and provincial legislation. In the past a municipal budget had to be prepared for 12 months for all municipalities, but the budget procedures differed from one province to another because of the different legislative provisions. Every municipality should realise that its municipal budget is regarded as the foremost financial statement of the municipality, as it reflects the financial capacity and state of affairs within the municipality. It was general practice in the past for the municipal executive to prepare and submit a municipal budget. In practice the former town clerk in co-operation with the city treasurer prepared draft sections of the budget and then submitted them to a council-in-committee. Only once such a council-in-committee has considered the draft budget is it formally discussed and approved by the council. Such council meeting was usually open to the public.\(^{340}\) The MFMA now determines and regulates the main aspects of a municipal budget.

18.4.2 Financial records, auditing and financial management

It is imperative for all municipalities to keep proper records of all its financial affairs. This was also the position under the former provincial ordinances and is continued under the new local government system. Apart from the financial records, municipalities must also submit their accounts for proper auditing procedures. Previously, auditing had to be undertaken by the Auditor-General or by auditors that were registered in terms of the Public Accountants and Auditors Act.\(^{341}\) More specific

---

\(^{8}\) of 1962) applicable in the Free State and Municipal Ordinance, 1974 (O 29 of 1974), which applied in the Cape Province.

\(^{340}\) See Cloete (1997) 118. The writer mentions that some of the former ordinances specifically prescribed that the budgets had to be open for inspection by the public. According to the Constitution s 215(1) all budgetary processes must promote transparency.

\(^{341}\) 80 of 1991.
details regarding the auditing procedures, as well as the duties and responsibilities of auditors of municipal accounts, were contained in the relevant provincial ordinances. Under the new local government system, both parliament and the provincial legislatures are required to enact legislation to deal with municipal financial affairs.\(^{342}\)

### 18.4.3 Municipal expenditure

It is self evident that all municipalities have enormous expenses in order to fulfil their duties and perform their functions. All municipalities therefore use funds from their revenue accounts to purchase materials and equipment and to employ personnel.\(^{343}\) All former provincial ordinances had specific requirements regarding the expenditure of municipalities in each province, which laws must now be read together with both national and provincial laws dealing with such issues.

### 18.4.4 Loan funds, stocks and capital goods

In order to perform their functions, many municipalities are forced to take up certain loans. Often municipalities do not have sufficient income to pay for extensive developments or infrastructure upgrading. In the past the powers of municipalities to negotiate and raise loans were strictly controlled in terms of the provisions of the relevant provincial ordinances.\(^{344}\) Strict control over loans by municipalities is essential to safeguard the public and future residents of a particular municipal jurisdiction from negative loan-repayment obligations and unpopular service fees increases. Loans can also be negotiated as bank overdrafts or by issuing stocks or debentures. In order to prevent maladministration and ineffective financial control, municipalities are nowadays required to keep and prepare separate budgets for loan funds. This was also the position in the former local government dispensation.\(^{345}\) It is also a common occurrence that many municipalities have extensive pieces of land at their disposal which land can be sold. One must, however, remember that such land is regarded as public property that belongs to the general public or residents of that municipal area and may thus be disposed of only by the municipality under strict control. In general

---

\(^{342}\) Again one should remember that the Constitution Sch 6 provides for the continuation of ‘old order legislation’ subject to amendment and consistency with the Constitution.

\(^{343}\) In general about 30% of revenue is spent on materials and equipment, 35% on salaries and allowances and 25% on interest on loans.

\(^{344}\) See, eg, the Provincial Ordinances read together with other national legislative enactments such as the Health Act 63 of 1984 and the Housing Act 4 of 1966.

\(^{345}\) See, eg, the Transvaal Municipal Consolidated Loans Fund Ordinance, O 9 of 1952.
municipalities have the authority to buy, sell or even expropriate land should such expropriation be essential in rendering a municipal/public service.

18.4.5 Municipal credit control and debt collection

It is of obvious importance, especially for the long-term financial viability of all municipalities, to collect revenues due to them effectively. Such effective collection programmes presupposes that appropriate credit control mechanisms must be established. As a first step, all municipalities must be able to measure the number of services that they must render and bill their consumers accordingly. It is essential that consumers receive regular and accurate bills for the services rendered to them in a format which is easy and clear to understand. Municipalities must also establish mechanisms to enable poor households to apply and qualify for rebates on service charges. Effective measures should be in place, however, to deal with those households or consumers who can afford to pay for services but neglect to do so timeously. It is of fundamental importance that municipalities retain the authority to discontinue certain services to consumers who do not fulfil their responsibilities to their relevant municipalities. Strict credit control measures are thus essential for municipalities to maintain effective and equitable financial management practices. It is this writer’s submission that the new legal order adequately addresses such requirements.

Under the new local government legal system, various legislative provisions have been enacted in order to ensure effective credit control and debt collection measures. According to the Local Government: Municipal Systems Act, various requirements have been laid down to enhance effective credit control and municipal debt collection. The measures are briefly discussed below.

18.4.5.1 Customer care and management

Municipalities are obligated within their financial and administrative capacities and in relation to the levying of rates and other taxes and the charging of fees for municipal services to establish, provide and ensure specific aspects. These aspects are:

(a) establish a sound customer management system that aims to create a positive and reciprocal relationship between persons liable for these payments and the municipality, and where applicable, a service provider;

---

347 See the Systems Act s 95(a)-(i).
(b) establish mechanisms for users of services and ratepayers to give feedback to
the municipality or other service provider regarding the quality of the services
and the performance of the service provider;
(c) take reasonable steps to ensure that users of services are informed of the
costs involved in service provision, the reasons for the payment of service
fees, and the manner in which monies raised from the service are utilised;
(d) where the consumption of services has to be measured, take reasonable
steps to ensure that the consumption by individual users of services is meas-
ured through accurate and verifiable metering systems;
(e) ensure that persons liable for payments, receive regular and accurate ac-
counts that indicate the basis for calculating the amounts due;
(f) provide accessible mechanisms for those persons to query or verify accounts
and metered consumption, and appeal procedures which allow such persons
to receive prompt redress for inaccurate accounts;
(g) provide accessible mechanisms for dealing with complaints from such per-
sons, together with prompt replies and corrective action by the municipality;
(h) provide mechanisms to monitor the response time and efficiency in complying
with paragraph (g); and
(i) provide accessible pay points and other mechanisms for settling accounts or
for making pre-payments for services.

It is clear from these requirements that the legislator intended that all municipalities
create a financial system that is directed at effective and sufficient service provision
but which also provides for customer care and public involvement in respect of mu-
nicipal rates, taxes and service charges.

18.4.5.2 Debt collection and credit control policy

Without a system in place which can ensure effective debt collection, all municipali-
ties will encounter financial restraints in varying degrees. In light of the fact that mu-
nicipal income is dependent largely on regular and up-to-date payment for services
rendered, every municipality must provide and enforce proper debt collection proce-
dures. According to the new legislative framework, all municipalities must collect all
money that is due and payable to them. This obligation is subject to the provisions of
applicable legislation. Furthermore, all municipalities, for the purpose of debt collect-
tion, must adopt, maintain and implement a credit-control and debt-collection policy
which is consistent with their rates and tariffs policies and which complies with the
provisions of the Municipal Systems Act.\textsuperscript{348} There is thus a clear and direct responsibility on municipalities to collect debt and to do so in a clear and informative manner. It is further also provided that the contents of a credit control and debt collection policy must provide for various issues.\textsuperscript{349} The policy must include at least the following:

(a) credit control procedures and mechanisms;
(b) debt collection procedures and mechanisms;
(c) provision for indigent debtors that is consistent with its rates and tariff policies and any national policy on indigents;
(d) realistic targets consistent with-
   (i) general recognised accounting practices and collection ratios; and
   (ii) the estimates of income set in the budget less an acceptable provision for bad debts;
(e) interest on arrears, where appropriate;
(f) extensions of time for payment of accounts;
(g) termination of services or the restriction of the provision of services when payments are in arrears;
(h) matters relating to unauthorised consumption of services, theft and damages; and
(i) any other matters that may be prescribed by regulation in terms of section 104 of the Systems Act.

Apart from the minimum requirements mentioned above, it is important to note that the policy may differentiate between different categories of ratepayer, user of services, debtor, tax, service, service standard and other matter, as long as the differentiation does not amount to unfair discrimination. It seems that the intention is to give municipalities a broad discretion to differentiate between different municipal debtors. In this respect, emphasis should again be placed on the provisions of the Constitution, which in section 9 of the Bill of Rights outlaws unfair discrimination. Where municipalities thus differentiate between municipal debtors, such differentiation must

\textsuperscript{348} See the Systems Act s 96(a)-(b).
\textsuperscript{349} Refer to the Systems Act s 97.
be lawful under the Constitution and may not amount to unfair discrimination.\textsuperscript{350} To ensure the effective application and enforcement of a municipal credit control and debt collection policy, municipalities are obligated to adopt by-laws to give effect to such policies.\textsuperscript{351} Again provision is made that such by-laws may differentiate between categories of municipal debtor, as long as such differentiation does not amount to unfair discrimination. It is submitted that an evaluation of a policy, whether it amounts to unfair discrimination or not, requires an objective assessment of the relevant circumstances of each case.\textsuperscript{352}

18.4.5.3 Supervisory and implementing authority

According to the new legislative framework, specific provision is made for the supervisory and implementing authority of a municipality’s credit control and debt collection policy and by-laws. The Systems Act specifically determines that a municipality’s executive committee or executive mayor, or if there is no executive committee or executive mayor, then the municipal council itself or a committee appointed by the council, is designated as the supervisory authority and must oversee and monitor the implementation and enforcement of the municipality’s credit control and debt collec-

\textsuperscript{350} See the Systems Act s 97(2), read together with the Constitution s 9. Many precedents have also been established in dealing with aspects concerning whether or not particular differentiation practices amounted to unconstitutional conduct.

\textsuperscript{351} See the Systems Act s 98(1) and (2).

\textsuperscript{352} Debt collection has always been a contentious issue and has often been the focus of legal disputes. Various cases concerning issues of municipal debt collection were reported in recent years. In \textit{Cape Town Transitional Metropolitan Substructure v ILCO Homes Ltd} 1996 (3) SA 492 (C) the court was faced with legal proceedings in terms of the Municipal Ordinance 20 of 1974 (C) s 93(1) for the recovery of rates. The section required authorisation by the Administrator or Premier of the province to institute legal proceedings after the expiration of a period of 12 months from the date upon which the rates became due and payable. It was held that such authorisation could be given before or after the expiration date. Authorisation could further be given after the institution of legal proceedings and could thus be ratified. In \textit{Midrand/Rabie Ridge/Ivory Park Metro Substructure v Lanmer (Pty) Ltd} 2001 (2) SA 516 (T) the court was faced with the issue concerning the recovery of interest on outstanding rates. With reference to debt due to a local authority, the Local Government Ordinance 17 of 1939 (T) provided that a local authority could recover interest at a rate not more than the rate determined by the Local Authorities Loans Fund Board in terms of the Local Authorities Loans Fund Act 67 of 1984 s 11(2)(b). The board determined such maximum interest to be equal to the prime rate charged by the commercial banking industry at the time. The court concluded that such a determination of the interest rate was not vague and required only an investigation into the prime rate applicable at the time. See also \textit{Eastern Metropolitan Substructure v Peter Klein Investments} 2001 (4) SA 661 (W). The case concerned the Local Government Ordinance 17 of 1939 (T) s 49, which permitted the recovery of moneys due for sanitary services from both the owner and occupier jointly and severally of the applicable premises. Refer also to \textit{De Beer NO v North-Central Local Council ETC} 2002 (1) SA 429 (CC). The case concerned the Durban Extended Powers Consolidated Ordinance 18 of 1976 (N) s 105. According to the ordinance, a municipal council had to send out three notices to a delinquent ratepayer before it could institute court proceedings against him/her. The court confirmed \textit{inter alia} that municipal money had to be raised as continued on next page
tion policy and related by-laws. The designated supervisory authority is also obliged to oversee and monitor the performance of the municipal manager in implementing the policy and applicable by-laws. The supervisory authority must also, when necessary, evaluate or review the policy and by-laws or the implementation thereof in order to improve the efficiency of its credit-control and debt-collection mechanisms, processes and procedures. Regular reports to the municipal council in respect of the policy are also required. In contrast with the supervisory authority, it is required that the municipal manager or particular service provider, if applicable, must implement and enforce the municipality’s credit-control and debt-collection policy and by-laws; must establish effective administrative mechanisms, processes and procedures to collect money that is due and payable to the municipality and must also report to the supervisory authority at such intervals as may be determined by the municipal council.

18.4.5.4 Additional powers of municipalities in respect of their credit control and debt collection procedures

The Systems Act states that at all reasonable hours the occupier of a premises in a municipality must give an authorised representative of that municipality or of a service provider access to the premises in order to read, inspect, install or repair any meter or service connection for the reticulation of a service or to disconnect, stop or restrict the provision of any service. Municipalities are furthermore allowed to consolidate any separate accounts of persons liable for payments to the municipality, to credit a payment by a person against any account of that person and to implement any of the debt-collection and credit-control measures in relation to any arrears on any of the accounts of such a person. If a person that is liable to the municipality for the payment of rates, taxes or fees consents to it, a municipality may enter into an agreement with that person’s employer to deduct from his or her salary or wages:

- any outstanding amounts due to the municipality or

speedily as possible because it was used by the council to fulfil its constitutional obligations in relation to the delivery of services.

353 See the Systems Act s 99(a)(i)-(ii).
354 Refer to the Systems Act s 99(b)-(c).
355 See the Systems Act s 100(a)-(c).
356 See the Systems Act s 101.
357 See the Systems Act s 102(1)(a)-(c). It should be noted that the provisions of the subsection do not apply to cases where there is a dispute between the municipality and the debtor concerning any specific amount claimed by the municipality from that person. S 102(2).
such monthly amounts/instalments as may be agreed between the parties. The effect of such an agreement can be regarded as a so-called “emolument attachment order”. Municipalities may also provide for special incentives for employers to enter into such agreements and for employees to consent to such agreement. It is submitted that such incentives could contribute significantly to the collecting of bad debt, which so many municipalities are facing in South Africa. The aim of such incentives is to collect some bad debt rather than nothing at all.

18.4.5.5 Regulations and guidelines in respect of credit control and debt collection provisions

In respect of credit control and debt collection measures, the minister responsible for local government may make regulations or issue guidelines to provide for or to regulate various matters. The matters are the following:

(a) the particulars that must be contained in the municipal manager’s report in terms of section 100(c);
(b) the identification of municipal services provided by the municipality or other service providers to users of services where the use of the service by the user can reasonably be determined, measured or estimated per quantity used or per frequency of such use;
(c) the determination, measurement or estimate of the use by each user of each service so identified;
(d) user agreements, and deposits and bank guarantees for the provision of municipal services;
(e) the rendering of accounts to ratepayers and users and the particulars to be contained in the accounts;
(f) the action that may be taken by municipalities and service providers to secure payment of accounts that are in arrear, including –
   (i) the termination of municipal services or the restriction of the provision of services;
   (ii) the seizure of property;
   (iii) the attachment of rent payable on a property; and

358 See the Systems Act s 103(a)(i)-(iii).
359 Refer to the Systems Act s 103(b)(i)-(iii).
360 Read the Systems Act s 104(1)(a)-(n).
(iv) the extension of liability to a director, a trustee or a member if the debtor is a company, a trust or a close corporation;
(g) appeals against the accuracy of accounts for municipal taxes or services;
(h) the manner in and time within which such appeals must be lodged and determined and the consequences of successful and unsuccessful appeals;
(i) extensions for the payment of arrears and interest payable in respect of such arrears;
(j) service connections and disconnections, and the resumption of discontinued services;
(k) the combating of unauthorised consumption, connection and reconnection and theft of municipal services;
(l) the development and implementation of an indigent policy;
(m) the tampering with or theft of meters, service supply equipment and reticulation network and any other fraudulent activity in connection with the provision of municipal services; and
(n) any other matter that may facilitate –
   (i) effective and efficient systems of credit control and debt collection by municipalities; or
   (ii) the application of this chapter.

When the minister makes regulations or issues guidelines, he or she must take into account the capacity of municipalities to comply with such regulations or guidelines and must differentiate between different kinds of municipality according to their respective capacities. 361

18.5 Important revenue sources of local governments
The success of the new local government system is dependent largely on the availability of resources and, more so, financial resources. Without appropriate financial capacity, most municipalities will not be able to provide or sustain essential services to their respective communities. Municipal revenue sources are therefore just as important as proper financial management and control. Within the new local government system, municipalities have been afforded various ways of ensuring and enhancing local revenue sources. On the issue of municipal revenue sources, it is

361 See the Systems Act s 104(2)(a)-(b).
important to distinguish between so-called *own revenue sources* and *outside sources*. Own sources refer to sources of income that a municipality can or must create for itself. Outside sources again refer to revenue that is not directly generated by the municipality itself but falls under examples such as grants from provincial or national governments to local governments.

One of a municipality’s most important revenue sources is the *power of taxation*. The power to tax is regarded as an essential prerequisite to ensuring a system of sustainable and accountable local government. According to the White Paper on local government, there are four areas of local decision-making that are important to municipal taxation. These areas are:

- the choice of tax to be imposed
- the definition of the tax base
- the choice of the tax rate and
- the administration of the tax system.  

It is also important for municipalities to have freedom and be able to vary their tax rates. Such a situation will not only strengthen local accountability but will also enable communities to challenge municipalities about the value-for-money of the services that they provide. Any *local tax policy* should be seen within the framework of the total tax system of a country, however, and not in isolation. There is a strong need for a coherent and transparent tax system in general. A particular taxation policy should always take into account any adverse or negative consequences which such a system could have on the productiveness of the economy of the region and/or country as a whole. It was thus envisaged that the new legal dispensation with regard to local government matters would specifically incorporate such important aspects within national legislation. Such a national legislative framework would then ensure uniform standards and practices between the various different types of municipality across the country.

**18.5.1 Property taxation**

Arguably the most important source of local taxation is so-called “property tax” (rates). This type of taxation requires owners of property located within a municipal area to pay a tax to the municipality based on a valuation of their property. The term

---

Property tax is generally used to refer to all taxes relating to immovable property (land).\textsuperscript{363} The main reasons property tax is regarded as a very suitable local tax are:

- it is easy to collect
- it produces a predictable and stable income
- it is fixed in location and
- it is impossible to conceal.\textsuperscript{364}

Property tax is directed mainly at financing municipal service provision, and it is therefore an important source of so-called “discretionary own-revenue” for local governments that enables municipalities to function effectively.

Historically, property rating in South Africa has been done differently in the various provinces. Each of the former four provinces had its own legislation in this regard. Such provincial legislative requirements were never properly co-ordinated, although the legal requirements were very similar in each province. For various reasons the old property rates/tax system was inadequate and ineffective. Such is the importance of municipal property taxation that the Constitution specifically addresses it. According to section 229(2) of the Constitution, all municipalities have the power to impose rates on property. Such a system may be regulated by national legislation, however.\textsuperscript{365} Since property taxation was conducted under the former provincial ordinances regulating such property rating and taxation, such enactments stay in force until such time as they are replaced by national legislation. From the outset of the restructuring of the entire local government dispensation, it was envisaged that the old system relevant to municipal property taxation also had to be overhauled.

According to the White Paper on Local Government, national government had to address four main issues with regard to property taxes. These issues can be summarised as follows:

- \textit{To bring untaxed areas into the tax net} Many former black areas are outside the property tax net and effective measures to integrate them must be implemented.

\textsuperscript{363} From an international perspective, property tax is regarded as the single most important tax at local government level, especially in developing countries. The more developed a country becomes, the less dependent it becomes on property taxes as a source of local revenue.

\textsuperscript{364} See Franzen RCD “Property tax: Alive and well and Levied in SA” (1996) 8 SA Merc LJ at 351.

\textsuperscript{365} See the Constitution s 229(2)(b).
• To establish a uniform property valuation and tax system. An optimal valuation system should be established. The White Paper has identified various possible rating systems.366
• To determine valuation periods. Properties should be valued regularly.
• To determine relief or partially exemption for the poorest people who genuinely cannot afford such taxes. Any rebates or grants-in-aid should be clearly indicated in the budget of a municipality.

It has also been argued that local governments should have some latitude in decisions apart from those mentioned above with regard to aspects of property taxes in their area, in order to reflect their own unique circumstances and local economic objectives.

18.5.2 The valuation of property

It was mentioned above that the new constitutional scheme entrenches the fact that municipalities are allowed to impose rates on property. Property rates can be levied only on the basis of some or other form of property valuation, however. Although the Constitution is silent on the issue of property valuations, such aspects are normally set out in national legislation.367 It is also obvious that apart from the requirements set out in national legislation, any valuation of property must be done within the parameters of South Africa’s supreme constitution. Any valuation or recovery of rates on property contrary to the provisions of the Constitution are invalid.368 In the past valuation had to be done by qualified and registered valuers.369

---

366 See the White Paper on Local Government (1998) at 135. The systems include site rating, or the valuation of land only, the combined rating of land and buildings, and differential or composite rating, where both land and buildings are rated together but at different rate levels, and where the rate levied on land is higher than that on improvements. A rating system where a uniform rate is used for areas which were not previously rated, irrespective of the value of the property. (This is often called ‘flat-rating’ in South Africa). The rate is usually lower than the actual value of the property.
367 The LGTA s 10G(6), eg, required local councils, metro councils and rural councils to ensure that properties within their areas of jurisdiction had to be valued at intervals prescribed by law and that a single valuation roll had to be compiled and had to be open for public inspection.
368 See, eg, the case of Lotus River Etc Residents Association v South Peninsula Municipality 1999 (2) SA 817 (C). The court held that increases in rates under the LGTA s 10G(6) and Property Valuation Ordinance 29 of 1944 (C) may not be in limitation of constitutional rights such as the right to equality unless such limitation is permitted under the limitation clause s 36. However, the court mentioned that its role is not to second-guess the legislature but to assess the lawfulness of any limitation. The court was also aware that municipalities inherited several valuation rolls with differing base dates as a result of the restructuring of local government. The court concluded that the uniform rates increase was carefully considered and was adopted only as an interim measure, thereby justifying the limitation.
369 See, eg, the Valuers Act 23 of 1982.
18.5.3 The basis of property valuations

There are many important aspects that influence the actual basis upon which property valuations are determined. From the outset it is important to distinguish between valuations on land and valuations on buildings. In all the former provincial ordinances the intention was that the value of land should be the amount which the land would have realised had a willing buyer and seller agreed on a free and voluntary sale. This seems to refer to market value. The value of buildings, on the other hand, was determined as the cost of erection at the time of valuation less depreciation. Another option was to value the land/property inclusive of all the improvements and then to subtract one value from the other.370 In the past, when reference was made to valuation in legislation it usually referred to immovable property (land) and improvements on the land. It was thus often important to determine whether an object on land was fixed to the land permanently or not.371 Generally speaking the determination of land values is usually done by reference to sale prices of similar land in a particular area, while the estimation of building replacement or erection/building costs can be calculated according to a standard rate per square meter.

Prior to the new local government dispensation, it was a general rule that valuations had to be done every four to five years. If the time gap was too large, then the valuations would no longer relate to the market value, and distortions would appear in the tax base. Furthermore, all former provincial ordinances have prescribed a basic format for a valuation roll in each municipal area. There were also specific requirements regarding valuations courts or boards and the procedures for making a valuation roll.372

18.5.4 The levying of municipal property rates

Today it is a constitutional fact that municipalities have the right to levy property rates.373 Prior to the new legal system, all former provincial ordinances provided for

371 See, eg, the case of Standard-Vacuum Refinery of SA (Pty) Ltd v Durban City Council 1961 (2) SA 669 (A).
372 See Craythorne (1997) 352-354. See also the cases of Crawford and Others v Borough of Eshowe and Another 1956 (1) SA 147 (N) and Helderberg Butcheries v Municipal Valuation Court, Somerset West 1977 (4) SA 99 (C).
373 See the Constitution s 229. See also Msunduzi Municipality v MEC for Housing, KZN 2004 (6) SA 1 (SCA).
the levying of property rates.\textsuperscript{374} The levying of property rates was also allowed under the LGTA.\textsuperscript{375}

Under the legal system prior to the new constitutional dispensation, various methods of rating existed. Three broad rating methods were generally known. The first method was the so-called “site rating” method. According to this method a rate was levied only on the rateable valuation of the particular land. This method encouraged the development of vacant land or the continuous development of occupied land to its fullest potential. To a great extent speculation in land was minimised, although the method produced less income than others. A second method used was the so-called “flat rating” method. Such a method requires that both land and buildings be rated together. It was a very productive method, as it brought in more revenue. This particular method required more detailed administration, however, and it often discouraged the improvement of property. The third method of rating was known as the “differential” (composite) rating method. This method entailed rating both land and buildings, but at different rates: land was levied at a higher rate than improvements on the land.\textsuperscript{376} Within a particular rating system, all the prior provincial ordinances

\textsuperscript{374} Various rates such as general rates, town rates, health rates, water rates, sewerage rates, special rates, sanitary rates and local rates were applicable. See Craythorne (1997) 354-355. See also the cases of Weenen TLC v Van Dyk 2000 (3) SA 435 (N), which required that rates and taxes had to be properly promulgated before their introduction. In Midrand/Rabie Ridge/Ivory Park Metropolitan Substructure v Strydom and Others 2001 (1) SA 98 (SCA) the case concerned the levying of a rate on property only once a year in terms of the Ordinance on Property Tax 11 of 1977 (T). The court held that under the ordinance a general property tax on property based on the site value was authorised only once a year and the taxpayer was entitled to be informed in advance of such taxes. It should be noted that if the required legal procedure to impose rates or taxes was not followed, then such rates are not eligible. Read Weenen TLC v Van Dyk 2002 (4) SA 653 (SCA).

\textsuperscript{375} According to the Act s 10G(7)(b) a municipality could even differentiate between different categories of property on such grounds as it deemed reasonable. It is important to note, however, that any differentiation could not amount to unfair discrimination. This would be contrary to the Constitution and thus invalid. For more on this position see PE Municipality v Prut NO 1996 (3) SA 533 (SE) and also Beukes v Krugersdorp Transitional Local Council and Another 1996 (3) SA 467 (W). The interim Constitution s 178(2) required that municipal rates and taxes had to be levied according to a uniform structure. See also Fedsure Life Assurance v Greater Johannesburg TMC 1999 (1) SA 374 (CC). Note the case of Robertson v City of Cape Town/Truman-Baker v City of Cape Town 2004 (5) SA 412 (CPD). The applicants in the case were dissatisfied with the increase of rates levied on their properties, which were levied on the basis of property valuations contained in a provisional valuation roll. The municipality relied on both the Property Valuation Ordinance 1993 (C) and ss 93(7)-(10) of the Structures Act as amended. The court held \textit{inter alia} that the municipality did not fall within the definition of local authority in s 1 of the Ordinance and could therefore not exercise a power to levy rates on the basis of a provisional valuation roll. The court also held that the amendments to the Structures Act violated ss 154(2) and 229(5) of the Constitution and were unconstitutional and invalid. Refer to para 154 at 459-460.

\textsuperscript{376} See Craythorne (1997) 355-356. The writer points out that the site-rating method seems to be the least popular in South Africa and that the flat rating method is used mostly in western countries.
provided for the exemption of certain property from the payment of rates. Exemptions commonly included land that was used for agricultural purposes, education (schools) and religious practices (church buildings).\textsuperscript{377}

Under the LGTA,\textsuperscript{378} councils were authorised to levy and recover property rates in respect of immovable property within their respective jurisdictions. Specific legal requirements were laid down which had to be followed. The LGTA was only a transitional piece of legislation and would be substituted by a uniform national Act once the restructuring process came to a close. This national Act was finally enacted in 2004, and parts of the Act commenced at such time. The new legal system regulating municipal property taxation is significantly different from the old systems that were applicable under the former four provincial ordinances.

18.5.5 Some important aspects concerning municipal property assessment and taxation

The adoption and finalisation of new legislative provisions regarding the levying and recovery of property taxes in South Africa was preceded by a strong public outcry about new proposals and suggestions. Many people have called new property taxation proposals a “hidden wealth tax” aimed at over-taxing the already heavily taxed average taxpayer.\textsuperscript{379} Other commentators have expressed the view that without a complete overhaul of the property taxation system in South Africa, local governments will not be able to fulfil their constitutional mandates, however.\textsuperscript{380} Therefore, the aim of a new system for property taxation is to do away with the previously ambiguous situation of having various property rating systems in the country and to replace them with a uniform system applicable equally throughout the territory of the state.\textsuperscript{381}

18.5.5.1 A brief history of property taxation in South Africa

It is reported that the first land-related tax was introduced into South Africa in 1677. The Cape Ordinance of 1836 introduced the first formal property tax in the Cape

\footnotesize{\textsuperscript{377} See, eg, Mosowitz v Johannesburg City Council 1957 (4) SA 569 (T); PE Municipality v Marist Brothers 1948 (1) SA 637 (E); De Aar Divisional Council v Convent of the Holy Cross 1952 (1) SA 495 (C) and St John’s Diocese v Umtata Municipality 1968 (3) SA 55 (E).

\textsuperscript{378} S 10G(7).

\textsuperscript{379} Refer to Ratiba MM “The Good, the bad or the ugly? Comments on the property rates bill” (2000) DR October at 27-29.

\textsuperscript{380} See Franzsen RCD “Property tax: Alive and well and levied in South Africa” (1996) 8 SA Merc LJ at 348 et seq.

\textsuperscript{381} The dual local government system of pre 1994 has created various fiscal disparities between municipalities. White local authorities were financially strong because of fiscal autonomy, which in-}

\textit{continued on next page}
Province, however, and by the end of the 19th century, such a system of taxation, based on capital values, was in place throughout the territories.\(^{382}\) Property tax was levied on the owner of land, irrespective of whether such land was zoned for residential, commercial or industrial purposes, and the tax could be levied on either the value of the land (site rating), the value of the land and improvements (composite rating) or on a uniform or flat rating system. Land was valued at market value, and all provincial valuation rolls had to include minimum information such as identification of the owner of land, the size and description of land as well as the value of the land together with improvements. It was also possible for land owners to appeal decisions of property valuation to a specific tribunal. Finally, the old system also provided for effective measures to recover outstanding levies. Properties could be sold via public auction, and the Registrar of Deeds was prohibited from transferring property from one owner to another unless a clearance certificate had been obtained from the relevant local authority and submitted to the Registrar.\(^{383}\) It will become clear that many of the old provisions have been incorporated into the new property rates legislative framework.

18.5.5.2 Reasons for changing the old property rates systems

There are various reasons for the former legal system of levying and collecting property rates and taxes' having to be overhauled. The following examples are a brief summary of such reasons:

• The entire social and legal framework of local government per se has changed. Property taxation now operates within a new supreme constitutional framework. Apart from the structural requirements of the Constitution, the Bill of Rights also determines various substantive compliance.\(^{384}\) In light of the new constitutional requirements, all local government structures were amalgamated which, in turn, required amendments to the former provincial tax legislation.

\(^{382}\) See Franzsen \textit{supra} fn 380 at 352-353.

\(^{383}\) The clearance certificate had to verify that all rates and taxes on the property in question was paid in full. This provision provided a significant safeguard for local authorities that property taxes would not be lost when a property was sold.

