join together again; reunite :

Submitted in partial fulfillment of the
Requirements for the degree of Master of
Architecture (Professional) in the faculty of
Engineering, Built Environment and Informa-
tion Technology
University of Pretoria
November 2010

By • **Justin James Saker**

Studio Master • **Arthur Barker**
Study Leader • **Marianne de Klerk**

Firstly, Thanks you to my creator, the God of the bible that has extended such undeserved grace to me throughout my life and more specifically throughout this year! Without Him I wouldn't have accomplished what I have, let alone even be here.

Secondly, to Marianne de Klerk, my study leader who has patiently worked with me, guiding the process. She seemed to never run out of grace for me and always lead me to believe that I could do far better than my progress suggested.

Thirdly, to Arthur Barker, who always did his best to accommodate me even though progress was slow at times. His scrupulous attention to the details of the process lead to much needed critical analysis

Fourthly, to Marius van Engelenhoven, who offered up much of his time to help me through my post grad. I couldn't possibly repay the hours he has sacrificed.

Fifthly, to uncle Leonard Giovanonni and my three older siblings, Gordon, Debrah and Vanessa who have contributed both financially and emotionally over the course of my studies. They have given much to see me through to this point.

And lastly, to my mother Anita, my sister Chélene and her husband Jonathan, to my lovely special friend, Charlene, and my extended family at Capital City Church, who have stood by me, through my ups and downs of this year. Without them this process would not have been as positive.

CONTENTS

01	Background and Context	11
02	Urban Framework, Theory and History	23
03	Site and Rationale	45
04	Block and Concept Development	63

05	Design Development	75