\(^{384}\) See, eg, the Bill of Rights s 9. Different tax regimes often militate against individual rights and values. Tax payers must be treated equally. Equality does not imply exactly the same tax liability, however, but rather equal tax for equal value. A proper division of the tax burden among tax or ratepayers is required. Vertically taxpayers must be treated in a similar way to other taxpayers simi-
According to the newly established municipal structures, the tax base of many municipalities was extended to areas outside of the boundaries of urban municipalities. Such areas include farmland, state-owned land and also tribal land, on which rates had never before been levied. Provision had to be made to incorporate such areas within the taxation legislation.\(^{385}\)

The former system of property taxation was fragmented and ineffective. No uniform system was in place, as property rates and taxes were levied and collected in terms of four different provincial ordinances. Such different rating systems caused financial differences between municipalities which, in turn, created a stumbling block for the implementation of a constitutionally sanctioned fiscal system.

The two-tier model of local government outside metropolitan areas requires a division of fiscal powers between local municipalities and district municipalities.

The taxation of so-called “public infrastructure” had to be addressed in new legislation. Previously, public infrastructure such as railways and power stations was exempted from paying property taxes. Such income sources had to be brought into the tax system.\(^{386}\)

It was also time to re-evaluate aspects such as the exclusion of certain properties from rates and taxes and the former system of rate-capping for certain property owners, since rates and taxes are an extremely important source of municipal revenue and such exclusion and capping could have significant financial implications for an municipality.\(^{387}\)

Different rates for different properties had to be reconsidered. The categories of property and the rates applicable to such properties was in need of re-evaluation. On this point it is reported that there seems to be a trend internationally to levy business property more highly than residential property.\(^{388}\)

\(^{385}\) For more on such aspects see Franzsen RCD “The present status of property tax in SA” (1999) 4 Journal of Property Tax Assessment and Administration at 3-13.

\(^{386}\) It is reported that international practices show that public entities should be rated on at least their operational land. See Franzsen RCD and McCluskey WJ “Some policy issues regarding the Local Government: Property Rates Bill” (2000) 12 SA Merc LJ at 213.

\(^{387}\) Rate-capping refers to a maximum limit that is set on the amount of a particular rate. Rate-capping has been implemented mainly to protect ratepayers against unreasonable rates and taxes.

tiation between rates for different properties can lead to taxation competition between municipalities, however. Special care should be taken in such instances since the Constitution prohibits the exercise of a rating power that materially and unreasonably prejudices national economic policies and activities.\textsuperscript{389} Most businesses are not as concerned about higher rates or taxes, however, since they usually pass such costs on to their consumers or employees.\textsuperscript{390}

- Exemptions from property taxes or the possible deduction from income tax of property taxes had to be re-evaluated. Property tax was traditionally allowed as a deduction from income tax when the tax was incurred for the purposes of trade or the production of income. This position has shifted the property tax burden to the national sphere of government. Since property taxes are also extended to rural areas, including commercial farming properties, the South African Revenue Service will have to calculate carefully the taxes that will be lost if property taxes are still income tax deductible.\textsuperscript{391}

In light of \textit{inter alia} the abovementioned factors, it became necessary to amend and re-evaluate the system of property taxation in South Africa. It should also be pointed out that the enforcement of property tax also influences and interacts with the land use policies of a state. The sustainability of property taxes depends strongly on stable property values. Such values in turn depend on multiple market factors such as the state of the economy, political policies and programmes and investment initiatives.\textsuperscript{392}

Furthermore, property rates are also influenced by the maintenance of up-to-date valuation rolls, regular assessment, billing and rates collection, accountability and transparency and a consumer acceptance of value for money. In South Africa in particular, the issue/culture of payment for services has often been somewhat contentious. Payment was used pre 1994 to force political change, but post 1994 such payment is required to ensure municipal development and the sustainability of ser

\textsuperscript{389} See the Constitution s 229(2).
\textsuperscript{390} See Franzsen and McCluskey \textit{supra} fn 386 at 215.
\textsuperscript{391} The question of whether property tax should be income-tax deductible or not is a policy consideration for the national government and does not directly need incorporation in the property rates legislation. Deductions will be provided in the Income Tax laws.
\textsuperscript{392} It is generally accepted that factors such as land invasions, land reform and settlement programmes, as well as land claims could significantly influence property values and therefore also property rates and taxes. See Franzsen \textit{supra} fn 385 at 358.
vices. There is a general need to build tax morality in local communities which is aimed at ensuring payment for services rendered.\textsuperscript{393} Tax morality will be improved only if taxes are fair and acceptable. Before the amalgamation of local authorities under the new legal system, property taxes were regarded as fair and not too burdensome.\textsuperscript{394}

It is thus very important that property rates and taxes be carefully researched and evaluated holistically within the broader tax system. The importance of public participation and educational programmes regarding property taxation in general can therefore not be overemphasised.

18.5.6 Introduction to the new Municipal Property Rates Act

The Municipal Property Rates Act (MPRA)\textsuperscript{395} was assented to by the president on the 11\textsuperscript{th} of May 2004. The main aims of the Act are:

- to regulate the power of a municipality to impose rates on property
- to exclude certain properties from rating in the national interest
- to make provision for municipalities to implement a transparent and fair system of exemptions, reductions and rebates through municipal rating policies
- to make provision for fair and equitable valuation methods of property
- to make provision for objections and appeals processes and
- to amend certain legislation and to provide for matters connected with the Act.\textsuperscript{396}

According to the preamble of the Act, it is confirmed that the Constitution entitles municipalities to impose rates on property in their areas, subject to regulation in terms of national legislation. Furthermore, municipalities must be developmentally

\textsuperscript{393} During 1995, national government launched the so-called Operation Masakhane campaign, with the specific aim of enhancing a culture of payment for services. Despite some success, non-payment is still very high. Three main reasons for non-payment have been identified: in the first place many residents are so poor that they do not have the ability to pay for services; secondly, many areas lack proper infrastructure and service delivery is not up to standard and, thirdly, some local residents have unrealistically high and immediate expectations regarding service delivery.

\textsuperscript{394} See Franzsen \textit{supra} fn 382 at 352-361. The writer mentions the following reasons for property taxes' being accepted under the former property taxation dispensation: (a) relatively low rates and substantial rebates for residential property owners; (b) relatively low rates and income tax deductibility for commercial property owners; (c) conservative assessed values (generally below fair market value) and well-structured objection and appeal procedures; (d) payment by way of monthly instalments, often in combination with the rest of the municipal bill (electricity and water), which rendered property tax relatively invisible; (e) a general preoccupation with high-profile taxes such as income and value-added tax; and (f) property tax fared well as a perceived benefit tax – services of a high standard were received in return for taxes paid.

\textsuperscript{395} 6 of 2004, hereafter referred to as MPRA.

\textsuperscript{396} Refer to the long title of the Act.
orientated, and must address service delivery priorities and promote economic and financial municipal viability. Local government needs a sufficient and buoyant source of revenue, and property rates have been identified as a critical source of revenue for municipalities to achieve their constitutional objectives. In light of the fact that the Constitution confers on parliament the power to regulate the exercise by municipalities of their fiscal powers and in order to ensure uniformity and simplicity in property rates collection, the Act has been enacted. 397 The Act has been divided into nine chapters and will be discussed briefly below.

18.5.6.1 Issues concerning the rating of property

According to the Act, only a metropolitan or local municipality may levy a rate on property in its area. In general, a district municipality may levy a rate on property only if it is in a district management area. 398 The power of a municipality to levy a rate on property is subject to three main prerequisites. Such power must be exercised subject to:

• section 229 of the Constitution and other constitutional provisions
• to the MPRA itself and
• to the rates policy which each municipality must adopt when levying property rates. 399

18.5.6.2 A municipal rates policy

The council of a municipality must adopt a rates policy consistent with the MPRA with regard to the levying of rates on rateable property in the municipality. 400 Such a rates policy will take effect on the effective date of the first valuation roll prepared by the municipality in terms of the Act and must accompany the municipality’s budget for the financial year concerned, when the budget is tabled in the municipal coun-

---

397 See the preamble of the Act.
398 See the Act s 2(10) and (2)(a). It should be clear from this wording that all property in SA is subject to a possible property tax unless specifically exempted. One must remember that the whole territory of SA has been demarcated under one form or another of local government. The reference to the area of a municipality also includes a district management area. Refer to the Act s 2(b).
399 See the Act s (3)(a)-(c). Note that according to the MPRA (a) as a corporate entity, “municipality” means a municipality described in the Municipal Systems Act s 2 and (b) as a geographical area “municipality” means a municipal area demarcated in terms of the Local Government: Municipal Demarcation Act 27 of 1998. See s 1 definitions.
400 Rateable property means property on which a municipality may in terms of s 2 levy a rate, excluding property fully excluded from the levying of rates in terms of the MPRA s 17. Refer to s 1 definitions.
The MPRA further requires that every rates policy must incorporate the following:

• Treat persons liable for rates equitably.

• Determine the criteria to be applied by the municipality if it levies different rates for different categories of property, if it exempts specific owners from payment of rates, if it grants specific owners of properties a rebate or a reduction in the payable rate or if it increases rates.

• Determine or provide criteria for the determination of categories of property for the purpose of levying different rates and categories of owner of properties or categories of properties for the purpose of granting exemptions, rebates and reductions.

• Determine how the municipality’s powers in terms of section 9(1) of the MPRA must be exercised in relation to properties used for multiple purposes.

• Identify and quantify in terms of costs to the municipality and any benefit to the local community any exemptions, rebates and reductions, any exclusions referred to in section 17(1)(a), (e), (g), (h) and (i) of the Act and also rates on properties that must be phased in in terms of section 21.

• Take into account the effect of rates on the poor and include appropriate measures to alleviate the rates burden on them.

• Take into account the effect of rates on organisations conducting specified public benefit activities and registered in terms of the Income Tax Act for tax reductions and which own property in the area.

• Take into account the effect of rates on public service infrastructure.

---

401 See the Act s (2), read with the Municipal Finance Management Act 56 of 2003 s 16(2), which regulates inter alia aspects concerning municipal budgets.

402 Refer to the Act s (3)(a)-(j).

403 A "rebate" refers to a discount granted in terms of s 15 on the amount of the rate payable on the property. A "reduction" means the lowering in terms of s 15 of the amount for which the property was valued and the rating of the property at that lower amount. See the MPRA s 1 definitions.

404 "Local community", in relation to a municipality (a) means that body of persons comprising (i) the residents of the municipality, (ii) the ratepayers of the municipality, (iii) any civic organisations and non-governmental, private sector or labour organisations or bodies which are involved in local affairs within the municipality and (iv) visitors and other people residing outside the municipality who, because of their presence in the municipality, make use of services or facilities provided by the municipality and (b) includes, more specifically, the poor and other disadvantaged sections of such body of persons. See the MPRA s 1.

405 58 of 1962.

406 Public service infrastructure means publicly controlled infrastructure of the following kinds: (a) national, provincial or other public roads on which goods, services or labour move across a municipal boundary; (b) water or sewer pipes, ducts or other conduits, dams, water supply reservoirs, water treatment plants or water pumps forming part of a water or sewer scheme serving the public; (c)
• Allow the municipality to promote local, social and economic development.
• Identify all rateable properties in the municipal area that are not rated in terms of section 7(2)(a) of the Act.

The MPRA specifically requires that when a municipality is considering the criteria to be applied in respect of any exemptions, rebates and reductions on property used for agricultural purposes, a municipality must take account of the following: 407

(a) the extent of services provided by the municipality for such properties;
(b) the contribution of agriculture to the local economy;
(c) the extent to which agriculture assists in meeting the service delivery and development obligations of the municipality; and
(d) the contribution of agriculture to the social and economic welfare of farm workers.

It is further provided that any exemptions, rebates or reductions provided for in the rates policy must comply with and be implemented in accordance with a national framework that may be prescribed after consultation with Organised Local Government (OLG). No municipality may grant relief in respect of payment of a rate to a category of owners of properties or to the owners of a category of properties, other than by way of an exemption, rebate or reduction provided for in the rates policy and granted in terms of section 15 of the Act. No relief may be granted to owners of properties on an individual basis. 408

Before it adopts its rates policy, a municipality must also follow a process of community participation. 409 The municipality must also ensure that the municipal manager, who is obligated to do so, has conspicuously displayed the draft rates policy for

407 See ss 3(5) and (6)(a)-(b).
408 Such a process is set out in the Local Government: Municipal Systems Act ch 4.
409 See the MPRA s 1 definitions.
a period of at least 30 days at the municipality’s head an satellite offices and libraries and, if the municipality has an official website, on that website. The municipal manager must also advertise in the media a notice stating that a draft rates policy has been prepared for submission to the council, that the draft rates policy is available for public inspection during office hours and that the local community is invited to submit comments and representation to the municipality within a period specified in the notice. A municipal council must take into account all comments and representations made or received when it considers the draft rates policy. A rates policy must be reviewed annually by a municipal council and must be amended if necessary. Any amendments to such a policy must be annexed to the municipality’s annual budget when tabled. The requirements of section 3(3)-(6) of the MPRA also apply to any amendment of a rates policy. It should be noted, however, that community participation in amendments to a rates policy is not facilitated under section 4 of the Act, but must be effected through the municipality’s annual budget process in terms of sections 22 and 23 of the Municipal Finance Management Act.

Finally, all applicable municipalities must adopt by-laws to give effect to the implementation of their rates policies. Such a by-law may differentiate between different categories of property and also between different categories of property owner liable for the payment of rates.

18.5.6.3 Aspects concerning the levying of rates

In general, when rates are levied, a municipality must levy rates on all rateable property in its area. However, a municipality is not obliged to levy rates on

- property which the municipality owns
- public service infrastructure owned by the municipality
- properties defined as a right registered against immovable property in the name of a person, excluding a mortgage bond registered against the property and properties in respect of which it is impossible or unreasonably difficult to establish a mar-

---

410 Refer in this instance also to the Systems Act s 21B.
411 The notice period may not be less than 30 days, however. See the Act s 4(2)-(3).
412 See Act 56 of 2000 read with the MPRA s 5(1)-(2).
413 Refer to the Property Rates Act s (6)(1)-(2). It would seem that the intention of the legislator is that a rates policy, even if adopted by a council, cannot be enforced and implemented if it has not been included and adopted as a municipal by-law. If such interpretation is indeed correct, then it is obvious that the implementation of a rates policy is more cumbersome than a normal municipal by-law. A municipality must first complete all the legal requirements mentioned above before the by-law, which also requires specific procedures, is adopted.
ket value because of legally insecure tenure resulting from past racially discrimi-
natory laws or practices.414

Although rateable property must be levied, a municipality is not prevented from
granting exemptions, rebates or deductions.415 Under the new legal dispensation a
municipality may, in terms of the criteria set out in its rates policy, levy different rates
for different categories of rateable property, which may include categories deter-
mined according to

• the use of the property
• the permitted use of the property or
• the geographical area in which the property is situated.416

The levying of different rates is subject to section 19 of the MPRA, however.417 Ac-
cording to the Act, the categories of rateable property include the following:418

(a) Residential properties;
(b) Industrial properties;
(c) Business and commercial properties;
(d) Farm properties used for agricultural purposes; other business and commer-
cial purposes; residential purposes or other purposes;
(e) Farm properties not used for any purpose;
(f) Smallholdings used for agricultural, residential, industrial, business, commer-
cial or other purposes;

414 See the MPRA s 7(1)-(2).
415 Read the MPRA s 7(2)(b) with s 15. This was also the position under previous laws. Refer to the
case of Association for the Aged v Ethekwini Municipality 2004 (3) SA 81 (D). In this case, the As-
sociation/applicant sought an order declaring certain properties to be exempt from rates according
to the Local Authorities Ordinance 25 of 1974 (KZN) s 153. The applicant was registered as a bona
fide welfare organisation. The court held that the onus was on the applicant to show that it qualified
for an exemption under the ordinance. The court also held that an exemption clause should be re-
strictively interpreted. Since the applicant sold life rights and used the premises exclusively to alle-
viate distress amongst aged persons and to promote their welfare, security and happiness, the
properties were exempt from rates under the ordinance. See paras D-E at 87.
416 “Permitted use in relation to a property” means the limited purposes for which the property
may be used in terms of (a) any restrictions imposed by (i) a condition of title, (ii) a provision of a
town planning or land use scheme or (iii) any legislation applicable to any specific property or prop-
ties or (b) any alleviation of any such restrictions. Refer to the MPRA s 1.
417 See the MPRA s 8(1)(a)-(c).
418 See the Act s 8(2)(a)-(r). Note that property in general means (a) immovable property regis-
tered in the name of a person, including, in the case of sectional title scheme, a sectional title unit
registered in the name of a person, (b) a right registered against immovable property in the name of
a person, excluding a mortgage bond registered against the property, (c) a land tenure right regis-
tered in the name of a person or granted to a person in terms of legislation or (d) public service in-
frastructure. Note also that reference to a person also includes an organ of state. See the MPRA s
1.
(g) State-owned properties;
(h) Municipal properties;
(i) Public Service Infrastructure properties;
(j) Privately owned towns serviced by the owner
(k) Formal and informal settlements;
(l) Communal land defined in the Communal Land Rights Act; 419
(m) State trust land; 420
(n) Properties acquired through the Provision of Land and Assistance Act 421 or the
Restitution of Land Rights Act 422 or which properties are subject to the Commu-
nal Property Associations Act; 423
(o) Protected areas; 424
(p) Properties on which national monuments are proclaimed;
(q) Properties owned by public benefit organisations and which are used for any
specific public benefit activities listed in part 1 of the ninth schedule to the In-
come Tax Act;
(r) Properties used for multiple purposes. According to section 9 of the PRA a
property used for multiple purposes must, for rates purposes, be assigned to a
category determined by the municipality for properties used for:
(a) a purpose corresponding with the permitted use of the property if so regu-
lated;
(b) a purpose corresponding with the dominant use of the property; or
(c) as a multiple purposes category in terms of section 8(2)(r) of the act. 425

The Act contains a specific provision regarding the levying of a rate on property in
sectional title schemes. Sectional title schemes are created to cater for mainly resi-

419 11 of 2004.
420 “State trust land” refers to land owned by the state (a) in trust for persons communally inhabit-
ing the land in terms of a traditional system of land tenure, (b) over which land tenure rights were
registered or granted or (c) which is earmarked for disposal in terms of the Restitution of Land
421 126 of 1993.
422 22 of 1994.
423 28 of 1996.
424 Such areas mean an area that is or has to be listed in the register referred to in the Protected
Areas Act s 10, which refers to the National Environmental Management: Protected Areas Act 57 of
2003.
425 Refer to the MPRA s 9(1)(a)-(c). A rate levied on a property categorised for use for multiple
purposes must be determined by apportioning the market value of the property to the different use
purposes and by applying the rates applicable to the categories for properties used for these pur-
poses to the different market value apportionments. See the MPRA s 9(2)(a)-(b).
dential and sometimes business or commercial uses. According to the MPRA, a rate on sectional-title properties must be levied on the individual sectional-title units and not on the property as a whole.\textsuperscript{426}

It is further provided that rates levied by municipalities must be in a rand amount and must be based on:

- the market value of the property or
- in the case of public service infrastructure, on the market value thereof, less 30\% of that value or on such a lower percentage as the minister for Local Government may determine.\textsuperscript{427}

Property mentioned in section 17(1)(h) of the MPRA is to be levied on the market value less the amount allowed in the section or by the minister.\textsuperscript{428} An important confirmation is that properties with a market value below a prescribed valuation level may be levied at a uniform fixed amount per property. This provision thus allows the imposition of a so-called flat rate on certain properties. Municipalities are not obligated to implement a flat rate or uniform fixed rate, but if they do opt for such a rate on a specific category of properties, then such fixed amount may not exceed a prescribed percentage of the amount due for rates payable on a property in that category with a market value equal to the prescribed valuation level.\textsuperscript{429}

When rates are being levied, a municipality must levy them for a financial year. Rates lapse at the end of the financial year for which they were levied. The levying of rates must further form part of a municipality’s annual budget process and annually, at the time of its budget process, a municipality must review the amount in the rand of its current rates in line with its annual budget for the next financial year. Rates levied for a financial year may be increased during the year only in terms of section 28(6) of the Municipal Finance Management Act.\textsuperscript{430} Rates further become payable as of the start of a financial year or, if the municipality’s annual budget is not approved by the start of a financial year, then from such later date when the budget,

\textsuperscript{426} See the MPRA s 10 read with s 92.
\textsuperscript{427} See the MPRA s 11(1)(a)-(b) read with s 17.
\textsuperscript{428} The MPRA s 11(1)(c). According to the definitions in the Act, “market value” in relation to a property means the value of the property as determined in the Act s 46. Refer to the MPRA s 1 read with s 46.
\textsuperscript{429} See the MPRA s 11(2)(3).
\textsuperscript{430} It is imperative to read both the MPRA and the MFMA together in respect of a period of levying of rates. See the MPRA s 12(1)-(3).
including a resolution to levy rates, is approved by the provincial executive in terms of the Municipal Finance Management Act.431

A rate is levied by a municipality by resolution passed by the municipal council with a supporting vote of a majority of its members. This apparently refers to an absolute majority of the members of a council.432 A resolution to levy rates must further be promulgated by publishing the resolution in the Provincial Gazette. The municipality must also without delay conspicuously display the resolution for 30 days at the head and satellite offices and libraries and on the municipal website if applicable. An advertisement in the media is also required, stating that a resolution to levy rates has been passed and that it is available for inspection.433

According to section 15 and in terms of the criteria set out in its rates policy, a municipality may exempt a specific category of owners of properties or the owners of specific categories of properties from payment of a levied rate. Rebates or reductions in rates may also be granted. When granting exemptions, rebates or reductions in respect of owners of categories of property, a municipality may determine such categories in accordance with section 8(2) of the MPRA and in respect of categories of owners of properties may include in such categories:

- indigent owners
- owners dependant on pensions or social grants
- owners temporarily without income
- owners of property situated within an area affected by disaster or any other serious adverse social or economic conditions434
- owners of residential properties with a market value lower than an amount determined by the municipality or
- owners of agricultural properties who are bona fide farmers.435

431 The term “annually” means once every financial year and “financial year” again means the period starting from 1 July in a year to 30 June the next year. See the MPRA s 1 definitions as well as s 13(1)-(2). The payment of rates per year can further be regulated. See also the MPRA ss 17, 55 and 78(4) respectively.

432 An “absolute majority” refers to a majority of 50% + 1 of the total number of members of a municipal council. If, eg, a council thus consists of 100 members, at least 51 members must vote in favour of levying rates. An absolute majority is more difficult to obtain than a normal majority, as the latter requires only 50% + 1 of the members forming a quorum, which is normally 50% of the total number of members of a council.

433 See the MPRA s 14(2)-(3).

434 “Disaster” is defined in terms of the Disaster Management Act 57 of 2002.

435 The MPRA s 15(2)(a)-(f).
Again it is the responsibility of the municipal manager annually to table in the council a list of exemptions, rebates and reductions during the previous financial year and also to submit a statement reflecting the income forgone by way of such exemptions, rebates and reductions, or exclusions in terms of section 17 of the Act or phasing-in discounts in terms of section 21.\textsuperscript{436} Finally, all exemptions, rebates and reductions projected for a financial year must be reflected in the municipality’s annual budget for that year as income on the revenue side and expenditure on the expenditure side.\textsuperscript{437}

\textbf{18.5.6.4 Limitations on levying of rates and additional rates}

The MPRA reiterates the constitutional requirements set out in section 229(2)(a) of the Constitution. Municipalities may not exercise powers to levy rates on property that would materially and unreasonably prejudice national economic policies, economic activities across municipal boundaries or the national mobility of goods, services, capital or labour. If a rate is contra the constitutional prescriptions, then the Minister of Local Government, after notifying the Minister of Finance, should give notice to a municipality by notice in the national \textit{Gazette} that the rate must be limited to an amount in rand that is specified in the notice. A municipality must then give effect to the notice and, if necessary, accordingly adjust its budget for the next financial year.\textsuperscript{438} The determination of whether a rate is contra the Constitution is not a clear-cut case, and it is submitted that an objective test is required to make such a finding. However, the MPRA states that any sector of the economy, after consulting the applicable municipality(s) and OLG, may request the minister to evaluate evidence to the effect that a rate is materially and unreasonably prejudice any of the matters listed above.\textsuperscript{439} If the minister is convinced of any material and unreasonable effect, he/she must act as set out in subsection 16(2) of the Act. Any notice issued under subsection 16(2) of the Act must be accompanied by reasons why a rate is contra subsection 16(1) and thus also contra section 229 of the Constitution. In order to help municipalities, the minister of Local Government, after consultation with the minister of finance, may by notice issue guidelines to assist municipalities in the exercise of their power to levy rates.\textsuperscript{440}

\textsuperscript{436} Refer to the MPRA s 15(3)(a)-(b).
\textsuperscript{437} The MPRA s 15(4)(a)-(b).
\textsuperscript{438} See the MPRA s 16(1)-(2).
\textsuperscript{439} Read the Constitution ss 16(1) and (3)(a) with s 229.
\textsuperscript{440} See the MPRA s 16(4)-(5).
The new legal framework also determines other impermissible rates that a municipality may not levy. Such impermissible rates include the following:\(^{441}\)

(a) a rate on the first 30\% of the market value of public service infrastructure;\(^{442}\)
(b) a rate on any part of the seashore;\(^{443}\)
(c) a rate on any part of the territorial waters of the RSA;\(^{444}\)
(d) a rate on any island of which the state is owner;\(^{445}\)
(e) a rate on those parts of a special nature reserve, national park or nature reserve or of a national botanical garden, which are not developed or used for commercial, business, agricultural or residential purposes;
(f) a rate on mineral rights;\(^{446}\)
(g) a rate on a property belonging to a land reform beneficiary or his/her heirs, provided that such an exclusion lapses after ten years from the date on which such title was registered in the office of the registrar of deeds;\(^{447}\)
(h) a rate on the first R15 000 of the market value of a property assigned in the municipal valuation roll to a category determined by the municipality for (i) residential properties; or (ii) for properties used for multiple purposes of which one purpose is for residential purposes;\(^{448}\)
(i) a rate on a property registered in the name of and used primarily as a place of public worship by a religious community, including an official residence regis-

---

\(^{441}\) See the MPRA s 17(1)(a)-(i).
\(^{442}\) Note the minister for Local Government may lower the percentage, but only after consultation. See the MPRA s 17(4)(a)-(c).
\(^{443}\) Refer to the definition of the “seashore” as defined in the Seashore Act 21 of 1935.
\(^{444}\) See the definition of “territorial waters” determined in terms of the Maritime Zones Act 15 of 1994.
\(^{445}\) This includes the Prince Edward Islands referred to in the Prince Edward Islands Act 43 of 1948.
\(^{446}\) See the definition of “property” in the MPRA s 1.
\(^{447}\) “Land reform beneficiary”, in relation to a property, means a person who (a) acquired the property through (i) the Provision of Land and Assistance Act 126 of 1993 or (ii) the Restitution of Land Rights Act 22 of 1994, (b) holds the property subject to the Communal Property Associations Act 28 of 1996 or (c) holds or acquires the property in terms of such other land tenure reform legislation as may pursuant to the Constitution s 25(6) and (7) be enacted after this Act has taken effect. See the MPRA s 1.
\(^{448}\) The aim of the legislator is clearly to benefit poor households by not levying rates on property below R15 000 market value. In order to be equitable, every owner will receive such an exemption. Similar provisions have been made in respect of a minimum free water and electricity supply. One must note that such an exemption is applicable only to property being used for residential purposes. Business and commercial properties do not receive the same exemption and are thus treated indifferently. There seems to be a legitimate reason for exempting residential property in this manner and, more specifically, in light of the constitutional objects and demands on local government, a constitutional attack on equality grounds will not easily suffice. The minister of Local Government may increase the monetary threshold. See the MPRA s 17(3).
tered in the name of that community which is occupied by an office bearer of that community.\textsuperscript{449}

The exclusion from rates lapses if the status of a property changes, from national land to something else, for example. If an exemption is withdrawn, rates by a private owner that would have been payable were it not for the exemption become payable.\textsuperscript{450} The amount payable when an exemption is withdrawn must be regarded as rates in arrears, and interest is applicable on such an amount. Such a position seems somewhat unreasonable. Why should an owner be liable for rates which have been legally exempted and for the interest on such rates? The MPRA clarifies the situation somewhat by stating that such rates and interest are applicable only if the declaration of the property was withdrawn because of a decision of the private owner to withdraw from the agreement regarding the property or because of a decision by the state to withdraw from the agreement because of a breach of the agreement by the private owner.\textsuperscript{451} It is of interest to note that a municipality is permitted to apply, in writing, to the minister of Local Government, to be exempted from paragraph 17(a), (e), (g) or (h) of the MPRA if it can demonstrate that an exclusion to levy such rates is compromising or impeding its ability or right to exercise its powers or to perform its functions within the meaning of the Constitution.\textsuperscript{452} What this position really means is that, in certain instances, municipalities may be permitted to levy rates on property which are usually regarded as impermissible/exempted rates. Any exemption granted by the minister must be in writing and is subject to such limitations or conditions as he/she may determine.\textsuperscript{453}

In order to protect owners of properties, the MPRA determines that a municipality may not levy:

• different rates on residential property, except as provided for in sections 11, 21 and 89 of the Act

\textsuperscript{449} Although such exemption was also allowed under the previous legal dispensation, religious communities should note the requirements of the MPRA s 16(1)(i) regarding the exemption of official residences of religious communities. Exclusion from these rates also lapses if the property is disposed of by the religious community or if the residence is not used as required. See the MPRA s 17(5).

\textsuperscript{450} See the MPRA s 17(2).

\textsuperscript{451} The MPRA s 17(d)(i)-(ii).

\textsuperscript{452} Read the MPRA s 18(1) with the Constitution s 151(4).

\textsuperscript{453} The MPRA s 18(2)(a)-(b).
• a rate on non-residential properties that exceeds a prescribed ratio to the rate on residential properties\textsuperscript{454}

• rates which unreasonably discriminate between categories of non-residential properties or

• any additional rates except as provided for in section 22 of the Act.\textsuperscript{455}

It is further the responsibility of the minister of Local Government, with the concurrence of the minister of finance, to set an upper limit on the percentage by which rates on properties or a rate on a specific category of properties may be increased. However, different limits may be set for:

• different kinds of municipality or

• different categories of property, subject to section 19.\textsuperscript{456}

The MPRA also determines a compulsory phasing-in of certain rates. According to the Act, a rate levied on newly rateable property must be phased in over a period of three financial years, subject to subsection 21(5) of the Act.\textsuperscript{457} Furthermore, a rate levied on property belonging to a land reform beneficiary must be phased in over a period of three financial years after the exclusion period set out in section 17(1)(g) has lapsed, subject to section 21(5). A rate levied on newly rateable property owned and used by organisations conducting specified public benefit activities and who are registered in terms of the Income Tax Act for those activities must be phased in over a period of four financial years.\textsuperscript{458} In the first year, the phasing-in discount on newly rateable properties or on properties belonging to a land reform beneficiary must be at least 75\% of the rate otherwise applicable to the property for that year, in the second year at least 50\%, and in the third year at least 25\%.\textsuperscript{459} During the first year no rate may be levied on newly rateable property owned and used by organisations conducting specified public benefit activities. After the first year, the phasing-in discount on

\textsuperscript{454} See the MPRA s 19(a)(b) read with s 11(1)(a). The ratio may only be prescribed with the concurrence of the minister of finance. S 19(2).

\textsuperscript{455} See the MPRA s 19(1)(a)-(d).

\textsuperscript{456} The minister may on application by a municipality and on good cause exempt a municipality from a set limit. See the MPRA s 20(1)-(4) read together with the MFMA s 43.

\textsuperscript{457} Note that according to the definitions in the MPRA s 1, "newly rateable property" means any rateable property on which property rates were not levied before the end of the financial year preceding the date on which the Act took effect. Properties which were (a) incorrectly omitted from the valuation roll or (b) identified by the minister where the phasing-in of a rate is not justified, are excluded from the definition.

\textsuperscript{458} Refer to the MPRA s 21(a)-(c).

\textsuperscript{459} The MPRA s 21(2)(a)-(e).
such property must be at least 75% in the second year, at least 50% in the third year and at least 25% in the fourth year.\textsuperscript{460} A rate levied may also not be higher than a rate levied on similar property or category of property. On written request by a municipality, the MEC for Local Government may extend the phasing-in periods mentioned above. No phasing-in period may exceed six financial years, however.\textsuperscript{461} If the MEC has extended a phasing-in period, he/she must determine the minimum phasing-in discount during each financial year of the extended period.

The new rating legislation also provides for additional rates and special rating areas. According to section 22 of the MPRA and by resolution of its council, a municipality may:

\begin{itemize}
  \item determine an area as a special rating area
  \item levy an additional rate on property in that area for the purpose of raising funds for improving or upgrading that area
  \item differentiate between categories of properties when levying an additional rate.\textsuperscript{462}
\end{itemize}

Since additional rates would place a more significant financial burden on certain property owners, it is required that before a municipality determines a special rating area, it must first consult the local community on the proposed boundaries of the area and also on the proposed improvement or upgrading required. Apart from this mandatory consultation obligation, the municipality must also obtain the consent of the majority of members of the local community in the proposed special rating area, who will be liable for paying the additional rate.\textsuperscript{463} When a municipality determines a special rating area, it must:

\begin{itemize}
  \item determine the boundaries of the area
\end{itemize}

\textsuperscript{460} See the MPRA s 21(3)(a)-(c). It must be noted that according to the definitions of the Act that specified public benefit activity means an activity listed in the Income Tax Act Ninth Sch Part 1 Item 1 (welfare and humanitarian), Item 2 (health care) and Item 4 (education and development).

\textsuperscript{461} See the MPRA s 21(4)-(6).

\textsuperscript{462} Refer to the MPRA s 22(1)(a)-(c). Since the resolution of the council concerns the levy of rates, it is submitted that such a resolution requires also an absolute majority of members to vote in favour thereof. The differentiation mentioned in s 22(1)(c) could, eg, result in business properties’ bearing the brunt of an additional levy, while residential properties in the particular area are excused from such additional levies. It seems clear that additional levies may be levied only if funds are needed to improve or upgrade a particular area. Cross-subsidising through additional levies are not allowed. An objective assessment of all relevant factors must be conducted in this regard.

\textsuperscript{463} “A majority” in this respect seems to refer to 50% + 1 of the total number of members of the relevant local community. It should be noted that not all members of the community need to be consulted, but only those members who will be liable for paying the additional rate. The intention of the legislator thus seems only to obtain a majority decision from persons/institutions responsible for pay property rates. See the MPRA s 2(a)-(b).
• determine how the area is to be improved or upgraded from the additional funds
• establish separate accounting and other record-keeping systems regarding the revenue generated by the additional rate and the improvement or upgrading of the particular area(s).

A municipality may further establish a committee comprising persons representing the community in the area as a consultative/advisory forum for the municipality on the improvement/upgrading. Representivity must be taken into account when the committee is established. The committee must then further be a subcommittee of the ward committee(s) in the area, if ward committees are applicable. A special rating area must not be used to reinforce existing inequities in the development of the municipality and must also be consistent with the objectives of the municipality’s integrated development plan.

18.5.6.5 The municipal register of properties
All municipalities levying rates on property are obligated to establish and maintain a property register in respect of all properties situated within the municipal area. Such a register must consist of two parts: a part A and a part B. Part A should consist of the current valuation roll of the municipality and, if applicable, supplementary valuation rolls. Part B must specify which properties are subject to exemption, rebate, reduction in phasing-in rate or an exclusion. The register must be open for inspection by the public during office hours and displayed on the municipal website if applicable. Finally, a municipality must regularly, but at least once a year, update part B of the register.

18.5.6.6 Liability for property rates
A rate levied on property must be paid by the owner of the property. Joint owners are normally jointly and severally liable for the amounts due for rates on that property. In respect of agricultural property owned by more than one owner in individual...
shares as legally allowed before the commencement of the Subdivision of Agricultural Land Act, a municipality is allowed to hold any one of the joint owners liable for all rates or hold any joint owner liable for only that portion of the rates that represents his/her undivided share in the property. One must note that the term “owner” has an expansive meaning. According to section 1 of the MPRA, the term owner means:

• a person in whose name ownership of property is registered
• a person in whose name a right to property is registered
• a person in whose name a land tenure right is registered or to whom the right was granted
• the organ of state which owns or controls a public service infrastructure. Apart from the abovementioned categories, the following persons/functionaries may for the purposes of the MPRA be regarded by a municipality as the owner of property in the following circumstances:

(a) a trustee of property in a trust
(b) an executor or administrator of property in a deceased estate
(c) a trustee or liquidator of property in an insolvent estate/liquidation
(d) a judicial manager of property of a person under judicial management
(e) a curator of property of a person under curatorship
(f) a person in whose name a usufruct or other personal servitude is registered regarding property subject to such usufruct or personal servitude
(g) a lessee of a property that is registered in the name of a municipality and is leased by it
(h) a buyer of a property sold by a municipality and of which possession was given to the buyer pending registration of ownership in the name of the buyer.

continued on next page
Rates levied on a sectional title unit are payable by the owner of the unit. Municipalities may not recover the rates on sectional title units or any parts thereof from the body corporate, except when the body corporate is the owner of any specific sectional-title unit. Body corporates are equally not permitted to apportion and collect rates from owners of units.  

In respect of the method and time of payment, it is determined that a municipality may recover a rate on a monthly basis or annually, as may be agreed to with the property owner. Rates are payable on or before a date(s) determined by the municipality. Only in special circumstances may the payment of a rate be deferred. A municipality is obligated to furnish each person/owner liable for the payment of a rate with a written account, which account must specify the following:

- the amount due for rates
- the date for payment
- how the amount was calculated
- the market value of the property
- the phasing-in discount, if applicable
- any additional rates, if applicable.

Delivery of an account is no prerequisite for collecting the applicable rate, however. A person/owner is liable for payment whether or not he/she has received an account. If no account is received, the onus is on the person/owner to make the necessary inquiries from the municipality. If an amount due for rates is unpaid after the determined date, then the municipality may recover the amount in whole or in part from a tenant or occupier of the property, despite any contractual obligation to the contrary on the tenant or occupier. The amount may be recovered only after the municipality has served a written notice on the tenant or occupier. The amount recoverable from a tenant/occupier is limited to the amount of rent or other money

---

474 See the MPRA s 25(1)-(4) read with s 92.
475 See the MPRA s 26(1)-(3). Recovery of rates may also take place less often than a month as prescribed in terms of the MFMA.
476 Refer to the MPRA s 27(1)(a)-(f).
477 Read the MPRA s 27(2)-(3). Note also that the furnishing of accounts is subject to the Systems Act s 102.
478 “An occupier”, in relation to a property, means a person in actual occupation of a property, whether or not that person has a right to occupy the property.
due and payable, but which has not yet been paid to the owner of the property, however. The tenant must set off any such amount paid to the municipality against any money owed by the tenant/occupier to the owner. 

A further method of recovery of rates is provided through section 29 of the MPRA. According to this section and despite the Estate Agents Affairs Act, a municipality may recover the amount due for rates on a property in whole or in part from the agent of the owner, if such a way is more convenient for the municipality. Again the agent must be served with a written notice to recover the due rates, and the amount recoverable is limited to the amount of any rent or other money received by the agent on behalf of the owner, less any commission due to the agent. On request, the agent must furnish the municipality with a written statement specifying all payments received by the agent on behalf of the owner.

18.5.6.7 General aspects concerning the valuation of rateable property

In accordance with the MPRA, a municipality that intends to levy a rate on property must cause a general valuation to be made of all properties in its area and prepare a valuation roll of such properties. All the rateable properties in a municipal area must be valued during a general valuation exercise, including all properties fully or partially excluded from rates. Properties referred to in section 7(2) of the Act must be valued only to the extent that rates are to be levied on them. The minister of Local Government may further fully or partially exempt a municipality from the obligation to value properties excluded from rates in section 17(1)(e), (g) and (i) of the Act, if the municipality can demonstrate that the valuation of such properties is too onerous for

---

479 It is clear that the legislator's intention is to allow municipalities a quick mechanism to recover non-levy payments by property owners. Although such mechanism is laudable, it is somewhat uncertain if such statutory form of recovery and obligation for set off by the tenant/occupier will withstand constitutional or other legal challenges. It is very likely that tenants/occupiers in such circumstances will suffer victimisation and other pressures from property owners. To what extent a tenant and property owner can be forced to make public the content and value of a private lease agreement or to what extent the contractual freedom between the parties can be overruled from the outside is unknown and somewhat problematic. There seems also to be an unnecessary burden on tenants/occupiers in cases where property owners default on the rates payments. In this regard, eg, a tenant/occupier must on request by a municipality furnish it with a written statement specifying all payments to be made by the tenant/occupier to the owner of the property for rent or other money payable on the property. See the MPRA s 28(4).

480 112 of 1975.

481 “An agent”, in relation to the owner of a property, means a person appointed by the owner of the property (a) to receive rental or other payments in respect of the property on behalf of the owner or (b) to make payments in respect of the property on behalf of the owner. See the MPRA s 1.

482 See the MPRA s 29(1)-(4).

483 Read the MPRA s 30(1)(a)-(b) with ss 30(2) and (3).
it, given its financial and administrative capacity. All valued properties must be included in the valuation roll.\textsuperscript{484} For purposes of the general valuation, a municipality must determine a date that may not be more than 12 months before the start of the financial year in which the valuation roll is first to be implemented. The general valuation must reflect the market value of the properties in accordance with market conditions at the date of the valuation and other statutory requirements.\textsuperscript{485}

A valuation roll mentioned above will take effect from the start of the financial year following the completion of the public inspection period set out in section 49 of the MPRA. The valuation roll further remains valid for that financial year or for one or more subsequent financial years as the municipality may decide. In normal circumstances, no valuation roll may remain valid for longer than four financial years.\textsuperscript{486} The MEC for local government may extend the period for which a valuation roll remains valid to five years maximum, however. Such extension is permitted only if the provincial executive has intervened in the municipality or on request by the municipality, in exceptional circumstances which warrant such extension.\textsuperscript{487} It must also be noted that a valuation roll remains valid for one year after the date on which the roll has lapsed if the provincial executive intervenes in terms of section 139 of the Constitution, which intervention could have been either before or after such a date. However, this position is subject to the fact that the intervention was caused by a municipality’s failure to determine a date of valuation for its general valuation or its failure to designate a person as its municipal valuer.\textsuperscript{488} It is therefore clear that unless exceptional circumstances exist, a municipality will have to conduct a general valuation of all property in its area every four years or on such intervals as it may have decided.

In order to compile a valuation roll, a municipality must designate a person as its municipal valuer before the date of valuation. This person may either be one of the financial officials of the municipality or a person in private practice. If a private practitioner is appointed, the municipality must follow an open, competitive and transparent process and must designate the successful bidder as its municipal valuer by way

\textsuperscript{484} See the MPRA s 30(2)-(3).
\textsuperscript{485} Read the MPRA s 31(1)-(2).
\textsuperscript{486} See the MPRA s 32(1)(a)-(b). This position reflect to some degree the similar position as was applicable under the previous legal dispensation.
\textsuperscript{487} Read the MPRA s 32(2)(a)-(b) together with the Constitution s 139.
\textsuperscript{488} Refer to the MPRA s 32(3)(a)-(b) read with ss 31 and 33.
of a written contract. The designation/appointment of a municipal valuer may be withdrawn/cancelled only on the grounds of misconduct, incapacity, incompetence, non-compliance with the MPRA, under-performance or breach of contract, if applicable.

A municipal valuer has a vast number of functions to perform. Such a person is obliged, inter alia, to

- value all properties
- prepare a valuation roll
- sign and certify the valuation roll
- submit the valuation roll to the municipal manager
- consider and decide objections to the roll
- attend every meeting of an appeal board hearing appeals or reviews of his/her decisions
- prepare supplementary rolls
- assist the municipality in collection/obtaining postal addresses of property owners
- generally provide appropriate administrative support incidental to the valuation roll.

In order to assist a municipal valuer, a municipal manager may designate officials/persons in private practice as assistant municipal valuers. Similar requirements applicable to the municipal valuer are prescribed in relation to assistant municipal valuer. A municipal manager may also designate officials or even non-officials of the municipality as data-collectors in order to assist the municipal valuer with the collection of data and other related work. Data-collectors appointed from outside the municipal staff component are remunerated from municipal funds, but only in terms of the contracts concluded with them.

In an effort to help a municipal valuer to fulfil his/her functions and obligations, the MPRA determines that the valuer may delegate any powers or duties reasonably

---

489 See the MPRA s 33(1)-(2), read with the MFMA ch 11. The written contract should set out the terms and conditions of the designation and the person must be issued with an identity card with personal photograph for identification purposes. Read the MPRA s 33(3).

490 The MPRA s 33(4)(a)-(d).

491 See the MPRA s 34(a)-(i).

492 Refer to the MPRA s 35(1)-(5).

493 All data-collectors are also issued with ID cards and may be removed from such a designation. Normal contractual laws should be applicable in such instances. See the MPRA s 36(1)-(5). A data-collector is a person designated as such. Refer to s 1 definitions.
necessary to an assistant municipal valuer to assist the valuer. Powers and duties in
the collection and processing of data may also be delegated to a data-collector. The
valuer must regularly review such delegations and, if necessary, amend or withdraw
such delegations. Delegations must be in writing, subject to the limitations and condi-
tions determined in the delegation and not divest the valuer of the responsibility of
the delegated powers. The valuer may also confirm, vary or revoke any decision
taken in terms of the delegation, but any such action may not detract from any rights
that may have accrued as a result of the decision.\footnote{The MPRA s 37(1)-(3).} In order to save costs and ob-
tain expertise, a municipality may enter into an agreement with another municipali-
ity(s) to designate a single municipal valuer and to share the costs of preparing the
different municipal valuation rolls. This sharing possibility is not permitted if the mu-
icipality concerned agrees to appoint an official of one of the partaking municipali-
ties as the municipal valuer.\footnote{Refer to the MPRA s 38(1)-(2). Sharing of a municipal valuer is thus permitted only if the designated person is a private practitioner.}

Specific qualifications of municipal valuers are prescribed. The new legislative sys-
tem determines that a municipal valuer:

\begin{itemize}
  \item must be registered as a professional valuer or associated valuer in terms of the
        Property Valuers Profession Act\footnote{47 of 2000.} and
  \item may not be a councillor of the designating municipality or other involved munici-
        palities.\footnote{See the MPRA s 39(1)(a)-(b).}
\end{itemize}

An assistant valuer must also have the same qualifications of a municipal valuer,
except that a candidate valuer registered under the Property Valuers Profession Act
may also be designated.\footnote{The MPRA s 39(2)(a)-(b). No councillor may be an assistant municipal valuer.} Before assuming office, a valuer or assistant valuer must
make a prescribed declaration before a Commissioner of Oaths regarding the per-
formance of the office and must lodge a copy of such a declaration with the munici-
pal manager.\footnote{The MPRA s 40(a)-(b).}

It is common cause that all rateable property must be valued in order to determine
the applicable rate payable. In order to value property and to establish the municipal
valuation roll, access to all rateable property is required. To facilitate such access,
the MPRA states that subject to any legislation that restricts or prohibits entry to any specific property, the municipal valuer, assistant valuer, data-collector or other authorised person may enter any property that must be valued and inspect that property for purposes of the valuation, between 07:30 and 19:00 on any day, except a Sunday or public holiday. When entering a property, the person must, on demand by a person on that property, produce his/her identification card. The valuer or other official may also be accompanied by an interpreter or other functionaries.\(^{500}\) A municipal valuer/other functionary may further require the owner/tenant/occupier of a property to give the valuer access to any document or information in his/her possession, which document or information is reasonably required for purposes of valuing the property. The valuer may make extracts from such documents or information and may also in writing require the owner/tenant/occupier or agent of owner, to provide the valuer either in writing or orally with particulars regarding the property which the valuer reasonably requires for the valuation.\(^{501}\) Owners/occupiers/tenants should be careful about refusing to supply the information/documentation, since the MPRA determines that where a document/information was not provided, but the owner later relies on such a document/information in an appeal against the valuation, the appeal board hearing such an appeal may make an order as to costs if the board is of the view that the failure has placed an unnecessary burden on the functions of the valuer or appeal board.\(^{502}\)

Valuers and assistant valuers are obligated to conduct the functions within a certain code of conduct. Every municipal valuer/assistant valuer must disclose any personal or private business interest to the municipality regarding any property in the municipality. The position/office as valuer may also not be used for private gain or improperly benefit another person. Furthermore each valuer/assistant valuer must comply with the code of conduct for municipal officials, as set out in Schedule 2 of the Systems Act.\(^ {503}\) A valuer/assistant valuer who contravenes/fails to comply with

---

\(^{500}\) See the MPRA s 41(1)-(3). In certain circumstances a valuer or other inspecting person may also be accompanied by security personnel, should such assistance be required by the circumstances. It is also submitted that any access to property must at least comply with any constitutional requirements. Examples of such rights are the right to privacy and property, to name but two.

\(^{501}\) Read the MPRA s 42(1)(a)-(c).

\(^{502}\) The MPRA s 42(2).

\(^{503}\) Read the MPRA s 43(1)(a)-(c) together with the Municipal Systems Act Sch 2. According to s 43(2), a municipal valuer/assistant valuer who is not an official of a municipality must comply with the code of conduct as if that person is such an official.
the requirements is guilty of misconduct and subject to dismissal. A decision to dis-
miss a valuer/assistant who is an employee of the municipality must be based on a
finding of an enquiry conducted in terms of the terms and conditions of employment
of the person.\footnote{The section thus requires an inquiry in accordance with applicable labour relations practices
and requirements. The municipality’s normal disciplinary procedures would thus come into play.
See the MPRA s 43(3)-(4).} If a municipal valuer/assistant has an interest in property or his/her
spouse, parent, child, partner or business associate, the municipal manager must
designate a special valuer to perform such valuation.\footnote{See the MPRA s 43(5). A special valuer must be qualified similarly to the normal municipal
valuer. Refer to s 39 qualifications.} Owners of the property
should note that a municipal valuer or other functionary may not disclose to any
person any information obtained except
• if allowed to in terms of the MPRA
• for the purpose of legal proceedings or
• in terms of court orders.\footnote{See the MPRA s 44(1)(a)-(d). The protection of information clause is also applicable to any
person accompanying a municipal valuer or other functionary, when performing his/her functions
under the MPRA s 41(1).}

\textbf{18.5.6.8 Aspects concerning property valuation criteria}

The new uniform Property Rates Act determines that all property must be valued in
accordance with generally recognised valuation practices, methods and standards.
Physical inspection, all often very useful, is optional. Comparative, analytical or even
other systems or techniques may be used, including aerial photography and com-
puter-assisted mass appraised systems/techniques. In cases where the available
market-related data of any category of rateable property is not sufficient, such prop-
erty may be valued in terms of mass-valuation systems. Such mass-evaluation sys-
tems/techniques should be approved by the municipality concerned after having
considered any recommendations of its municipal valuer and as may be appropriate
in the circumstances. Mass-valuation systems/techniques may include a system
based on predetermined bands of property values and the designation of properties
to one of those bands on the basis of minimal market-related data.\footnote{See the MPRA s 45(1)-(3).} Subject to the
provisions of the MPRA, the market value of a property is the amount that the prop-
erty would have realised had it been sold on the date of valuation in the open market
by a willing seller to a willing buyer. In order to determine the market value of a prop-

\footnote{\textit{University of Pretoria etd, Bekink B (2006)}}
property, the following aspects must be considered for purposes of valuating a property:

(a) the value of any license, permission or other privilege legally granted to the property;
(b) the value of any immovable improvement on the property that was erected or is being used for a purpose which is inconsistent with or in contravention of the permitted use of the property;
(c) the value of the use of the property for a purpose which is inconsistent with the permitted use.

The following issues must be disregarded for purposes of valuation:

• the value of any building or other immovable structure under the surface of the property which is the subject of any mining authorisation or mining right as defined in the Minerals Act
• the value of any equipment or machinery which is regarded as immovable property, excluding a lift, an escalator, an air-conditioning plant, fire extinguishing apparatus, a water pump installation for a swimming pool/irrigation or domestic purposes and any other equipment/machinery that may be prescribed
• any unregistered lease in respect of the property.

When determining the market value of a property used for agricultural purposes, the value of any annual crops or growing timber that have not yet been harvested at the date of the valuation must be disregarded. Where available, the market value of public service infrastructure may be valued in accordance with any other prescribed method of valuation. In respect of sectional-title schemes, the valuer must determine the market value of each sectional title unit in accordance with the provisions of section 46 of the MPRA.

---

508 See the MPRA s 46(a) and (c).
509 Any unlawful use/improvement is regarded for valuation purposes as if the use/improvement was lawful.
510 See the MPRA s 46(3)(a).
511 50 of 1991.
512 Prescribed in this sense refer to prescribe by regulation in terms of the MPRA s 83.
513 Refer to the MPRA s 46(4).
514 The MPRA s 46(5).
515 See the MPRA s 47.
18.5.6.9 Aspects regarding municipal valuation rolls

All valuation rolls must list all rateable properties in their respective municipal areas. Specific particulars that must be reflected on the roll, if such information is reasonably determinable, are:

- the registered or other description of the property
- the category in which the property falls
- the physical address
- the extent of the property
- the market value, if valued
- the name of the owner and
- any other prescribed particulars.\textsuperscript{516}

The municipal valuer must submit the certified valuation roll to the municipal manager, who must within 21 days of receipt of the roll publish in the \textit{Provincial Gazette}, once a week for two consecutive weeks, a notice stating:

- that the roll is open for public inspection for a specified period and
- which invites every person who wishes to lodge an objection against the roll in the prescribed manner and period.\textsuperscript{517}

The municipal manager must further disseminate the substance of the notice to the local community and serve by ordinary mail, if appropriate, on every owner a copy of the notice, together with an extract of the valuation roll pertaining to the relevant property.\textsuperscript{518} Both the notice and the valuation roll must also be published on the municipality’s website, if applicable. Any person may, after publication of the notice, inspect the roll during office hours, and on payment of a reasonable fee, request extracts from the roll and may also lodge an objection with the municipal manager against any matter reflected/omitted from the roll. An objection must be in relation to a specific individual property and not against the valuation roll as such.\textsuperscript{519} Objectors

\textsuperscript{516} Read the MPRA s 48(1)-(2)(a)-(g). The minister may prescribe further particulars.

\textsuperscript{517} See the MPRA s 49(1)(a)(i)-(ii). The inspection period may not be less than 30 days from the date of the publication of the last/second notice in the \textit{Provincial Gazette}.

\textsuperscript{518} Refer to the MPRA s 49(1)(b)-(c). These requirements must be read with the requirements set out in the Municipal Systems Act ch 4 and s 115.

\textsuperscript{519} It seems that since the Act allows \textit{any person} (own emphasis added) to lodge an objection, it is therefore not necessarily the owner of a particular property that has such a right. It would thus seem possible that a person could lodge an objection to the valuation of other property owners. See the MPRA s 50(1).
who are unable to read or write must be assisted by the municipal manager.\textsuperscript{520} It is not only private persons that may lodge an objection; a municipal council itself may lodge an objection with the municipal manager against the valuation roll that affects the interests of the municipality. The municipal manager must within 14 days of the end of the objection period submit all objections to the municipal valuer, who is again obligated to decide and dispose of the objections promptly. It is important to note that the lodging of an objection does not defer liability of payment of rates beyond the payment date.\textsuperscript{521} When considering and processing objections, the municipal valuer must promptly consider the objections, decide them on facts and adjust or add to the valuation roll, depending the decision taken.\textsuperscript{522}

The new legislative framework also provides for the compulsory review of decisions of the municipal valuer. In this regard it is provided that if a municipal valuer adjusts the valuation of a property by more than 10\% upwards or downwards, then the valuer must give written reasons for such a decision to the municipal manager, who must, in turn, promptly submit the relevant valuation decision, together with reasons and documentation, to the relevant valuation appeal board, for review.\textsuperscript{523} The relevant appeal board is then obligated to review the decision and either to confirm, amend or revoke the decision.\textsuperscript{524}

It is further required that a municipal valuer must in writing notify every objector and also the owner of a property if not the same, of the valuer’s decision, any adjustments made to the roll and whether a section 52 automatic appeal is applicable.\textsuperscript{525} An objector or owner may in writing, and within 30 days after such notification, apply to the municipal manager for reasons for the decision. A prescribed fee must accompany the application. Within 30 days after receipt of such application through the

\textsuperscript{520} It seems obvious that the Act does not require the municipal manager to act in his/her personal capacity, but rather that personnel from his/her office provide such assistance. The municipal manager stays finally responsible for such assistance, however. The MPRA s 50(3).

\textsuperscript{521} See the MPRA s 50(4)-(6). Payment of rates by property owners whilst an objection is still undecided, is somewhat controversial. It seems that the Act requires payment first and possible settlement/adjustments later. Such a situation could put legitimate objectors in a negative position vis-à-vis their relevant municipalities. The constitutionality of such a position is somewhat doubtful.

\textsuperscript{522} Note that the minister may prescribe the objection procedure and also that the objections should be evaluated with due regard to the submissions of an objector, which can be the owner of the property concerned or any other person. See the MPRA s 51(a)-(c).

\textsuperscript{523} Read the MPRA s 52(1)(a)-(b).

\textsuperscript{524} If an appeal board amends or revokes a decision, the chairperson of such a board and the valuer must ensure that the valuation roll is adjusted according to the decision of the board. the MPRA S 52(3).

\textsuperscript{525} See the MPRA s 53(1)(a)-(c).
municipal manager, the relevant valuer must then provide the applicant the reasons for the decision in writing. After receipt of the written reasons for a decision, an appeal to an appeal board against the decision may be lodged in the prescribed manner with the office of the municipal manager. Such an appeal may be lodged by either an objector, an owner of a property who is affected by the decision and the municipal council concerned, if the municipality’s interests are affected. An appeal by an objector must be lodged within 30 days after the date on which the written notice was sent to the objector or after 21 days after the day on which the reasons for a decision were sent to an objector who has requested such reasons. An owner of a property must lodge an appeal within 30 days after the date on which the written notice was sent, or within 21 days after the date on which the decision was taken. A municipal manager must then forward any appeal to the chairperson of the appeal board within 14 days after the end of any applicable appeal period. The chairperson of the appeal board must then, for purposes of considering any appeal, convene a meeting of the board within 60 days after an appeal has been forwarded. A copy of the appeal must also be submitted to the municipal valuer concerned. Again the MPRA determines that an appeal lodged does not defer liability for payment. Finally, it is determined in the Act that any adjustments or additions made to a valuation roll will take effect on the effective date of the valuation roll. If an adjustment in the valuation of a property affects the amount due for rates, then the municipal manager must calculate the amount actually paid and the amount payable in terms of the adjustment calculated since the effective date. The municipal manager must then recover or repay the rates to the liable person: the difference together with interest at a prescribed rate.

---

526 The MPRA s 53(2)-(3).
527 See the MPRA s 54(1)-(2).
528 Refer to the MPRA s 54(3)-(4).
529 According to the definitions set out in the MPRA s 1, the term “effective date” means the date on which a valuation roll has taken effect in terms of the Act s 32(1) or the date on which a supplementary valuation roll has taken effect in terms of the Act s 78(2)(b).
530 See the MPRA s 55(1)-(3). Where additions to a valuation roll were made, the municipal manager must also recover from the liable person, payment of the rate because of the addition, plus interest as prescribed.
18.5.6.10 Requirements and determinations pertaining to valuation appeal boards

The MEC for local government in a province is authorised to establish as many appeal boards in the province as may be necessary. There must be no fewer than one such an appeal board in each district municipality and each metropolitan municipality, however. If more than one appeal board is established in a district municipality, each board must be established for one or more local municipalities or even district management areas. The main function of an appeal board is twofold:

• It should hear and decide appeals under the Act.
• It should review decisions of a municipal valuer submitted under section 52 of the Act.

With reference to the composition of an appeal board, the PRA determines that each appeal board should consist of a chairperson, who must be a person with legal qualifications and sufficient experience in the administration of justice, and not fewer than two and not more than four other members with sufficient knowledge of or experience in the valuation of property. Of such persons, at least one must be a professional valuer registered in terms of the Property Valuers Profession Act. All members of an appeal board must be appointed by the MEC, taking into account the need for including representivity as well as gender representivity. When making appointments, the MEC must follow a transparent process. The following persons are legally disqualified from being a member of an appeal board, however:

• an unrehabilitated insolvent
• a person under curatorship
• a person declared to be of unsound mind by a court of the Republic of South Africa
• a person who, after 24 April 1994, was convicted of an offence and sentenced to imprisonment without an option of a fine for a period of not less than 12 months
• a person who has been disqualified in terms of applicable legislation from practising as a valuer or a lawyer

531 Notice of the appeal boards must be given in the Provincial Gazette of the province.
532 See the MPRA s 56(1)-(2).
533 Read the MPRA s 57(a)-(b).
534 See the MPRA s 58(1)-(3).
• a person who is in arrears to a municipality for rates or services charges for a period longer than three months.\textsuperscript{536}

A member of an appeal board who is a councilor, employee or valuer of a municipality must withdraw from the proceedings of the board if a matter concerning that municipality’s valuation roll is being considered by the board.\textsuperscript{537} The normal term of office of members of an appeal board is four years, but members are eligible to be reappointed.\textsuperscript{538} After consultation with the MEC, the minister of Local Government must determine the conditions of appointment of members of an appeal board. Conditions of appointment may differ between the chairperson and other members. The municipality or municipalities for which an appeal board was established must remunerate the members of the board according to the conditions of appointment and the directions of the MEC.\textsuperscript{539} All members of appeal boards must perform their duties in good faith and without fear, favour or prejudice. Any personal or private business interest of a member in a matter on appeal must be disclosed, and such a member must withdraw from the proceedings, unless the board decides that the interest is trivial or not relevant. Such a decision should be announced in public at the first available sitting of the board. No member may use his/her position or privileges for private gain or to improperly benefit another person. Members may also not act in any way that compromises the credibility, impartiality, independence or integrity of an appeal board. If a member contravenes the code of conduct mentioned above, he/she will be guilty of misconduct.\textsuperscript{540}

It is also provided that a member of an appeal board ceases to be a member when that person resigns, is no longer eligible or is removed from office. Only the MEC may remove a member from office and only on the grounds of misconduct, incapacity or incompetence. A decision to remove a member must be based on a finding of misconduct or incompetence by an investigating tribunal appointed by the MEC. Members under investigation may be suspended from office by the MEC.\textsuperscript{541}

\textsuperscript{536} The MPRA s 59(1)(a)-(f). The disqualification because of an offence ends five years after the imprisonment has been completed.
\textsuperscript{537} The MPRA s 59(3).
\textsuperscript{538} No specific terms are laid down in the MPRA. A member can thus be reappointed several times. Refer to the MPRA s 60.
\textsuperscript{539} The MPRA s 61(1)-(3).
\textsuperscript{540} Refer to the MPRA s 62(1)-(2).
\textsuperscript{541} See the MPRA s 63(1)-(4).
MEC may further appoint alternative members of an appeal board. An alternative member acts as a member when a member is absent, has recused him/herself or when the filling of a vacancy on the board is pending.\textsuperscript{542}

The chairperson on an appeal board decides where and when a board meets, but he/she must promptly convene a meeting if a majority of members of the board so request in writing, at a time and place set out in the request. When a board is hearing an appeal, it must sit in a municipality whose valuation roll is the subject of the appeal or being reviewed.\textsuperscript{543} If a chairperson is absent or not available, or if there is a vacancy in the office of the chairperson, then the other members of the board must elect a member with experience in the administration of justice or elect the alternative as chairperson to preside at the meeting. Meetings are open to the public, but a board may adjourn in closed session when deliberating an issue.\textsuperscript{544} An appeal board may further request a municipality whose valuation roll is under consideration to provide it with the necessary office accommodation and other administrative assistance, inclusive of staff for the board. All reasonable requests in this regard must be complied with by the municipality, which is subsequently also liable for the costs of the appeal board.\textsuperscript{545} The internal procedure of a board may be determined by the board, subject to any procedures that may be prescribed.\textsuperscript{546} A majority of members of an appeal board serving at any relevant time constitutes a quorum for a meeting, and a matter before the board is decided by a supporting vote of a majority of the members. If on any matter there is an equality of votes, then the member presiding must exercise a casting vote in addition to that person’s normal vote as a member.\textsuperscript{547} It is the responsibility of the chairperson of an appeal board and of the valuer

\textsuperscript{542} See the MPRA s 64(1)-(3).
\textsuperscript{543} It seems that the intention of the legislator is for the board to sit and convene within the municipal offices of the municipality concerned. See the MPRA s 65(2).
\textsuperscript{544} Read the MPRA s 55(1)-(4).
\textsuperscript{545} Refer to the MPRA s 66(1)-(2).
\textsuperscript{546} The MPRA s 67.
\textsuperscript{547} The MPRA is somewhat unclear on the aspect of decision making. There seem to be two possibilities. Since a majority (50% + 1) of members of a board forms a quorum, such a quorum must normally be present before a meeting and subsequent decision is taken. The Act s 68 determines that any matter before the board is decided by a supporting vote of a majority of the members of the board, however, and not a majority of the members present that formed a quorum. To illustrate the position, let us imagine an appeal board that consists of five members. Refer again to the Act s 58. A quorum would be three members. If the legislator intended that a majority (absolute majority) of the members of a board must support a matter before the board, then all three members must support a decision. If the intention was to refer to a supporting vote of a majority of members present that form a quorum, then only 2 (50% + 1 of the members present) would allow a continued on next page
of a municipality to ensure that that valuation roll is adjusted or added to in accordance with the decisions taken by the board.\(^{548}\) When an appeal board gives a decision, it may issue an order with regard to costs, as it sees just and equitable. Persons whose appeals or opposition to an appeal were in bad faith or frivolous may be ordered to compensate the municipality concerned in full or in part for costs incurred by the municipality in the appeal.\(^{549}\) It is also determined that the MEC may on request by an appeal board authorise the board to establish one or more committees to assist it in the performance of its duties. When appointing members of a committee, the board is not restricted to members of the appeal board. Furthermore, the board

- must determine the duties of a committee
- must appoint a chairperson and other members
- must authorise the committee to co-opt advisory members within the limits determined by the board
- may remove members
- may also determine a committee’s procedure.

The board can also dissolve a committee at any time.\(^{550}\)

Similarly to a municipal valuer, an appeal board may enter any property that is subject of an appeal and inspect the property. When entering a property, a member or assistant of the board must identify himself or herself and may be accompanied by an interpreter or other functionaries.\(^{551}\) Members of appeal boards may require access to documents or information relevant to the appeal/review and may make extracts thereof. They can also require written or oral particulars regarding the property relevant to the appeal/review.\(^{552}\) Information obtained may not be disclosed, except as authorised under the MPRA.\(^{553}\)

---

\(^{548}\) Refer to the MPRA s 69(1)-(3). Where an adjustment affects the amount due for rates, then s 55 must be applied.

\(^{549}\) The MPRA s 70(1)-(2).

\(^{550}\) See the MPRA s 71(1)-(5). Note also that ss 61-66(2)(b), read with the necessary changes, apply to the conditions of appointment of members of a committee who are not members of an appeal board.

\(^{551}\) For the full details read the MPRA s 71(1)-(3). The MEC must issue all members of an appeal board an identity card with the photographs of that person for identification purposes.

\(^{552}\) Refer to the MPRA s 73(a)-(c).

\(^{553}\) Read the MPRA s 74(1)(a)-(d).
In order for an appeal board to function properly, the MPRA determines that an appeal board may by notice summon a person to appear before it in order to give evidence or to produce documents specified in the summons/notice. The board may also call a person present at a meeting, whether summoned or not, to give evidence or to produce a document in that person’s custody. For evidential purposes, the board may administer an oath or solemn affirmation to a person and question or have a person questioned. Documents obtained may be retained by the board for a reasonable period. It is further also provided that a person who is appearing before an appeal board, whether summoned or not, may at his/her own expense be assisted by a legal representative. When a person is summoned before a board, he/she is entitled to witness fees paid to state witnesses in criminal proceedings in a criminal court. Such fees are payable by the relevant municipality. It should be noted that the law regarding privilege to a witness in a criminal case applies before an appeal board. In the last instance, it is provided that legal proceedings by or against an appeal board may be instituted in the name of the board, and any costs awarded in any legal proceedings against such a board must be borne by the municipality concerned.

18.5.6.11 Aspects regarding the updating of municipal valuation rolls

All applicable municipalities must regularly, but at least once a year, update its valuation roll by preparing either a supplementary valuation roll or amending its current valuation roll. In respect of supplementary valuations, a municipality must, whenever necessary, cause a supplementary valuation to be made in respect of all rateable property that

• was incorrectly omitted from the roll
• was included in a municipality after the last general valuation
• was subdivided or consolidated after the last general valuation of which the market value has substantially increased or decreased
• was substantially incorrectly valued during the last general valuation

554 See the MPRA s 75(1)(a)-(e).
555 For more details refer to the MPRA s 75(2)-(4).
556 It seems therefore that an appeal board is afforded legal personality, which can take legal action itself or against which legal action can be instituted. The MPRA is somewhat vague about this particular aspect. See the MPRA s 76(1)-(2).
557 The MPRA s 77(a)-(b).
• must be revealed because of other exceptional reasons. A municipal valuer who prepared the valuation roll may be designated for the preparation and completion of the supplementary roll. A supplementary roll takes effect on the first day of the month following the completion of the public inspection period, and it remains valid for the duration of the municipality’s current valuation roll. Supplementary valuations must reflect the market value of properties as determined in accordance with market conditions that prevailed at the date of the valuation determined for the purposes of the municipality’s last general valuation and other provisions of the MPRA. Rates applicable to a supplementary valuation roll become payable with effect from:
  • the effective date of the supplementary roll
  • the date on which the property was included in the municipality
  • the date on which the subdivision or consolidation of the property was registered in the deeds office or
  • the date on which the market value has substantially increased or decreased. All municipalities must regularly amend their valuation roll to reflect any changes to the particular roll. Changes to the roll in circumstances under section 78 of the MPRA may be effected only through a supplementary roll, however.

18.5.6.12 Miscellaneous matters pertaining to the new property rates legislation

The MPRA determines that, on good cause shown and on such conditions as the MEC may impose, the MEC for Local Government in a province may condone any non-compliance with a provision of the Act which requires any Act to be done within a specified period or pertaining to any Act to be done within a specified period. Any

558 See the MPRA s 78(1)(a)-(f). Note that the provisions of ch 4 Part 2 and also chs 5, 6 and 7 are applicable to the updating of valuation rolls.
559 Read the MPRA s 78(2)(a)-(b) together with s 49.
560 Refer to the MPRA s 78(3)-(4). It seems clear from the Act that not only increases in the value of property are provided for, but also decreases. When the valuation of a property is negatively impacted, eg, through fire or other natural disaster, then a property owner would be well advised to notify the relevant municipal manager of such an occurrence and request the municipal valuer to investigate the matter and to make an adjustment accordingly. It is submitted in this regard that unless an adjustment to the valuation roll by means of a supplementary roll has been made, a property owner will have to pay the rates due on that property as was valued in terms of the previous valuation. A possible refund could be applicable later when the supplementary valuation roll is in effect.
561 The MPRA s 79.
non-compliance with sections 21, 31 or 32 of the Act may not be condoned.\textsuperscript{562} The MEC must further monitor whether municipalities comply with the provisions of the Act. If municipalities fail to comply with the Act, the MEC may take any appropriate steps to ensure compliance, which steps could include a proposal to intervene in accordance with section 139 of the Constitution.\textsuperscript{563} Even the minister may monitor or investigate and even issue a public report on the effectiveness, consistency, uniformity and application of municipal valuations. Such an investigation may include studies of the ratio of valuations to sale prices and also other appropriate statistical measures in order to determine the accuracy of valuations.\textsuperscript{564} The minister is furthermore authorised to make regulations which are not inconsistent with the Act, and which concern:\textsuperscript{565}

(a) any matter that may be prescribed in the act;
(b) matters that refer to the preparation, contents, adoption and enforcement of a municipal rates policy;
(c) the manner in which rates referred to in section 21 of the MPRA must be phased in together with the criteria that municipalities must take into account;
(d) the property register;
(e) the form and content of any document referred to in the act, including a declaration, authorization, valuation roll, objection, appeal and notice;
(f) the valuation and rating of public service infrastructure;
(g) procedures to be followed in connection with appeals and reviews of decisions of municipal valuers;
(h) aspects of condonement of non-compliance;
(i) the giving of reasons by an appeal board;
(j) the funding of appeal boards;
(k) inquiries by investigating tribunals for appeal boards;
(l) inquiries of alleged misconduct of valuers;
(m) fees payable for information or issuing of documents;

\textsuperscript{562} The MPRA s 80(1)-(3). The power to condone may also only be exercised within a framework, as may be prescribed by regulation by the minister.
\textsuperscript{563} Read the MPRA s 81(1)-(2).
\textsuperscript{564} Investigations may be undertaken in respect of one, more or all municipalities. See the MPRA s 82(1)-(3).
\textsuperscript{565} See the MPRA s 83(1)(a)-(n).
(n) any other matter in the opinion of the minister that is necessary for the effective carrying out or furtherance of the objects of the act.

Furthermore, the minister may declare by regulation a contravention of or failure to comply with any specific regulation to be an offence. Before regulations are promulgated, the minister must consult with OLG on the substance of those regulations and must also publish the draft regulations in the Government Gazette for public comment. It is also provided that the copyright of valuation rolls and other documents produced by municipal functionaries under the Act vests in the relevant municipality concerned.

The MPRA determines that a person is guilty of an offence if that person:
(a) contravenes section 43(1)(a) or (b), 44, 62(1)(b) or (c) or section 74 of the act;
(b) willfully obstructs, hinders or threatens a valuer or other authorized person when performing a duty or exercising a power in terms of the act;
(c) willfully gives information in an objection in terms of section 50(1)(c) of the act or in an appeal which is false in any material aspect;
(d) after having been summoned, fails to be present at a meeting, fails to remain present until excused or fails to produce a document specified in the summons;
(e) after having been called under section 75 of the act, refuses to appear, answer any question, except where the answer might incriminate the person or to produce a document in the person’s custody;
(f) fails to comply with a request under section 29, 42 or 73 of the act or willfully supplies false or incorrect information in any material respect.

A valuer is guilty of an offence even if he/she is grossly negligent in the exercise of the functions of the office. For someone convicted of an offence, the penalty under the Act is the liability of imprisonment, which may not exceed two years, or a fine as may be prescribed in relevant national legislation. A person convicted of an offence in terms of section 83(2) of the Act is liable only for a fine or imprisonment not exceeding six months, however.

---

566 See the MPRA s 83(2). It should be noted that regulations may treat different categories of property or different categories of owner of property differently.
567 Refer to the MPRA s 84(a)-(b).
568 The MPRA s 85.
569 See the MPRA s 86(1)(a)-(f).
570 Read the MPRA s 86(1)-(4).
the event of any inconsistency between it and any other legislation regulating the levying of municipal rates.\footnote{The enforcement of so-called “old-order” legislation, which is still in existence in the various provinces, is thus subjected to the MPRA. See the MPRA s 87.}

\textbf{18.5.6.13 Aspects concerning transitional arrangements and the amendment and repeal of legislation}

According to the MPRA, municipal valuations and property rating conducted by a municipality in an area in terms of legislation which is repealed by the MPRA before the commencement of the Act may, despite such repeal, continue to be conducted in terms of that legislation until the date on which the valuation roll covering that particular area prepared in terms of the Act takes effect in terms of section 32(1).\footnote{See the MPRA s 88(1)-(2).}

Until a municipality prepares a valuation roll in terms of the MPRA, a municipality may continue to use a valuation roll and supplementary roll that was in force and may levy rates against property values as shown on that roll. Where valuation rolls were prepared by different predecessor municipalities, the current/new municipality may impose different rates based on the different rolls. The amounts payable on similarly situated properties should be more or less similar. The transitional requirements lapse within four years from the date of commencement of the MPRA, however.\footnote{Read the MPRA s 89(2)-(3). When the old order laws lapse, then the old valuation rolls/supplementary rolls may not be used anymore.}

Similar to valuation rolls, a rates policy adopted before the commencement of the Act continues to be of force until the date on which the first valuation roll prepared under the Act takes effect.\footnote{See the MPRA s 90(1)-(2). Any review of such an old rates policy after the commencement of the Act must take the aims of the MPRA s 3(3) into account.}

Transitional arrangements regarding section 21 applications, the liability of bodies corporate of sectional title schemes and special rating areas are also determined by the MPRA.\footnote{Refer to the MPRA ss 91, 92 and 93 respectively.}

Finally, the MPRA amends and repeals various pieces of national and provincial legislation. For details on such legislation, refer to the schedule annexed to the Act.\footnote{See the Act s 95 together with the Sch. The Act comes into operation only on a date to be determined by the president by proclamation. The MPRA s 96. It should specifically be noted that the MPRA repeals the whole of the Rating of State Property Act 79 of 1984.}

In contrast with the levying of property taxes on privately owned land, the state is sometimes exempted from having to pay taxes to local authorities. According to the Rating of State Property Act,\footnote{79 of 1984.}
state property is also rateable. Exemptions are possible, however. This Act was repealed by the MPRA, however.

18.5.7 Fees, service charges and tariffs

Municipalities have always been very dependent on financial income derived from fees, service or user charges and various tariff obligations. All former provincial ordinances provided for such revenue arrangements. Section 10G(7) of the LGTA empowered municipalities to levy and recover levies, taxes, fees and tariffs and also prescribed the procedures for doing so. Unless repealed or contrary to the Constitution, such requirements are still applicable and enforceable. According to the new constitutional scheme, that is, section 229, municipalities are empowered to impose taxes, levies and duties apart from property rates and surcharges on fees if authorised by national legislation. Income tax, general sales tax, and value added tax are excluded, however.

Generally speaking, a “charge” is regarded as a payment for something to be done, for example an electricity or water connection. The fee or charge is then a once-off payment. A “tariff”, on the other hand, refers to a continuing fee or charge for a service that is being rendered or for a function that is to be performed on a continuing basis. Examples of tariffs included tariffs for the supply of water or electricity, refuse removal or even public transport. In essence the purpose of fees, charges and tariffs is to recover the cost of providing such a service or to perform such a function.

Fees, tariffs and service charges are often divided into different categories. A distinction is made between trading services, necessary services and social services. Trading/utility services include water and electricity services. Normally it is expected that municipalities do not make a profit on such services, as it could be oppressive to poor households. In many instances in the past profits were indeed achieved on electricity and sometimes on water services. Necessary charges or fees relate mostly to sewerage, refuse removal and associated services. Social services refers to services such as clinics, building control, markets, halls, libraries,

---

578 See the Act s 3(3).
579 The Constitution does not define what is meant by levies or taxes. Taxes must be levied and recovered according to the law, however.
580 See Craythorne (1997) 360-361. The writer mentions that sometimes the amount charged will cover the entire cost of the service or function, and sometimes the cost will amount to only a contribution of the costs. The balance will then often be subsidised from other sources such as rate

continued on next page
parks and other recreational facilities. Such services are regarded as important for the growth and development of a community. They are often very expensive and are subsidised from other sources.

It is evident that user charges form an important source of municipal own revenue and that the cost recovery of such charges is essential. Many municipalities under the new legal system contain several backlogs in respect of payment for these services. In an effort to assist municipalities in meeting the capital costs of bulk connector infrastructure, national government has provided for the Consolidated Municipal Infrastructure Programme (CMIP). There is a general obligation on municipalities to develop clear tariff policies and also to ensure that poor/indigent households have access to basic services. It is also important that tariff enforcement and credit control mechanisms should be improved. In an effort to guide tariff policies, government and other stakeholders have agreed on the following guidelines:\(^{581}\)

- **Payment in proportion to the amount consumed** As far as is practically possible, consumers should pay in proportion to the number of services consumed.
- **Full payment of service costs** All households, with the exception of the indigent, should pay the full costs of the services consumed.
- **Ability to pay** Municipalities should develop a system of targeted subsidies to ensure that poor households have access to at least a minimum level of basic services.
- **Fairness** Tariff policies should be fair, in that all people should be treated equitably.
- **Transparency** Tariff policy should be transparent to all consumers and any subsidies and concessions which exist must be visible and understood by all consumers.
- **Local determination of tariff levels** Municipalities should have the flexibility to develop their own tariffs in keeping with the above principles.
- **Consistent tariff enforcement** A consistent policy for dealing with non-payment of tariffs needs to be developed. This must be targeted and enforced with sensitivity to local conditions.

\(^{581}\) See the White Paper on Local Government (1998) at 137.
• **Ensure local economies are competitive** Local tariffs must not unduly burden local business through higher tariffs, as these costs affect the sustainability and competitiveness of such businesses and firms.

18.5.8 *Trading enterprises and subsidies*

It has always been customary for local governments to participate in trading enterprises. Trading enterprises are associated with activities such as the provision of water, electricity, transport and fresh produce. Trading enterprises should be balanced within the overall tariffs policy to enhance income, on one hand, but not to overburden consumers/residents on the other. In the past it was expected of local authorities to generate sufficient income to carry out their activities. Little financial or other assistance was received from the other spheres of government. Municipalities were exempted from revenue sources such as income tax, stamp duties and the taxation on gifts, however. Subsidies were also received from the central and provincial authorities. The provisions of section 214 of the Constitution, which requires the equitable division of revenue raised nationally, should significantly enhance the financial support from the two higher spheres of government to the lowest spheres. Both national and provincial governments are legally obligated to support municipalities from *inter alia* a financial point of view.

18.5.9 *RSC levies and intergovernmental transfers*

In the recent past, Regional Service Council levies have developed into an important source of revenue for especially metropolitan and district councils. Although often controversial, these taxes are important for municipal revenue and should be retained until a suitable alternative is found. Some of the general criticism levelled against RSC levies is the costs of collection and the fact that the tax is directed on staff or labour. This is often perceived to reinforce a bias against labour-intensive enterprises and could therefore negatively impact on development. It is submitted, however, that as long as such levies are restricted to low levels and are effectively controlled, the potentially negative effects should be minimised.582

---

582 See the Regional Services Act 109 of 1985, which provides for the payment to councils of a regional services levy by every employer and a so-called “regional establishment levy” payable by every person carrying on an enterprise in the area of a particular council. Refer also to the case of Greater Johannesburg TMC v Eskom 2000 (1) SA 866 (SCA). The dispute concerned the liability for regional establishment levies on the part of Eskom to the particular municipal council. According to the RSC Act s 12, every person carrying on an enterprise within a region/jurisdiction is subject to such a levy. Eskom Act 40 of 1987 s 24 exempted Eskom from payment of levies that would other-

continued on next page
In light of the constitutional obligation that municipalities are entitled to an equitable share of national revenue as well as the obligation on national and provincial governments to support municipalities financially, the principle of intergovernmental transfers (IGT) has become very important. According to the White Paper on local government, three basic types of transfer were identified:\textsuperscript{583}

- There are agency payments paid by provincial governments to municipalities for services rendered by the municipalities on behalf of the provinces.
- There are direct grants from higher spheres to municipalities to subsidise the capital costs of investment in municipal infrastructure.
- There are grants to support the operating budget of municipalities.

Municipalities must ensure that the agency payments they receive are sufficient to cover the full cost of the services which they deliver. The possibility of unfunded mandates should be guarded against. It is important that the new system of IGT should address not only the vertical division of revenue but also the horizontal division of revenue between municipalities \textit{inter se}. The vertical division is decided via the national budgeting process. It is also important to note that the equitable share from national revenue covers only funds transferred to cover operating costs of municipalities. Capital grants are classified under so-called “additional grants”. From the horizontal divisional point of view, all municipalities must be able to provide a basic level of services and have at least an administrative infrastructure sufficient to govern its area effectively.

\textbf{18.5.10 Municipal loans and capital funds}

It was mentioned above that the Constitution allows municipalities to raise loans for capital or current expenditure.\textsuperscript{584} Such loan capacity refers to external loans such as bank overdrafts. Municipalities must be very cautious not to over-exceed their borrowing possibilities and end up having a negative credit rating, however. In order to ensure that a municipality does not fall into a trap of debts, strict requirements are set out before a loan can lawfully be obtained.\textsuperscript{585} Loans for bridging finance may be raised only during a financial year and also only to finance current expenditure in
anticipation of the receipt of revenue to be collected. Apart from raising loans, munici-
palities can also utilise internal capital funds as a resource for funding less ex-
pensive capital purchases such as equipment and minor building works.

18.5.11 Municipal stocks
Another method used in the past in raising capital by municipalities was through the
issuing of municipal stock. Stock refers to a fixed amount of money invested by an
individual or institution. It is a form of loan. In return for the investment, a certificate is
issued as evidence of ownership of a fixed amount of stock. Normally a stock certifi-
cate is transferable at a price determined by the prevailing money market. Cray-
 thorne identifies three types of stock.586 These are bearer stock, inscribed stock and
registered stock. Transfer of stock takes place through the transfer or surrender of
the stock certificates. In South Africa this method of raising money is preferred be-
cause of security offered by the stocks and also easy accounting control. Finally,
there are two methods of issuing stock: one is through the so-called “fixed price”
system and the other is through the “tender” system. Under the tender system mu-
nicipal stock is put up for public tender, and an issue is made to the highest bid-
der.587

18.6 Conclusion
It is obvious to conclude that the restructuring process of local government and the
various constitutional demands placed on municipalities have introduced many fi-
nancial challenges. These challenges include a dramatic increase in services re-
sponsibilities, escalation in municipal salaries, higher administrative costs and
often a significant reduction in experienced personnel.588 Most of these challenges
have placed severe pressure on the cash flows and financial control mechanisms of
all newly amalgamated municipalities.

There seems to be a strong need and indeed constitutional obligation for munici-
palities to restore and implement strict financial discipline and to take effective steps
to recover outstanding debts and to fully utilise all local methods to generate the
necessary revenue. Without sufficient revenue at their disposal, municipalities will
not be able to fulfil and complete their constitutional obligations. It is further also

essential that municipalities are properly assisted and supported by both the national
government and the provincial authorities. The success of municipal fiscal manage-
ment lies in strict control and oversight, however. In this regard the higher spheres of
government have important control functions to fulfil.

It is submitted that the new legislative provisions, within the basic framework of the
Constitution, indeed create a legal dispensation that should allow all municipalities to
enhance and secure sufficient financial revenue and thereby provide and sustain
essential municipal services. Such support and financial entitlements are not unre-
stricted, and various measures of control and accountability over fiscal matters have
been provided for. Clear and decisive provisions are also made to ensure higher-
sphere involvement in municipal financial affairs and to provide for oversight and
even national and provincial intervention in cases where municipal finances are
inappropriately managed. The new legal framework also allows for much stronger
public participation in financial affairs, which in turn should foster stronger relation-
ships of trust and support between local residents and their respective municipal
governments. However, the ultimate success of the new system lies in the way in
which the new system is implemented and in the manner in which all roleplayers
exercise and fulfil their distinctive legal obligations.
The principles of municipal public administration and the requirements of performance management, capacity building, accountability and public participation

19.1 Introduction
The importance of the relationship between municipalities and residents as well as between municipalities and the two higher spheres of government have been emphasised in many previous chapters of this work. These relationships have been given constitutional importance and significance under the new overall constitutional scheme. Especially since the Constitution is the supreme law of the state, all constitutional requirements dealing with the public administration and the relations between the public and government institutions must be strictly complied with. Under the previous local government system, many of these issues were not legally enforceable or were largely downplayed in mostly provincial ordinances. This position has now changed fundamentally under the new constitutional dispensation.

As a basic point of departure, the meaning of administration (i.e., municipal administration) refers to the overall management of the public affairs of a certain organisation.\(^1\) On a municipal level, public administration encapsulates a special relationship between politics and administrative organs. The politicians are concerned with the uses of power, whilst the administration is concerned with translating the political decisions into practical implementation. Furthermore, the political dimension is subject to change, whereas the administration is characterised by stability and routine.

In terms of public administration, it must be remembered that the concept includes aspects such as policy, decisions, staffing matters, organising, planning and also resource allocations. The concept also differs widely from one administration to an-

\(^1\) Craythorne (1997) 65.
other. Municipal administration is undoubtedly part of public administration in general, but it also has a more distinctive importance; for example:\(^2\)

- It operates in a political field.
- It operates within the context of democratic notions of an open, responsive and accountable government institution.
- It is decentralised and, to a certain degree, self-financing.
- It is the part of government which is closest to the citizens of a particular state.

19.2 Basic aspects concerning municipal public relations

All forms of government accept in general that their actions have to be acceptable by their subjects. This realisation provides the basis for the development of a relationship of trust and support between the state and its people. In modern day governments this relationship is very important because a government is generally accountable to the people who have elected it to power. This position is particularly true for local governments. Because local authorities provide essential goods and services which affect people directly, it is acceptable that the public at large should be sensitive about the performance of both political office-bearers and administrative staff components.

In contrast to the public relations activities of private enterprises which are directed at sales and profits, public relations programmes of public institutions are usually approached from the point of view of promoting general welfare. Public institutions are mostly monopolistic enterprises with no real competitors. This position has changed somewhat under the new South African constitutional scheme as competitiveness, accountability and responsiveness in providing services and attracting investment have become familiar catch-phrases. Because of their prominent caretaker roles in society, public institutions such as municipalities are subjected to various legal requirements in respect of the exercise and fulfilment of their functions.\(^3\) It is further also an established requirement that public functionaries maintain high ethical standards. This position is so because of the important public responsibilities which municipalities must perform.

---

\(^3\) See Cloete (1997) 152. The writer mentions that the public does not always understand the reasons for administrative red tape. There are often very good reasons for such requirements, however. The introduction of Public/Private Partnerships (PPP) has also boosted municipal competitiveness and profit targeting.
Municipal public relations are affected by every action of a political or staff representative. The activities of municipalities will always be evaluated carefully by local residents and other stakeholders. If respect is to be achieved, officials and political representatives should foster an attitude of commitment to the general public. It is thus safe to say that the state of public relations is largely dependent upon the conduct and performance of every functionary involved in public administration. Because of its importance, every municipality should appoint officials that are charged exclusively with the handling of its public relations. One of the many difficult tasks of a public relations officer is to determine public opinion and attitudes and to accommodate such opinions and attitudes. Quick and reliable information is very important here.

19.3 The constitutional requirements affecting municipal public administration

In light of the importance and responsibilities of public administration at large, the new constitutional scheme specifically entrenches certain basic values and principles that govern it. These basic values and principles are important to not only the public administration per se, but also the public services throughout all three spheres of government. Unless the Constitution is amended, the basic values and principles have been afforded supreme legal status and must be complied with.

19.3.1 The basic values and principles governing public administration

In section 195 of the Constitution, the following values and principles relevant to the overall public administration are mentioned as follows:\(^5\)

- A high standard of professional ethics must be promoted and maintained.
- Efficient, economic and effective use of resources must be promoted.
- Public administration must be development-orientated.
- Services must be provided impartially, fairly, equitably and without bias.
- People’s needs must be responded to and the public must be encouraged to participate in policy-making.
- Public administration must be accountable.
- Transparency must be fostered by providing the public with timely, accessible and accurate information.

\(^4\) Such personnel are usually known as “public relations officers” (PROs) and “publicity officers” (media liaison officers).

\(^5\) See the Constitution s 195(1)(a)–(i).
• Good human-resource management and career-development practices must be
cultivated to maximise human potential.

• Public administration must be broadly representative of the South African people,
with employment and personnel management practices based on ability, objectivity,
fairness and the need to redress imbalances of the past to achieve broad rep-
resentation.

All of the abovementioned values and principles are obligatory and must be complied
with. The Constitution is clear on the fact that public administration must be gov-
erned by the democratic values and principles enshrined in the Constitution and not
only those mentioned in section 195(1). Apart from the values and principles men-
tioned, the Constitution confirms that the principles apply to the public administration
in every sphere of government, organ of state and public enterprise. Without a doubt
such principles are therefore relevant to all municipalities. The Constitution further
requires the enactment of national legislation which must ensure the promotion of
the mentioned values and principles. It is also permitted that the national legislation
envisioned above may allow for differentiation between aspects regulating public
administration between different sectors, administrations or institutions. In this regard
the particular nature and functions of different sectors, institutions or administration
should be taken into account when the legislation regulating the public administration
is enacted. Furthermore, it seems clear from the Constitution that not all aspects
concerning the public administration of all administrations or sectors should be pre-
cisely the same. The national legislation envisaged in section 195 has been enacted
as the Public Service Act. Inter alia, the Act provides for the broad principles on the
functioning of the public service in general, thereby also including various aspects
important to municipal public administration. The Act must also be read in conjunc-
tion with section 197 of the Constitution, which in essence creates a public service
for the entire Republic of South Africa. According to the Constitution, there is a public
service within the overall public administration. Such public service must function

---

6 See the Constitution s 195(1).
7 See the Constitution s 195(2)(a)-(c).
8 See the Constitution s 195(3).
9 See the Constitution s 195(4)-(6).
10 103 of 1994 as amended by Act 86 of 1998. Note that the Act is applicable to only the na-
tional and provincial spheres of government. Municipalities currently still determine their own condi-
tions of service and determine their own salary scales.
and be structured in terms of national legislation, and the public service must execute the lawful policies of the government of the day loyally.\textsuperscript{11} The terms and conditions in the public service must also be regulated by national legislation, and public service employees are entitled to a fair pension. No employee may be favoured or prejudiced because that person supports a particular political party or cause. Finally it is the responsibility of provincial governments to manage the public service in their administrations. They may do so only within a framework of uniform norms and standards applying to the public service.\textsuperscript{12}

It was mentioned above that municipal administrations are clearly part of the public administration at large and that the principles and requirements mentioned in the Constitution and national legislation are equally applicable to them. Apart from the national legislative requirements for all administrations, certain specific aspects have also been included in selective laws dealing specifically with local government matters. Such legislative provisions will be discussed below. Finally, it must be pointed out that the Constitution also establishes a single Public Service Commission for the Republic of South Africa. The commission must be independent and impartial and must exercise and perform its functions in the interests of the maintenance of effective and efficient public administration and a high standard of professional ethics in the public service. The commission is regulated by national legislation and therefore it also plays an important role in overseeing and controlling aspects of public service and administration within the municipal public administrative domain.\textsuperscript{13} The commission has various constitutionally entrenched powers and functions and also certain additional powers and functions prescribed by national legislation.\textsuperscript{14}

\textbf{19.3.2 Issues concerning municipal administration}

In follow-up of the constitutional requirements mentioned above, the new local government legislative framework also provides for aspects relevant to local public administration. According to the Local Government: Municipal Systems Act,\textsuperscript{15} the local public administration is governed by the democratic values and principles embodied in section 195(1) of the Constitution. It is further provided that in the administering of
its affairs, municipalities must strive to achieve the objects of local government as set out in section 152 of the Constitution and also comply with the duties of local governments. In furtherance of the developmental duties of municipalities, the Systems Act determines that, within their administrative and financial capacity, all municipalities must establish and organise their administration in a manner that would enable municipalities to comply with various administrative and financial requirements. These requirements are the following:

- to be responsive to the needs of the local community
- to facilitate a culture of public service and accountability amongst its staff
- to be performance orientated and focused on the objects and developmental duties of local government
- to ensure that its political structures, political office bearers and managers and other staff members align their roles and responsibilities with the priorities and objectives of the municipality’s integrated developmental plan
- to establish clear relationships and to facilitate co-operation, co-ordination and communication between its political structures and political office bearers and its administration; and between its political structures, political office bearers and administration and the local community
- to organise its political structures, political office bearers and administration in a flexible way in order to respond to the changing priorities and circumstances of the municipality
- to perform its functions through operationally effective and appropriate administrative units and mechanisms, including departments and other functional or business units and also, when necessary, to perform such functions on a decentralised basis
- to assign clear responsibilities for the management and co-ordination of the administrative units and mechanisms
- to hold the municipal manager accountable for the overall performance of the administration
- to maximise efficiency of communication and decision-making within the administration

---

16 See the Systems Act s 50(1)-(2).
17 See the Systems Act s 51(a)-(m).
• to delegate responsibility to the most effective level within the administration
• to involve staff in management decisions as far as is practicable
• to provide an equitable, fair, open and non-discriminatory working environment.

The requirements mentioned above are subject to any applicable labour legislation, however. Applicable labour legislation will prevail if any inconsistencies arise.\(^{18}\) It seems that the intention of the legislature was to allow municipalities considerable leeway in order to create an effective municipal administration, but not to do so at the expense of established and recognised labour interests.

19.4 Principles of municipal accountability and public participation

It is an historical fact that to a large extent community participation and municipal accountability were neglected under the former local government dispensation. One of the core elements of change was allowing people to have a say in the decisions that affected their lives. Participation and accountability of representatives are therefore not new concepts in South African public life. Under the new dispensation these concepts have been afforded significant recognition. The supreme law of the state now recognises that participation and accountability are core and crucial principles for ensuring sustainable, democratic and developmental local government. According to the founding provisions and the objectives of local government, the aim of the new constitutional dispensation is to establish a democratic government founded \textit{inter alia} on the values of accountability, responsiveness and openness. These sentiments are echoed in the objectives of local government, which affirms the aim of providing democratic and accountable local governments for local communities and encouraging their involvement in local government matters.\(^{19}\) With this new constitutional mandate, the principles of participation and accountability are central to the new local government dispensation and the final transformation of the previous system.

The process of ensuring participation and accountability in local government represents major challenges for all municipalities. The transition to the new system was long and difficult, and many adaptations were required in order to accommodate new structures and processes. Central to the success of establishing a new system has been the participation by citizens and the accountability of those in positions of

\(^{18}\) See the Systems Act s 52.

\(^{19}\) See the Constitution ss 1 and 152.
power. There are many shortcomings in the new system, however, and constant development of participation and accountability is required.

19.4.1 Participation, communication and partnerships

The essence of the concept of participation is giving people, and more specifically local residents, a real say in decisions that affect their lives. In order to take part in such decision-making processes, people must have access to decision-making structures in order to make their voices heard. Real participation strengthens the legitimacy of municipal decision making. South African local governments face various challenges to ensure participation, however. Many members of society do not have the opportunities that others do to express themselves. The lack of resources and education often excludes people from participatory processes. There are two key ways in which participation can be facilitated. They are

- to improve and maintain existing channels of communication
- to form new and strong partnerships between municipalities and local stakeholders.

19.4.2 Channels of communication

It is a fact that in systems where there are open channels of communication meaningful participation usually occurs. The following different channels of communication should enhance participation between citizens and municipalities:

- **As voters** One of the commonly known and important ways through which citizens can voice their opinions in terms of governmental decision making is through the process of voting. Every adult South African citizen has the right to vote and to take part in elections for any legislative body established in terms of the Constitution. This constitutionally protected right is important not only to ensure a democratic society but also to allow the voters to have a direct say in the choice of their political leaders and their policies. As with all government structures, municipalities have an obligation to make voters aware of their right to vote and to motivate them to exercise such right.
- **As consumers of services** Most people have direct contact with their municipalities through the use of and payment for municipal services. Through this channel

---

20 See LGIS no 2 “Participation and Accountability” (1999) at 3-8.
21 Read the Constitution s 19(3)(a).
of regular contact, many aspects of municipal decision making can be communicated.

- **As an organised interest group** People often organise themselves in different interest groups. Such groups include political parties, NGOs and a range of Community Based Organisations (CBOs) such as ratepayers associations, church groups etc. Business people also organise themselves into groups that look after their interests and the interests of the region. A local chamber of commerce is a good example of a business organisation that could have an important influence with the local authority and which could serve as an acknowledged and influential communication instrument.

- **Through specialised structures** Communication can also be significantly enhanced through specialised local structures. A ward committee is such a structure and could play a very important intermediary between local residents and their local municipality. Ward committees are best suited to detecting local problems and to communicating such problems quickly and effectively. Apart from ward committees, which interact with the specific ward representative, residents can also communicate and participate with their local municipality through their traditional leaders or other community organisations. The existence of traditional leadership in many regions in South Africa and its role and involvement with local municipalities should also provide a powerful mechanism for participating and communicating with their municipal structures.\(^\text{22}\) It is essential that municipalities should ensure that the channels mentioned above are kept open and effective. To this end the new local government legislative framework provides specifically for a chapter on community participation.\(^\text{23}\) A further example of a specialised structure is the existence of organised labour. Organised labour should also be consulted by municipalities when issues are considered that could have an impact on them. In the case of *SAMWU v City of Cape Town and Others*\(^\text{24}\) the Supreme Court of Appeal stated that the provisions of sections 16-21 of the Systems Act foster

---

\(^{22}\) Municipalities can also ensure participation through the establishment of internal municipal committees, eg, an advisory committee. Such a committee is specifically formed to address the need for effective communication with the public and can act as a vital link between the municipality and its local community.

\(^{23}\) See the Systems Act ch 4, which is discussed later in this ch.

\(^{24}\) 2004 (1) SA 548 (SCA).
community participation in municipal decision-making processes. Such participation could include organised labour.  

19.4.3 Participation through partnerships

When channels of communication are open and effective, conditions are conducive for partnerships to be formed. Examples of these are partnerships between the municipality and the police in combating crime, and between local business enterprises to alleviate social upliftment. The new legal framework provides specifically for such programmes and partnerships.

19.4.4 The new legislative provisions regarding community participation

Under the new local government legislative framework, specific provision has been made for ensuring and protecting the participation of local communities. Chapter 4 of the Municipal Systems Act features various legal obligations to which municipalities must comply. From the start the Act determines that municipalities develop a culture of municipal governance that complements formal representative government with a system of participatory governance. In an effort to achieve and develop such a culture, municipalities must encourage and create conditions for the local community to participate in the affairs of the municipality. Participation should include participation in:

• the preparation, implementation and review of the municipal integrated development plan
• the establishment, implementation and review of the performance management system
• the monitoring and review of performance in general, including outcomes and impact of performance
• the preparation of the municipal budget
• strategic decisions relating to the provision of municipal services.

Municipalities must further contribute to building the capacity of the local community in order to enable it to participate, and to enable councillors and staff members to foster community participation. Municipal resources and funds that are allocated

---

25 Refer to the SAMVU case supra fn 24 at 551-555.
26 See the Systems Act ch 4.
27 Refer to the Systems Act s 16(1)(a)(i)-(v).
annually from the municipal budget should be provided in order to achieve the mentioned participatory objectives.28

Specific mechanisms, processes and procedures for community participation have also been provided for. The Systems Act determines that participation by the local community in the affairs of the municipality must take place through various mechanisms.29 All municipalities must establish appropriate mechanisms, processes or procedures to enable the local community to participate in the affairs of the municipality. In this respect, municipalities must provide for

- the receipt, processing and consideration of petitions and complaints lodged by members of the local community
- notification and public comment procedures
- public meetings and hearings by the municipal council, other political structures and political office bearers, when appropriate
- consultative sessions with locally recognised community organisations and where appropriate, traditional authorities
- report-back mechanisms to the local community.30

When a municipality establishes mechanisms or processes of participation, it must take into account the special needs of people who cannot read or write, people who have disabilities, women and various disadvantaged groups. A municipal council may also establish one or more advisory committees to advise the council on any matter within the council’s competence.31

A further important provision is that municipalities must communicate to their relevant communities information concerning inter alia the available mechanisms to encourage and facilitate community participation, the matters on which participation is encouraged and also the rights and duties of members of the local community.

---

28 See the Systems Act s 16(1)(b)-(c). It should be pointed out that the mechanisms to encourage participation must not be interpreted as permitting interference with a municipal council’s rights to govern and to exercise executive and legislative authority. In instances where participatory schemes would interfere with municipal administration or the effective provision of services, such schemes must be overruled in favour of a municipality’s right to govern and to exercise its functions and obligations. See the Act s 16(2).

29 See the Systems Act s 17(1)(a)-(e). It is envisaged that participation must take place through (a) political structures; (b) other mechanisms, processes and procedures provided for in terms of the Systems Act; (c) other appropriate mechanisms, processes and procedures established by the municipality; (d) councillors; and (e) generally applying the provisions for participation as provided for in the Systems Act.

30 See the Systems Act s 17(2)(a)-(e).

31 See the Systems Act s 17(3)(a)-(d) and s 17(4).
When such information is being communicated by a municipality to its local community, it is obligatory for the municipality to take into account the language preferences and usage in the municipality and the special needs of people who cannot read or write.\textsuperscript{32} Participation is also enhanced through giving notice to the public of municipal council meetings and giving them admission to these. It is now required by law that the municipal manager of a municipality give notice to the public of the time, date and venue of every ordinary meeting of the council and also special or urgent meetings, except when time constraints make such notice impossible.\textsuperscript{33} As was stated elsewhere in this work, a municipal council must conduct its business in an open manner and may close its sittings only when it is reasonable to do so.\textsuperscript{34} The constitutional requirement is reiterated in the new legislative framework. Meetings of a municipal council and of its committees are open to the public, including the media, and neither the public nor the media may be excluded from council or committee meetings except when:

\begin{itemize}
  \item it is reasonable to do so because of the nature of the business being transacted \textit{and}
  \item a by-law or resolution of the council specifying the circumstances in which the council/committee may close a meeting, authorises the council or committee to close the meeting to the public.\textsuperscript{35}
\end{itemize}

The public or media, may not be excluded, from a council or committee meeting when any of the following matters are being considered or being voted on:\textsuperscript{36}

\begin{itemize}
  \item a draft by-law tabled in council
  \item a budget tabled in council
  \item the municipality’s draft IDP or amendments thereto, tabled in council
  \item the municipality’s draft performance management system or amendments, tabled in council
  \item the decision to enter into a service delivery agreement in terms of section 76
\end{itemize}

\textsuperscript{32} Refer to the Systems Act s 18(1)-(2).
\textsuperscript{33} See the Systems Act s 19(a)-(b). The manner in which the notice is to be given must be determined by the municipal council.
\textsuperscript{34} See the Constitution s 160(7).
\textsuperscript{35} See the Systems Act s 20(1)(a)-(b). Note that decisions by local governments are taken via specific resolutions or via the adoption of a by-law. Resolutions can however be \textit{more easily amended} or changed than by-laws.
\textsuperscript{36} See the Systems Act s 20(2)(a)-(f).
any other matter prescribed by regulation.

However, it is interesting to note that, subject to reasonability and the nature of the business being transacted, an executive committee and a mayoral committee may close any or all of its meetings to the public and media. Finally, a municipal council, within its financial and administrative capacity, must provide space for the public in the chambers where the council or committees meet, and it may also take reasonable steps to regulate public access to and public conduct at such meetings.

The new local government legislative framework also determines specific requirements in respect of communications to the local community. When a municipality needs to notify the community of anything through the media, it must do so in the local newspaper(s) of the area, in newspapers circulating in the area and in newspapers determined by the council to be newspapers of record; alternatively, notices can be sent by radio broadcasts covering the area of the municipality. Any notification must be in the official language(s) determined by the council, with consideration of the language preference and usage within its area. Notices must also be displayed at the municipal offices. When a local community is invited to submit comments to the council, the invitation notice must state that municipal staff members will assist persons who cannot write. Similar provisions are set when members of the public are required to fill in forms. Persons who cannot read or write must be assisted.

Specific provisions regarding the publicity of documents have also been included. According to the Systems Act, all documents that must be made public by a municipality in terms of a requirement of the Act, the Municipal Finance Management Act or any other applicable legislation must be conveyed to the local community by displaying the documents at the municipality’s head and satellite offices and libraries, on the municipality’s official website if available and by notifying the local community of the place and address where detailed particulars concerning the documents can be obtained. Each municipality is also obligated to establish its own official website if it decides that it is affordable, and place on such website all information required under

37 The Systems Act s 20(3).
38 The Systems Act s 20(4)(a)-(b).
39 See the Systems Act s 21(1)(a)-(c).
40 See the Systems Act s 21(2)-(5).
41 See s 21A of the Systems Act as inserted by Act 44 of 2003 s 5. If appropriate, a notification mentioned above must invite the local community to submit written comments or representations to the municipality in respect of the relevant documents.
the Systems Act and the Municipal Finance Management Act. If no website is established, all relevant information should be displayed on an organised local government website sponsored or facilitated by the National Treasury. It is the overall responsibility of the municipal manager to ensure maintenance and regular updating of the electronic information of a municipality.42

Under the new legislative framework, the minister of local government is also authorised to make regulations or issue guidelines on various aspects concerning public participation in local municipal affairs. The minister should take into account whether municipalities have the capacity to fulfil extra regulatory or guiding requirements, however.43

19.4.5 Local municipal accountability

It was explained above that accountability is one of the founding values of the new South African constitutional state and is applicable to all spheres of government including the local government sphere. In essence, accountability refers to the need to explain or to defend certain actions or conduct. Accountability is needed to ensure that people in positions of power can be held accountable and responsible for their actions and conduct. Accountability therefore plays an important role in ensuring stability and acceptance of a particular democratic system. It ensures appropriate checks and balances for local residents with regard to their elective representatives. Accountability means not only taking responsibility, but also ensuring liability in certain instances. See, for example, the case of Umzinto North Town Board v Moodley.44 In this case a duly appointed town treasurer, purporting to act under delegated authority, invested municipal funds contrary to the Local Authorities Ordinance45. The town treasurer/defendant argued that he was exempt from liability under the Ordinance. However, the court held inter alia that the defendant bore the onus of proving that he was entitled to an exemption, that he acted wilfully and knowingly that his investment decision was not covered by the ordinance and that his conduct

42 Read s 21B of the Systems Act as inserted by Act 44 of 2003 s 5.
43 For more details refer to the Systems Act s 22(1)-(4). Note the difference between the words “responsible” and “accountable”. Responsibility refers to the fulfilling of a duty, whilst accountability also includes the obligation to provide answers for specific actions/conduct. See also the LG: Municipal Planning and Performance Management Regulations published under GNR 796 in GG 22605 of 24 August 2001. Item 15 of the regulations deals with community participation in respect of IDP and performance management.
44 1996 (1) SA 539 (D).
45 Ordinance 25 of 1974 (N).
was not excused by the ordinance. He was thus liable for the damage caused by his actions. All three components of a municipality must be accountable in municipal matters. There seems to be a stronger awareness of the importance of accountability and our courts should take bold action if accountability is not assured. A system which encourages participation also deepens local democracy, as citizens feel more confident about participating when they know that their inputs count and that those responsible can be held accountable. Accountability in local government further ensures that the actions of the council also reflect the aspirations of the relevant community.

19.4.6 Establishing paths of accountability

In view of the importance of local accountability, it is essential for all local governments to establish all possible paths/methods to enhance and assure a truly accountable government. There are therefore various paths of accountability, some within the municipality itself and others between the municipality and the particular local community. The following diagram provides an overview of the various paths.

---

46 See the Umzinto case supra fn 44 at 543-545.
47 The three components are the political office bearers, the municipal staff members and, to a lesser extent, the local community members.
48 See in this regard the unreported case of LR Brink and G Nieuwoudt v Die Speaker van die Munisipale Raad van Nala Plaslike Munisipaliteit en een ander, Free State High Court, December 10 2001 under case no 2125/2001. The case concerned mainly the suspension of two councillors from the municipal council. The court found on the facts that the grounds for suspension were frivolous and devoid of the rules of natural justice. The court held that the actions of certain councillors were so unreasonable and tainted by racism and maliciousness that it would be unfair to apply ratepayers’ money to funding the action and that the costs of the matters should be paid by the relevant councillors out of their own pockets. The Constitution demands rational decision making, openness and fairness. Such features are essential to legitimacy, public confidence and acceptance of any administration. According to the Constitution, and more particularly s 152, municipal governments must be accountable governments. It is submitted by some legal experts that accountability can now be seen to extend further than the administrative organ itself and, in some extreme cases, can even mean personal accountability of those individuals who collectively make up the particular organ. See also Barrie G “Caveat town councillors” Without Prejudice (2001) 8. For a similar example of collective accountability, also refer to the Constitution ss 80(4) and 122(4), which allows the Constitutional Court to order unsuccessful applicants of the National Assembly or a provincial legislature to pay the legal costs of an application under the sections.
49 Diagram taken from LGIS no 2 “Participation and Accountability” (1999) at 10.
As was mentioned above, a municipality is accountable to both institutions inside the municipality and to the public and other stakeholders outside the municipality. On the external level, municipalities are accountable to the public which they serve. External accountability manifests in different ways. There is, for example, the accountability of a ward councillor to the ward inhabitants. If the population of a ward is not satisfied with such a councillor, they should vote the person out of office in the next election. Non-ward councillors are also held accountable through pressure on the relevant political party that they represent. According to the new local government system, all councils must put an integrated development plan in place, which plan is linked with the five-year term of office of councillors. Councillors can thus be held accountable in respect of their performance relative to such an IDP. It is not only the political office-bearers that are accountable to the public, however; the municipal administration is also accountable. It must be emphasised that the relationship between the administration of a municipality and its local public is very important. Quality and professional service fosters public support and participation.\textsuperscript{50} It is ultimately the

\textsuperscript{50} Public accountability of municipal administrative staff has always been somewhat problematic, but in many municipalities it seems to have taken a turn for the worse. Both national and provincial governments have recognised the need for improvement in such regard. The Batho Pele (people first) programme is but one new initiative, which aims to ensure accountability through im-

continued on next page
responsibility of each municipality to ensure that it has implemented effective mechanisms and procedures to ensure that accountability is achieved. It should further be pointed out that organised labour is also accountable to the broader community. Unions have a duty to encourage their members to serve their communities. Ultimately what is needed is a balance between the needs and aspirations of workers and the needs of the community towards affordable and accessible services.\textsuperscript{51}

Accountability must also be provided for within a municipal administration. In such instances various forms of accountability can be distinguished. Firstly, there should be strong accountability between the executive authority and the municipal council. Under new policy directives and emerging legislation, the role of executive structures within the council has been enhanced. The introduction of a speaker particularly enhanced executive accountability to the council and public.\textsuperscript{52} Apart from being accountable to the executive authority, the council and the administration are accountable to one another. The administration has to answer to the council’s political leaders, but the leader must support the administration in doing its work. On this point it should be noted that the new developmental nature of local government, with its greater emphasis on participation and accountability, has resulted in many changes in the way in which municipalities function.\textsuperscript{53} Accountability is also required between the municipality as employer and organised labour. Various strategies should be developed to ensure that workers have a say in the way in which a municipality is to function. Finally, municipalities are also accountable to the other spheres of government, which are reciprocally accountable to them. For example, municipalities are required to implement national and provincial development programmes, but both national and provincial governments have a supporting, coordinating and monitoring role with regard to municipalities. All in all, the three

\begin{itemize}
\item proved customer management and service provision. See LGIS no 2 “Participation and Accountability” (1999) at 11.
\item According to the White Paper on Local Government, labourer’ interests should not stand in the way of transformation or delivery objectives. It is envisaged that the new South African Local Government Bargaining Council must play a critical role in enhancing positive partnerships between labour, management, the council and, finally, the relevant local community.
\item Refer to all the special functions that the speaker must perform and oversee. The speaker functions as a person who is charged with ensuring that the council and its structures are accountable for the way in which they function.
\item The enforcement of party political idealism within a particular administration often does not encourage co-operation and can be very destructive. See LGIS no 2 “Participation and Accountability” (1999) at 14.
\end{itemize}
spheres of government have an overarching constitutional accountability to the new constitutional model and to the nation at large. Such accountability is founded on the Constitution itself, as it requires a system of democratic government founded on *inter alia* the values of accountability, responsiveness ad openness.\(^\text{54}\)

In an effort to ensure that accountability is achieved, many new initiatives have been implemented. It is submitted that these initiatives should go a long way towards enhancing and achieving accountability. Some of the new initiatives are summarised briefly as follows.\(^\text{55}\)

- **Codes of conduct** Codes of conduct have been introduced for councillors, traditional leaders and officials. Such codes should ensure that those individuals act in the interest of the communities that they serve and that they are accountable for their actions.
- **Full-time appointed councillors** Full-time councillors will have more time to fulfil their functions, which should improve effectiveness and accountability.
- **New structures and functionaries** Under the new legislative system, new and enhanced structures and functionaries such as the office of the executive mayor and the new municipal manager have been created. These structures and functionaries have specifically allocated powers, responsibilities and functions and should also play an important role in ensuring municipal compliance to all its duties and objectives.
- **Performance management** Under the new system, municipal performance is measured against key performance indicators (KPI). The KPI should be set up in consultation with the public and other stakeholders and should encourage participation and accountability through regular monitoring.
- **Public rights and responsibilities** Residents in particular municipal jurisdictions have both rights and obligations. Such a system, which requires a balanced approach, should also enhance municipal accountability and effectiveness.

19.4.7 Developing programmes for participation

It was mentioned above, that all municipalities are now legally obliged to develop systems of public participation. Such development requires different phases. In the first phase, municipalities should build up a relationship with all the relevant stake-

\(^{54}\) Refer to the Constitution the Preamble and s 1(d).

\(^{55}\) Refer to LGIS no 2 “Participation and Accountability” (1999) at 12.
holders in their communities and develop a shared vision for the area as a whole. All interest groups should be involved. This process can be initiated through various strategies such as publicity days and local media coverage. Care should be taken not to marginalise groups within communities. People must also see that the municipal initiative is genuine and that serious consideration is given to their involvement. The second phase should involve the internal restructuring of municipal administrations. Existing staff members and councillors should change their attitudes toward public participation and their own accountability. Once a new relationship has been established the new system of interaction and participation should be maintained.

From the discussion above it is clear that the new local government system is significantly different from the one that existed prior to the new constitutional dispensation. Municipalities are now constitutionally obliged to provide democratic and accountable governance for all local communities. New laws provide the basis for making the new system a reality. The key to the success lies in the capacity and willingness of all stakeholders to take the processes forward, however.

19.5 Aspects concerning municipal performance management and capacity building

The new legislative framework for local government has also established new demands on the performance of municipal staff members to ensure that the objectives of local government are met. After the transformation process had been initiated, municipal administrations were faced with various new challenges and demands: municipal jurisdictions were enlarged, many service backlogs became evident, a new constitutional vision and place for local governments was created, new boundaries were drawn and finally a new legal framework for local governments was initiated. Special directives and assistance to municipal administrations are therefore essential in order to ensure a more efficient, customer-orientated and developmentally creative local government dispensation. In order to create such a system, proper performance management within all municipal administrations is generally regarded as a prerequisite; performance management is seen as a strategic tool that can encourage new attitudes, skills and competencies within the new local government dispensation.

In essence, performance management can be summarised as a process whereby municipalities seek to improve and monitor their functioning and accountability on an ongoing basis. Performance is then regularly assessed to determine whether plans
have been implemented, resources are being used effectively and whether the munici-
pality is fulfilling its duties and responsibilities. If municipal performance manage-
ment is implemented correctly, it should enable municipalities to deliver quality
services in a cost-effective, efficient and accountable manner. In light of the fact that
performance management is a new concept for local administrations, there is no
uniform or general model available which municipalities can implement with guaran-
teed success. An effective and efficient performance management system must be
developed to meet the unique circumstances that exist in modern local governments
in South Africa.\textsuperscript{56}

The previous local government dispensation never provided properly for a compre-
hensive performance management system. Consumers or the public at large never
had the opportunity to measure the effectiveness of municipal service delivery and
quality of services. Under the new constitutional requirements local governments are
obliged to meet the basic needs of citizens, and especially provincial governments
are tasked with monitoring the performance, capacity and effectiveness of munici-
palities within their respective jurisdictions. In follow-up on the constitutional provi-
sions, the new legislative framework for local governments provides specifically for
the enhancing of municipal performance management.\textsuperscript{57} The need for a general
performance management system for all municipal governments was already envis-
aged in the White Paper on Local Government. The White Paper confirmed that the
aim of a new national performance management system is to:\textsuperscript{58}

\textsuperscript{56} Under the new constitutional system, various systems have been proposed to establish an
effective performance management system. One such proposal was the \textit{Batho Pele} (people first)
vision for managing performance in the broader public sector. The \textit{Batho Pele} proposal is aimed at
delivering the best service to the public. The proposal consisted of eight service delivery principles
(i.e. consultation, service standards, access, courtesy, information, openness and transparency, re-
dress and value for money). \textit{Batho Pele} also aims at constantly improving the quality of services
through the implementation of an eight-step process. Such steps, which could serve as an impor-
tant guide for municipalities that embark on performance improvement programmes, are: identifica-
tion of the customer; establishing customer needs and priorities; determining the current service
baseline; identifying the improvement gap; setting service standards; gearing up for delivery; an-
nouncing service standards and finally monitoring delivery against standards and publishing the
results. These principles should form the basis for any new local government performance man-
gerement system. The overall aim is to make municipalities efficient, customer-orientated, develop-
mentally creative institutions that enable citizens to obtain better service delivery. See LGIS no 2
“Performance Management” (1999) at 4-5.

\textsuperscript{57} See the Local Government: Municipal Systems Act ch 6. The aim of the new legal framework
is to: define goals and priorities; establish objectives, set indicators for performance, measure perform-
ance; review and adjust service delivery mechanism and finally to report on the progress made.

\textsuperscript{58} Refer to the White Paper on Local Government (1998) at 51-52.
• assess the overall state of local government
• monitor the effectiveness of development and delivery strategies of municipalities and ensure that scarce resources are utilised efficiently
• provide early warning signals
• allow for performance comparison between municipalities across the country
• identify successful approaches or best practices
• provide a national set of performance indicators.

The envisaged system is not aimed at imposing additional burdens on municipalities but rather at seeking a change in the way in which municipalities perform and fulfil their duties and responsibilities.

19.5.1 The new legislative requirements regarding municipal performance management

As was envisaged in the White Paper on Local Government, national legislation under the new local government dispensation specifically determines various aspects regarding municipal performance management. All municipalities are now legally obligated to establish and develop performance management systems (PMS) and to review such systems. The new legal requirements relevant to municipal performance management are briefly as follows:

• The establishment and development of performance management systems Each municipality established under the new local government dispensation must establish a performance management system that is commensurate with its resources, that is best suited to its circumstances and is in line with the priorities, objectives, indicators and targets contained in its integrated development plan. Municipalities must further promote a culture of performance management among their political structures, office bearers, councillors and municipal administrations. They must also ensure that their affairs are administered in an economical, effective, efficient and accountable manner.59 Specific responsibility has been placed on the executive committee or executive mayor, whichever is applicable, or a committee of councillors appointed by the municipal council in the absence of an executive committee or executive mayor,

59 See the Systems Act s 38(a)-(c).
(a) to manage the development of a municipality’s performance management system
(b) to assign certain responsibilities of the system to the municipal manager
(c) to submit the proposed system to the municipal council for adoption.\footnote{60}

All municipalities must further establish mechanisms to monitor and review their performance management system.\footnote{61}

- \textit{The core components and community involvement in municipal performance management systems} Every performance management system is required to include various core components. Accordingly, in terms of its performance management system and any other regulations and guidelines that may be prescribed, every municipality must incorporate and provide for the following: \footnote{62}
  
  (a) setting appropriate key performance indicators (KPIs) as a yardstick for measuring municipal performance, including outcomes and impact, with regard to the municipality’s development priorities and objectives set out in its IDP
  
  (b) setting measurable performance targets for each of the development priorities and objectives
  
  (c) monitoring performance and measuring and reviewing performance at least once a year against the development priorities and KPIs
  
  (d) taking steps to improve performance where targets have not been met
  
  (e) establishing a process of regular reporting to the council, political structures, office bearers, staff, the public and appropriate organs of state.\footnote{63}

It is further also obligatory for a municipality to involve the local community in the development, implementation and review of the municipality’s PMS and also to allow the community to participate in the setting of appropriate key performance indicators and performance targets.\footnote{64}

\footnote{60} Refer to the Systems Act s 39(a)-(c).
\footnote{61} The new legal framework does not provide guidelines on what mechanisms should be employed. It seems that if it is left to each municipal council to decide on what mechanisms to employ to monitor and review performance. See the Systems Act s 40.
\footnote{62} See the Systems Act s 41(1)(a)-(e).
\footnote{63} In this regard, appropriate organs of state should include provincial governments which are tasked to oversee and monitor municipal performance. Ss 41(2) requires the PMS applied by a municipality to be so devised that it could serve as an early warning indicator of under-performance.
\footnote{64} See the Systems Act s 42. This section entrenches for the first time real and constructive public participation in respect of municipal performance control and oversight. It is submitted that continued on next page
• **The setting of key performance indicators and the audit of performance measurements** Under the new legal framework for local government, after consultation with the MEC for local government and organised local government nationally, the minister for local government may prescribe by regulation general key performance indicators that are appropriate and that can be applied to local government generally. The minister may also review and adjust those KPIs when necessary.65

All municipalities are further required, in a manner determined by their council, to make known to the general public, both internally and externally, which KPI and performance targets are set by the municipality for purposes of its PMS. The results of such a PMS and performance measurements must be audited as part of the municipality’s internal auditing processes and also annually by the auditor-general.66

• **Requirements regarding reports on the PMS and the making of regulations and guidelines** Apart from the establishment of a municipal performance management system, each municipality must prepare for each financial year an annual report consisting of *inter alia* a performance report. Such a performance report should reflect:

  (a) the performance of the municipality and each external service provider during that financial year

  (b) a comparison of the performances with the targets set for them and also the performances in the previous financial year

  (c) measures taken to improve performance.67

It should be noted that an annual performance report must form part of a municipality’s annual report as is determined in chapter 12 of the Municipal Finance Management Act.68

Apart from the reporting responsibility on the municipal manager, the newly enacted legislative requirements also place a similar responsibility on the MEC and the minister concerned. In this regard, the MEC for local government in a province is obliged

---

65 See the Systems Act s 43(1)(a)-(b). General KPIs must be included in a municipal PMS where applicable. See s 43(2).

66 Refer to the Systems Act ss 44 and 45 respectively.

67 Read s 46(1)(a)-(c) of the Systems Act as substituted by Act 44 of 2003 s 6.

68 See s 46(2) of the Systems Act as amended.
annually to compile and submit to the provincial legislature and the national minister responsible for local government a consolidated report on the performance of municipalities in that province. The consolidated report must identify all municipalities that have underperformed during the year, as well as the proposed remedial action to be taken. The report must then be published in the *Provincial Gazette*. Finally, the minister responsible for local government must annually compile and submit to parliament and the nine MECs for local government in the provinces a consolidated report of local government performance in general, in terms of general key performance indicators. Such a report must be published in the *National Gazette*.70

In confirmation of the fact that the new legislative requirements are not a complete legal system and in order to cater for the effectiveness of the system, the national minister is permitted to make regulations or to issue guidelines to provide or regulate certain issues. These are:71

- incentives to ensure municipalities establish PMSs within a prescribed period and comply to the Act
- the setting of KPIs by a municipality with regard to its development objectives
- the identification of appropriate general KPIs that can be applied to municipalities generally
- the regular review by a municipality of its KPIs
- the setting of a framework for performance targets by municipalities consistent with their development priorities, objectives and strategies set out in their IDPs
- mechanisms, systems and processes for the monitoring and measurement of performance by a municipality with regard to its development objectives
- the internal auditing of performance measurements
- the assessment of those performance measurements by a municipality;
- the assessment of progress by a municipality with the implementation of its IDP
- the improvement of performance
- any other matter that may facilitate the implementation by municipalities of an effective and efficient PMS or the application of chapter 6 of the Systems Act.

---

69 See the Systems Act s 47(1)-(2). The MEC is also tasked to submit a copy of the report to the NCoP s 47(3) of the Act.
70 See the Systems Act s 48.
71 See the Systems Act s 49(1)(a)-(k).
It is clear that the legislator’s intention was to give the minister a wide authority to make regulations or to issue guidelines. When the minister makes regulations or issues guidelines he/she must take the capacity of municipalities into account and he/she must differentiate between different kinds of municipality.\textsuperscript{72}

19.5.2 Creating and maintaining an effective system of municipal performance management

With reference to the abovementioned legislative requirements in relation to municipal performance management, two key elements seem to be significant. At first, each municipality will have to identify and prioritise those areas where performance improvement is most required. Such areas will include both external developmental priorities and internal transformation necessities. National government should assist municipalities by identifying common performance areas that are applicable to all municipalities, such as access to basic services such as water, sanitation, electricity and housing. Through national minimum standards, municipalities will be guided when defining their own goals within their unique circumstances and will consolidate existing fragmented approaches to services. The second key element is performance assessment. An objective performance assessment is crucial for the creation and maintenance of an economic, efficient and effective local government performance management system.\textsuperscript{73}

Apart from the two key elements of an effective and efficient PMS, all performance management systems should contain six core elements. Each element is important to make the system work, and are discussed briefly as follows:

- \textit{Performance measurement} Performance measurement requires a relatively objective framework for assessing performance. Measurement is achieved by setting

\textsuperscript{72} Refer to the Systems Acts 49(2)-(4). The minister is also permitted to phase in some or all of the applications of the provisions of the chapter on performance management, which provisions place a financial or administrative burden on municipalities.

\textsuperscript{73} To illustrate the functioning of such an objective performance assessment system, imagine the following example: Two municipalities, A and B, with similar budgets, responsibilities and staff both decide to undertake similar-sized housing development projects. How would their respective performance with reference to the project be assessed? It is submitted that the first step would be to assess the economic factors of the project. Such measures look at the cost of resources. If one municipality spent more on materials, such a position would be one indication of performance. Cost measures alone can be misleading, as poorer quality material are cheaper. Quality is thus also important. The second phase of assessment should evaluate quantity and quality in relation to resources used. Finally the effectiveness should be evaluated. It is important to assess what effective contribution to the overall developmental objectives of a municipality has been achieved through the project. See also LGIS no 2 “Performance Management” (1999) at 11.
performance indicators and linking them to performance targets. Performance indicators indicate how performance will be measured; that is, the number of households to receive water connections. Performance targets again refer to the result to be achieved within a given timeframe (eg 5000 connections by yearend 2005). Performance indicators can be determined only once a municipality has identified the key objectives for development in its area and with the municipality’s overall developmental goals and priorities in mind. Many municipalities have set various performance indicators through their development-planning processes. A distinction should be made between general performance indicators and local performance indicators. General performance indicators refer to such indicators that are applicable to all municipalities, while local indicators reflect particular local developmental priorities and objectives. Any KPI should ensure that the right area of performance is measured and that the quality of performance is also assessed. Part of any process of performance measurement involves the establishment of targets for each performance indicator. Performance is then measured within a given timeframe, according to whether targets for each indicator have been achieved. The setting of performance targets can be a somewhat complicated exercise and should ultimately result in realistic and achievable objectives. In determining proper targets it is suggested that certain guidelines be used and that a checklist be developed when targets are set for particular indicators.74

- **Performance monitoring and evaluation** The monitoring and assessment of the performance of municipalities is a crucial aspect of any successful PMS. Monitoring and evaluation are processes aimed at assessing the performance of municipalities and the people that work for them. It is important to note that the assessment of people refers not only to municipal staff members but also to external contractors that do work or provide services on behalf of a municipality. Generally speaking, performance monitoring is an ongoing process to determine whether targets are being met and whether development objectives are being

---

74 According to LGIS no 2 “Performance Management” (1999) at 14 the following guidelines and checklist questions should be useful in determining performance targets: Guidelines are preciseness and measurability, relevance to user, being demanding but realistic, approved by politicians and providing communication to the public. Checklist questions could include the number of each service provided, how many new services were provided in a year, what trends are impacting on the service, what customers expect, the municipality’s realistic capacity and what other similar municipalities are achieving.
achieved. Performance management must be conducted very carefully, and information should not be manipulated to produce results that appear better than they really are. Uncompromising integrity of performance management is therefore essential. In contrast with the monitoring process, performance evaluation is a deeper and more detailed process of performance analysis. Such an evaluation process looks not only at whether a municipality is performing adequately but also at the areas of underperformance. All municipalities should make special arrangements to evaluate performance regularly. A further key element of the monitoring and evaluation process is so-called “performance auditing”. This process involves verifying that the measurement mechanisms and results are accurate and that proper procedures have been followed to evaluate and improve performance. The checks built into the new legislative framework should ensure objective verification of performance results and should ultimately enhance municipal service provision and compliance with the new constitutional demands.75

- **Performance reporting** Under the new legal framework, all municipalities are obliged to submit annual performance reports to the public and higher spheres of government. It is submitted that the reporting requirement should significantly enhance public participation and municipal accountability and should therefore be strictly enforced.

- **Capacity building** Without the necessary capacity, municipalities will not be able to perform and fulfil their duties and responsibilities. Municipal capacity building must therefore be a core element of a broader performance management strategy. Capacity building is a process of developing the ability for improved performance within municipalities and will be discussed in more detail elsewhere in this chapter.

- **Intervention** It was mentioned earlier that the Constitution allows and demands intervention into the affairs of local government when necessary. Especially the provinces are tasked with oversight and intervention powers into the affairs of municipalities when cases of non-performance are reported. Such interventions should be based on accurate diagnostic results, however, and should be undertaken on an objective basis. When intervention is allowed on subjective grounds

---

75 See LGIS no 2 “Performance Management” (1999) at 16-17. A further check on performance monitoring and evaluation is public participation. Public involvement and pressure for improved per-
or without proper justification, the new constitutionally entrenched status of local
government as an independent sphere of government would be unnecessarily
jeopardised. In this regard it should be emphasised that the ultimate aim of inter-
vention is not to create a hierarchy of one sphere of government over another but
to ensure that citizens receive the essential services that are promised under the
new constitutional scheme.
• **Performance incentives** Ultimately the performance of any particular municipality
and its staff depends on certain incentives within the PMS. Good performance
should be rewarded whilst poor performance should be penalised. Various means
of incentive are possible, such as fiscal and political motivators, rewards, competi-
tions and individual motivational schemes.

19.5.3 **Implementing performance management**
The implementation and maintenance of an effective PMS is in essence founded on
the new constitutional foundation. All spheres of government are constitutionally
obliged to fulfil their duties and responsibilities according to the constitutional pre-
scriptions and to ensure a general system of democratic government that is ac-
countable, responsive and open. Local governments are further tasked with specific
developmental duties and the achievement of specified municipal objectives.\(^76\) In
order to determine whether such objects and duties are being met, a proper system
of accountability and performance management is necessitated. Under the provi-
sions of the Systems Act, a new legal framework for national performance manage-
ment has been enacted. In essence, the new system will function as follows:
• **Step 1:** All municipalities must identify the areas that require performance
measuring and improvement. This will be an integral part of the IDP pro-
cess and the setting of development objectives.
• **Step 2:** Once the areas have been identified, a municipality will monitor and
measure its performance by developing indicators and targets for each of
the development priorities.
• **Step 3:** A municipality will then have to evaluate its performance and take
steps to improve performance when targets are not being met.

\(^76\) See the Constitution ss 1, 152 and 153.
• **Step 4:** In addition to those areas identified by a municipality, some areas fundamental to the overall reconstruction and development of South Africa will be identified by national government, through consultation with key stakeholders such as SALGA and provincial governments.

• **Step 5:** Each municipality will be expected to report on these areas through the prescribed national indicators and targets.

• **Step 6:** A municipality will be able to exceed the targets set by national government, but it will not be able to perform below those targets.

To illustrate the practical application of the new PMS, the example is given of a municipality where 50% of the residents do not have access to clean drinking water. Water is arguably the single most essential municipal service, as it is needed for drinking, cooking, washing and cleaning. Without water, communities suffer severe discomfort and disease. As a first step, the particular municipality will identify water provision as an area that requires performance measuring and improvement. Water provision to all residents will be set as a priority with a correlating objective of giving all residents access to at least a certain number of litres of drinkable water per day. The objective will then translate into development strategies which could include major investment programmes in water schemes. Strategies could also include cross-subsidising between consumers if necessary.

As a second step, and once the area of performance have been identified, then a municipality will have to monitor and measure its performance. This is achieved through the development of KPIs and targets for each of the identified priorities. The following KPIs and targets could be relevant to the example mentioned above:

**KPIs:**
- the percentage of households that do not have access to water (measure growth)
- the bacterial count in water (measure quality of water)
- average time spent by community members (measure impact of scheme on community to bring water to their houses)
- percentage of residents paying for services (measure sustainability and financial impact).

**Targets:**
- to reduce households without water from 50% - 30% in two years
- to ensure quality of water is up to standard
- to reduce travel time for community to fetch water
• to ensure measures are taken to service payment collections better.

Under the third step, the municipality will have to evaluate its performance and will have to take steps to improve performance when targets are not met. Measurement mechanisms can include:
• keeping data of households with water
• testing water quality regularly
• surveying residents’ activities and the implementation of a proper billing and credit control system.

Finally, the municipality must report on its performance management in each area as is required by law.

Although the many benefits of a proper PMS are very clear, the implementation of such a system does present various challenges. Challenges that are most common are limited financial resources, inadequate administrative capacity, poor public participation and a slow ability to adapt to the new legal order. In order for effective and efficient performance management to occur, it is suggested that all municipalities will have to commit themselves to this end and dedicate their energy to overcoming the different challenges and finding new ways to fulfil their duties and obligations. Other spheres of government must assist municipalities in this endeavour, but ultimately the responsibility lies with municipalities all over the country to start focusing on the new outcomes of municipal services and programmes.77

19.6 Aspects regarding municipal capacity building

19.6.1 Introduction

It is a general phenomenon all over the world that local governments are pushing for autonomy and decentralised decision making. More autonomy and decentralised powers often leave municipalities with many new performance demands, however. The position in South Africa under the new local government legislative framework is no different. The new local government dispensation has created strict legal demands on municipalities to comply and fulfil certain duties and responsibilities. Without a sufficient capacity, municipalities will not be able to fulfil such duties and

77 In order to enhance the new legislative requirements dealing with performance management the LG: Municipal Planning and Performance Management Regulations were promulgated. See GNR 796 in GG 22605 of 24 August 2001. The regulations provide for inter alia the nature of a performance management system, the adoption of a PMS, the setting of key performance indicators, general key performance indicators, the setting of performance targets an the monitoring review an internal auditing of performance measurements.
responsibilities, however. It is of paramount importance therefore that municipalities themselves, as well as the two higher spheres of government, ensure that municipal capacity is adequate to ensure compliance with their new constitutional and other legislative obligations. Municipal capacity building is thus regarded as one of the more important tools available to municipalities to ensure service delivery and the overall fulfilment of their duties and responsibilities. Capacity building should therefore form one of the strategic programmes that municipalities must put in place.

During the former local government dispensation, capacity building was often racially determined and did not support democratic municipal development. Under the new system municipalities have been afforded distinctive autonomy and powers and are supported to handle their own affairs in accordance with their own priorities. Capacity building should be a very important objective for all municipalities, as it will ensure various advantages. The following advantages will be secured through a solid municipal capacity:

- services are delivered as is legally required
- more powers can be delegated down to a municipal level
- better investment opportunities can be created.

Capacity building is therefore very important and should be done on the political, financial management and administrative levels. It speaks for itself that capacity building cannot be done without proper training. With the restructuring of local government, the overall local government capacity building scheme had to be revisited and changed. It was especially envisaged that the new system should ensure the following results:

- to respond to municipal needs
- to be acceptable and aimed at all people
- to offer capacity building that qualifies officials and frontline workers for promotion and further development

78 Under the former system two training bodies made up local government training. There was the Local Government Training Board (LGTB), established under the Local Government Training Act, and the Apprenticeship Training Board for Local Authorities (ATBLA), established under the Manpower Act. The two structures operated separately and addressed different fields in the training sector. Coordination was poor, and the absence of a common national vision on capacity building led to a lack of objectives, fragmentation of training programmes and poor staff development results. The two bodies later merged into the Local Government Education and Training Board (LGETB).

79 See LGIS no 2 “Capacity building” (1999) at 5.
• to address the capacity building needs of rural municipalities
• to ensure the involvement of all role players to find solutions for municipal challenges.

19.6.2 Establishing a new local government training system

In the White Paper on Local Government, a vision and framework was provided within which local government capacity building was to be developed. The previous system had to be changed to become a more flexible, decentralised and demand-driven system with continuous improvement of municipal staff members and political office bearers.\textsuperscript{80} In response to the new changes and challenges of the new system, a new set of skills and competences had to be created to ensure an overall developmental local government. Various initiatives have thus been piloted in a variety of newly created capacity building programmes and schemes.\textsuperscript{81}

In follow-up on the vision in the White Paper on Local Government, various laws have been passed or amended to give more meaning and substance to the new local government capacity-building system. See, for example, the Skills Development Act,\textsuperscript{82} which Act requires a Sector Education Training Authority (SETA) to be established in every sector of the South African workforce in order to develop skills.

This LGSETA will be made up of representatives of both organised labour such as SAMWU and IMATU and organised employer’s organisations, which are represented under SALGA. Specific functions have been envisaged for the new LGSETA to fulfil. Such functions include:\textsuperscript{83}

• Preparing a Local Government Skills Plan.
• Implementing the Local Government Skills Plan by
  (a) establishing learnerships
  (b) approving workplace skills plans
  (c) allocating grants to employers, education and training providers and workers

\textsuperscript{80} See the White Paper on Local Government (1998) at 115.
\textsuperscript{81} Examples of some of the new competencies and capacity-building programmes are: council-
lors’ code of conduct, falling under SALGA training; performance management, falling under the department of Constitutional Development; integrated development planning, falling under the department of Constitutional Development; local economic development, falling under the department of Constitutional Development and NGO’s financial management; voter education, falling under the IEC and senior management development, falling under university-based training programmes. See LGIS no 2 “Capacity building” (1999) at 7.
\textsuperscript{82} 97 of 1998.
\textsuperscript{83} See LGIS no 2 “Capacity building” (1999) at 9.
(d) monitoring local government education and training in the sector.

- Promoting learnerships by
  (a) identifying work places for practical work experience
  (b) supporting the development of learning materials
  (c) improving the facilitation of learning
  (d) assisting in the conclusion of learnership agreements.

- Registration of learnership agreements.

- Applying to SAQA for accreditation as an Education and Training Quality Authority (ETQA).

- Collecting Skills Development Levies and disbursing these to municipalities.

- Reporting on income and expenditure and the implementation of its sector skills plan to the Director-General of Labour.

- Appointing staff for the performance of its functions.

The Skills Development Act also introduces a new learnership approach to skills development. This approach requires a combination of institutional learning and workplace learning/experience. Skills development, which will require substantial financial resources, is financed largely through the Skills Development Levies Act.\(^{84}\)

The levies are not sufficient to meet the existing training needs, and it is clear that other funding sources such as private donors, business or even other spheres of government should be explored.

It was mentioned above that it is not only municipal staff members that are in need of new training, but also political office bearers. The new constitutional and other legislative requirements have placed important responsibilities on political representatives. In this regard SALGA has developed a so-called “councillor-training programme” for all councillors. In order to ensure quality in the new training programmes, the South African Qualifications Authority Act,\(^{85}\) has established the South African Qualifications Authority (SAQA), which must oversee the implementation of a national qualifications framework (NQF). The NQF is seen as a new way of "grading" learning achievements by using eight NQF levels.\(^{86}\) The new NQF ap-

\(^{84}\) 9 of 1999.

\(^{85}\) 58 of 1995.

\(^{86}\) The lowest NQF level is level 1, which is the equivalent of grades 7-9 of the traditional high school education grading system. Level 4 corresponds to grade 12. In future, most officials will be trained against the eight NQF levels.
proach towards learning is different from the past, as it is based on learning outcomes, which are measured by the ability of a learner after training to convert his/her learning into work performance. SAQA and the NQF also promote a system for the recognition of prior learning and so-called “life-long learning”. These initiatives should allow people gradually to qualify themselves and to help to develop the careers of staff members and ensure that local government becomes an attractive place of work.

19.6.3 **Mechanisms to enhance municipal capacity building**

In light of the new legal requirements, it is obvious that all local governments will have to establish various training and development programmes. Such programmes and initiatives will necessarily be different for each of the different categories and types of municipality because of their diverse circumstances and responsibilities. In many instances, the new local government dispensation is characterised by various performance gaps, some of which can be filled only through the training of councillors, officials and other frontline workers. What municipalities need is a good training programme. In order to establish such a training programme municipalities need to determine which of the problems they encounter can be solved through building the capacity of staff and which cannot. In instances where internal capacity building cannot solve the problems, alternative approaches exist such as outsourcing or the conclusion of partnerships with other private or public institutions. It is also very important for municipalities to prioritise their capacity-building strategy as part of their integrated development plan. In this regard it is suggested that every IDP should incorporate a skills-development plan as a key component, which should facilitate capacity-building solutions within the municipality.\(^{87}\) Under the new constitutional dispensation, all provinces are obliged to build the capacity of local governments. Various interactions and cooperation strategies must still be developed between municipalities and their respective provincial governments in order to fulfil the constitutional vision and obligations.

19.7 **Conclusion**

In conclusion, it is submitted that the principles of public administration, performance management and municipal capacity building are currently in need of major trans

\(^{87}\) See LGIS no 2 “Capacity building” (1999) at 16.
formation. According to the new legal framework, an entirely new approach towards capacity building, performance management and public participation has been mandated. All municipalities will have to take and implement new initiatives to ensure compliance with the newly established legislative requirements. All in all one can conclude that the new vision for local government is to create an essentially customer-orientated public service. The codes of conduct for both councillors and staff members set out basic requirements for accountability and control. It is further submitted that the new legal framework indeed lays a sound foundation for a more people-orientated local government system, which should be able to meet the demands of all South African people and should ensure a better and brighter future for all.
20

Municipal development planning

20.1 Introduction

According to the new legal framework for local governments, a significant measure of responsibility relating to municipal planning has been decentralised to local government structures. Although municipal planning is incorporated as a functional area of concurrent national and provincial legislative competence,¹ all municipalities are constitutionally obligated to structure and manage their administrations and budgeting and planning process in such a way as to give priority to the basic needs of their communities. All municipalities must also promote the social and economic development of their communities.² The new constitutional dispensation furthermore determines that one of the objects of local government in general is to promote social and economic development and to promote a safe and healthy environment.³ Because of this new constitutional mandate, the new local government system is often referred to as a developmentally orientated local government system. It is obvious from the abovementioned requirements that local government planning processes must be structured and organised so as to achieve the objects of the new local government dispensation and also to give priority to the basic needs of their respective communities. If local governments are to achieve such a developmental system, they are to be thoroughly supported by the two higher spheres of government. Both national and provincial laws are therefore needed to ensure municipalities fulfil their developmental duties. Whereas provincial laws will often differ in content and approach, national legislation should provide an overarching set of regulatory provisions so as to enable municipalities to create a basic planning framework. In compliance with its responsibility in this regard, parliament has enacted the Local

¹ See the Constitution Part B Sch 4.
² Refer to the Constitution s 153(a).
³ See the Constitution s 152(c)-(d).
Government Municipal Systems Act. The provisions of the Act relating to planning and environmental issues will be discussed below.

20.2 **National principles concerning local government developmental planning**

20.2.1 **General requirements relating to municipal development planning**

According to the Local Government: Municipal Systems Act, local government planning is to be developmentally orientated. In order to achieve this objective, all municipalities must undertake developmentally orientated planning so as to ensure three purposes:

- that municipalities strive to achieve the objects of local government set out in the Constitution
- that municipalities give effect to their developmental duties set out in the Constitution and
- that municipalities with other organs of state contribute to the progressive realisation of the (socio-economic) fundamental rights contained in the Constitution.

In order to achieve and undertake planning processes that are developmentally oriented, the Systems Act determines that its provisions in this regard must also be read in conjunction with chapter I of the Development Facilitation Act.

A second important feature of the new local government planning framework is that the planning processes undertaken by a municipality must be aligned with and must complement the development plans and strategies of other affected municipalities and other organs of state. The purpose of such alignment and complementation of different development plans and strategies is aimed at giving effect to the principles of co-operative government as is contained in the Constitution.

Apart from the requirements of co-operation in municipal planning processes, municipalities are also obligated to participate in national and provincial developmental programmes. Such participation is directly required by the Constitution and is also a

---

4 32 of 2000 as amended. The Act aims *inter alia* to establish a simple and enabling framework for the core processes of planning, which process *should* underpin the notion of developmental local government. Refer also to the long title of the Act.

5 See the Systems Act s 23(1)(a)-(c).

6 Refer to the Constitution ch 2s 24, 25, 26, 27 and 29.

7 See the Systems Act s 23(2) as well as the Development Facilitation Act 67 of 1995.

8 Refer to the Systems Act s 24(1) read together with the Constitution ss 40 and 41. According to s 41, all three spheres of government and all organs of state within each sphere must adhere to the principles of co-operative government as are set out in the Constitution. The main objective of co-operative government is to ensure co-operation and co-ordination between the various role players.
national consequence of the fact that both national and provincial governments have concurrent legislative competence over municipal planning activities.\(^9\) The new legal framework also determines that if municipalities are required to comply with planning requirements in terms of national or provincial legislation, then the responsible organ of state must

- align the implementation of that legislation with the provisions of chapter 5 of the Systems Act and
- consult with the affected municipality in such implementation and take reasonable steps to assist the municipality in meeting the legal requirements relevant to its IDP.\(^10\)

Before either national or provincial legislation affecting municipal planning issues is introduced in parliament or a provincial legislator, the organ initiating the legislation must consult with OLG. Similar consultation is required in respect of subordinate legislation before such legislation is enacted.\(^11\) Again the underlining principle of co-operation and co-ordination as part of a system of co-operative government is emphasised.

The new legal framework directed at municipal planning also requires specific requirements regulating the adoption of IDPs. According to the Systems Act, each municipal council must adopt a single, inclusive and strategic plan for the development of the municipality within a prescribed period after the start of its elected term. Such plan should have the following aims:\(^12\)

- to link, integrate and co-ordinate plans and to take into account proposals for the development of the municipality;
- to align the resources and capacity of the municipality with the implementation of the plan;
- to form the policy framework and general basis on which annual budgets must be based;
- to comply with other provisions of the Systems Act;
- to ensure compatibility with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

---

\(^9\) Refer to the Constitution s 153(b), which specifically requires this participation.

\(^10\) See the Systems Act s 24(3)(a)-(b).

\(^11\) See the Systems Act s 24(4).

\(^12\) See the Systems Act s 25(1)(a)-(e).
An IDP adopted by a municipal council as mentioned above may be amended, but it remains in force until a new IDP is adopted by the next elected council. A newly elected municipal council may adopt the IDP of its predecessor, but must comply with certain requirements. Finally, it is required for all municipalities to give notice to the public of such adoption within 14 days of the adoption of its IDP and also to make copies or extracts from the plan available for public inspection. A summary of the plan must also be published.

20.2.2 The contents and core components of Integrated Development Plans

The new national regulatory legislation furthermore sets specific core components that IDP must incorporate. According to the Systems Act, an IDP must reflect the following:

(a) the municipal council’s vision for the long term development of the municipality with special emphasis on the municipality’s most critical development and internal transformation needs;

(b) an assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;

(c) the council’s development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;

(d) the council’s development strategies which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;

(e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;

(f) the council’s operational strategies;

(g) applicable disaster management plans;

(h) a financial plan, which must include a budget projection for at least the next three years; and

(i) the key performance indicators and performance targets determined in terms of section 41.

---

13 See the Systems Act ss 34 and 25(2).
14 Read the Systems Act ss 25(3)(a) and 29(1)(b)(i), (c) and (d) in conjunction with one another.
15 See the Systems Act s 25(4)(a)-(b).
16 See the Systems Act s 26(a)-(i).
It is quite clear that the IDP has a central and very important function within the new local government system. The IDP serves basically as a guiding document for the short term developmental needs and initiatives of every municipal government in South Africa. For this reason, special provision regarding the status of an IDP has been made and will be discussed later.17

20.2.3 Requirements regarding the process for planning, drafting, adopting and reviewing Integrated Development Plans

The Systems Act also determines specific procedures regarding the framework for integrated development planning, for adoption and review procedures of IDP(s) and for the role players involved during the various processes.

In order to establish a framework for integrated development planning, each district municipality must adopt a framework for integrated development planning in its area as a whole. The adoption of this framework is to be effected within a prescribed period after the start of the elected term of the council and also after a consultative process with the other local municipalities in the area has been followed. After adoption, the IDP framework binds both the district municipality and local municipalities in the relevant area jurisdiction of the particular district.18 At the very least, the framework must

• identify the plans and planning requirements binding in terms of national or provincial legislation on the district municipality, the local municipalities or even any specific municipality on its own within the area
• identify the matters to be included in the IDPs of the district and local municipalities that require alignment
• specify the principles to be applied and co-ordinate the approach to be adopted in respect of the alignment of IDP matters
• determine procedures for consultation between the district and local municipalities during the process of drafting their respective IDPs and also the procedures to be implemented in order to effect essential amendments to the framework.19

17 See the Systems Act s 35. Refer also to item 2 of the local government: Municipal planning and performance management regulations as published under GNR 796 in GG 22605 of 24 August 2001. Item 2 deals with the details of an IDP.
18 See the Systems Act s 27(1)-(2).
19 Refer to the Systems Act s 27(2)(a)-(d). It should be noted that these provisions are applicable only between a district municipality and its various local municipalities. In a metropolitan area,
Through their municipal councils and within a prescribed period after the start of their elected term, all municipalities are obliged to adopt a process set out in writing to guide the planning, drafting, adoption and review of their IDPs, however.\textsuperscript{20} Through the various mechanisms of public participation, a municipality must consult with its local community before adopting the process mentioned above and must give notice to the local community regarding the particulars of the process it intends to follow.\textsuperscript{21}

With reference to the process to be followed by a municipality to draft its IDP, the municipality must ensure the following requirements:\textsuperscript{22}

- that the process is in accordance with a predetermined programme which must specify timeframes for different steps
- that mechanisms of public participation allow for
  (a) the local community to be consulted on its development needs and priorities
  (b) local community participation in the drafting of the IDP
  (c) organs of state, traditional authorities and other role players to be identified and consulted on the drafting of the IDP
- that the identification of all plans and planning requirements that are binding on the municipality in terms of national and provincial legislation are provide for
- that the IDP is consistent with any other matters that may be prescribed by regulation.

In areas outside metropolitan areas, all district municipalities must plan integrated development for the area as a whole but in close consultation with the local municipalities and must draft its IDP after having taken into account the integrated development processes of and proposals submitted to it by the local municipalities in its area. Simultaneously, all local municipalities must align their IDPs with the framework adopted by the district municipality and must draft their IDPs, after taking into account the IDP process and proposals from the district municipality.\textsuperscript{23}

\textsuperscript{20} The new requirements make it clear that each and every local government is legally required to draft and adopt an IDP for its area. See the Systems Act s 28(1).

\textsuperscript{21} See the Systems Act s 28(2)-(3).

\textsuperscript{22} See the Systems Act s 29(1)(a)-(d).

\textsuperscript{23} See the Systems Act s 29(2)-(3). It is clear that in the new legal system a district council’s responsibility for a district IDP is a statutory requirement. All district councils must formulate district wide IDPs, which must include a framework for the IDPs of local councils in their areas of jurisdiction.
The management of the IDP drafting processes falls under the responsibility of the executive committee or executive mayor of a municipality or under a committee of councillors appointed by the municipal council if it is a municipality without an executive committee or an executive mayor. The responsible committee or person must manage the drafting of the IDP, must assign responsibilities to the municipal manager in the IDP process and must submit the draft plan to the municipal council for adoption by the council. Further monitoring and support to the process of integrated development planning is provided for in that the MEC for local government in the province may:

- monitor the process followed by a municipality
- assist a municipality with the planning, drafting, adoption and review of its IDP
- facilitate co-ordination and alignment of the IDPs of different municipalities and the strategies and programmes of national and provincial organs of state.

The MEC may take any appropriate steps to resolve disputes or differences in connection with the IDP processes between a municipality and its local community or between municipalities.

After an IDP has been adopted or amended, the municipal manager of a municipality must submit a copy of the IDP to the MEC for local government in the province within ten (10) days after such adoption/amendment. The copy of the IDP must further be accompanied by a summary of the pre-adoption process, a statement that the process has been complied with, together with explanations where necessary, and finally in the case of a district and local municipality, a copy of the framework adopted for integrated development planning between the municipalities. The MEC may within 30 days of receiving a copy of an IDP or amendment thereto, or within such reasonable longer period as may be approved by the minister of local government, request the relevant municipal council to adjust the plan or the amendment, in

District IDPs should thus determine a strategy for promoting economic development in the entire district and ensure upliftment of all communities. Such IDPs should guide revenue-raising and service-delivery activities and promote interaction between citizens, councillors, officials and higher spheres of government. It is important that District and Local IDPs be drawn up parallel to each other and inform and reinforce one another. District councils are thus responsible for aligning and co-ordinating potentially contradictory municipal IDPs. District IDPs are an important tool for integrating service-delivery activities and municipal goals.

---

24 See s 30(a)-(c) of the Systems Act.
25 See s 31(a)-(d) of the Systems Act. The monitoring and provincial supervision is subject to any other law(s) enacted to regulate such supervision in local government spheres, however.
26 Refer to the Systems Act s 32(1)(a)-(b)(i)-(iii).
accordance with the MEC’s proposals, if the plan/amendment does not comply with a requirement of the Systems Act or is in conflict or not aligned with the development plans and strategies of other affected municipalities or organs of state. The MEC may then request a municipal council to comply with the provisions of the Systems Act.²⁷ A municipal council must consider the MEC’s proposals and, within 30 days of receipt of such proposals, adjust its IDP accordingly, if it agrees with the proposals. If a municipality disagrees with the proposals, it must object thereto and must furnish the MEC with written reasons for disagreeing. On receipt of such an objection, the MEC may refer the objection to an ad hoc committee for a decision. If the MEC decides to refer the objection, it must be referred within 21 days of receipt of the objection.²⁸

The ad hoc committee mentioned above must be appointed by the MEC, whenever necessary. The committee must consist of members representing local government, the provincial government and national government. The MEC appoints the members of an ad hoc committee with the concurrence of the municipality concerned, the provincial organ or organs involved and with the concurrence of the national organ or organs of state involved in the dispute or in whose functional area the disputed is located.²⁹ The procedure of the ad hoc committee must be dealt with in accordance with procedures prescribed by regulation.³⁰ A matter before an ad hoc committee is decided if at least two spheres of government agree on the matter. If the committee rejects the objection(s) of the municipality, the municipality must comply with the initial request by the MEC within 30 days of the decision and after having been informed of the decision.³¹

All municipalities are also obligated to review their IDPs annually in accordance with an assessment of their performance measurements under section 41 of the Systems Act and also to the extent that changing circumstances so demand. The amendment procedure should be in accordance with a prescribed process.³²

²⁷ See the Systems Act s 32(2)(a)-(b).
²⁸ It seems clear from the Act that the MEC has a discretion either to refer such a dispute to an ad hoc committee or not to. Should he decide not to refer it, it seems that his decision would be final. See the Systems Act s 32(3)-(4).
²⁹ See s 33(2)(a)-(c) for more details.
³⁰ See the Systems Act ss 33(3) and 37.
³¹ See the Systems Act s 33(4)-(5).
³² Refer to the Systems Act s 34(a)-(b).
20.2.4 Miscellaneous aspects concerning municipal integrated development planning

The new legislative framework also affords specific status to a particular IDP. The Systems Act determines that an IDP adopted by a municipal council has the following importance:

• It serves as the principal strategic planning instrument which guides and informs all planning and development and decisions relating thereto in a municipal area.
• It binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality’s IDP and national or provincial legislation, in which case such legislation is to prevail.
• It binds all other persons to the extent that those parts of the IDP that impose duties or affect the rights of those persons have been passed as a by-law.33 It should be noted that a spatial development framework contained in an IDP prevails over a plan as is defined in section 1 of the Physical Planning Act of 1991.34

Finally, the Systems Act determines that all municipalities must give effect to their IDPs and conduct their affairs in a manner which is consistent with their IDPs. The national minister is further authorised, for the purposes of municipal integrated development planning, to make regulations or to issue guidelines in terms of section 120 of the Act and to provide or to regulate certain matters. Such matters are the following:35

(a) incentives to ensure that municipalities adopt their integrated development plans within the applicable prescribed period, and comply with the provisions of the Act concerning the planning, drafting, adoption and review of those plans;
(b) the detail of integrated development plans taking into account the requirements of other applicable national legislation;
(c) criteria municipalities must take into account when planning, drafting, adopting or reviewing their integrated development plans;

33 See the Systems Act s 35(a)-(c). Although an IDP has been given statutory recognition and status, if certain parts of an IDP impose duties or affect the rights of other persons, such as the local community, eg, then such aspects should have been incorporated in a by-law and should have been passed as such to have binding force over such persons. See s 35(1)(c).
34 125 of 1991 and the Systems Act s 35(2).
35 See the Systems Act s 37(1)(a)-(i).
(d) the detail of the process for the planning, drafting, adoption and review of integrated development plans;
(e) a process for the amendment of integrated development plans;
(f) the manner in which an objection must be referred to an ad hoc committee envisaged in section 33;
(g) the manner in which written evidence or documents must be submitted to an ad hoc committee;
(h) the proceedings of an ad hoc committee; and
(i) any other matter that may facilitate –
   (i) integrated development planning and the drafting of integrated development plans; or
   (ii) the application of this chapter.

When the minister makes regulations or issues guidelines to regulate matters under subsection 37(1)(b)-(e), he/she must take into account the capacity of municipalities to comply with those matters and must differentiate between different kinds of municipality according to their respective capacities. Furthermore, the minister is authorised to phase in the application of the provisions of the chapter on integrated development planning where such provisions place a financial or administrative burden on such municipalities.  

20.3 Conclusion

It was demonstrated above that municipal development planning is not only a legal obligation for all municipalities but that without such planning municipalities will not be in a position to fulfil their obligations and responsibilities. The new local government dispensation is developmentally orientated, which in essence requires progress in the realisation of developmental goals. Municipalities must therefore move forward and should enhance and create a better living environment for all South African citizens. Development planning is not something that can be done in isolation by individual municipalities. It requires constructive involvement of all three spheres of government on a vertical axis and also all relevant municipalities inter se, on a horizontal axis. The constitutional obligations and principles of co-operative govern-

---

36 See the Systems Act s 37(3)-(4). Refer again to the LG: Municipal Planning and Performance Management Regulations as published under GNR 796 of GG 22605 of 24 August 2001. Apart from the details of an IDP, the regulations also address the process for amending IDPs, referring of objections to IDPs to an ad hoc committee, as well as requirements giving effect to an IDP.
ment are therefore of significant importance in relation to developmental strategies and interaction between the various organs of state. Such co-operation will benefit not only municipalities but also both national and provincial policies and programmes.

Municipal development planning is incorporated mainly in a Municipal Integrated Development Plan (MIDP), which serves as a single, inclusive and strategic plan for the development of the municipal area. All MIDP must incorporate certain minimum core components as they guide the short-term development of local governments in South Africa. Because of its importance, an MIDP is strongly protected, and strict requirements for its adoption and amendment are determined by law. Such plans are flexible, living documents, however, and should be reviewed annually to keep up with the changing demands and circumstances in municipal jurisdictions. All in all, the new requirements and status of MIDP should go a long way towards helping the new local government structures to manage and achieve their important constitutional obligations.
21

Basic legal matters relevant to local government structures

21.1 Introduction
In light of the various aims and responsibilities of local governments, it is generally accepted that such governments are confronted with almost all aspects of the law. It was explained in chapter 10 that municipalities have been established throughout the whole territory of South Africa, and therefore there is no area that does not fall under the direct authority of a particular municipal council. The importance of legal knowledge regarding not only the composition and functioning of municipalities, but also other fields of law is of significant importance. No legal practitioner can practise law in a particular area in our country without a sound knowledge of the legal rules that are applicable to local governments. Every now and then a practitioner will be confronted with legal disputes that concern the particular local authority either directly or indirectly. In many areas, the local municipality is often the largest employer organisation and also the largest economically active entity. In short, one can say that a legal adviser for a local government or a practitioner advising clients on local government matters should have a sound legal knowledge of almost all the different fields of the South African law.

In order to be able to handle and address legal problems, it is important to know the law and where to find the law. As the law is constantly changing and developing, it is obvious that all role players in local government should be able to access and then apply the relevant legal rules that encompass the new local government dispensation. All role players must have a sound knowledge of the different sources of local government law. These sources are mentioned briefly below.

21.2 Sources of local government law
In principle, there are three main sources of local government law. They are:
- legislation
- a combination of common law and customary law
• legal precedents.

It is only legislation and case law that are of importance to local government practitioners and legal scholars, however. Since local government law is part of the broader constitutional system of South Africa, customary and common law rules have very little or no influence or impact as a source of local government law.¹

21.2.1 Legislation as a source of local government law

Legislation is without a doubt the most important and influential source of local government law. It was discussed and explained above that the new local government dispensation was not only created in terms of legislation but that it also functions and operates according to various pieces of legislation. Such legislative requirements can be from either the national or a provincial government.² It should be pointed out that the term “legislation” as referred to here, is a wide term and includes both national and provincial laws, as well as proclamations and regulations made by ministers or MECs.³

Within the ambit of legislation, it should be obvious and self-explanatory that the Constitution of the Republic of South Africa, which is a very unique and important legislative source of the country’s legal system, forms the basic legal framework on which the new local government system has been founded. The Constitution defines mainly the powers and functions of all three spheres of government and, in particular, the powers and functions of all local governments.⁴

Apart from the constitutional text itself, the Constitution further mandates the enactment of various other national and provincial laws, with the purpose of giving body to the basic legal framework of local governments. Such Acts, as was mentioned and discussed in the previous chapters of this work, then complete the legal framework within which local governments are operating.⁵

¹ For more on this point see the cases of In re: Certification of the Constitution of the RSA 1998, 1996 (4) SA 744 (CC) and also President of the RSA v Hugo 1997 (4) SA 1 (CC).
² Because of the ever-changing needs of society, local government law is contained and regulated mainly by legislation.
³ See the Constitution s 239 for a more exact definition of the term “legislation”.
⁴ As the supreme law of the state, the provisions and requirements of the Constitution are non-negotiable. Non-compliance with the Constitution would result in invalidation. See the Constitution s 2.
⁵ It was mentioned above that local government per se is not a concurrent legislative competence or exclusive legislative competence in terms of the Constitution Sch 4 and 5. This position seems to indicate that it is left for mostly the national government to legislate on local government matters, if so allowed by the Constitution. See the Constitution s 163. Only when the Constitution allows provincial laws over certain matters will it be possible for provincial governments to legislate.

continued on next page
21.2.2 The importance of customary and common law principles
Basically there are two main reasons for both the common law and customary law not featuring as important sources of local government law. In the first instance, the new local government system is a totally new legal system which had its origins within the new constitutional legal foundation. The new system was totally overhauled to such an extent that common law rules are no longer of any importance. Secondly, the Constitution also does not contain a provision to the extent that the former common law or customary law principles still continue. Apart from this position, the former local government system was regulated mainly by legislation under the then government of South Africa. The influence of common law or customary law under the former system was largely non existent. Finally, it was held by the highest judicial authority in South Africa that even from a constitutional viewpoint there are no common law powers left that were derived from the former royal prerogatives. All such powers have now been enumerated within the text of the Constitution or other legislation.

21.2.3 Judicial precedent as a source of local government law
Apart from legislation, judicial precedents, or what are commonly referred to as “case law”, are the second most important source of local government law. The importance of legal jurisprudence is founded on two issues in particular. Firstly, South Africa follows the legal doctrine of *stare decisis*, which means that the lower courts in the hierarchy of judicial bodies are compelled to follow the decisions, in similar cases, handed down by the higher courts. Secondly, the Constitution clearly spells out the importance and role of the judicial authority in our legal system. According to the Constitution, the judicial authority of the Republic of South Africa is vested in the courts and the courts are subject to the Constitution and the law only. Any order or decision by a court binds all persons to whom it applies, including the state. The importance of judicial precedents is therefore self evident, and local government
practitioners and scholars must ensure that they keep up to date with decisions of our courts regarding local government legal matters.

Apart from the sources mentioned above, there are no other real sources of local government law. Although the works and writings of legal scholars, the discussion and deliberations of politicians and the submissions of the concerned public at large are of importance to legal development, such aspects are not sources of local government law and should be regarded only as primary information sources from which the content of the law can sometimes be determined.

21.3 Important fields of law relevant to local government law

It was mentioned above that local government administrations often face a large variety of legal issues. In order to cope with such issues, most municipal councils that can afford to do so have a specific legal section that advises and handles legal problems for both the political and administrative branches of the local authority. Municipal legal advisors are therefore responsible for both internal and external legal matters. Such a situation often demands broad legal and paralegal expertise. Local government matters are important not only to the political office bearers and administrative personnel, however. Such matters are also regularly of importance to the relevant local community. Of the three spheres of government, citizens of a state are most likely, at some stage, to be involved in a legal dispute with their local authority. Against this background it is obvious that local community members are in need of professional and expert legal advice and assistance regarding local government legal matters.

It falls way beyond the scope of this work to discuss or even try to explain the various legal fields that are of importance in municipal matters. What is of interest, however, is to highlight briefly some of the most common areas of legal dispute that involve local governments. While it is the task of lawyers and legal advisors to keep knowledgeable about the law in general, some of the specialised legal issues are also of value for both the political and administrative components of a municipality in order for them successfully to fulfil and maintain their duties and responsibilities.

21.3.1 Common legal issues relevant to local governments

- The law of contract The law of contract is particularly important to local government legal advisors. All municipalities are involved in various legal contractual re-
relationships on a regular basis. As a sphere of government and a legal entity, municipalities are legally empowered to enter and conclude contracts.  

- **Property law** The law concerning property and other related issues is also of regular importance to local governments. Property is regarded as of such importance in our modern democracy that it has been afforded direct protection under the Constitution.  

10 Property law also includes issues regarding

(a) expropriation
(b) property leasing
(c) purchase, sale and acquisition
(d) transfer of property ownership
(e) other related land use rights such as the restitution of land rights, land reform measures, communal property associations, informal land rights issues and eviction requirements and procedures.  

---

9 See also Keyser v Orkney Town Council 2003 (4) SA 131 (T) with reference to lease agreements. In Gordon v Pietermaritzburg-Msunduzi: TLC and Another 2001 (4) SA 972 (N) it was mentioned that with the advent of SA’s new constitutional dispensation, momentous changes were brought about to local government. The court held that the contract concluded between the parties was impossible to perform and, although it was true that the state was bound by ordinary commercial contracts concluded by it, in cases of impossible performance, the law of contract allows for the cancellation of the agreement. In the case certain regulations, which formed the basis of the contractual relationship between the parties, were repealed in the context of an entirely new constitutional dispensation, which included local government. See paras B-D at 978.

10 According to the Constitution s 25, no person may be deprived of property except in terms of a law of general application. Arbitrary deprivation of property is specifically outlawed. Although property may be expropriated, there are specified requirements under which such expropriation must be done. Refer also to the case of Modderfontein Squatters, Greater Benoni City Council v Modderklip boerdery (Pty) Ltd (Agri SA and Legal Resources Centre as amici curiae), also referred to as President of the RSA v Modderkip boerdery 2004 (6) SA 40 (SCA).

11 Most of these issues are regulated in terms of specific Acts of parliament. For more on municipal property-related issues, refer to Nonyana MR “Communal Property Associations for convenience v townships for services and maintenance” Property Law Digest August 2000 Butterworths at 3. The writer refers to the Communal Property Association Act 28 of 1996 which has improved communal land ownership. See also the following cases: De Villiers en ‘n Ander v Stadsraad van Mamelodi en ‘n Ander 1995 (4) SA 347 (T) dealing with expropriation under the Expropriation Act 63 of 1975. See also Cape Town Municipality v Table Mountain Aerial Cableway Co Ltd 1996 (1) SA 909 (C). In Southern Metropolitan Substructure v Thompson and Others 1997 (2) SA 799 (W) it was held that a local authority’s duty to provide and allocate housing cannot lawfully be fettered by contractual undertakings not to evict illegal occupiers of land. When land/property is sold, it must be described sufficiently in accordance with the Alienation of Land Act 68 of 1981. Faultless description is not required. See Headermans (Vryburg) (Pty) Ltd v Ping Bai 1997 (3) SA 1004 (SCA). See also M & J Morgan Investments (Pty) Ltd v Pinetown Municipality 1997 (4) SA 427 (SCA), and Randburg Town Council v Kerksay Investments (Pty) Ltd 1998 (1) SA 98 (SCA) dealing with expropriation issues. Refer also to Skinberg v South Penninsula Municipality 2001 (4) SA 1144 (C). It was stated as a sembl to the case that despite the clear distinction made in the Constitution s 25 between deprivation and expropriation of property, there may be room for the development of a doctrine akin to constructive expropriation in South Africa, particularly where a public body utilises a regulatory power in a manner which, taken in isolation, can be categorised as a deprivation of prop-

continued on next page
An interesting aspect regarding land is the Subdivision of Agricultural Land Act, which requires that agricultural land may not be subdivided unless the Minister of Agriculture has given his written consent thereto. Section 12 of the Local Government: Municipal Structures Act allowed for the establishment of new municipalities for the entire territory of South Africa, however. Accordingly, it is argued by some that all land now falls within the jurisdiction of a municipality. Since agricultural land also falls within the jurisdiction of a municipal council, it seems that section 3 of the Subdivision of Agricultural Land Act no longer has application.

- The law of delict The law of delict is an equally important field of law within the local government domain. All municipalities face delictual accountability on a daily basis. Delictual liability is confined not only to general delictual claims but also more specialised claims under the legal protection of vicarious liability, defamation and other unique forms of delictual accountability. The law of delict is a vast and often complex field of the law and should be studied carefully.
• **Constitutional law and administrative law** The importance of constitutional law, which includes not only formal constitutional law but also aspects of fundamental rights law, administrative law, environmental law, legal interpretation and even some aspects of public international law have been highlighted above. Apart from the obvious importance of the Constitution and its Bill of Rights, the legal rules regulating the field of administrative law are also of particular importance to all local government bodies. Many municipal actions form part of the executive authority of the state and therefore fall under the rules of administrative law. The importance of administrative law was specifically highlighted in the case of *Fedsure Life Assurance v Greater Johannesburg TMC*. In this case it was mentioned that when a legislature, whether national, provincial or local, exercises the power to raise taxes or rates or determines appropriations to be made out of public funds, such a power is peculiar to elected legislative bodies. Such powers are exercised by democratically elected representatives after due deliberation of the circumstances and cannot be classed as administrative action. Not only the legal advisors of a municipality, but all municipal administrators, should have a basic understanding and knowledge of administrative law and its various related legal rules.

• **Criminal law** Municipalities are also often involved within the ambit of criminal law. Such issues are confined not only to incidents where municipal personnel are implicated in criminal activity but can also relate to incidents where municipal employees or even councillors are held criminally liable for activities within a particular municipality. So, for example, is it possible for a municipal official, mostly the municipal manager, to be held liable for non-compliance with certain

---

For more on constitutional and administrative law see the cases of *Claude Neon Ltd v Germiston City Council and Another* 1995 (3) SA 710 (W), where the court held that an undertaking by a local authority official to notify a person is an administrative act that gives rise to a legitimate or reasonable expectation. See also *Tony Rahme Marketing Agencies SA (Pty) Ltd and another v Greater JHB TMC* 1997 (4) SA 213 (W); *Gencor SA Ltd v TC for Rustenburg and Environs and another* 1998 (2) SA 1052 (T); *Erf one six seven Orchards CC v Greater JHB Metro Council and Another* 1999 (1) SA 104 (SCA) and *Transnet Ltd v Goodman Brothers (Pty) Ltd* 2001 (1) SA 853 (SCA). See *City of Cape Town v Rudolph and others* 2004 (5) SA 39 (CPD) regarding a housing dispute under s 26 of the Constitution.
The importance of criminal law within the new local government dispensation should not be underestimated, therefore.

- **Labour law** The importance of labour law for municipal governments is particularly highlighted by the fact that municipalities are often one of the larger employer organisations within a particular municipal area. Depending on the size of the municipality, municipal councils employ hundreds or even thousands of personnel. Labour law issues are thus part and parcel of a municipal administration, and a sound knowledge of labour law is essential. Apart from normal labour issues such as wage negotiations, promotions and disciplinary action against employees, local government administration also encounter more specialised labour issues such as disputes within essential services areas. Because of the importance of labour law in local government, most municipalities have established personnel and labour relations departments to handle such matters. There is even a specific bargaining council that was established to resolve and deal with municipal labour issues between municipalities as employers, and labour unions as representatives of municipal employees.

- **Building regulations and town and regional planning law** All municipalities are required to be involved in local planning processes and development programmes. Each municipal government is therefore regularly involved in town planning activities, and municipalities must also ensure that minimum building standards are complied with.

---

21 See the Occupational Health and Safety Act 85 of 1993 as an example.

22 For typical examples of labour-related issues in local authorities see Cape Local Authorities Employers Organisation v IMATU 1997 (1) SA 656 (C) and Mhlambi v Matjhabeng Municipality and another 2003 (5) SA 89 (O). In the latter case the court held inter alia that a reasonable request for further particulars in a disciplinary action is an ingredient of the right to a fair hearing and that the principles of natural justice demanded that such information be furnished.

23 For more on town planning and building requirements see the National Building Regulations and Building Standards Act 103 of 1977. Refer also to cases such as: Sandton Town Council v Gourmet Property Investments CC 1994 (4) SA 569 (A) dealing with national building regulations; Diepsloot Residents and Landowners Association and Another v Administrator Tvl 1994 (3) SA 336 (A); Schapenrome Investments (Edms) Bpk v Sandtonse Stadsraad 1994 (2) SA 34 (A); Stands 5/1 Wierda Valley (Pty) Ltd and Another v Sandton Town Council 1994 (1) SA 333 (A); Knop v JHB City council 1995 (2) SA 1 (A); Huisman v Minister of Local Government, Housing and Works 1996 (1) SA 836 (A); East Zulu Motors v Empangeni/Ngwelezane TLC 1998 (2) SA 61 (CC) and also Paola v Jeeva and others 2004 (1) SA 396 (SCA), concerning the value of a view of a property. Refer also to Van Wyk J and Van Wyk D “Planning law, administrative justice and the Constitution: Van Juyssteen v Minister of Environmental Affairs and Tourism 1996 (1) SA 283 (C)” THRHR 1996 (59) at 675 et seq; Gildenhuys A “Omgewingsbewaring beperkings op grondebruiksveranderings” Butterworths Property Law Digest (2000) at 13 and Van Wyk J “Planning Law – Will Cinderella emerge a princess?” THRHR 1996 (59) at 1. See also the case of Humphrys NO v Barnes 2004 (2) SA 577 continued on next page
• **Environmental law** It was mentioned above that all three spheres of government must comply with the new constitutional requirements. One such requirement is the provision of a clean and healthy environment. Environmental laws are therefore of significant importance for all local authorities. It is essential for municipalities to determine their responsibilities under current legislative provisions and to ensure compliance with their obligations in that regard.\(^{24}\)

### 21.4 Special legal matters pertaining to local government

Apart from the general legal fields that have an impact on local governments, the new local government legal framework also provides for specific legal matters that are of particular importance to local authorities.\(^{25}\) These special provisions regarding municipal legal matters must be read in conjunction with the general provisions of the law.

#### 21.4.1 Legal proceedings

According to the Systems Act, all municipalities are authorised to compromise or compound any action, claim or proceedings and may submit to arbitration any matter other than a matter involving a decision on its status, powers, duties or the validity of its actions or by-laws.\(^{26}\) The particular subsection is somewhat dubious and unclear. As a legal person all municipalities have legal standing and may thus institute or defend any legal action in which they have a direct, or sometimes indirect, interest. However, this position is conditional to the extent that the particular legal action is indeed permissible under the law in general.

#### 21.4.2 Legal representation for employees or councillors of a municipality

Under the new legal framework, it is permissible for a municipality, subject to such terms and conditions as it may determine, to provide an employee or a councillor of

---

\(^{24}\) For more on environmental aspects see Verstappen v Port Edward Town Board and Others 1994 (3) SA 569 (D), the Environmental Conservation Act 73 of 1989 and Witbooi E “Obligations on property owners to control alien invasive vegetation on their land” *Butterworths Property Law Digest* March 2003 at 3.

\(^{25}\) Refer to the Local Government: Municipal Systems Act 32 of 2000 ch 11 as amended by Act 40 of 2002 s 2(1).

\(^{26}\) See the Systems Act s 109(2).
the municipality with legal representation where applicable. Such legal representation is limited to only two instances, however:27

- where legal proceedings have been instituted against the employee or councillor as a result of any act or omission by that person in the exercise of his or her powers or the performance of his or her duties or
- where the employee or councillor has been summoned to attend any inquest or inquiry arising from the exercise of his or her powers or the performance of his or her duties.

It should be noted that employees or councillors are not automatically entitled to the legal representation mentioned above. The decision to provide for such representation lies with the municipal council. All legal assistance not addressed in the two instances above should be for the employee’s or councillor’s own account and should not be funded from the municipal/public purse.

21.4.3 Issues concerning evidence

The Systems Act specifically provides that in legal proceedings against a municipality a certificate which purports to be signed by a staff member of the municipality and which claims that the municipality used the best known or only or most practicable and available methods in exercising any of its powers or performing its functions must, on its mere production by any person, be accepted by a court as evidence of that fact.28 It is further provided that a copy of the Provincial Gazette in which a by-law was published may, on its mere production in a court by any person, be used as evidence that that by-law was passed by a municipality concerned.29

21.4.4 Fines, bail and the prosecution of offences

Under the new legal framework, a staff member of a municipality so authorised may institute criminal proceedings and conduct the prosecution in respect of a contravention of or failure to comply with a provision of

- a by-law or regulation of the municipality
- other legislation administered by the municipality or

27 See the Systems Act s 109A(a)-(b).
28 The Systems Act s 110.
29 Refer to the Systems Act s 111. It is submitted, however, that such a situation should prevail only in instances where no contrary evidence is presented to a particular court.
• other legislation as determined by the National Director of Public Prosecutions in terms of section 22(8)(b) of the National Prosecuting Act of 1998.  

It is also provided that fines and bails that were recovered in respect of offences or alleged offences referred to in item 2 of Schedule 4 to the Public Finance Management Act must be paid into the revenue fund of the municipality concerned.

21.4.5 Time of notices, payments and the service of documents and process

A payment may be made at a municipality only during the normal or extended office hours of a municipality, except when payment is made by electronic transfer or at an agency pay-point. These times also apply to when any notice or other document may be served on the municipality, including its council, other structures, functionaries or staff members in an official capacity. There are exceptions to this rule in urgent matters, however. Any notice or other document that is served on a person in terms of the Systems Act or by a municipality in terms of any legislation is regarded as having been served when:

• it has been delivered to that person
• it has been left at that person’s place of residence or business in the Republic of South Africa with a person apparently over the age of sixteen years
• it has been posted by registered or certified mail to that person’s last known residential or business address in the Republic of South Africa and an acknowledgement of the posting thereof is obtained from the relevant postal service
• it has been served on a person’s agent or representative in the Republic of South Africa in a manner provided for above if that person’s address in the RSA is unknown
• it has been posted in a conspicuous place on the property or premises of the person to which it relates if that person’s address or agent in the Republic of South Africa is unknown.

It is also provided that when any notice or other document must be authorised or served on the owner, occupier or holder of any property or right in any property, that it is sufficient if that person is described in the notice or document as the owner,

30 A staff member may prosecute or conduct criminal proceedings only if so authorised in terms of the National Prosecuting Authority Act 32 of 1998 s 22(8)(f).
31 1 of 1999.
32 See the Systems Act s 113.
33 See the Systems Act s 114(a)-(b).
34 See the Systems Act s 115(a)-(e) as amended by Act 6 of 2004 see 94.
occupier or holder of the property. In such cases it is not necessary to name the person specifically. Finally, any legal process is effectively and sufficiently served on a municipality when it is delivered to the municipal manager or a person in attendance at the municipal manager’s office. Outside parties thus seeking to serve on a municipality documents of whatever nature should serve such documents on the office of the municipal manager.35

A further important practical aspect concerning the institution of legal proceedings against a municipal council is the provision of the Limitation of Legal Proceedings (Provincial and Local Authorities) Act36. According to this Act a notice must be sent to a municipality informing it of a claim against the municipality. According to section 2 of the Act such a notice/letter of demand must be sent to the council within 90 days of the date of the cause of action. After such notice, no formal summons may be issued against the municipality concerned, unless the claim has been rejected or a further 90 day period has lapsed. It must also be noted that the Act also requires that a claim prescribes against a council unless summons has been issued within 24 months since the occurrence of liability. Several case law precedents have been developed over such matters. See for example Ntanga v Butterworth Municipality and another37 and also East London Municipality v Abrahamse.38 In many instances the requirements of the Act were strictly enforced. Refer to De Klerk en ’n ander v Groter Kroonstad Plaaslike Oorgangsraad.39 In Proovinsie van die Vrystaat v Williams No40 the Appellate Division confirmed that the term/word “liability” in the context of the Act has a wide meaning. Finally, the Constitutional Court in 2001 held that the Limitation of Legal Proceedings Act, which requires the specific notice within a short period of time and with limited scope for condonation for non-compliance, constitutes a material limitation of an individual’s right of access to a court under section 34 of the Constitution and that such limitation could not be justified under section 36 of the Constitution. Accordingly, the court held that section 2(1)(a) of the Act was unconstitutional and invalid. See Moise v Greater Germiston Transitional Local Council: Minister of Justice and Constitutional Development Intervening (Women’s Legal Centre

35 Refer to the Systems Act s 115(2)-(3).
36 94 of 1970.

40 2000 (3) SA 65 (SCA).
as *Amicus Curiae*). In a follow-up case, the Constitutional Court further held that the invalidation of section 2(1)(a) of the Act operated retrospectively to the moment the Constitution came into effect. Since the Constitution came into effect, the inconsistency of the Act has become evident and, as a matter of law, the provision of the Act has been a nullity since that date.

21.4.6 Public servitudes and the custody of documents

Similar to the situation under some of the former ordinances that affected local governments, the Systems Act now confirms that all public servitudes in favour of a municipality are under the control of the municipality. A municipality must further protect and enforce the rights of the local community arising from those servitudes. It is also the responsibility of the municipal manager to take custody and control of all of a municipality’s records and documents, unless where otherwise provided.

21.4.7 Restraint on transfer of property

All municipalities are directly involved in the process of transferring property (land) from one person or institution to another. Similarly to the South African Revenue Service, a municipality must provide a clearance certificate stating that all levies, duties or taxes payable to the municipality have been paid up to date before a particular property can be transferred. In order to protect a municipality, and thus also its public community, from losing valuable revenue for service already rendered, the Systems Act determines that a registrar of deeds may not register the transfer of property except on production to that Registrar of Deeds of a prescribed certificate which:

- was issued by the municipality or municipalities in which that property is situated and
- certifies that all amounts that became due in connection with that property for municipal service fees, surcharges on fees, property rates and other municipal taxes, levies and duties during the two years preceding the date of application for the certificate have been fully paid.

45 See the Systems Act s 118(1)(a)-(b). The certificate is valid for a period of 120 days from the date it was issued. The Act s 118(1A). This was also the position under some of the former provincial ordinance. Refer also to *Venter NO v Eastern Metro Substructure, Greater JHB TC* 1998 (3) SA continued on next page
In the case of a transfer of property by a trustee of an insolvent estate, the transfer and recovery of monies are subject to section 89 of the Insolvency Act.\textsuperscript{46} To help secure municipal funds even more efficiently, it is specifically provided that an amount due for

- municipal service fees
- surcharges on fees
- property rates and other municipal taxes
- levies or duties

is a charge upon the property in connection with which the amount is owing and that such a claim enjoys preference over any mortgage bond registered against the property.\textsuperscript{47} The requirement of a clearance certificate does not apply to a transfer from the national government, a provincial government or a municipality of a residential property which was financed with funds or loans made available by any of the three spheres of government, and when the vesting of ownership as a result of a conversion of land tenure rights into ownership in terms of the Upgrading of Land Tenure Rights Act of 1991.\textsuperscript{48} However, municipalities are not precluded from collecting any amounts owed to them in respect of such a property at the time of the transfer or conversion.\textsuperscript{49} Finally, the preference that is enjoyed over any mortgage bond does not apply to any amount referred to which became due before a transfer of a residential property or a conversion of land tenure rights into ownership.\textsuperscript{50}

Although the protection of municipal service fees, surcharges, property rates and other taxes or levies is not something new, its new statutory protection has been the

\textsuperscript{46} 24 of 1936. S 89(4) provides that notwithstanding the provisions of any law which prohibited the transfer of any immovable property, unless any tax as defined in ss (5) due thereon had been paid, that law would not debar the trustee of an insolvent estate from transferring any immovable property in that estate for the purpose of liquidating the estate if he had paid the tax which might have been due on that property in respect of the periods mentioned in ss (1) and that no other preference would be accorded to any claim for such tax in respect of any other period. S 89(5) provided that, for the purposes of subss (1) and (4), ‘tax’ in relation to immovable property meant any amount payable periodically in respect of that property to the State or for the benefit of a provincial administration or to a body established under the authority of any law in discharge of a liability to make such periodical payments if that liability was an incident of the ownership of that property.

\textsuperscript{47} See the Systems Act s 118(3).
\textsuperscript{48} See Act 112 of 1991.
\textsuperscript{49} The Systems Act s 118(4)(a)-(b).
\textsuperscript{50} The Systems Act s 118(5).
focus of legal debate and even strong judicial challenge. In the matter between
*Greater Johannesburg TMC v Galloway No and Others* the first respondent, a
liquidator of a company, had sold immovable property belonging to the company to
the second respondent. In order to proceed with the transfer of the property, the first
respondent applied to the municipality/applicant for clearance figures in order to pay
such and to obtain a clearance certificate in accordance with section 50 of the Local
Government Ordinance. Upon receipt of the figures, the first respondent disputed
certain amounts claimed by the council. The respondent also took the view that he
was not required to pay the disputed levies/taxes by reason of section 89 of the
Insolvency Act. The court held that section 89(4) overrode the provisions of any
other law which prohibited the transfer of any immovable property unless any tax
defined under section 89(5) due on the property in question had been paid. The
liquidator thus had to pay certain taxes. Any items prescribed by section 50 of the
Ordinance which fell outside the definition of a tax set out in section 89(5) were not
payable by the liquidator in order to obtain the clearance certificate. The court
further held that section 89(4) did not extend to water, electricity and refuse removal
charges. Such items were not in respect of the property but were in respect of the
agreements which had been entered into for the provision of such services and
therefore in respect of the services themselves. Charges in respect of electricity,
water and refuse removal were not in respect of the property and could not be re-
covered as a prerequisite before the clearance certificate was issued. The applica-
tion by the council was accordingly dismissed. A similar issue was decided in
*Eastern Metropolitan Substructure of the Greater Johannesburg Transitional Council v Venter NO.* The case concerned a liquidator of a close corporation who had paid
to the local authority under protest certain amounts for basic water and sewerage
charges. The respondent argued that such charges did not constitute taxes under
section 89(1) and 89(5) of the Insolvency Act and that he was not obligated to pay
such amounts in order to obtain a clearance certificate under section 50 of Ordi-

56 2001 (1) SA 360 (SCA).
nance 17 of 1939 (T). Rezoning fees under sections 48 and 63 of the Town Planning and Townships Ordinance 15 of 1986 (T) were also in issue. Contrary to the decision in Greater JHB TMC v Galloway NO above, the Supreme Court of Appeal held that there was no basis on which it could be contended that amounts not constituting taxes listed in section 50(1) of the Ordinance did not have to be paid by the respondent in order to obtain a clearance certificate. Although the amounts were not taxes, the council was entitled to withhold the clearance certificate until they were paid. The court further held that once it had been accepted that the amounts were due and owing in terms of section 50, there was no legal basis for the amounts to be repaid to the respondent. Since the respondent wished to transfer the properties, he had to pay the amounts due in respect of the rezoning fee, and the basic water and sewerage charges so as to have the embargo created by section 50 lifted. Section 118 of the Systems Act was also subjected to constitutional challenge. In Geyser and another v Msunduzi Municipality and others it was argued by the applicant/owner of a property who was held liable by the respondent municipality for municipal service fees due on the property which the applicant leased to a tenant, that the charges were unconstitutional since they resulted in arbitrary destruction and deprivation of the property owner’s rights under section 25 of the Constitution. The court held that although section 118 of the Act clearly envisaged deprivation of the property, the purpose of the deprivation was to facilitate debt recovery, which was a legitimate and important purpose essential for the economic viability and sustainability of municipalities in South Africa. There was thus a rational connection between the means employed and the desired result. The limitation on property owners’ rights was reasonable and reflected a fair balance between public interest and the property owner’s interest. Section 118 is thus not arbitrary and not inconsistent with the Constitution. The court also held that municipal service fees were based on consumption and thus could not refer to rates on property. Such fees included charges for electricity and water consumption supplied to the owner/occupier of the property. The section also applied to all municipalities in the Republic, thus excluding incapacity in application. Notwithstanding the court’s decision, some commentators have

60 Refer to pras A-D at 38-39.
argued that the obligation on owners to pay all outstanding arrears is contrary to the Constitution.  

21.4.8 Miscellaneous provisions

The Systems Act also provides for a few miscellaneous legal aspects. In the first place it is provided that a councillor who attempts to influence the municipal manager or any other staff member or even agent of a municipality not to enforce an obligation in terms of the law or a decision of the council is guilty of an offence and is on conviction liable to a fine or to imprisonment for a period not exceeding two years. A person acceding to such an attempt is also guilty of an offence punishable with the same sanction. If a person is convicted of an offence and is subsequently sentenced to more than 12 months’ imprisonment without the option of a fine, he/she is disqualified from remaining a councillor and cannot become a councillor of any municipality during a period of five years from the date of the conviction.

The minister concerned with local government is also authorised to make regulations on certain matters and to issue guidelines that are not inconsistent with the Act.

Finally, the Systems Act provides for certain transitional arrangements and the phasing in of the provisions of the Act itself. Under transitional arrangements, it is provided that any written agreement on the exercise of executive authority in an area of another municipality, which agreement existed immediately before the Act took effect, must be regarded as having been concluded in terms of the relevant provisions of the Systems Act. The minister must also initiate steps for the rationalisation of existing national and provincial planning legislation applicable to municipalities in order to facilitate local development planning as an integrated concept within the system of co-operative government as is envisaged in section 41 of the Constitution. Mechanisms for facilitating co-ordination between sectoral regulation of local government matters must also be established. In order to facilitate a smooth transition,

the minister is authorised to phase in the various applications of the provisions of the Systems Act which place a financial or administrative burden on municipalities.68

21.5 Conclusion

It seems obvious that the application of the law is of significant importance to all local government structures. The law in general and, more particularly, the law relating to municipal affairs form not only the basis on which all municipalities must function, but also set the scene within which municipalities are to fulfil and perform their new constitutional role and obligations. It is clear in this respect that a sound knowledge of all the relevant legal principles relating to local government matters is an essential requirement for legal advisors, private practitioners, local administrators and political office bearers alike.

68 The Systems Act s 123.
22

Concluding remarks

22.1 Introduction

It is clear from the above that the third sphere of government has changed drastically from the order that was in place prior to 1994. The new supreme Constitution with its comprehensive Bill of Rights has set a new legal paradigm for municipal government. It is especially the founding values and specific municipal objects of the new constitutional dispensation that had an unprecedented impact.\(^1\) Compliance with the new constitutional provisions is imperative whether that relates to legislative or executive actions or even the conduct of bodies or institutions within the state. The Constitution however only provides a basic constitutional framework. In many instances the basic framework had to be completed through the enactment of various national or provincial laws.\(^2\)

In chapter one of this research it was stated that the aim of the research is two-fold. The first objective was to provide a systematic and comprehensive exposition of the new constitutional and other national legislative provisions relevant to the new system of local government. In this respect it is submitted that the preceding chapters do indeed achieve such an objective. Almost all legislative provisions relevant to local government have been systematically subdivided into the various chapters and have been grouped together according to their topics and relevance. It is submitted that the compilation and systemisation of the many legal requirements should indeed contribute to making the legal dispensation regarding local government law more accessible which in turn could enhance more research and debate in this often neglected albeit if important field of law.

\(^1\) Read s 1 of the Constitution. According to s 2 the Constitution is entrenched as the supreme law of the SA state and any law or conduct inconsistent with the Constitution is invalid. All the obligations imposed by the Constitution must be fulfilled.

\(^2\) See again the provisions set out in ss 151(3), 154(1), 155(2) and (3), 157(2), 160(5) and 164 of the Constitution which specifically require either national or both national or provincial laws on issues directly relevant to local government matters.
The second aim was to evaluate the extent of compliance with the new local government legal system, to the key normative principles set out in the Constitution and which underpins the new legal government system. Such an evaluation can only be conducted after due regard to all the constitutional and subsequent national legislative requirements. In an effort to link the various preceding chapters together and to tie-up the research as a whole, a brief summary of the extent of compliance with the key constitutional requirements and prerequisites is provided in this conclusion. The summary follows the same chronological sequence as was provided for in the introductory chapter of this work.

22.2 Evaluating compliance with the key normative principles of the new local government legal dispensation

22.2.1 Is the new local government legal dispensation non-racial and truly democratic?

The new dispensation has undoubtedly overturned the segregation and apartheid policies of the past and has provided a platform for a uniform democratic local sphere of governance where municipal services are rendered for the benefit of all people. The confirmation within the supreme law of the South African state of *inter alia* the founding values of equality, democracy, freedom, non-racialism and non-sexism has created a strong foundation to ensure that all spheres of government are constitutionally obligated to ensure a non-racial and democratic government.

22.2.2 Does the new nature, rights and duties of municipalities comply with the new constitutional vision?

It was indicated above that the new local government system does not only provide local government with a distinctive legal nature, but also sets down clear and precise rights and duties for all local government structures. This is necessary to ensure local governments are empowered to fulfil their duties. The new system not only provides local authorities with the required foundation to act, but also incorporates constitutional values of accountability and public participation. These values are particularly promoted through legislative provisions which confirm that local government consists out of political, administrative and local community components. As such, the new legal framework should enhance and promote the underlying values

---

3 Read ss 4, 5 and 6 of the Municipal Structures Act together with s 156 of the Constitution.
that the Constitution demands.

22.2.3 **Municipal government and the principles of co-operative government**

The Constitution obligates all three spheres of government to comply with specific principles aimed at ensuring a system of co-operative federalism. All spheres have been allocated with specific functional activities. Although significant protection of such powers is provided for, many overlaps between the specified functions do occur. Such overlaps in turn again require proper co-operation between the spheres in order to fulfil their functions and responsibilities. In an effort to ensure such co-operation the Constitution determines various principles with which all spheres must comply.⁴ The new legal framework, *via* the Municipal Systems Act, specifically expands on the basic constitutional provisions and thus enhances the envisaged constitutional scheme.

22.2.4 **The establishment of a new system and structure for local government**

It is a specific constitutional obligation, that all former local governments had to be restructured and that new institutional models for local government structures had to be provided for. Furthermore, the whole territory of the Republic had to be included in the jurisdiction of a specific municipal authority.⁵ The new legal dispensation indeed complies with these constitutional requirements. In the first instance, the entire territory of the South African state falls within the jurisdiction of a demarcated municipal government. Even areas that are not viable to have their own direct local government, ie district management areas, fall under the control of a district municipality within that area. Secondly, the Municipal Structures Act provides for various new institutional models of local government. Apart from the constitutionally defined categories of municipalities the act provides for the establishment of various models of municipal types by combining various municipal systems.⁶

In total five systems have been created. Three are so-called executive systems whilst two are participatory systems. Since the powers, functions and circumstances of municipalities differ it is submitted that the various combination possibilities indeed should be able to cater for the different needs and responsibilities of all municipalities. The new legal framework further aims not only to achieve more effective execu

---

⁴ Refer to ss 40 and 41 of the Constitution.
⁵ See s 151 of the Constitution.
⁶ See s 7 of the Structures Act.
tive functioning but also to ensure public involvement and participation, which again should enhance the underlying values of the Constitution. Although a clear division of the roles and responsibilities of the various types of municipalities has been determined, there seems to be some uncertainty in practice. Uncertainty especially exists relating to the division of powers and functions between local municipalities and their relevant district municipalities. Notwithstanding such difficulties, the new legislative provisions have ensured that all municipal institutions have been re-established and all former municipal authorities have been replaced by newly transformed local authorities. Municipal boundaries were re-determined and many municipalities were amalgamated into new enlarged and supposedly more effective institutions.

A significant number of municipalities however still face enormous challenges relating to their new structures and boundaries and the amalgamation of municipal administrations and personnel. Further legal directions are needed to address some of these challenges more effectively.

### 22.2.5 Confirmation of new municipal boundaries

It is clear from the new constitutional framework, that municipal boundaries had to be re-determined. This requirement was specifically fulfilled via the Municipal Demarcation Act which established an independent Municipal Demarcation Board.⁷ This board has demarcated all municipal boundaries and has fulfilled the requirement of creating a system of wall to wall municipal government in South Africa. Under the Constitution, national legislation had to determine the criteria and procedures to determine municipal boundaries by an independent authority.⁸ Two national acts, the Local Government: Municipal Structures Act and the Local Government: Municipal Demarcation Act were enacted.⁹ Together these two acts, address the overall constitutional obligations towards municipal boundaries.

Boundaries are important to ensure local governments can provide municipal services in an equitable and sustainable manner. It would seem that the new laws indeed comply and fulfil the constitutional demands. It should be noted however that the determination and internal delimitation of municipal boundaries are not once off

---

⁷ Read ss 151(1) and 155(3)(b) of the Constitution together with the provisions of Act 27 of 1998.

⁸ S 155(3)(b) of the Constitution.

exercises but are continuous in nature. Regular evaluation of municipal boundaries is thus required. It is also notable that after the demarcation process, the number of official local authorities were reduced from over 800 to 284. The demarcation process thus significantly rationalized local government structures. Such rationalization was needed under the Constitution to create a system of local governance that is effective and efficient and that would ensure the achievement of the objects of local government as set out under the Constitution.

22.2.6 Adhering to the founding values and the Bill of Rights
The Constitution specifically requires radical changes to the composition and election of municipal councils. In essence the new local government system had to be redesigned to ensure and achieve compliance to the Constitution’s founding values and a truly democratic state. In order to complete such a system, many new changes had to be affected. On a closer evaluation, it seems acceptable to conclude that the new legal framework, indeed completes the basic framework of the Constitution regarding the composition and election of municipal councils. Local governments are now truly democratic spheres of government.

The new system is unique in some instances. For example, although the term of local governments is now similar to national or provincial governments, local governments are composed according to an electoral system that provides for a combination of proportional representation and constituency based electoral systems. The unique features have been included to enhance the unique features of local governments and to ensure better representation and accountability. It seems as if the new legal system is well equipped to fulfil the broad constitutional requirements.

22.2.7 Recognising the role of traditional leadership
One area where the new local government legal dispensation still seems to lack clear direction is with regards to the role and involvement of traditional leaders in local government structures. Although the institution of traditional leaders is constitutionally recognised and protected, the precise role of traditional leaders, specially in local government, has not been properly defined. This problem is confirmed by na-

10 The number of 284 is composed out of 6 Metropolitan municipalities, 47 District municipalities and 231 Local municipalities. For more detail refer to www.info.gov.za/localgovernment visited on 18/07/2005.
11 Read ss 157(1) and (2)(a)-(b) of the Constitution.
12 See ss 211 and 212 of the Constitution.
tional government, which has embarked on new policy and legislative initiatives aimed at clarifying the current uncertainties. 13 Traditional leaders form an important part of traditional African cultures and structures and they should not only be included in municipal decision-making processes, but they can play a positive role in ensuring the ultimate success of especially rural municipalities.

The Constitution however only creates three spheres of government and allocates powers or authority only to such spheres and not to traditional leaders. One can thus argue, that unless a constitutional amendment is carried through, traditional leaders will be subjected to the authority of the local governments in which area such leaders fall. Since traditional leaders play an important role in maintaining traditional African customs, their roles should thus be more clearly defined. In view of the fact that the Constitution is the supreme law of the state, the role and functions of traditional leaders must comply with the Constitution. Traditional leaders are thus not autonomous institutions but function within the broad constitutional system. A strong need exists for co-operation and consultation between traditional leaders and local government structures. Clear national guidelines on such issues should ensure positive co-operation between the two institutions. Such legislative requirements are urgently needed.

22.2.8 The division of the powers and functions between the three spheres of government

Under the Constitution, local government is not only recognised as distinctive and autonomous sphere of government but the Constitution also determines the specific powers and functions of municipal governments. Such powers and functions are thus constitutionally entrenched and cannot be taken away unless constitutional amendments are executed. 14 Local government powers are however not absolute, and are subject to national and provincial laws. In essence municipal powers and functions must be exercised to fulfil constitutional objectives and developmental duties. Under the constitutional framework, both the Structures Act and the Systems Act expand upon municipal powers and functions. It is of interest to note that within the new constitutional dispensation, local government powers are regarded as original pow-

---

13 See the Traditional Leadership and Governance Framework Act 41 of 2003.
14 Read s 156 together with parts B of Sch 4 and 5 of the Constitution.
The Constitution does however not directly distinguish between the powers and functions of the different categories of municipalities *inter se*. Although it is constitutionally envisaged that a proper division of municipal powers should be made, such division had to be conducted in terms of national legislation.\(^{16}\) Since category A or Metropolitan councils have exclusive executive and legislative powers, the division is only relevant between Local Council and their relevant District Councils. This division is specifically provided under the Local Government: Municipal Structures Act.\(^{17}\) Powers not specifically allocated to a district will vest in the local municipality.

It is thus submitted that the new legal framework indeed complies to the broad constitutional requirements regarding the identification of municipal powers and functions and the division of such powers and functions between category B and C municipalities. Assignment of powers or functions are also permitted, and it is regulated through provisions set out in the Systems Act.\(^{18}\) The new system also provides for municipal financial powers. The current system however still faces problems relating to old order laws that are still applicable and new proposals that have not yet materialized. Although the national legislative framework has been enacted, both provincial and even municipal laws are needed to complete the overall legal framework.

### 22.2.9 Evaluating the new legal rules dealing with internal mechanisms and municipal leadership

It is an obvious fact that municipal governments are becoming more and more complex in comparison with their predecessors from yester year. Such complexities and duties require an effective, committed and educated leadership. On evaluation of the new legal framework, it would seem as if the new legal rules indeed support and facilitate the creation of such internal procedures and functions. The new system provides for various leadership options depending on the circumstances relevant in each particular municipal jurisdiction. To enhance and regulate municipal leadership,

---

\(^{15}\) See *Fedsure Life Assurance v Greater JHB TMC* 1999 (1) SA 3741 (CC).

\(^{16}\) According to s 155(3)(c) the Constitution determines the following: “[S]ubject to section 229, [National Legislation must] make provision for an appropriate division of powers and functions between municipalities when an area has municipalities of both category B and category C. A division of powers and functions between a category B municipality and a category C municipality may differ from the division of powers and functions between another category B municipality and that category C municipality”.

\(^{17}\) See ss 83-84 of the Systems Act.

\(^{18}\) See ss 8-9 of the Systems Act.
the Constitution directly regulates the internal procedures of municipal councils. These requirements are indispensable for effective municipal decision-making and the achievement of municipal goals and duties.

Both the Systems and the Structures Acts specifically expand on the basic constitutional provisions and thereby support and enhance the constitutional vision. Since the functioning of a local government is largely dependant on the effective exercise of functions, the new legal dispensation provides for specific codes of conduct for both political office bearers and also municipal administrative personnel. It is thus submitted that the new legal provisions indeed have a significant role in regulating and controlling internal municipal functioning. Although the framework is extensive, regular overview should be employed and swift legal changes could be enacted to rectify or expand on existing rules in order to enhance or comply with practical problems.

22.2.10 Ensuring sustainable municipal service delivery

The new legal dispensation for local government also addresses the important aspect of service delivery and identifies various basic municipal services and functional activities. It must be remembered that the main objective/reason for existence of local governments is to provide sustainable and effective municipal services to local residents. Without such service delivery, local settlements cannot be sustained and the overall governmental structure of the state will be placed in jeopardy. The new system demands a system for service delivery that is accessible, simple, affordable, of high quality with incorporation of the values of accountability, sustainability and value for money.

In compliance with the constitutional prerequisites, the Systems Act determines specific duties and requirements for all local governments in respect of municipal service provision and related aspects. The act is however silent on which mechanism municipal councils should use to achieve and comply with the abovementioned requirements. Municipal councils must put their own policies and programmes in place and should be monitored and controlled by the two higher spheres. Possible expansion on the current legal regulation could enhance better achievement of the

---

21 Read again ss 1, 152 and 153 of the Constitution.
22 See s 73 of the Systems Act.
mentioned goals. Municipal councils must also adopt tariff policies for the levying of fees for municipal services. Services can be provided via internal mechanisms or external ones. Although municipal services per se are not absolutely defined and other services can also be assigned to municipalities, the Constitution together with the new laws, determines what should be regarded as basic municipal services. The achievement and compliance with the constitutional demand on services, will largely depend on how local governments structure their policies and also to what extent effective oversight by national/provincial governments are provided.

**22.2.11 Establishing a new local government personnel corps**

In relation to municipal staff the Constitution determines that all municipal councils can employ personnel that are necessary for the effective performance of their functions. Local governments are thus empowered to employ such staff members that are needed to fulfil their obligations and duties. The new requirements have specifically been incorporated to enhance the organisational efficiency of municipalities but vigorous training of personnel is required. Municipal personnel matters should not be seen in isolation but together with other labour related requirements that are set out in other laws. The new dispensation determines that the municipal manager is the head of the municipal administration and as such has been given a wide range of duties and responsibilities. Such a person is also the highest accountable official.

Employment, especially of senior staff is linked to new performance standards and evaluations. Senior staff are mostly employed for fix periods only and a comprehensive code of conduct for staff members has been included. Continuous training and support is however a prerequisite for effective local government administrations. It is submitted that old order bureaucracies should be avoided and regular evaluation of the organizational structures of municipalities must be undertaken. Municipal staff matters should further be linked to the requirements of the public administration and guidelines on financial management. All in all it appears as if the basic constitutional

---

28 See s 7 of the Systems Act.
29 Refer to Sch 2 of the Systems Act.
demands are met and that local government administrations and personnel structures are adequately empowered to achieve and fulfil their important constitutional obligations.

22.2.12 Regulation of municipal fiscal management and fiscal powers
Mention was made above that municipal administrations and staff members are partly regulated in terms of a new and reformed legislative framework dealing with municipal finance and fiscal management. Without a proper financial system and effective control mechanisms, local governments will not be able to fulfil their obligations. Financial powers and proper fiscal management are essential in the new local government dispensation. From the chapter on municipal finance discussed above it becomes obvious that an entire new legal framework has been established. Not only does the Constitution determine basic fiscal requirements and obligations, but also that new national legislative provisions are authorized to create a uniform system for property tax assessments and recovery as well as a comprehensive system aimed at regulating municipal fiscal management. It is suggested that the new dispensation indeed fulfils the constitutional demands but that the system should be constantly monitored to ensure effectiveness and efficiency. Swift amendments should be considered to better and regulate the new system should new financial challenges arise. Financial discipline is a key component for the success of local governments and careful and continuous oversight by national/provincial governments is essential. It is submitted that the new dispensation, if applied correctly, indeed should enhance and ensure effective municipal financial capacity and fiscal management.

22.2.13 Compliance to new vision for public administration
It was mentioned above that the Constitution sets various requirements dealing with the public administration and other related matters. The new legal system supports such requirements and seeks to adhere and advance to the supreme constitutional demands. Apart from the provisions dealing with the public administration, various other requirements such as principles and provisions of performance management, capacity building, municipal accountability and public participation have been included in the new system. Such provisions are aimed at fulfilling the new constitu-

30  56 of 2003.
31  See ss 195, 196, 50 and 51 of the Systems Act.
tional values set out in the founding provisions of our supreme law.\textsuperscript{32} The new dispensation aims at ensuring a more customer orientated public service with strict requirements of accountability and control. One can indeed argue that a sound foundation for a general people orientated local government system has been established, which system should not only ensure constitutional compliance but also a more brighter future for all South Africans.

\textbf{22.2.14 Adhering to the principles of municipal development, planning, performance management, capacity building and public participation}

The new legal dispensation also incorporates significant provisions relating to municipal development planning and the regulation of basic legal matters. Important aspects relating to municipal planning have been decentralized to municipal governments, and although municipal planning is a functional area of concurrent national and provincial legislative competence, all municipalities are constitutionally obligated to ensure proper and effective municipal development planning. Proper municipal planning is needed to structure and manage municipal administrations in such a way as to give priority to the basic needs of their communities. Municipalities are also obligated to promote the social and economic development of their communities and to ensure a safe and healthy environment. The Constitution specifically requires national laws to provide an overarching set of regulatory provisions to enable all municipalities to create and cater for basic planning needs. This requirement was partly met in the provisions of the Systems Act.\textsuperscript{33} Integrated Development Planning is now a core component of the new legal framework and should significantly allow municipalities to fulfil their developmental responsibilities. Municipal Integrated Development Planning should however be continuously monitored and adjusted to keep abreast with local changes and circumstances.

Since municipalities are established throughout the territory of South Africa and since they have a large impact on local communities, many general legal rules are applicable to local government administrations. Apart from a general understanding and knowledge of the different legal fields relevant to the South African legal system, various unique legal provisions are also highlighted. Such unique legal matters pertaining to local government only have been identified in national legislation and is

\textsuperscript{32} See s 1 of the Constitution read together with ch 4 and 6 of the Systems Act.
\textsuperscript{33} See ss 24-29 of the Systems Act.
directly regulated in terms of the Systems Act. As a sphere of government, local governments are faced with general legal matters on a daily basis, and as such a complete understanding and compliance with the law of the state in general is a prerequisite for municipalities to be able to perform their functions and achieve their goals.

22.2.15 Evaluating the new status and autonomy of local government institutions

One of the more distinct features of the new face of local government in South Africa is the fact that it now has a new enhanced and protected status and autonomy. All local government institutions have been confirmed as a distinct and interdependent sphere of government. Notwithstanding the constitutional confirmation of the new status and subsequent autonomy of local governments, such autonomy is not absolute and is often subjected to the oversight and control of both the national and provincial spheres of government. In light of the constitutional provisions, the autonomy of municipalities is regarded as a limited or restricted autonomy. The crux of the limitation lies in the confirmation within the Constitution itself in that municipalities are in some instances subjected to national and provincial legislation. Any encroachment on the autonomy of a local authority must be justified and permitted under the Constitution or else it would be unconstitutional and invalid. Since the Constitution itself entrenches only a limited autonomy for local government, any dispute relating to such an issue should be resolved with reference and interpretation of the overall constitutional scheme. Many aspects could have an impact in such cases, for example the Bill of Rights, the principles of co-operative government or even the requirements dealing with government finance. It is however submitted that the limited autonomy of local government should not detract from the new role local governments are to play in our new constitutional dispensation.

22.2.16 Achieving the five core objects of local government

Arguably the most important function of a local authority, seen from a local community point view, is the provision of sustainable service delivery. This core function of all municipal governments has been at the forefront of municipal development, not

---

35 Refer to s 40 of the Constitution.
36 See s 151(3) and (4) of the Constitution.
only in the South African context, but all over the world. It was explained above that the main reason for the existence of local authorities was to ensure and secure sustainable provision of certain municipal services to local communities. The most common problem facing local governments today is the lack or insufficient provision of such services. Since the provision of services is such a fundamental function of a local government, the new constitutional dispensation has specifically incorporated such a function within the new legal framework.\footnote{S 152(1)(b) of the Constitution states that one of the objects of local government is to ensure the provision of services to local communities in a sustainable manner.} The provision of municipal services however is not the only important municipal object and therefore the Constitution has identified and entrenched five core objects of the new local government dispensation.\footnote{Refer to s 152(1)(a)-(e) of the Constitution. The objects are: democratic and accountable governance, provision of services, promotion of social and economic development, promotion of a safe and healthy environment and lastly the encouragement of public participation in municipal matters.} All municipalities are obligated to strive, within their financial and administrative capacities, to achieve the five objects mentioned above. Although the new legal framework should facilitate and enhance the fulfilment of the core objects of local government, it is ultimately left to municipal governments themselves to ensure that they structure their finances and administrations in a manner that will achieve the objects. Many municipalities in South Africa are not complying with this important constitutional requirement and subsequently many are not providing sustainable services and are not achieving the lawful expectations of local communities. It is this writers submission that the new legal framework indeed fosters and ensures a legal order within which municipalities should be able to achieve their goals and objects. One should however not loose sight of the important role both national and provincial governments must play to ensure through oversight and control measures, that municipalities are indeed making positive progress in the achievement of local government objectives.

### 22.2.17 The principle of creating a local government dispensation that is developmentally orientated

Apart from the core objects of local government the new constitutional scheme also requires all municipalities to be developmentally orientated regarding their duties.\footnote{See s 153 of the Constitution.} In essence, the developmental approach of local government entails the improvement of the quality of life of all municipal communities. In order to achieve the obliga-
tion of being developmental in nature, all municipalities are obligated to do two things: (a) they must structure and manage their administrations and budgeting/planning processes in such a way as to give priority to the basic needs of their respective communities and thereby help to promote the social and economic development of such communities; (b) they must participate in national and provincial development programmes.  

In view of the new legal system for local government, which includes aspects such as co-operative government and the new internal municipal structures and procedures, it is again writers submission that the new legal dispensation indeed caters and fosters a local government system where developmental duties and objects can be realised. Success however will ultimately depend on the manner in which municipalities themselves structure and manage their institutions in order to achieve such duties at best.

22.3 Conclusion

It is writer’s overall conclusion that the new legal dispensation relevant to local government institutions of South Africa, as was created within the general constitutional framework, not only complies with the overall constitutional demands, but if correctly applied and if the envisaged support and oversight is provided, should indeed succeed in steering local government to be a more developmental and more people orientated sphere of local government. A broad and seemingly effective legal system has been created to allow and ensure that municipalities can achieve their specified constitutional duties and objects. The new dispensation not only seems to cover all necessary components of a successful legal dispensation but also provides for various mechanisms to ensure proper control and oversight. Many commentators have in the recent years suggested that both the two higher spheres of government were dragging their feet in completing the legal system for local government, and that especially national government has failed to timeously fulfil its constitutional obligations. In view of the extent and content of the new legal system and upon close evaluation of all the new laws that were enacted, one can however understand that the completion of the new system was not as elementary as many initially believed. It is this writers opinion that the new established legal system indeed signifies a monumental advancement in the creation of an effective and supported municipal government in the new South African constitutional state.
